A Salesman is More than a Machine

Perhaps in years to come—when efficiency reaches its highest pinnacle, and some efficiency expert finds himself sorely in need of an occupation—he may attempt to make a machine to *sell goods*. To take the money and hand out the article requested.

A salesman uses his brains and imagination to find hidden sales features in his product and suggest them to customers.

If asked for a bottle of O-Cedar Polish to brighten the furniture he would mention the splendid results O-Cedar gives when used to bring back the original gleam to a piano or auto.

Or he would tell of the ease and thoroughness with which the O-Cedar Polish Mop polishes floors and woodwork.

Little points like these, a mere machine could never aspire to, but the modern salesman uses them for making sales, friends and profits.

Range
No. E9841.

The Line That Never Fails To Increase Your Summer Sales

This is the season when women want "Universal" Electric Ranges and Grills—they make it hot for the food and cool for the cook. Women no longer heap coals of fire on their own heads by lugging kindlings and doing coal-hod calisthenics in summer.

"Universal" Grill and Range Features

Easy to operate and keep clean.
Requires little space.
Quick heat without blaze, smoke, or odor.
Four heats, 175, 300, 350, 650—WXXXS.
Cooks everything within the limits of its capacity.
Dinner for two or three persons at a very low cost.
Two cooking operations at the same time above and below the radiant grill.

Now is the time to push "Universal" Ranges and Grills. They're widely advertised, easy to sell. The housewife is instantly interested when she is shown the "Universal" tradesmark.

Hatch Garage Door Outfits

Canada Will Possess a Total of 500,000 Autos In 1920: Every Automobile Must be Housed

Records show that the number of automobiles in Canada has doubled about every two years. There is every indication that this will continue for some years. Your market for Garage Hardware is assured. Hatch Garage Door Outfits are sensible, practical and made with exacting care.

They are exceptionally easy to apply and full directions are packed with each set. Slamming and sagging of the doors is impossible and snow and ice cannot interfere with their working easily and reliably.

The Hatch is easy to sell and profitable.

The Sets Includes :

3—*Special Swivel Door Rollers, 22 Feet of Track,* 3—*Pairs Special Garage Door Hinges.* 3—*Stay Rollers (Floor Guides).* 2—*Extra Heavy Garage Door Handles.* 1—*Safety Hasp (For Fastening Doors Outside).* I—*Hook and Eye (For Hooking Back Swinging Section Inside).*

The track comes in separate Bundles—2 eighty-foot, and 1 six-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

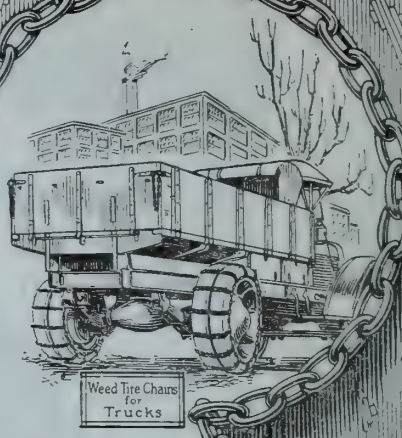
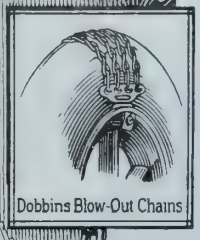
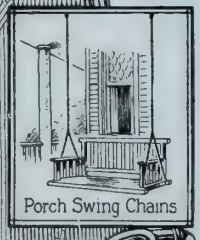
D·C·C
TRADE MARK

THE HONOR OF THE "DCCO" FAMILY







Weed Chain for Motor Cars!
Anchor Chains for Ships!
Chains for Railroads!

Devices that make travel safe on land and sea, that can be absolutely depended upon to protect human life, are typical of the nature and quality of "Dcco" products.

The workers who make up the "Dcco" family know they are doing more than making commodities merely to be sold.

They know that it is their work that holds millions of motor cars and trucks to slippery roads.

It is their work which enables mighty ships to ride safely at anchor, whether in harbor or helpless on a lee shore.

It is their work which makes possible the safe operation of thousands of railroad trains.

This gives the work of the "Dcco" family honorable and distinctive responsibility which is reflected in every link of every "Dcco" product—"From Plumbers' Safety Chain to Ships' Anchor Chain."

In the "Dcco" family, loyalty to the work itself is rated above everything.

The honor of the "Dcco" family is in the hands of each member of it, even to the youngest worker.

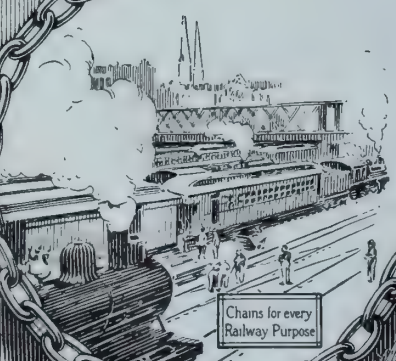
These are the reasons why it is possible to say not only that "Every Weed is Guaranteed" but that every link in every chain made by the Dominion Chain Company will hold for the purpose intended.

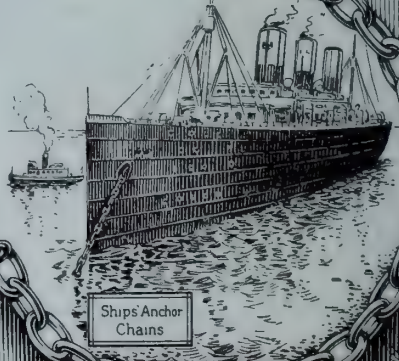
The big "Dcco" Line includes chains for every purpose---from Plumbers' Safety Chain to Ships' Anchor Chain---all Styles, Sizes and Finishes.

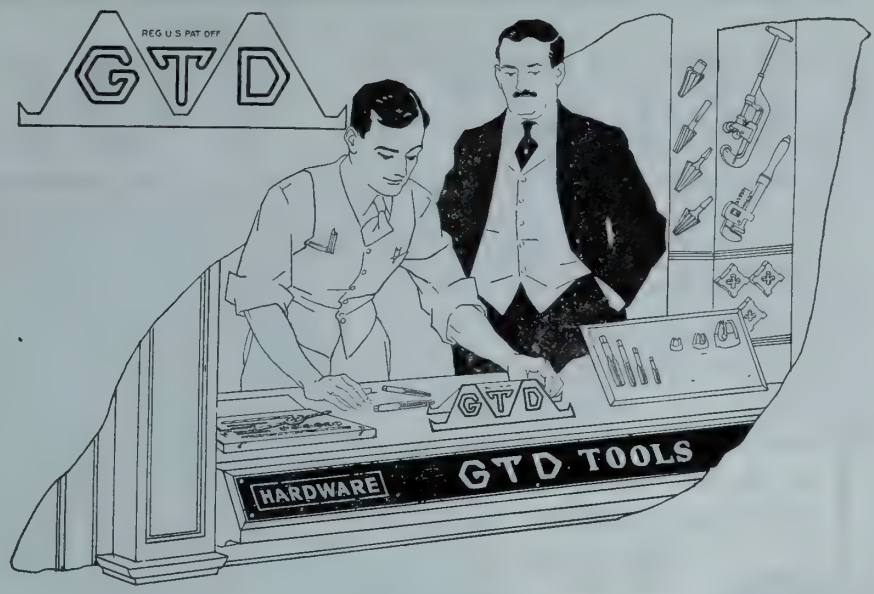
DOMINION CHAIN COMPANY

LIMITED

Niagara Falls, Ontario, Canada







Is Your's a Store—or a Business?

WE ALL remember the back country store with the local wiseacres gathering round the stove and settling the nation's affairs—"By Heck!"

Some of our country's finest men started in such surroundings but *they didn't stay there.*

They weren't content to be doing business at the same old rate year after year.

How many hardware dealers are content to conduct their trade on the principle of stocking a minimum quantity of as many lines as possible and then saying, "Now—when they phone or drop in I've got the goods."

The idea worked fairly well once, but nowadays such a dealer will find that his customers may forget to phone or drop in and "buy." A little investigation will show that some energetic competing dealer has sent out an informed salesman with a standard line of goods and he *makes* orders, instead of *takes* orders.

Mr. Wideawake is breaking tradition by "seeking" trade and is building up a business by linking himself up with a product such as the GTD line of screw threading tools with its backing of 47 years' experience, and his establishment is becoming known as the GTD Tool Supply House.

The GTD "*Gun*" Tap and "*Acorn*" Die are specialties which once introduced will establish further GTD connection.

Story for Week Dated July 10, 1920. *HULL IN 1851* *Being No. 13 in the Serie*

What Has A Diving Board To Do With Match-Making?

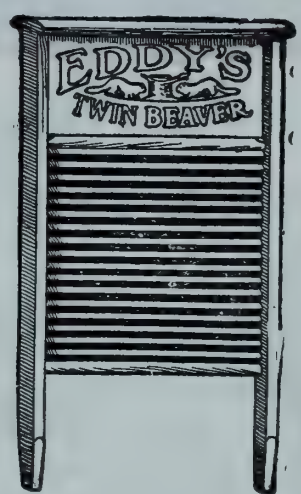
IN MAKING matches, just as in making history, there is interest in the way things used to be done. That's where the diving board comes in in match-making.

In the early 50's when the Eddy plant was founded, it was a dangerous business to mix the inflammable phosphorus and other explosive ingredients for match heads. To attempt to stir them together like paint with a paddle would mean an explosion and fire. So in the old days at the Eddy plant there might be seen the curious process used to reduce the risk.

The mixing of the materials for match heads was done in covering tubs by the simple expedient of putting the tub on the end of a spring-board just like a diving board, and "jumping" the board steadily for a while. Even then there was danger in opening the tubs, and they had to be opened under water. But that old process has long ago been done away with at the Eddy plant. Other mixing processes were invented and used; but always with the white or yellow phosphorus there was not only risk of fire, but danger to the health of the employees. This the Eddy Company determined to stop.

So, in spite of its much greater cost, they imported "Sesqui" for match heads, and were using this safe non-poisonous match-head long before the Dominion Government made its use legally compulsory. This indicates the care taken by the Eddy Company of their employees' health, a point which makes for excellence in all Eddy Co. products. The only peculiarity about Sesqui is that it has to be worked in pure washed air of a certain temperature, and that, as you have read previously in this series, is found to perfection in the great modern Eddy plant at Hull.

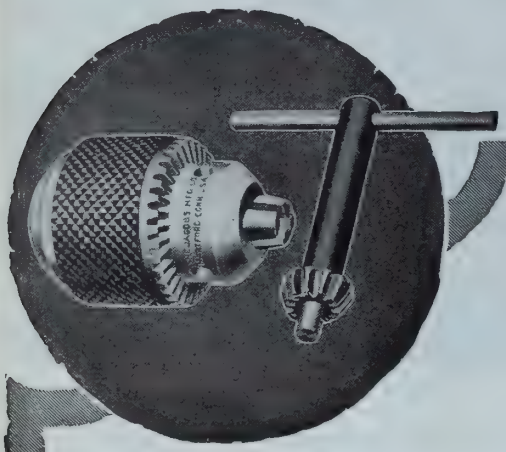
A Quick Turnover, Good Profit and Small Investment



Eddy's matches have become so well known to the hardware trade for their successful selling qualities that they are closely associated, in the minds of hardwaremen, with the qualities of quick turnover and good profit.

If interested, tear out this page and keep with letters to be answered.

JACOBS CHUCKS



The Line Of Least Resistence

It's the line of Jacobs Chucks when it comes to selling. Their firm grip, accuracy and ease of adjustment have made them the choice of the man behind the drill.

And because of this preference, Jacobs Chucks have been selected as standard equipment by foremost manufacturers of portable drills.

That's why Canadian Hardware Dealers handling mill supplies have found Jacobs Chucks a most profitable line.

Your cue: Carry a full line of Jacobs Chucks. You owe it to your customers—and to yourself.

The water swirls through the clothes in a figure 8 movement four times as often as in the ordinary washer.

This Little Chap Brings Business to Dealers

You find him attracting folks' attention to the 1900 Cataract Electric Washing Machine advertisements in every worth-while publication in Canada.

In a clever and direct way he explains the figure 8 motions which is the exclusive and dominating feature of the "1900 Cataract Washer."

He tells how and why the "figure eight" movement makes the 1900 Cataract Washer superior to all other washing machines, by washing clothes faster and cleaner without rubbing.

The swinging reversible wringer, that swings from washer to rinse water — to blueing water — and then to clothes basket is another among many good selling points that won for the 1900 Cataract Washer the title of "The Perfect Washer."

The splendid selling points, plus the extensive advertising of 1900 Cataract Washers, need but little effort on the dealer's part to make quick sales at a goodly profit.

We have an attractive proposition to offer dealers who wish to cash in on the steadily increasing demand for electric washers.

Write to-day and investigate the famous line of Electric Washing Machines.

Our line is complete — Electric Motor, Engine Power and Hand Washers.

Nineteen Hundred Washer Company

357 Yonge Street, Toronto

A Fitting Answer to the Collar Pad Question

Farmers realize the necessity of a reliable, dependable Collar Pad to protect horses' shoulders.

If any question arises as to the kind of Pad which will give greatest satisfaction, the answer, satisfactory and complete, may be given by the Dealer who handles

TAPATCO REGISTERED TRADE MARK **BRAND COLLAR PADS**

Every part is designed to give extra wear. The patented Stapling Device (Patented in U.S., December 1, 1914—Patented in Canada, April 6, 1915), is one of many superior features.

A wire staple reinforced by felt washer, firmly grips hook to body of Pad, so that it remains secure even when the fabric itself has become weakened by sweat and long use. This feature combined with a soft, flexible, cushion-like and absorbent pad, insures 100% satisfaction.

JAMES SMART PLANT

BROCKVILLE, CANADA

"That's the Brace for Me"

says your customer. "It's a Millers Falls. I have one of their hand drills that I've used for over ten years and it's a real satisfaction. Their tools are made right."

Put a Millers Falls tool in your customer's hands. Let him look at it, handle it, get its "feel" and perfect balance. It will be your strongest sales talk.

This inner goodness of Millers Falls tools, their strength, sureness, ease of operation, make them reliable friends of skilled workmen or amateurs. And thousands of skilled workmen and amateurs are being told about Millers Falls tools through a campaign of national advertising appearing every four weeks in the Saturday Evening Post and other publications.

You should get the full benefit of this advertising by handling the full Millers Falls line. Confidence in the tools you sell means confidence in your store—steady customers.

Whether hack saws, braces, hand and breast drills, auger bits, mitre boxes, vises, in and out screw drivers, or any others of our line, you will find that Millers Falls tools make lasting friends for you.

Send for our helpful little handbook "How to Sell Tools"

"That's the brace for me!"

Insert shows ½-page advertisement from the June 26th SATURDAY EVENING POST

Millers Falls Breast Drill, No. 97. "The Mechanic's Favorite" (shown here) is the most complete breast drill on the market. A great time-saver. Five different and distinct actions. Can be used in the most inaccessible places. Its ball thrust bearings give it easy operation and long life. It won't get out of order.

Jobs you can do —yourself

IT is the odd jobs that have to be done around the house and on your car that help run up the cost of living.

Simple jobs, such as putting a horn on your car, are easy if you have the proper tools.

You don't have to be a mechanical genius to drive a nail with a hammer, but you do have to have the nail and the hammer. You can drill holes in wood or metal if you have a drill—otherwise, you have to hire someone who has a drill.

The present-day cost of a single job requiring *only* the use of a certain tool, and a man's time, is often more than enough to cover the purchase price of that tool

Think of "jobs" in terms of the tools required to do them and you will quickly see the common sense of acquiring tools instead of hiring skilled labor to do simple jobs.

Any mechanic, carpenter or hardware man will recommend "Millers Falls" every time when asked about braces, auger bits, hand and breast drills, mitre boxes, hack saws and other boring and cutting tools For fifty years Millers Falls Tools have held the highest esteem of users and sellers of fine tools.

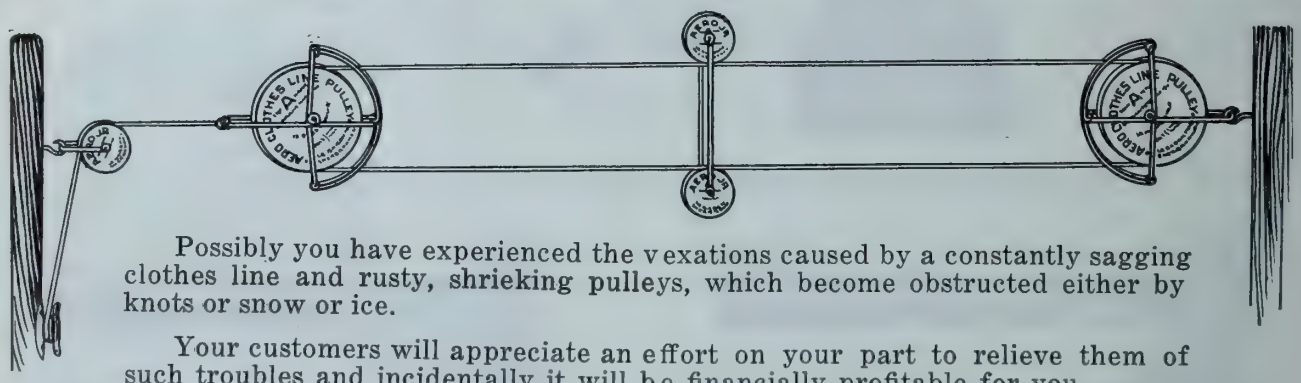
DAVIDSON'S PREMIER MADE IN CANADA THE SEAL OF DURABILITY

DAVIDSON



Possibly you have experienced the vexations caused by a constantly sagging clothes line and rusty, shrieking pulleys, which become obstructed either by knots or snow or ice.

Your customers will appreciate an effort on your part to relieve them of such troubles and incidentally it will be financially profitable for you.

AERO Clothes Line Pulleys manufactured of waterproofed hardwood are 6 inches diameter, with deep V-shaped groove, giving perfect friction to varying diameters of line, are self-lubricating, rustless, knot-passing and will run noiselessly under all weather conditions, and are guaranteed for ten years, if oiled annually.

The **Aero** method of installation as per above cut is a departure from common practice, but a glance at it will convince you of its practicability in securing a taut clothes line at all times without splicing the line itself. If desired, the line and pulleys may be taken in after use.

The Aero Line Support prevents sagging in the center when carrying heavy loads.

Your jobber probably has these in stock. If not, communicate with us direct or with our Western Agents—H. L. Perry Co., Ltd., Winnipeg, Man.

JENKINS
Brass Globe Valve
Standard Pattern

For the past 56 years Jenkins Bros. have striven to produce Valves for every condition of usage that would set the standard for Quality and Service.

The following guarantee which accompanies every genuine Jenkins Valve is a clear indication that this superior standard has been attained

> "If you will put a Jenkins Valve on the worst place you can find where you cannot keep other valves tight and if it is not perfectly tight or does not hold steam, oils, acids, water or other fluids longer than any other valve you may return it and your money will be refunded."

This guarantee is the dealer's assurance of a satisfied valve customer. Are you prepared to meet the increasing demand for Jenkins Valves?

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue

Teaching Boys to Buy Good Tools

MANUAL training courses in our schools are teaching boys and young men how to do good work with tools.

These boys, as a result, are coming to appreciate good tools more than ever. They make up a class of tool-buyers that it is distinctly worth while to cultivate.

We are telling these young amateur carpenters and wood-workers about the quality of Disston Saws and Tools.

To do this, we are using the magazines to which they look for information on mechanical subjects—"Popular Mechanics," "Popular Science Monthly," "Scientific American," and "Industrial Arts," etc.

We send the Disston message to more than three-quarters of a million readers of magazines of this kind. The exact number of subscribers is 781,067.

These boys constitute by no means a small market for sales of quality saws and tools.

Telling this market the story of Disston Saws and Tools is another instance of our thorough cultivation of all classes of buyers to increase public demand for high-grade saws and tools.

Next month we will tell you how we reach another class of tool-buyers—the "handy man around the house."

Disston Saws and Tools are constantly advertised in magazines and agricultural publications with a total circulation of 8,497,003 copies each issue.

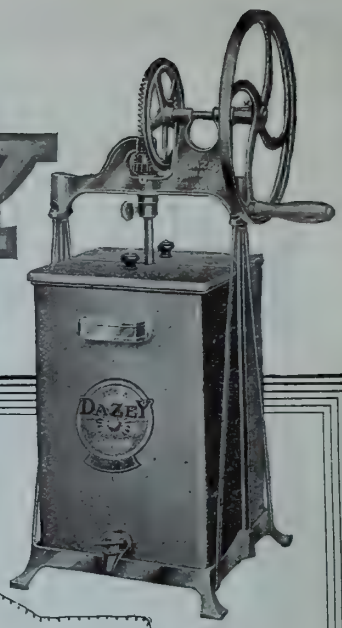
DAZEY CHURNS



Value Convincing Features

The DAZEY incorporates those essential features of a perfect butter-maker—those that are becoming more universally demanded every day.

Apologies are never necessary—but *facts* always.

There is REAL satisfaction in pointing out—

—the *dasher* which produces such powerful agitation that butter is made in 3 to 8 minutes—

—the all-metal *receptacle* which assures perfect sanitation—

—that in *cleaning* receptacle only has to be handled, and how convenient this is—

—then, too, that the DAZEY is substantially built of steel and iron which will last for years.

It is this combination of vital details of construction which goes to make up the DAZEY that appeals to the butter-makers, and that will sell a DAZEY to his neighbor.

National conversion to the "DAZEY SYSTEM" of making better butter means that enterprising dealers are profiting by the demand.

We are anxious to tell you more about the DAZEY and ask that you send for new catalogue showing Glass churns, 1 to 4 quart sizes, and Metal churns 1 to 28 gallon capacities, for hand and power.

Discussion re Automobile Repairs Act

Measure Passed by Saskatchewan Government Being Contested by R.M.A. and Dealers—Motorization of the West Hampered by Difficulty in Getting Parts, But Act Framed Along Same Line as Farm Implement Act Will Not Remedy the Trouble

THE passing of "A Bill Respecting Automobile Repairs" has caused great confusion in the Province of Saskatchewan insofar as dealers in accessories, repair parts and holders of automobile agencies are concerned. The original draft of the Bill provided that the manufacturers were to provide the required service stations in the Province, but during the debate on the first reading the word "manufacturer" was replaced by the word "vendor," which changed the aspect of the bill very materially and has been the cause of great dissatisfaction among automobile dealers in the Province.

Since automobiles have come into more general use in Western Canada the greatest drawback to their use has been the difficulty of obtaining repairs at times when such were urgently required. The Province is located a great distance from the centres where parts and accessories are manufactured and this condition has only aggravated the situation. Owners of light cars of certain makes were assisted to some degree by the opening of service stations by manufacturers, to supplement the regular channels of this trade, but owners of large cars were benefited very little. The Act which has now been placed on the Statutes is framed along similar lines to the Farm Implement Act, which requires manufacturers to keep in a designated place in the Province, all necessary parts and repairs. There are, however, several reasons why this Act, while applicable to the farm implement trade, is a great handicap to business as far as the automobile trade in the Province is concerned.

Saskatchewan R. M. A. Takes the Matter Up

The Saskatchewan branch of the Retail Merchants' Association went into the matter on behalf of the dealers, but before any action could be taken the Bill was put through the House. A meeting of dealers was then called and representations were made to the Government. E. T. Wilband, of Regina, presented the case on behalf of the automobile dealers, pointing out that dealers were operating on a one-year contract subject to five days' convellation notice. This meant that no dealer knew how long he would be in possession of the agency and if he were deprived of it the day after he had disposed of a car sold under that agency contract, the effect of the Act would be that he would be compelled to carry repairs for such car for a period of five years after his contract had ceased to exist.

Private Individuals Would Have to Supply Parts

The definition given in the Act for the term "vendor" was also dealt with. Under the definition, any private individual wishing to dispose of his car would be subject to a demand for repairs at any time within the five-year term in the same way as a regular agent. It is evident that such a ruling is impracticable.

The Act provides also that lists of parts and repairs shall be filed with the Government on or before February 1 each year. It is contended by dealers in the Province that at the present time, when prices are changing with such frequency, that supplementary lists would have to be filed often and new prices could not be charged until this had been done. This provision, it is contended, will mean a great deal of extra work for the dealer and the Government.

No Limit on Prices Which Could Be Charged

The Act places no limit on the prices which may be charged, the only stipulation being that the prices charged must not exceed the listed prices. On a rising market it is pointed out that in order to protect himself from loss, it would be necessary for the dealer to list his prices considerably higher than he would expect to obtain. This would lessen the value of the Act to a great extent.

The fact that failure on the dealer's

IMPORTANT NOTICE TO AUTO ACCESSORY DEALERS

Hardware dealers who sell automobile accessories are reminded that the Anti-Glare Headlight Law as passed by the Ontario Government at the last session of the Legislature will become effective on July 18. That date will be sixty days from the prorogation of the last session and will be the day set for the Act to become effective. After that date every motor vehicle in Ontario will be compelled to comply with the law which requires that every motor vehicle will have its headlights equipped with anti-glare lenses or devices approved by the Department of Highways and to have them correctly adjusted so as to eliminate glare.

In the May 15 issue of Hardware and Metal an illustrated article appeared showing that headlights though equipped with anti-glare devices will not comply with the law unless properly adjusted and focussed. The responsibility will therefore be on the motorist to see that his lamps are properly adjusted. The hardware dealer who sells the lenses or other devices can help and protect his customer by giving some information as to how to test the headlights, as outlined in the article mentioned.

part to obtain repairs within a reasonable time would render him liable for damages was also pointed out as a difficulty.

The Act does not come into force until May 1 next and lists will therefore be filed by February 1 of next and subsequent years. In the meantime dealers in the Province are giving careful study to the provisions of the Act and a further opportunity will be given for placing their recommendations before the Government. For the time being, it will be possible to overcome the requirements of the Act by stamping across the face of any contract for the sale of cars a statement to the effect that the provisions of the Act are waived, thus making it of no effect insofar as those particular sales are concerned. This is, of course, necessary in the case of private individuals selling cars, as well.

Members of Committee

The members of the committee who waited upon the Government were: S. D. McMicken, of Moose Jaw, provincial president of the R. M. A.; F. E. Raymond, of Saskatoon, provincial secretary; H. E. Lamm, of Swift Current; J. B. Smith, of Assiniboia; T. H. Masterson, of Regina; W. G. Parsons, of Regina; S. Strickland, of Milestone; W. J. Ward, of Saskatoon; E. T. Wilband, of Regina; Clem Alexander, of Moose Jaw; J. O. Oles and Robert Weir, of Regina; J. C. Nichol, of Radisson; W. P. Ball, of Assiniboia; S. E. Fawcett, of Saskatoon; G. W. Stockton, of Carlyle; A. E. Tutte, of Kerrobert; D. S. Saunders, of Assiniboia; G. W. Anderson, of Regina, and W. L. McQuarrie, of Saskatoon.

A Well Illustrated Accessory Ad.

Accessory Advertising on Large Scale

T. McAVITY & SONS, Ltd., St. John, N.B., are going after the automobile accessory business in a very active manner. Large advertising spaces are used in the local papers every day, and quite often a full-page illustrated advertisement, such as is reproduced herewith, will show to the public some of the lines the McAvity firm sell. Their windows, too, are never without an automobile accessory display, which is changed every few days, so that the passers-by can see all the latest equipment suitable for their cars. This firm has handled accessories for about four years, and it is now one of their staple lines. To look back to the time when McAvity's first started to sell automobile accessories, and compare the stock of that time with the stock of the present time, is all one need do to judge whether their venture is a success or a failure. The new lines which are being added from time to time go to show that this firm is doing all in its power to give the motoring public the advantage of a complete line. Their slogan iss "You can get it at McAvity's."

Provisions of the Act

The provisions of the Act in question are outlined as follows:

CHAPTER 86, STATUTES OF SASKATCHEWAN, 1919-20.

An Act Respecting Automobile Repairs
(Assented to February 4, 1920.)

His Majesty, by and with the advice and consent of the Legislative Assembly of Saskatchewan, enacts as follows:—

Short Title

1. This Act may be cited as "The Automobile Repairs Act, 1920."

Interpretation

2. In this Act, unless the context otherwise requires, the expression "Vendor" means any person, firm, company or association selling or offering for sale automobiles on hih or its own account.

Vendors to File List

3. All vendors shall file with the Provincial Secretary on or before the first day of February in each year a list of the automobiles which they have for sale, with the

Dealers' Suggestions to Summer Tourists

THE summer motor touring season is now here and during summer vacation period many owners of motor cars will visit favorite fishing haunts in out-of-the-way sections of the country, and others will make up touring parties to explore new parts. There are many of these classes of motor owners to be found in every community and the hardware dealer can secure much business in accessories from advising such motor car owners that he is in a position to outfit them completely for their trip, insofar as accessories are concerned. Also, if it happens to be one of the first tours the motorist has attempted, the hardware dealer can make good connections by handing out suggestions, based on experience, which will make the tour much more comfortable for the uninitiated. Such suggestions might be along the following lines:

As a general rule, for comfort wear loose clothes, and for economy wear old clothes, also when you go motor car camping use woollen wear as a protection against cold, but do not wear the woollen garment next to the skin. Wear cotton or linen garments under the woollen ones. Army woollen shirts, loose at the neck, are excellent for men and women. Everyone should have a sweater along and some kind of a waterproof overgarment. Khaki, olive drab and gray shades are most serviceable in all garments. Around camp use camp moccasins or light shoes—slippers are taboo. Use boots or shoes with leggins, but do not take new shoes along, only the worn and comfortable ones. Footwear should have heavy soles and hosiery should be of wool and heavy.

A cap with visor or a medium brimmed hat is recommended. If one outfits specially for a motor camping tour a corduroy suit or a golfing jacket with breeches are very comfortable, or in the warm months a khaki or olive drab worsted suit. Breeches and a three-quarter length coat are very practical for women. As nights are cold in high altitudes, warm clothing is essential in such regions.

For working round the car and camp, a pair of overalls will be appreciated by the men, and the women will find an enveloping apron more than useful. A one-piece sleeping suit of cotton flannel with detachable hood and feet is very comfortable, and in cold weather a woollen one-piece sleeping suit of light material, with head-piece attached or with a detached sleeping cap. To those who do not count the cost, a leather coat, short or long, according to taste, or a leather vest, may be recommended.

Amber goggles or large glasses with amber lenses will be found almost a necessity when travelling in some regions where the light is high and glaring. Mosquito veiling will be frequently found a great comfort. Each person of a camping party should be confined to one suitcase. All extra clothing should go into duffle bags.

prices at which they are sold, both for cash and on credit, and showing also in the latter case the usual length and terms of credit and the rate of interest charged.

Vendors to File List of Repairs

4. (1) Such vendors shall also file with the Provincial Secretary annually on or before the said date, a list of all repairs required for the automobiles sold by them, stating the cash selling price thereof and the places in Saskatchewan where the same may be purchased. (2) It shall be unnecessary to include in such list standard bolts and nuts or straps or other iron or wooden parts usually made by blacksmiths or carpenters.

Supplementary Lists

5. In the event of any charges from time to time in matters mentioned in the lists referred to in the two preceding sections, the vendors shall within 30 days of making such change, file a supplementary list or lists, as the case may be, with the Provincial Secretary, corrected to date.

Penalty for Neglecting to File List

6. Any vendor neglecting to file a list, as and when hereinbefore required to do so, shall be guilty of an offence and liable on summary conviction to a penalty not exceeding $5.00 for every day the default continues.

Sale Price Not to Exceed List Price

7. No repair shall be sold at a higher price for cash than the price stated in the list so filed as required by Section 4, or Section 5, as the case may be, and any person charging a higher price for cash for any repair than the price so stated shall be guilty of an offence and liable on summary conviction to a fine of $25.00.

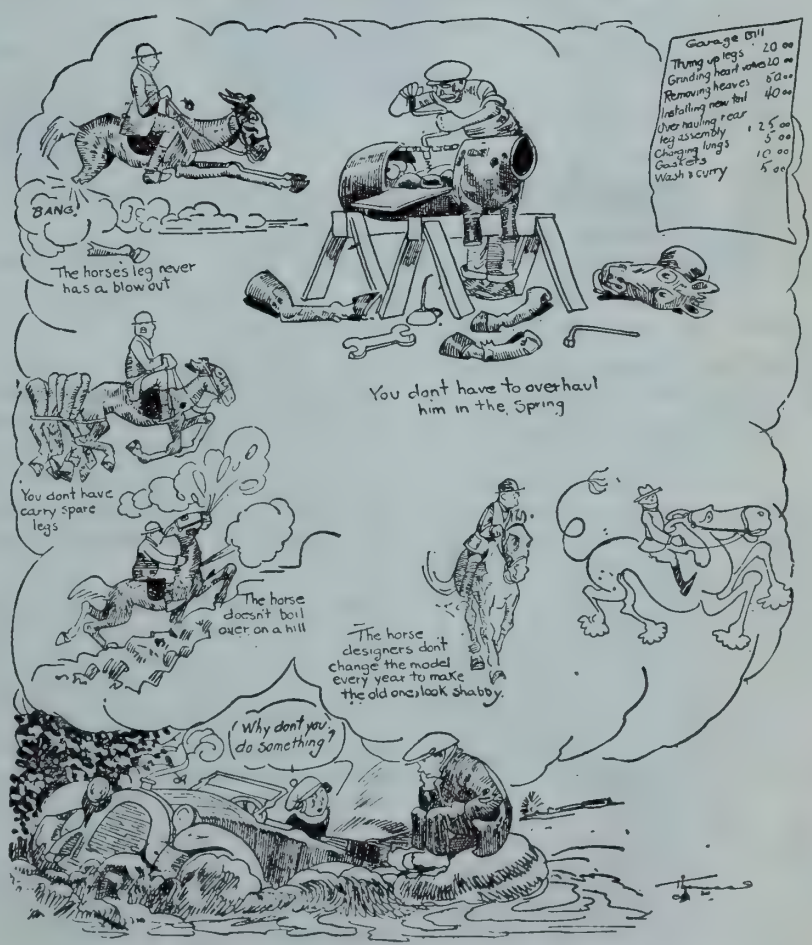
Warranty

8. Every vendor who sells an automobile within Saskatchewan shall be responsible to the purchaser as upon a warranty that all necessary repairs for the automobile sold by him, other than standard bolts and nuts or straps or other iron or wooden parts usually made by blacksmiths or carpenters, will for a period of five years from the date of sale be kept at a place within Saskatchewan to be named in the contract, and that at said place the purchaser will be able to obtain them within a reasonable time.

Coming Into Force

9. This Act shall come into force on the first day of May, 1920.

When a Motorist Loves a Horse



(Courtesy Detroit Motor News.)

Retailers Must Buy Tax Stamp Punches

Stamps Ready by August 10th and Government Will Provide Punches at Cost to Retailers to Deface Used Stamps—Refund of Taxes Go with Goods Returned by Customer—Retailer Makes Adjustment on Next Remittance.

LATEST advices to Hardware and and Metal are that collection of the new taxes by means of revenue stamps will not go into effect until August 10, but until then retailers must make remittances to the nearest Inland Revenue office. The decision of the Inland Revenue Department to begin the stamp collection on August 10 is said to be final.

Stamps have already been printed of denominations from one cent to 10 cents, of 13, 15, 20, 25, 30 cents, and every multiple of 10 cents up to $1, and for $1, $2, $3, $4, $5 and $10. The stamps, however, have not been printed in quantity sufficient to supply all of Canada, but by August 1 enough will have been printed to guard against a shortage.

Differently Colored

The stamps are of different colors so that clerks can distinguish them quickly and there are so many denominations that it is possible to affix the exact amount of the tax in the majority of cases with either one or two stamps. There are a few exceptional cases where three stamps would be needed. The stamps of higher value would be useful in the case of stock transfers and the selling of expensive articles.

The stamps are uniform in design, bearing the bust of His Majesty, with the words "inland revenue" inserted above the head and the words "excise tax" down below, while the denomination of the stamp is shown on either side.

Must Punch Stamps

After considering all methods of cancellation, including various kinds of indelible pencils, it has been decided that the only satisfactory method will be by means of a punch. This will be supplied by the department at cost to all merchants and every stamp will have to be cancelled by means of it after being affixed to an invoice or sales receipt. The exact type of the punch has not yet been determined.

Refund of Taxes

While no refund of taxes collected under the original resolution and discontinued under the final resolution is allowed, some dealers have interpreted this to mean that no refund of taxes collected is allowed in any case. This is erroneous, however, for in the case of goods purchased being returned to a store for a refund, the total amount paid, including the tax, is to be refunded to the customer. The dealer adjusts the matter by taking the amount out of his next remittance of taxes to the Government, and shows a copy of credit slip for the amount as evidence of his having refunded the amount of the tax.

Resume Hearings of Combines Cases

Reorganized Board of Commerce Will Continue Hearings Already Under Way, But Will Not Commence Any New Cases Until Their Authority is Established

OTTAWA.—The new commissioners of the Board of Commerce held their first meeting this week to discuss future operations. It was decided, in view of the questions raised as to their jurisdiction to function under Part II of the Combines and Fair Prices Act, 1919, which deals particularly with hoarding and taking unfair profits on the sale of necessaries of life, not to institute of their own motion any new investigations with respect to these matters but to continue the enquiries already under way. This course was adopted so that valuable time may not be lost between now and the determination of jurisdiction by the Privy Council in preparation for public hearings.

The above statement, it is emphasized, is not to be understood to mean that if complaints of profiteering in necessaries of life be at any time received by the board, from any part of Canada, they will not be investigated. The Board of Commerce will take the usual steps to deal with these complaints, as the board takes the stand, notwithstanding the recent submission of its stated case to the Supreme Court of Canada now in appeal to the Privy Council, that it has jurisdiction to operate under the profit control sections of the Combines and Fair Prices Act, and it will deal with persons found guilty of such infractions of the act.

The Board of Commerce, the commissioners state, has unquestioned jurisdiction concerning the investigation and restraint of combines, monopolies, trusts and mergers which constitute Part I of the Combines and Fair Prices Act, 1919, and it is proposed to proceed with the hearing and determination of certain alleged combines cases, trial of which had to be postponed in April owing to the disorganization of the late board.

The first statement issued by the newly-constituted board, containing the above information, is signed by W. White, Chief Commissioner; F. A. Acland, and G. A. Dillon, commissioners.

Allege Combine Among U. S. Hardware Jobbers

In view of the recent ruling of the Board of Commerce that certain combinations of wholesale dealers working together for their mutual benefit were, with few exceptions, within legal rights, it is interesting to note that the Federal Trade Commission in the United States has tackled the Southern Hardware Jobbers' Association with a notice to come forward within forty days to answer the charge that the members of the association have confederated together to prevent certain retail dealers' co-operative purchasing companies from obtaining supplies of hardware from the manufacturers thereof.

"The Commission's complaint sets out that certain retail hardware dealers of Georgia and adjacent states organized a co-operative purchasing company for the purpose of purchasing in wholesale quantities hardware supplies dealt in by such co-operating retailers.

"Respondents are to answer averments that they have confederated together to prevent the retail dealers' co-operative purchasing company from obtaining supplies of manufacturers and other sources from which purchasers of hardware in wholesale quantities must obtain supplies; that manufacturers have been caused to refuse to sell to this co-operative purchasing company. The Commission was informed that manufacturers were notified that they would lose the patronage of the members of the Wholesalers' Association if sales were made to the co-operative company."

Will be Competition in World's Steel Market

In circles where the export business in steel is known the general belief is that Great Britain will not be the only competitor of the steel producers of America in the world's steel market.

Belgium, which heretofore exported 60 per cent. of her steel production, is now operating at 80 per cent of capacity and is exporting a large percentage of this output, and Germany is expected to become an important exporter of steel soon, as it can even now produce in excess of its domestic consumption. The same is said to apply to France.

The Japanese buyers are cancelling contracts and the outlook in the Far East is not reassuring. Another point which is made in connection with the prospects of steel exports is the fact that a number of heretofore importing countries are gradually getting into a position to take care of their own domestic needs. Australia, for instance, now is known to have sufficient rail capacity to meet her entire requirements. India is rapidly entering the same category.

Hints on Seasonable Advertising

The reproduction of some sample advertisements herewith will give some idea of the lines being advertised by others in the trade in all parts of Canada, and will impart some ideas or suggestions which others may incorporate in their local advertising.

Hammocks For Porches and Summer Resorts

"FRESH AIR HASN'T ADVANCED IN PRICE." Use lots of it. Get into one of our good hammocks and drink it in," says an ad. by Harrison's Hardware, Port Colborne, Ont. "We have a beautiful assortment on hand now which you want to see before you purchase."

Hammocks are a seasonable line now when porches are being made use of and the summer resorts are opening up. Inject a little life into the advertisements of summer lines and the results will surprise you.

"TO MEN ONLY.—You no longer cut your grain with the sickle or your hay with a scythe. But your women folk, if they are doing your washing on the Wash Board, are doing pretty much the same as the women did when the Pharaoh ruled in Egypt. You could no longer go back to the crude implements of those days than you could get along without electricity or railways. For one-quarter of the cost of a binder which is used but a few days and left idle for a year—for a fraction of the cost of a typewriter or adding machine you could equip your kitchen and laundry with modern implements."

Screens For Fly Time

Screen doors are made the subject of an advertisement by James S. Neill & Sons, Ltd., Fredericton, N.B.

"Get Ready For Fly Time," says the ad. "Now is the time to buy your window screens and screen doors. We have a large stock in all standard sizes. Call and see the ——— screen door. No trouble to put on or take off. Can be put in place in a second and removed just as quickly."

* * * *

Get Early Start Against Fly Pest

Another type of ad. on screens is by W. H. Thorne & Co., Ltd., St. John, N.B. It reads: "KEEP THE FLY OUTSIDE." "How? With fly screen, wire doors and wire netting. Now, while it is early, is the time to start your fight against the fly pest which has been responsible for the spread of so many and deadly diseases. We have a large stock of the better kind of fly screens and wire doors at the following prices."

* * * *

Washing Machines for Up-To-Date Kitchen and Laundry

A washing machine ad. by F. P. Turner, Port Colborne, Ont., creates some interest by its unusual tone. It reads: "We have all of these helps and as merchants we don't want them to remain idle in our store, we want them to work for you in your home. We ask you to appropriate a small sum for the better kitchen and laundry."

* * * *

Prize of a Bicycle for Examinations

A plan of offering a bicycle to boys and girls successful in the summer examinations is followed out by Gerry's Hardware, Fort William, Ont. It reads: "A PRIZE is a big inducement to hard work. The summer exams. will soon be on and boys and girls decide whether they will pass or stay in the old class for another term. How about offering that boy or girl a prize, say one of our—— bicycles, as an inducement to good hard work for the next few weeks and the exam. It means more to the children, to you, and everything you can do will be appreciated in the years to come."

* * * *

Save Amount of Income Tax

"WHY WORRY ABOUT YOUR INCOME TAX RETURN?" says an ad. by G. R. McLean, Waskada, Man.,

EDITORIAL COMMENT

DEALERS SHOULD BE CONVERSANT WITH ANTI-GLARE HEADLIGHT LAW

THE Ontario Anti-Glare Headlight Law will become effective on July 18th, and after that date every motor vehicle in the province must be equipped with lenses or other devices to prevent glare from the headlights. Hardware dealers who sell accessories can use this information to good account in notifying their customers as to the requirements of the law. The enforcement of the Act, following years of prolonged discussion, is as important a piece of legislation as has ever been put on the Ontario Statutes, insofar as motor vehicles are concerned.

It is important for the dealer to be fully conversant with the requirements of the Act so that he can inform his customers intelligently. He should point out to his customers that it is not alone necessary to purchase a set of headlight lenses or other devices and put them on his car, because manufacturers of the best devices require that the headlights and bulbs be correctly adjusted in order to secure best results from the use of their lenses. A lens applied upside down will intensify glare and a bulb not correctly adjusted to the correct focal point in front of the reflector will greatly impair the illumination of the headlight. On such points as these the dealer should be posted.

There are approximately 145,000 motor vehicles in the Province of Ontario, so it is evident there is much business to be secured in the sale of anti-glare devices. The dealer who is fully conversant with the requirements and can advise customers is the one who will get the big end of this business. The requirements and methods of testing headlights was fully outlined in May 15 issue of Hardware and Metal.

RETAILERS DO THE WORK—M.P.'S GET THE PROFITS

THE plan for the collection of taxes under the new resolutions is now taking more definite shape as certain difficulties surrounding the adoption of any such radical measure are gradually being overcome. By August 10th it is hoped to have the stamps ready for distribution to the trade throughout Canada, and this step will be a vast improvement over the ponderous method now in vogue whereby triplicates of each sale must be submitted. Stamps in various denominations have been prepared and it is learned that they are in such denominations that not more than three, and more often only one or two stamps, will be required to be affixed to cover the price of any merchandise. They are in different colors so that the various denominations may readily be identified.

An announcement which has brought forth some caustic comment from certain retailers is that to the effect that the Government will provide "at cost" punches for the defacement of used stamps. Some hardware merchants have expressed the opinion to Hardware and Metal that forcing them to become Government tax collectors without remuneration is quite sufficient without compelling them to purchase, even "at cost" punches for the defacement of the Government's stamps. Some are of the opinion that this action is particularly galling in view of the action of members of Parliament in increasing their own indemnities, such action possibly being considered equitable in view of the success of the new taxation measure. It rather makes it look as if the retailer was to be called upon to do the work, to purchase the wherewithal to do the work, and the members of Parliament are to be the ones to benefit from a monetary standpoint.

EDITORIAL NOTES

"THE excess profits tax, never a revenue measure, is a penalty upon economy, upon conservative capitalization and upon quantity production. It never was intended to be a revenue measure. It is a cornerstone in the present intolerable price-structure and it should be repealed."—William B. Colver, member U.S. Federal Trade Commission.

* * *

THAT THE "people with moderately large incomes in Canada are not paying the proportion which they should be made to pay," is an argument of the "Grain Grower's Guide" with which there will be general agreement by those with readily established incomes. This, however, is not so much the fault of the Income Tax as it is because of the difficulty of equitably enforcing its provisions.

continuing: "Better to buy your hardware from us and save more than your 1920 tax." The commendable point about this advertisement is the fact that it is made timely. Undoubtedly many local business men were thinking of their income tax returns at this time and the headline caught their attention. There is always some local matter of general interest to business men which can be made the subject of an advertisement and link up with it an appeal for business.

* * * *

Paint to Cover Up Local Scars

"Cover Up a Multitude of Sins." This is an expression with which most of us are familiar and it arouses interest to see what the context is. An ad. by Gardiner (The Hardware Man), Dundalk, Ont., with this heading, continued as follows: "Snow and paint are the world's great helps to 'camouflage' the multitude of unsightly spectacles any old town, city or village is almost certain to harbor. Here's your chance, and now's your time to cover up Dundalk's little scars."

* * * *

Oil Range Substitute For Maid

"THE BEST SUBSTITUTE FOR A MAID" is a heading which catches the interest particularly in view of the prevailing shortage of this class of help. An ad. with this heading, by McGowan's Hardware. Teeswater, Ont., continues: "Maids are scarce and hard to get, but housewives need not worry. A —— oil range is the best substitute. With a —— oil stove cooking is cleaner, cooler, quicker by far than when it is done in any other way. Make a special effort to have us put a modern oil stove in your home during our May and June sale."

* * * *

Washer Pays for Itself in a Year

"THIS WASHER PAYS FOR ITSELF IN ONE YEAR," says an ad. on washing machines, by J. H. Lee, Oakville, Ont. "The —— electric washer saves enough money to pay for itself the first year. It saves the washwoman's wages; it saves laundry bills; it saves the clothes, for they last four times as long when washed in this machine. It saves doctor's bills, for it cuts out back-breaking drudgery. —— washer costs less to run than the washwoman eats. It operates for 2 cents an hour, and is easier to run than a sewing machine."

* * * *

Refrigerator Demonstration

An ad. on refrigerators by Mills Hardware Company, Hamilton, Ont., in connection with a recent demonstration, states as follows: "KEEP YOUR FOOD PURE AND WHOLESOME—With the advent of warm weather one's thoughts naturally turn to cooler things to eat and also a means of keeping food sweet and fresh. The solution to your problem is a ——— refrigerator, the one household article that is more important than any other. The —— refrigerators are built on scientific lines and provide a constant circulation of pure, cold, dry air in the provision chamber. More germ diseases have resulted from refrigerators that have not the proper circulation of cold air than most people would realize, the food becomes tainted and therefore is unsanitary. Have the joy of living this summer; it is predicted that it will be a dry, hot summer. Get a refrigerator and keep your food pure and wholesome."

* * * *

Free Trial of Oil Stoves For Summer

Oil stoves for summer use are emphasized in an ad. by Jeffery Hardware, Teeswater, Ont. "The ideal stove for summer use. Ask your neighbor who uses one, and what she has to say will be a strong argument for it. To those who have never used these stoves and would like to try one we are offering a free trial for thirty days, providing you live within ten miles of the store." The ad. is reproduced herewith along with other seasonable ads. which will give the dealer some suggestions for planning his own local advertisements.

EVENTS IN THE TRADE

Hardware Store Robbed

Dresden, Ont.—Last week-end Wells & Kofel, hardware, was broken into and $250 in cash and some cheques were taken from the safe.

Open Office in Montreal

Canada Decalcomania Co., Limited, Canadian manufacturers decalcomania transfers, factory and head office, Toronto, will shortly open up an office in Montreal for the purpose of giving their Eastern trade better service. Mr. W. H. Brown, who will have charge, is making his home in Montreal.

Erect New Wire Products and Stamping Factory

Montreal.—Hardware and Metal understands that plans are afoot for the establishing of a large wire and stamping plant at Richmond, Que. While details are not available, Hardware and Metal understands that this company will enter the manufacturing field as producers of wire goods and various stamped wares. It is understood that negotiations are now under way and that the prospects for the establishing of a factory at this point appear to be bright.

New Building Under Way

Galt.—Some time ago ratepayers voted $25,000 to the Elliott White-Hall Machine & Tool Company, one of the city's war industries, with which to help build the new plant. The contract for building has now been let to the Kennedy-Bell Construction Company, of Brantford, who have started work and who promise to have the building completed in September.

English Manufacturer to Visit Canada

Mr. H. C. Hole, the managing director of the Canadian United Manufacturers Agency, will be in Canada during August, and may be communicated with at the King Edward Hotel, Toronto.

Throw All Streams Open

The Ontario Government is said to be planning to throw all streams open to the public for fishing in the near future. At the same time they will establish hatcheries at several places in the Province and will see that good streams are kept stocked. If this is carried out there will be some disgruntled fish hogs in this country, but those who can spare a day or two during the fishing season will be able to go fishing without committing the offence of poaching.

Supplies Will Be Inadequate

Montreal.—In an interview this week with George C. Davis, manager of Frothingham & Workman, Ltd., Montreal, Hardware and Metal was informed that the outlook for a heavy fall business is most promising. "In the matter of wire products, I do not believe there will be more than one-third enough of these goods to go around," said Mr. Davis. "There is a very heavy demand for baling wire in particular, and also for nails and other products of wire manufacture. The outlook is one of the most promising I have seen in many years and there is no question but that there will be a heavy fall business all around."

Mr. Davis, in common with many others, is rather disappointed with the freight troubles which have assumed definite proportions as far as transport in Montreal is concerned. This refers particularly to the recent strike of teamsters and which is very far-reaching, in that goods being delivered to outside points have to be transported to depots or wharves for shipment to their destination. Otherwise conditions, in many respects, Mr. Davis reports as very promising.

Maritime Provinces Promise Well

Montreal.—In an interview with Gordon C. Seybold, Starke-Seybold, Ltd., Montreal, on his return from an extended trip to the Maritime Provinces, Hardware and Metal was informed that conditions there are excellent at the present time. The outlook for a big crop is very promising, with the exception that hay yield may be a little short, otherwise crop conditions are very satisfactory and this means that business will be good this fall in the Maritime Provinces.

Mr Seybold was particularly pleased with conditions in Prince Edward Island, and there is a very buoyant spirit there generally. The farmers are very prosperous and this means good business for merchants, and one of the best indications of the solidity of present conditions is revealed in the extensive purchases of good grades of automobiles by the farmers. Mr. Seybold also states that retail hardware merchants are enjoying a splendid degree of prosperity at the present time and are most hopeful of conditions continuing active right along.

Automotive Industry Warned

Car manufacturers, makers of parts and supplies and jobbers in steel products at Detroit, catering to the automotive industry, have sent out letters warning against a further increase in the price of materials, and asking that prices be lowered wherever possible. It is claimed that automobiles have reached the high peak of acceptable prices and that continued increases in materials and parts will cut consumption, which is already evident.

Sails for England

Mr. Harry A. B. Fales, of Frank Fales & Sons, 61 Dock Street, St. John, N.B., has sailed for England, where he will interview the leaders in the English, French and Norwegian fishing trade. Mr. Fales, whose firm represents Henry Milward & Sons, Redditch, Eng., manufacturers of fish hooks and tackle; Messrs. Hounsell's, Bridport, Eng., manufacturers of lines and nets, and R. Hood, Haggie & Son, of Newcastle-on-Tyne, will interview all these firms and familiarize himself with methods of manufacture, etc., of the various lines.

Two More Firms to Locate in Regina

Regina.—Announcement is made that Beatty Brothers, of Fergus, Ont., will build a $60,000 plant, and that McColl Brothers, of Toronto, are contemplating erecting a $150,000 building in this city.

McColl Brothers, who have made an application for a warehouse site, manufacture lubricating oils, paint oils and paint in Eastern Canada. They ask for half a block of city property in the wholesale district. The new warehouse for McColl Brothers will be erected on block 121, immediately behind the Sanitary Bakery, lots 11 and 12, at a cost of about $60,000. The building will be 50 feet by 112 feet, with trackage facilities.

Winchester Buys Another Plant

The Winchester Company has purchased the Mack Ax Plant at Beaver Falls, Pa., and will continue it with an increased output. The Mack Ax Plant is well known in the United States. It was established by Joseph Graff at Beaver Falls, Pa., in 1871. After several years of successful business, the plant was sold to the Hubbard Company, Pittsburgh, in 1877.

In 1890 it was consolidated with the American Ax and Tool Company and was operated as a unit of that firm until 1912, when it was sold to the Kelly Ax Manufacturing Company, of Charlestown, West Virginia. Immediately after this purchase the plant was closed down and the machinery removed. The buildings and real estate were sold to John Mack, Senior, who immediately organized the Mack Ax Company, and began the manufacture of this make of axes.

Gillette Employees Hold Picnic

Montreal.—The Gillette Social Club of the Gillette Safety Razor Company of Canada, Ltd., held its third annual picnic at King Edward Park, near Montreal, on Saturday last. Over five hundred employees and friends left on the Steamer "Imperial," which was specially chartered for the day, and advantage was taken of this to enjoy a sail down the broad St. Lawrence for several hours before landing at the park.

A good programme of sporting events took place, credit being attributed to the sports committee. Among the features of the day which proved of great interest was a relay race, in which teams from various departments competed. The honors were carried off by teams from the office staff, while the baseball match scheduled between teams from the office and factory resulted in the favor of the factory by a score of 17 to 12.

This picnic is said to have been one of the most enjoyable and successful in the history of the company.

Cuba Would Buy Canada's Goods

Montreal.—According to Dr. Caballero, who represents the Sun Life Assurance Company of Canada at Havana, Cuba, Cuba is anxious to have direct trade dealings with Canada. He stated recently in Montreal that Canadian goods are much appreciated by Cubans and that if more Canadian salesmen were sent into that field they would be able to secure good orders. Among lines wanted are asbestos, cement, building plaster, wire nails, paper of all kinds, and various lines of manufactured hardware. Great prosperity exists there owing to the greatly inflated price that is being paid farmers for sugar cane, and farmers have grown very wealthy in the past few years.

Japan Wants Canadian Goods

Montreal.—"Canadian manufacturers have given no heed to the needs of Japan, which has now a billion dollars' favorable trade balance, and is fifth in the main powers of importance."

This statement of A. E. Bryan, Canadian Trade Commissioner at Yokohama, who is at present in Montreal, indicates that Japan is an excellent market for Canadian goods if properly exploited.

Mr. Bryan stated that the Japanese were very anxious to trade with Canada, but it was rather difficult to do so, particularly during the period of the war. Then in Japan there are no Canadian branch export houses and no salesmen from the Dominion visit that country. One of the complaints cited by Mr. Bryan is that while it is very necessary that "cash including freight" prices be quoted, Canadian exporters continually quote f.o.b. rates either at their factory or at Vancouver. Instead of helping matters this is a serious drawback in the cultivation of Japanese trade.

Require Many Products

While Japan imports a great variety of products, nickel, asbestos, lead, zinc, steel, and various iron manufactured goods are wanted and are imported in extensive quantities. Trade in all these lines, according to Mr. Bryan, may be expanded materially if proper attention is given on the part of manufacturers. There is a good market there, he states, for all kinds of machinery. Just at the present time business conditions are reported to be somewhat slack in that country, although this will be but a temporary condition, and this fall will see very heavy ordering again, he intimates.

IMPORTANT TAX RULING

A ruling made to all collectors of Customs states that tax on all lines mentioned in Sections 1 and 2 of the Resolution, insofar as importations are concerned, apply only when importations are for consumption or use other than resale.

It has been ruled that the tax does not apply to goods imported by a manufacturer to be used by him in production of other goods for sale and not to go into consumption otherwise or be sold in the condition imported.

Where under this ruling an importing manufacturer enters any such goods as exempt from this tax, there shall be furnished on the face of such entry a certificate by the importer as follows:

"Certified that the goods hereby entered as exempt from luxury excise tax for the reason that they are to be used by me (or us), in the manufacture of other articles for sale by me (or us), will be so used, and will not be diverted for any other purpose.

.....

Importer."

Peninsula Out After Industries

The annual Niagara District Industrial Conference date has now been set for August 2 to 4. The itinerary has all been arranged for, and will include in the three days trips to every part of the district, and the illustration of all its features, industrial, public works, hydro, etc.

At the suggestion of John T. James, of Bridgeburg, it has been decided to assess against the various cities, towns and villages in the district their share of the cost of the conference, which will be $7,000.

Visitors from the United Kingdom as well as Canada and the United States are expected at the conference, the secretary having already received a list of names of numerous delegates.

Winnipeg. — O-Rib-O Manufacturing Company, which has opened its new site on Erin Street, has sold its old premises at 233 Stradbrooke Avenue to the Eternal Battery Company.

Exhibition of Foreign Cutlery at Sheffield

An exhibition of 800 samples of Japanese, United States and German post-war cutlery, tools, etc., was held in the Cutlers' Hall, Sheffield, recently, and was visited by 350 firms from Sheffield and district. The general expression of opinion respecting the samples of Japanese manufacture was that though the prices quoted were extremely low, they were too high for the class of goods they represented, and that it was unreasonable to expect Sheffield firms to turn out goods of such a low grade.

On the other hand, the goods emanating from United States factories were considered of excellent quality and finish. The grinding in particular was described as first class, and the general finish left nothing to be desired. Prices, however, were high and were easily beaten by the Sheffield manufacturers who examined them.

The German samples were of variable quality and variable prices. There was a lack of uniformity in respect to both points, but in the majority of cases prices were fairly high and most of the visitors seemed easily able to compete. One firm who had recently received a quotation for pen-knives with sample from Germany, after subjecting the samples to a critical test, came to the conclusion that the German pen-knives were 3s. per dozen dearer than the British, and that the quality was 50 per cent. under German pre-war productions. In yet another case a Sheffield firm was manufacturing nickelled pen-knives at 9s. per dozen against German samples marked (May, 1919) at 11s. 6d. per dozen.

A number of firms borrowed samples at the close of the exhibition for the purpose of copying designs or reproducing patterns that appeared to be good selling lines.

Threaten Extensive Closing Down of Iron and Steel Capacity

"Extensive closing down of iron and steel capacity is nearer at hand than at any stage of the unsettled operating conditions which have gripped the industry for several months past," says The Iron Trade Review. "While empty coal cars may be loaded for movement in direct line toward the mines, this is a decidedly limited service and of temporary character. In all directions pig iron, semi-finished and finished steel has begun to pile up rapidly in producers' hands, on top of the huge accumulation already on hand. A continuance of this condition only can result in drastic curtailment of output. Insistent demands for all the material on contract the mills can ship serve to controvert reports of enforced curtailment of production by automobile builders due to financial causes. A summary by steelmakers of the situation at Detroit discloses that the different plants are operating to the fullest extent permitted by material supplies. Urgent calls for spot pig iron, especially basic, have continued this week and have been intensified by the narrowed traffic facilities.

NEWS OF WESTERN CANADA

Means Much to Western Retailers

Accomplishment of Aims of W.C.C.A. Will Mean Big Increase in Future Trade in Western Canada—More Than Half the Money Required is Now in Hand—47 Per Cent. of Western Farmers Have Automobiles.

"IF THE Western Canada Colonization Association settles 20,000,000 acres of idle arable land, it is probable that another 10,000,000 acres, suitable only for pasture, will be used for raising livestock. The value of such settlement will exceed the entire national debt of the Dominion." So said Mr. M. A. Brown, Provincial chairman of the Western Canada Colonization Association, in a recent interview with Hardware and Metal. Mr. Brown, who is Mayor of Medicine Hat, added:

"In 1918 the farm production of Alberta, Manitoba and Saskatchewan was valued at $1,322,804,490, from some 30,297,416 acres under field crops and other lands suitable only for livestock. On the same basis, the idle acres which the association aims to bring into use have a potential value of $870,000,000 per annum.

"Divided into 93,750 half-section farms, each of 320 acres, these lands would provide an opportunity for almost 100,000 more farmers, and for a total of at least 400,000 immigrants, counting men, women and children.

"Settlers from the United States have been bringing in $600 for every man, woman and child. The average for immigrants from the British Isles and elsewhere would be considerably lower, but even before the war British immigrants averaged at least $100, and the amount now would be much higher. The immigrants sought by the association will be "hand-picked" and will be from the United States and the British Isles principally. Their average wealth may be placed conservatively at $300 each. This in itself means a total initial accession to national wealth of something like $100,000,000.

"Such an influx of agricultural settlers would be accompanied by heavy immigration of artisans and other non-agriculturists, with wealth of probably $50,000,000 more.

"The annual gross income per farm in Western Canada is now close to $4,500, including the value of products consumed by the farmers themselves. Allowing for a possible decrease in prices, the annual gross income per farm may safely be placed at not less than $3,500 for many years to come. Of this amount at least $1,500 is expended annually in purchases of goods, largely in local stores.

Each farm would contribute $1,200 every year to increase the national wealth of the Dominion. For all the 93,750 new farms, the increase would amount to $112,500,000. But this would be the gain from the project in a single year. Canada would, in effect, receive from the settlement of these idle acres a perpetual increase in national wealth of $112,500,000. The present value of such perpetuity, reckoned at 6 per cent., is no less than $1,875,000,000.

"The $1,500 or more expended by each farm household annually for goods would be distributed among retailers, wholesalers, bankers and manufacturers. Ultimately, much of it would go to the workers. It would provide more employment and attract new capital to supply the additional wants.

"A recent survey among its subscribers, made by one of the largest farm papers in Western Canada, showed that 50 per cent. of the farmers carried life insurance; 46.3 per cent. had telephones; 47.2 per cent. owned automobiles; 36 per cent. had gasoline engines; 34 per cent. had pianos; 30 per cent. owned threshing outfits; 30 per cent. had talking machines; 20.4 per cent. owned tractors. These figures indicate the tremendous demand for goods and services which would result from the successful utilization of nearly 100,000 new farms. That demand would mean increased prosperity for every interest in the Dominion.

"The settlers and their families would spend at least $140,750,000 annually, principally for manufactured goods. To meet this demand, not less than $125,000,000 would be needed for industrial undertakings. The opportunity would attract new capital from the United States and elsewhere, and it would be safe to count on an accession of at least $75,000,000 in this way.

"The problem of the railways would be solved. The average settler in Western Canada means $763 per year in railroad earnings on freight and passenger business. From the 93,750 farms there would come a yearly increase of $71,531,250 in the gross income of the railroads.

"The increase in national wealth which would result from the accomplishment of the aim of the Western Canada Colonization Association may, then, be summarized as follows:

New wealth brought by settlers	$150,000,000
Present net worth of new farm production in perpetuity	1,875,000,000
New capital attracted from abroad for industrial undertakings	75,000,000
Present worth of new wealth resulting from profits on handling new farm production	500,000,000
Total	$2,600,000,000

"In comparison, Canada's gross national debt is less than $2,100,000,000, and the net debt about $2,000,000,000.

"Utilization of the idle lands of Western Canada in its value to Canada not only would offset the entire net debt of the Dominion but would leave a surplus of more than half a billion dollars for development of the Dominion's natural resources."

EXTENDS HUNTING INVITATION

Mr. MacKenzie, of Mallett & MacKenzie, hardware, Kamloops, B.C., is going on a hunting trip very soon and through the representative of Hardware and Metal he extends an invitation to any hardware dealers who want some real hunting, to go along with him.

MOTOR TRUCK BRINGS BUSINESS

M. Dumont, hardware, Ashcroft, B.C., handles automobile accessories and repairs. About a year ago they opened a garage and have the agency for a well-known automobile and tractor. They use a motor truck in their own business and have found it a big help in developing business as far away as 220 miles north, in the Caribou country. This is truly good evidence of the value of a truck for giving service in outlying districts and thereby bringing such trade into closer touch with the store.

Announces New Stores' Opening

Four-Page Leaflet Published by Falconer's Ltd., Winnipeg, Announces Opening of Two Branch Stores, Emphasizes Policy of Business and Advertises Seasonable Lines.

TWO new branch stores were recently opened by Falconer's Limited, Winnipeg, in order to better serve the residents of the outlying districts to which the trade of the original store had extended. An outline of the business policy which has developed this store to this extent was outlined in April 10 *issue of "Hardware and Metal." One of the new stores is on Main Street and the other in Elmwood. In connection with the development a four-page leaflet was issued, making the announcement of the new stores being opened for business and pointing out that the extension of business would enable the giving of better prices and that already notable price reductions had been made throughout the stores. A point is made of the fact that fifteen years of experience guides the management in its merchandising policies and emphasis is laid on the policy of "honest goods at honest prices" with a guarantee of "Your money back" if goods are not satisfactory.*

The leaflet contains illustrations of a number of seasonable lines with information, prices, etc., and was calculated not only to make the desired announcement, but to link up a little sales talk which was successful in bringing business to all three stores in celebration of the event.

The slogan now being used by Falconer's Ltd. is "Three stores now—at your Service."

INTRODUCING OUR TWO NEW STORES

The two-page centre spread of the four-page leaflet used by Falconer's, Ltd., Winnipeg, in connection with the opening of two branch stores. Many lines of Wash Day helps and paints and varnishes for the Clean-Up-Paint-Up campaign are illustrated on these pages. The fourth page illustrates a number of lines of baby carriages, go-carts, express waggons, and bicycles.

Newsy Notes From Here and There

Toronto.—J. H. Webber, of the Steel Co. of Canada, Ltd., Toronto division, has left Toronto on a holiday trip accompanied by Mrs. Webber, Miss Webber, who is starting on a tour through England, Scotland, France, Belgium and Switzerland, accompanied her parents as far as Montreal.

Toronto.—J. H. McMahon, hardware merchant of Port Credit, Ont., was a visitor in Toronto this week.

Toronto.—R. H. Greig, hardware merchant of Streetsville, Ont., made a business trip to Toronto during the week.

Montreal.—Mr. James, representing Shurly Dietrich, Galt, Ont., was a recent visitor to Montreal; James Hossack, Canadian representative Lufkin Rule Company of Canada, Ltd., Windsor, Ont., called on the Montreal trade recently; F. D. Anger, of the purchasing department, Frothingham & Workman, Ltd., is away to the Gaspe coast for a couple of months.

Montreal.—H. Kearns, managing-director B. & S. H. Thompson & Company, Limited, was a visitor to Toronto this week: John R. Anderson, manufacturers' representative, Montreal, returned this week from an extended trip to Newfoundland.

Montreal.—O. N. Parent, Canadian Yale & Towne, Limited, St. Catharines, was in Montreal this week; Gordon C. Seybold, of Starke-Seybold, Limited, returned from a trip to the Maritime Provinces.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1183. **Cement.**—A large firm importing builders' supplies at Sao Paulo, Brazil, wish to import Portland cement of the best quality in large quantities.

1187. **Cement, pipe, gypsum.**—A Havana firm wish agencies for the following Canadian products: cement, cast-iron pipe, gypsum.

1188. **Hardware, building materials, etc.**—A London firm of importers and exporters, possessing showrooms and warehouses, are desirous of securing the representation of Canadian manufacturers of hardware of all sorts, building materials, and specialty lines generally.

1189. **Hardware, nails and wire.**—A well-established British firm wish to arrange for exclusive selling rights in the United Kingdom for Canadian manufacturers of hardware of all kinds, especially nails, barbed wire and plain wire. They are ready to buy and pay cash, and will undertake to advertise in the United Kingdom.

1190. **Mechanical domestic specialties.**—An inquiry has been received from the Japanese Naval Department for all kinds of mechanical devices to be used in the galleries of warships, such as potato peelers, meat and bread slicers, and similar devices for labor saving and quick preparation of food. Full information, prices, etc., should be supplied at once.

1194. **Clocks.**—Wholesale jeweller would like to get in touch with manufacturers of various kinds of clocks.

1196. **Lead, spelter, and tinplate.**—An English firm of commission agents in Rio de Janeiro—head office, London—wish to import various metals from Canada, such as sheet and pig lead, spelter, and tinplate. For convenience they prefer to deal with a first-class Canadian export commission house rather than with a number of manufacturers.

1197. **Asbestos.**—A London company ask for the addresses of the principal Canadian producers and shippers of asbestos (crude and fibre).

1200. **Miscellaneous manufactures.** — A Brazilian firm of general importers in Sao Paulo, Brazil, wish to hear from Canadian manufacturers of cutlery, tools, lubricating oils, electrical fixtures, machinery, chemical products, paints and varnishes, motor cycles, bicycles.

West African Supplies

Note.—The following group of trade inquiries emanate from established British traders in the West African colonies of Cameroons, Gambia, Gold Coast, Nigeria, and Senegal. These colonies serve as dispensing centres for the vast areas of the interior of Africa, and the many millions of natives demand a constantly increasing supply of manufactured articles. The Elder-Dempster steamship lines are furnishing a direct service to West Africa from Montreal, the next sailing being SS. Bassan on July 15. There are eighteen branches of the Colonial Bank of London in the five colonies. The active trading season is from December to May.

1206. **Miscellaneous supplies.**—A British firm of West African import and export merchants established in London, Liverpool, Manchester and Birmingham, England, and New York, and opening shortly in Montreal, with over 100 branches in West Africa, in Gold Coast, Togoland, Dahomey, Nigeria, also Morocco, desire to receive samples, catalogues and prices of the undermentioned Canadian commodities which they would like to send to West Africa by the Elder-Dempster steamers from Montreal: Lumber, cement, iron bars and sheets, nails, paint, builders' materials and hardware, enamelware, lamps and lanterns, general hardware, lighting plants and accessories, motor cars, trucks, tires and parts. These commodities at present are being supplied by the United States and shipped from New York, as Canada owing to the war was unable to give a direct steamer service. This firm are doing an immense business in West Africa. They are ready to buy and pay cash.

1207. **Miscellaneous supplies.**—A firm in the West of England, purchasing on behalf of customers in British West Africa, would be glad to hear from Canadian manufacturers and shippers of the following articles: Brushes (paint); paint and enamel, ready mixed and in paste form; metal-framed mirrors, photo frames, etc.; spoons, knives, forks, and all kinds of cutlery; tools (hatchets in particular); bicycles, tinware, hollow-ware, cement, filters, gramophones and records, sports requisites, pocket flash lamps and batteries, alarm and other cheap clocks.

1208. **Building supplies, hardware.** — A Liverpool firm of West African merchants wish to be placed in touch with exporters of asbestos roofing, building materials, enamelware, iron bars, wire nails, locks, hinges, galvanized ware, shovels, tools, for direct export to West Africa.

1209. **Wire nails, enamelled ware, corrugated sheets.**—An English firm wish to purchase for direct shipment to customers on the Gold Coast (West Africa), supplies of wire nails, enamelled ware, and galvanized corrugated iron sheets, and invite prices from Canadian manufacturers. Terms cash against documents at London bank.

1210. **Hardware.**—A Liverpool firm of West African merchants ask to be placed in touch with exporters of enamelware, wire nails, building materials, etc., for direct shipment to West Africa.

1211. **Hardware and canned goods.**—A Liverpool firm ask to be placed in touch with exporters of enamelware, wire nails, locks and hinges, etc., for direct export to West Africa.

1212. **Enamelware, nails and washers.**—A Liverpool firm asked to be placed in touch with Canadian exporters of enamelware, galvanized nails and washers, for direct export to West Africa.

1213. **Hardware.**—A Liverpool firm ask to be placed in touch with Canadian exporters of enamel and galvanized ware, iron bars, wire nails, locks, all classes of from Canada, for direct export to West Africa.

1214. **Hardware.**—A Liverpool firm wish to be placed in touch with Canadian exporters of enamel and galvanized ware, building materials, wire nails, locks, hinges, shovels, tools, etc., for direct export to West Africa.

1215. **Hardware.**—A Liverpool firm wish to be placed in touch with Canadian exporters of enamel and galvanized ware, building materials, wire nails, locks and hinges, white-pine lumber, shovels, tools, etc., for direct export to West Africa.

1216. **Hardware.**—A Liverpool firm ask to be placed in touch with Canadian exporters of enamel and galvanized ware, iron bars, wire nails, all classes of hardware, for direct export to West Africa.

1217. **Hardware and lumber.**—A Liverpool firm wish to be placed in touch with Canadian exporters of enamelware, wire nails, locks and hinges, galvanized iron, timber, artisans' tools, etc., for direct export to West Africa.

1218. **Import and export agents.**—A Liverpool firm of West African merchants wish to get in touch with a reliable firm prepared to act on their behalf as buyers of Canadian products and sellers of palm oil, cocoa, peanuts, mahogany, etc.

1219. **Enamelware.**—A Liverpool firm of West African merchants wish to purchase cheap grades of the above from Canadian from Canada, for direct export to West Africa.

1220. **Galvanized corrugated sheets.**—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

1221. **Asbestos roofing and building material.**—A Liverpool firm of West African merchants wish to purchase the above from Canada, fo rdirect export to West Africa.

1222. **Iron bars.**—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

1223. **Wire nails.**—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

1224. **Locks, hinges, furniture fittings, etc.**—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

Hardware Letter Box

Foamite

Granby Consolidated Mining, Smelting and Power Company, Ltd., Vancouver, B.C.—Can you give us the name of a fire extinguisher called "Foamite"?

Answer.—This extinguisher is made by the Foamite Fire Extinguisher Company, Hamilton, Canada.—Ed.

Animal Bait

R. T. Holman, Ltd., Summerside, P.E.I.—Please advise us as to names of manufacturers of animal bait.

Answer.—The following are manufacturers of this line: John Hallam, Ltd., 105 Front St. E., Toronto; Weil Bros. & Co., Fort Wayne, Ind.; F. C. Taylor & Co., St. Louis, Mass.; Funston Bros. & Co., St. Louis, Mo.; F. C. Stephens, Kansas City, Mo.—Ed.

Club Bags

Serivan and Rutherford, Tilbury, Ont.—Please advise us name of manufacturers of club bags.

Answer.—The following are manufacturers: Julian Sale Leather Goods, Ltd., Toronto; Lamontagne Ltd., Montreal, Que.; Langmuir, Mfg. Company, Ltd., Toronto; J. Eveleigh & Co., Ltd., Montreal, Que.; Christie Trunk & Bag Co., Amherst, N.S.; Hugh Carson Co., Ltd., Ottawa, Ont.; S. & H. Borbridge, Ottawa, Ont.; The Adams Mfg. Co., Toronto, Ont.—Ed.

Cement Tools

Cowan Hardware Co., London, Ont.—Please advise us names of manufacturers of cement tools.

Answer.—Following are manufacturers: Canadian Foundries and Forgings, Ltd., Brockville, Ont.; The Wright Tool Co., Hamilton, Ont.; Toronto Lock Mfg. Co., Ltd., Toronto.—Ed.

Carpet Stretchers

Hardware Company of Toronto, Ltd., Toronto, Ont.—Kindly advise us who manufacture carpet stretching vises made after the principle of ice tongs?

Answer.—C. F. Osborne & Co., Newark, N.J., and Sargent & Co., New Haven, Conn., manufacture carpet stretchers of this style.—Ed.

Acorn Oil Cook Stove Repairs

W. A. MacLaren, Esq., Hensall, Ont.—Would you kindly tell us where we could procure wicks and repair parts for the "Acorn" oil cook stove, also where we could procure the Bon Ami?

Answer.—Wicks and repair parts could be procured for the "Acorn" oil cook stove from the Sheet Metal Products Co. of Canada, Ltd., Toronto, Ont. So far as we can learn there are no agents for the Bon-Ami in Canada. A. J. Lendeman & Hoverson Co., Milwaukee, Wis., are the manufacturers.—Ed.

Bottle Capping Machines

John H. Lee, Esq., Stony Creek, Ont.—Would you kindly give us the names of manufacturers of bottle metal capping machines?

Answer.—The following are manufacturers: Crown Cork and Seal Co., 87 Parliament Street, Toronto; Anchor Cap and Closure Corp. of Canada, Ltd., 50 Dovercourt Rd., Toronto; Wilson and Cousins, 35 McCaul Street, Toronto; E. W. Bliss Co., Brooklyn, New York; Phoenix Hermetic Co., Chicago, Ill.; Sterling Cork and Seal Co., Toledo, Ohio; Van O Press Company, Brooklyn, New York.—Ed.

Steel Wool

R. T. Holman, Ltd., Summerside, P.E.I.—Would you kindly give us the names of the manufacturers of steel wool, and also if manufactured in Canada?

Answer.—So far as we are able to learn there are no manufacturers of this product in Canada. The following are some of the American makers: American Steel Wool Mfg. Co., Inc., 451 Greenwich, New York; Jas. H. Rhodes & Co., 162 William St., New York; Ridgley Trimmer Co., Springfield, Ohio; Buehne Steel Wool Co., 93 Nassando, New York.—Ed.

Gasoline Shortage Becoming Serious

Oil Companies Advertising for Economy in Use of Gasoline—Demand Increased 650% in Recent Years and Production of Crude Petroleum Increased Only 150%

ADVERTISEMENTS asking everyone to conserve gasoline are being run throughout Canada by some of the leading oil companies. There is said to be a real shortage of gasoline. Hardware and Metal is advised that in the last few years the demand for crude petroleum, practically all of which must be imported for the manufacture of gasoline in Canada, has increased more than 650 per cent. In a like period, production has increased about 150 per cent. A shortage of crude and high prices necessarily follow. Pennsylvania crude is to-day costing $6.10 and Oklahoma crude $3.60 per barrel at the wells, and these prices must be paid in American funds, which adds another 10 per cent.

The oil-producing companies claim to be sparing no expense or effort to adequately meet the growing demand for petroleum products, but notwithstanding the best efforts of these companies, the demand is going ahead of production by leaps and bounds. The only apparent solution is to use all petroleum products, especially gasoline, economically and efficiently. Few motorists realize how essential this is. To-day, more gasoline is used than is being produced. Curtailment of waste is imperative. If we do not voluntarily practise economy, we will eventually and inevitably be forced to do so.

Those who have studied the subject say that one-half gallon of gasoline per car is wasted daily through carelessness, the over-use of cars and needless mileage. This means 200,000 gallons of gasoline wasted daily in Canada or 73,000,000 gallons per year if all motor cars were operated every day. This waste must be stopped.

One gallon of gasoline will provide energy to move a one-ton truck 15 miles, or to put it another way, it will move 15 tons of freight one mile. It is hardly likely that anywhere near 73,000,000 gallons of gasoline is wasted yearly in Canada, but if we can by conservation save one-tenth of this amount (7,300,000 gallons), we will save enough to haul 109,500,000 tons one mile.

It has been estimated that 7,300,000 gallons of gasoline will plant, harvest and thresh 15,500,000 bushels of wheat. We can eliminate the necessity for higher prices on foodstuffs by saving gasoline.

BRITISH ZINC

"Spelter is beginning to attract attention again, and the metal would now appear to be passing through one of those phases which are only too familiar to all who handle zinc," states "The British Metal World" in its current issue. "British smelters are in a very unenviable position, and, if all we hear is correct, it will be a matter of great difficulty for some of them to continue much longer unless the Government is prepared to spend another £100,000 or so to assist them. It is a very melancholy fact that, after all the tall talk about keeping out the German metal and finding a market for the Australian concentrates, the output of spelter in the United Kingdom last year was less than it was in 1913, and that at the present time the industry has come nearly to a standstill.

"The world's total spelter production to-day is probably at the rate of 600,000 tons per annum. If this country worked at its fullest capacity it could turn out 80,000 to 90,000 tons at the least, yet it is only producing at the rate of 15,000 tons a year."

INCREASE REGISTERED LETTER FEE

According to an amendment to the Post Office Act passed during the recent session of Parliament, the registration fee on letters and other matter mailed in Canada is fixed at ten cents (10c) per each letter or article.

The above fee shall apply to all registered mail matter posted in Canada on and after the 15th July, 1920.

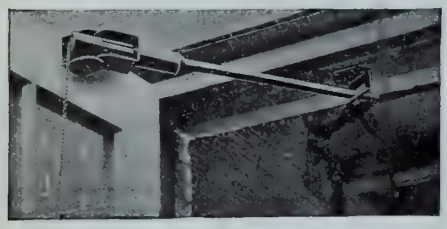
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

New Garage Door Holder

The Stanley Works, New Britain, Conn., U.S.A., have recently put on the market a new garage door holder, which they call their No. 1773 cushion type, and state that the purpose of this door holder is to securely fasten the garage door when open, preventing it from slamming or damaging a car entering or leaving the garage.

The makers claim their new holder is similar to their No. 1774 holder already



Garage Door Holder

in use, except that it is made considerably heavier, having been designed for extra heavy factory doors, private garage doors, or public garage doors, and has very heavy springs covered by a cylinder, protecting them from the weather and which act as a cushion, relieving any strain on the hinges.

The manufacturers also claim that their holder is reversible for right or left hand doors, and may also be applied to square or curved top doors. It is made in several finishes, including japan, dead black japan, sherardized, or dead black over sherardized, and is packed complete one pair in a box, with directions for applying staples and screws, the gross weight being 16½ pounds.

A very attractive circular regarding their new device has just been published for manufacturers and contains illustration and literature describing their new product.

Lever Tire Pump

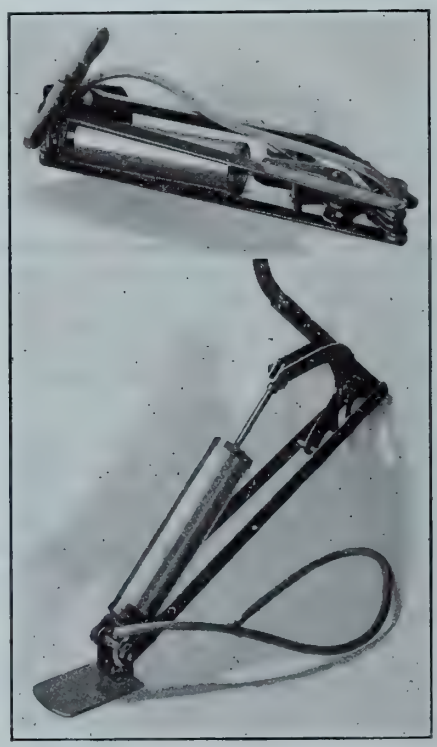
A new air pump for inflating automobile tires is being marketed by the Mor-Air Auto Pump Co., Napersville, Illinois, and which goes under the trade name of J. K. Lever Pump. The manufacturers claim that in construction the pump is all pressed steel, and has no stuffing box, a steel plunger and heavy cap leather being the only parts of the large compression cylinder. On account of the short, specially designed cylinder the friction in operation is nominal, thus eliminating overheating of the pump.

The manufacturers describe their pump as being made on a lever principle, which is operated by hand and foot, and is so designed as to be very easily operated and yet give the maximum pressure. This is attained by the operation being on the lever principle by means of a cam slot and secondary lever, the leverage being increased approximately ten times with air under compression having a resistance against 250 pounds pressure nominal and will inflate a 30 x 3 tire to 60 pounds air in 60 strokes.

The makers also state that their new product is all pressed steel construction, having no stuffing box, and is equipped with an extra heavy cup leather plunge

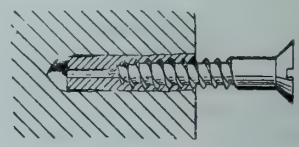
The Rawlplug Co.

The Rawlplug Company, Ltd., head office in Kensington, London, S.W., England, and represented in New York by Staddon & Company, are placing on the Canadian market the Rawplug, which they claim is a device for fixing screws in plaster, brick, marble, slate, stone, cement, concrete, metal, etc. It is for use by builders, contractors, electricians, plumbers, engineers, etc., for any purpose for which a screw is used. The Rawlplug consists of a tube of stiffened fibres which automatically expand when a screw is driven into them, thus obtaining a firm hold. The plugs are made in various lengths and sizes for taking



Lever Tire Pump

different sizes of screws, and no special screws are required. Steel plugging tools are also sold in connection with the plugs, they being used to make the required hole in the plaster, sement, brick, or whatever substance into which the screw is to be inserted. It is claimed that the Rawlplug requires no skilled handling, saves time and cost, does not damage surrounding decorations, leaves no unsightly wood blocks, and is an efficient plug for plaster. Tests carried out show various weights which can be



The Rawlplug

applied to articles held by means of screws placed in the Rawlplugs. These graduate up to half a ton, which can be suspended on a screw hold in stock brick. It is stated that a great many English railway and public utilities, builders, contractors and electrical firms are using the plugs in large quantities with good success. The company plans to enter upon manufacture in America for this market and will shortly be establishing offices in Canada.

Electric Motor Milker

A small electric milking machine mounted on wheels so that it can be moved from cow to cow is being offered the trade by the Sharples Milker Co., Westchester, Pa., who claim that their new device requires no pipe line or installation, and comes from the factory ready for use.

The manufacturers describe their new Motor Milker as follows: An electric motor drives a slow-moving piston, which makes suction on the back stroke and compressed air on the forward stroke. This piston gives the slow pulsation of suction and pressure which milks the cow comfortably. Rubber tubes connect the pump to the milk pail and teat cups. No gas engine is necessary and most of the parts needed on pipe-line milkers are eliminated.

Cups with rubber linings fit over the cows' teats, and a gentle suction sucks the milk out. Then, intermittently, compressed air squeezes and massages the teats to keep them in condition. The milking is done almost as the calf does it, and the method is really more natural and calf-like than squeezing the teats by hand.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

PRICES on nearly all hardware commodities are very firm and there seems little possibility for lower quotations in the near future. The reverse of this situation is the case at present and the tendency is for still higher quotations. A sharp advance has been made on paris green prices, the new quotations being 10 cents per pound higher. Steel wool prices have also been marked up 12½ per cent. Higher prices have also been made on Dart unions, felt collar pads, building paper and felts, fruit slicers, polishing mops, whips, clocks, mirrors, sad iron handles, fence wire grips, beaver board, tapped and blank nuts, wrought washers, builders' hardware, iron wood screws, bolts, dry colors and 5-gallon containers.

The scarcity of supplies is proving very unsatisfactory to all concerned. Deliveries continue to come forward very slowly and in small quantities. This is chiefly attributed to the tie-up and congestion of freight as a result of strikes and other disturbances on the U.S.A. railroads, a condition which has also been responsible in a large measure for the great scarcity of coal and fuel and some industries are still tied up as a result.

Jobbers state that business has been seasonably good during the week, although the demand has slightly fallen off. Nearly all booking prices have been announced for fall delivery and fall orders are coming forward for good quantities.

Collections are coming satisfactory, although some state that money circulation is somewhat stiffer.

MONTREAL MARKETS

MONTREAL, July 8.—Changes are fewer in hardware jobbing circles, and in some respects it would seem that the peak has been reached on certain products. At the same time there are indications that demand will far exceed supply on a great many staple and special articles, and this will mean that the present basis on such goods will probably hold. At no time have so many factors had to be taken into consideration, such as transportation, raw material supplies, labor, etc., and nearly all of these are intricately involved. There seems to be a consensus of feeling that there will be no drastic readjustment of prices from the figures now obtaining.

Coal oil and gasoline, and all kinds lubricating oils, are very firm. In view of the recent advances for iron and steel some jobbers look for early advances on chain. Water pipe and boiler tubes are scarce and firm, with advances probable. Shoe threads are very firm and high in price. Dart unions are higher. One line of felt collar pads has advanced. Various building papers are higher in price. Fruit slicers are advanced again. Wire nails are firm and high, and wire products are all scarce and firm, with advances not unlikely in the near future. Enamelled ware prices are firm and the various lines in active demand. Wash tubs and pails are selling freely, but are not plentiful, owing to the shortage of sheets. Liquid veneer mops have advanced to $16 per dozen. Cutlery is firm and in demand. Old material is quiet and the undertone easier. Ingot metals have been erratic to some extent and there has been rather a free liquidation of stocks.

Country business has been excellent for a long time, June being reported as one of the most active months on record. City business is at present very satisfactory. There still is considerable shortage of seasonable goods.

All Oils Are Firm; Demands Heavy, Too

Montreal.

OILS, GASOLINE.—Demand for gasoline, auto oil and coal oil has continued heavy in recent weeks and the greatest problem has been that of securing delivery of adequate quantities. The undertone on all is very firm, and with the great scarcity of fuel oil there is no possibility of any but a firm, or even a higher market ruling.

Coal oil is selling at 29 to 31 cents per gallon, and motor grade gasoline at 38½c.

Snaths and Equipment Have Been Active Sellers

Montreal.

SCYTHES, SNATHS.—The present movement of scythes and snaths, mower files and scythe stones is very active. From many parts of the country the demand is especially heavy in view of the fact that recent rains have improved the hay crop prospects and it is fully expected that the demand for these products will continue for some time. The prices are holding firm.

Screen Doors; Windows Have Had Big Demand

Montreal.

SCREENS.—This has been an active season for window screens, screen doors, and other lines. The supplies are being somewhat broken, and certain sizes are

pretty well sold out by the jobbers. Prices have remained firm.

Will Chains Advance? Some Expect Increases

Montreal.

CHAIN.—The undertone on coil chain of all kinds is particularly strong and it would not be surprising if an advance is made in the basis at a very early date. There is a seasonably fair demand for this product, but in view of the fact that iron rods have recently advanced, it is logical to look for a firming of the chain market and some jobbers are looking for an early revision upwards.

Pipe Basis Is Firm With Demands Active

Montreal.

PIPE.—The demand for galvanized and black pipe is seasonably active and the difficulty expressed by jobbers is that of obtaining ample supply. Delivery of pipes above 2 inches diameter is said to be uncertain and erratic, and the condition may not be improved for some time. The undertone is a very strong one.

Shoe Thread Firm; May Advance More

Montreal.

SHOE THREAD.—The undertone is very strong on all kinds of twine and thread and shoe thread in particular is very firm. Present prices on Barbour's are as follows: No. 8, per pound $3.25; No. 10, $3.60; No. 12, $3.70; No. 15, $3.80; No. 20, $3.90. Acadia brand is selling at 5 cents a pound less than the above prices.

Special Fittings Are Marked Higher

Montreal.

UNIONS.—A revision has been made in the bases for Dart unions and these are now selling to the trade at 8 per cent. discount for black ¼ in. to 2 in., while for galvanized an advance of 20 per cent. is added. One-eighth inch, 2½ in. to 4 inches long inclusive, are list plus 5 per cent.

Advance Is Made on Line Collar Pads

Montreal.

COLLAR PADS.—One line of felt collar pads, namely that with strap and buckle, has been advanced, the price now being $12.25 per dozen. Other lines of these pads remain unchanged.

Advances Are Made For Building Papers

Montreal.

BUILDING PAPERS.—A very considerable advance has been manifest this week on various kinds of roofing material. Some of the following prices will be of interest to the hardware trade:

Heavy dry sheathing is now selling at $7.75 per 100 lbs. This advance is from $5.45; while heavy tarred has advanced from $5.60 to $7.75; Cyclone dry building paper is now $1.65 per roll and tarred $1.75; Joliette dry per roll $1.25,(tarred $1.40; Surprise sheathing roll $1.30; Sulphide sheathingin half to two lbs. quantities $9.00 per 100 lbs. and in less quantities $9.25. Rideau No. 2 dry is $1.25 and tarred $1.45.

Rosin sized has been discontinued.

Slicers Costing More; Price Per Dozen $36

Montreal.

SLICERS.—An advance has just been effected in Sterling slicers, which are now selling to the trade at $36.00 per dozen.

Some Say Nails to Hold at Present Basis

Montreal.

NAILS.—Wire nails are holding steadily firm at $6.10 per keg and many jobbers feel that while there is a much heavier demand than can be satisfied, advances of price in the near future will be looked for. From another quarter a suggestion was made that prices had not been maximum, eves though the basis at present is extremely high. With building conditions active in many parts of the country a heavy demand is likely to continue. Cut nails are selling still at $6.35 per keg.

Active and Firm Are Enamelled Ware Prices

Montreal.

ENAMELLED WARE.—There is an active demand for enamelled ware at the present time, in fact, the sales could be much larger if the stocks were available. Everything depends on the delivery of raw material from the mills and this is still much restricted. The basis is naturally very firm and will so continue.

Wash Tubs and Pails None Too Plentiful

Montreal.

TUBS AND PAILS.—There is an active demand for galvanized tubs and pails and the market conditions are very strong, with both commodities in active demand at firm prices.

Polish Mops Advance to $16.00 a Dozen

Montreal.

MOPS.—An advance has been made in the price of Liquid Veneer mops, these now selling to the retail trade at $16.00 per dozen. It will be recalled that a change was made in the price of polishes a while ago, but these are holding at the advances of a few weeks ago.

Cutlery Arrivals Are Reported as Better

Montreal.

CUTLERY.—Prices have been very firm on cutlery and these will perhaps hold firm. Arrivals from the Old Country have been improving to an extent, however, and there is hope that this bettering of conditions on delivery will be permanent. Some orders placed last fall have been delivered to jobbers here already, Hardware and Metal is informed. Pocket knives, table and dessert knives, etc.. have been very acceptable to the trade, and distribution is readily effected.

Steel Sheets Hold at Record Prices

Montreal.

SHEETS AND PLATES.—While there has been a slight improvement in the delivery of sheets, this is hardly noticeable, so great and excessive are the demands of the trade. One manufacturer stated to Hardware and Metal a few days ago that there had been some improvement in delivery to them. So far beh'nd are deliveries generally, however, that there may be little extensive relief in a big way for some months. The basis continues nominal, with demands quite active.

BLACK SHEETS—

18 and 20 gauge	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Cordage Prices Steady; Has Good Movement

Montreal.

ROPE AND CORDAGE.—Prices have remained steady and unchanged on all lines of rope and cordage. The movement is fairly active, season considered, and the manufacturers have had quite considerable sale for their product for some time past.

Pure manila basis is still 35½c, British manila 28c, and sisal 22½c per lb.

Quietness Surrounds Lead Products Line

Montreal.

LEAD PRODUCTS.—Prices have held without change on lead pipe, sheet lead and solder. The undertone is tending somewhat softer, but it is to be expected that raw products will have to change materially before there is a marked change in the manufactured products. Labor still is a big factor in production cost, and this is still on a high basis.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00
Note.—Lead pipe is subject to a discount of 10%.

Steady, Firm Prices For Iron and Steel

Montreal.

IRON AND STEEL.—Prices rule steadily firm, the mills being taxed to capacity in turning out bars. Of some sizes it is still difficult to get adequate delivery, although there is no serious complaint on this score. The tendencies are steadily strong, and little indication is apparent of a lowering of prices.

IRON AND STEEL

Iron finish machinery steel		$5 05
Norway iron	13 50	15 00

Mild steel		5 00

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Old Materials Have Weaker Price Tendency

Montreal.

OLD MATERIAL.—Prices are remaining unchanged, but the undertone is easy on most old materials. The tendencies have not been favorable. Manufacturers, beset on this hand and that with fuel and labor difficulties, have not been in the market for considerable quantities of old scrap and the undertone has therefore been easier. The list has held without definite change, however, for some few weeks. If industrial activity increases there will be a better usdertone to the market; otherwise prices will decline furthr.

Ingots Are Erratic But Prospects Better

Montreal.

INGOT METALS.—Prices have been somewhat erratic on various ingots, including tin, lead and copped. The situation has been one of extensive liquidation by large holders and this means that the markets have been erratic, as stated.

TIN.—London cables again reveal an unsettled situation but this is expected to wear itself out soon. Local movement has been heavier. Price this week 58c.

COPPER.—Casting is selling at 23½c per lb., and electrolytic at 24c. It is on a firmer basis this week at New York.

LEAD.—Somewhat erratic. Spain is not producing heavily, however, and importers feel that this will have the effect, in the long run. under such heavy demands as now exist, of holding prices rather steady. Price 10c.

SPELTER.—This, too, has been unsettled during the week. Tone is now somewhat better and prices here are 10 3-4c.

ANTIMONY.—An improvement is manifest and liquidation has, of late, been heavy. The basis holds at 11c per lb.

ALUMINUM.—Quantities in demand are limited and the movement is restricted. Prices are ranging from 35 to 38c per lb.

Binder Twine Moves; Cordage Sales Fair

Montreal.

BINDER TWINE.—This is now moving out to the trade actively, and there has been much shipment of booked orders. Prices are firm at the announced basis of several weeks ago.

TORONTO MARKETS

TORONTO, July 8.—Price changes are not so numerous this week, although quotations are very firm and the tendency is still for higher prices. An advance of 12½% has been made on steel wool prices. Dominion ammunition discount is adjusted to 37½% in place of a former 30/10%. Prices on whips have been marked up about 10%. Building papers have also come up for higher revised prices.

Wire nails are very scarce and jobbers are concerned for future deliveries. Oiled and annealed wire, also No. 9 wire, is very hard to procure and stocks generally are said to be very light, a situation which has been gradually aggravated by the scarcity of coal and other fuel, due to the recent tie-up on the United States railroads.

Jobbers state their stocks are still very light and replacements are coming very slowly, and if some relief is not soon offered the situation there may be a famine on some lines.

Summer goods have been moving very satisfactorily, and refrigerators, cream freezers, door screens, electric fans, etc., have had a very brisk turnover. Fall booking orders are beginning to come forward for lanterns, snow and furnace shovels, ammunition and other fall and winter lines. Collections are coming fairly well, although money seems somewhat tighter.

Advance of 12½% Made on Steel Wool Prices

Toronto.

STEEL WOOL.—New and higher revised prices have again been made in steel wool, and the latest prices will approximate an advance of 12½ cents over former quotations. This latest advance is attributed to the higher cost of material as well as labor, handling, and other factors.

Dominion Ammunition Quoted at 37½% Off

Toronto.

AMMUNITION.—The recent discount on metallic loaded shells of the Dominion make which has recently been quoted at a discount of 30 per cent. and 10 per cent. off the list has been changed to read Dominion list less a discount of 37½ per cent.

Wrought Pipe Stocks Light; Prices Very Firm

Toronto.

WROUGHT PIPE.—Pipe manufacturers state that they have difficulty in supplying the trade with certain sizes of pipe. The scarcity of skelp and the fact that some skelp mills have closed down, coupled with the present great shortage of coal and fuel, has been a great detriment to manufacturers of this commodity, they state. The trade transportation difficulties have also been big factors in curtailing supplies and this in connection with the heavy demand is putting considerable strain on the manufacturer of this commodity.

Although no change in price is immediately looked for, the present quotations are very firm and are quoted as per current quotation pages.

O. and A. Wire, Also No. 9, Continue Scarce

Toronto.

WIRE.—Wire of nearly all kinds is still hard to procure and manufacturers state they have been unable to catch up with their orders. This, the jobbers state, is reflected in the stocks and they are unable to supply all their dealers as a result; especially is this true of the oiled and annealed and the number 9 galvanized wire.

Sheet Mica Beginning to Move; May be Higher

Toronto.

SHEET MICA.—Orders for sheet mica are already beginning to move for fall business and jobbers are of the opinion that the very firm quotations at present current may not hold and that they would not be surprised to see higher prices made before the heavy seasonable fall buying movement sets in.

Whip Prices Have Advanced About 10%

Toronto.

WHIPS.—An advance of approximately 10 per cent. on nearly all lines of whips has been made, which manufacturers state is due to the advanced cost of cotton varnish, cane and other materials, as well as the higher cost of labor for manufacturing this commodity.

The demand for whips has been very heavy and manufacturers have had considerable difficulty in keeping up with the supply. This also may be a factor for the higher prices.

Poultry Netting Still A Seller; Stocks Light

Toronto.

POULTRY NETTING.—It is the general belief that the heavy buying season for poultry netting is practically over. However, jobbers state there is still a heavy demand for some sizes. This, however, they state, may be due to the past slow delivery and that part of the present demand is caused by those not having received their full amount of stocks ordered. The Canadian two-inch mesh is still quoted at net list, while the one-inch mesh continues to sell at an additional 5 per cent. added to the list. These prices are very firm, although no change is immediately looked for.

Scarcity for Wire Nails Showing No Relief

Toronto.

WIRE NAILS.—A heavy demand is being made on jobbers and manufacturers for all kinds of wire nails and jobbers are in a quandary as to how to overcome the situation, as they state their stocks are very low and no shipments are coming forward. It may be that the numerous United States buyers that have come in this market for wire nails have greatly increased demand, while on the other hand manufacturers state they have been faced with the difficulty of securing material, as well as the fuel and coal famine which has resulted from the recent tie-up on the United States railroads.

It is hard to state what the future will show for better delivery of nails, but many are not looking for much improvement for some time to come, owing to the present unsatisfactory conditions which have to be faced.

Building Papers and Felts Again Advance

Toronto.

BUILDING PAPERS.—New and higher prices have again been made on many lines of building papers, which is said to be in line with advances which have been made in nearly all other kinds of papers. Felts have also been revised **upwards** and new and higher prices are now in effect. Some of the new quotations are as follows:

BUILDING PAPERS

	Per roll
Cyclone brand, dry	$1 65
Cyclone brand, tarred	1 75
Joliette brand, dry	1 25
Joliette brand, tarred	1 30
"Anchor" brand dry sheathing, No. 1	1 65
"Anchor" brand dry sheathing, No. 2	1.25
Heavy tarred straw sheathing	7 75
"Stag" brand sheathing (Surprise)	1 80
Empress dry sheathing	1 85
Heavy dry straw sheathing	7 75
"Anchor" brand tarred sheathing, No. 1	1 75
"Anchor" brand tarred sheathing, No. 2	1 45
	Cwt.
"Spruce" sheathing, 36 in. and 72 in.	$10 50

All prices are F.O.B. Montreal and Toronto.

Iron and Steel Bars Show Fair Stocks

Toronto.

IRON AND STEEL BARS.—The demand for iron and steel bars of nearly all kinds continues to be a very satisfactory one and all in the trade are very well satisfied with the amount of business being handled. Jobbers state they have fair stocks on hand and while there are some sizes they have difficulty in securing, they state on an average that their stocks are fairly heavy, and in many cases are quite adequate to carry them over till further shipments are received from the mills. However, whether there will be a shortage on account of the loss of production the mills have suffered owing to shortage of coal and strikes and other reasons remains to be seen. Some are of the opinion that the mills will catch up sufficiently to overcome any situation that may arise. The following are the present quotations:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 95
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Lead and Zinc Products Show Little Change

Toronto.

LEAD AND ZINC PRODUCTS.—Due to the fluctuation of the basic metals nearly all products on the list are quoted from a weaker basis this week, and while the price is showing a downward tendency no change has been made in the quotations.

There continues to be a fairly heavy demand for lead pipe and lead waste pipe, and lead traps and bands are also moving freely. Solders of nearly all kinds are going out steadily and jobbers state they are very well satisfied with the amount of business being handled.

The following are the present quotations:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Prices on Disston Saws Higher, Due to Sales Tax

Toronto.

SAWS.—The addition of the sales tax has increased the cost of Disston saws to the dealer. However, the manufacturers state that no advance in price of Disston saws and tools has been made since January 19th, 1920, and recent quotations should have indicated that the new quotations were on account of the sales tax.

Waste Materials Show Weaker; Stove Plate Firm

Toronto.

WASTE MATERIALS.—The tendency is still for lower prices on nearly all lines of waste materials and business is said to be very dull. Number 1 machinery has taken a considerable drop this week and is now quoted at $33 per ton. Automobile tires have also dropped ½ cent a lb. and are now quoted at 2½ cents per lb. Scrap zinc is ½ cent lower and is now quoted at 6 cents per lb. Dealers state the future outlook for nearly all kinds of scrap and waste material is very dull and they are looking for still lower prices in the near future.

Stove plate, however, shows a reversed situation and is very scarce and hard to procure and is still being quoted at a high firm figure of $32 per ton. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06
Heavy copper	0 17
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Tea lead	0 03

Some Shipments Sheets Coming, Still Scarce

Toronto.

SHEETS AND PLATES. — Although some have been fortunate enough to secure light supplies of sheets and plates, the markets are said to be practically bare of supplies as shipments that have come forward are not adequate to relieve the great famine which has prevailed for some time back, it is stated.

Shipments of freight continue to be very tardy; especially is this true of some sections on the United States railroads. Some have it that the supply of freight cars for local deliveries has become more or less limited and the situation has become fairly tight, and some have found it necessary to wait several days before securing their required number.

The demand for sheets, if anything, is greater than ever and in some cases manufacturers have had to slow up in their production on account of the lack of material.

The following quotations are published here merely as a guide, and while these prices are fairly standard many are charging premiums on account of having to go into the local markets or where they have been fortunate enough to secure their shipments from the mills for which they have been required to pay premiums:

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
3-16 inch plate	....	9 75
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$11 50	$12 00	$12 25
U.S. 28	11 45	11 70	11 45	11 85
U.S. 26	11 15	11 40	11 15	11 55
22 and 24	11 00	11 25	11 00	11 40
18 and 20	10 70	10 95	10 70	11 10
16	10 70	10 95	10 70	11 10
12 and 14	10 55	10 20	10 55	10 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Boiler Tube Deliveries Tardy; Some Scarcity

Toronto.

BOILER TUBES.—Some scarcity is being felt for boiler tubes. Especially is this so of some sizes, and while it is true some jobbers have fairly heavy stocks there are some who state their stocks are becoming very low and who have considerable difficulty in replacing certain sizes.

This situation is attributed to a shortage of skelp, which in turn has very seriously affected the manufacture of this commodity. The tie-up of the freight transportation has also been a factor, it is stated, and supplies have been moving very slowly from their sources. The following are the present quotations on boiler tubes:

BOILER TUBES—	Seamless	Lapweld
1 inch	$23 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	98 00	64 00

Corrugated Sheets Scarce; Situation Not Improved

Toronto.

CORRUGATED SHEETS. — Shipments of raw material are still very tardy and manufacturers state that there is very little improvement shown in the situation regarding the manufacture of corrugated sheets, and many directly concerned seem very anxious for the future.

Manufacturers state the demand is a very good one and that a heavy percentage of this is for orders which should have been delivered several months previously, but owing to the conditions which have prevailed for the past few months these orders have not been filled.

The recent tie-up on the United States railroads has caused great inconvenience to many and manufacturers state the reaction is still being felt and they are having difficulty in securing cars to transport their material, and in some cases this has been reflected on local freight deliveries, and the past few days has shown a decided tightening up on the available freight car supply.

Owing to the great difficulty in securing supplies, as well as premiums that have to be paid in order to secure immediate delivery, many are charging premiums over the prices shown herewith, although these prices generally are acceded to be the booking or standard prices. However, manufacturers state it is often necessary for them to go into the local markets and pick up materials in small quantities in order to fill their orders, and they are often required to pay premiums for these pick-ups. The following are the present quotations:

	Per 100 square feet	
Corrugated Sheets—	Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equallized on Montreal.

Discount, 7½%.

Tin Prices Down ½c; Copper Much Stronger

Toronto.

INGOT METALS. — With the exception of tin most ingots shown on the following list are rather firm; tin, however, has declined ½ cent per lb. Lead remains unchanged, although stocks are rather light. Copper has a considerably stronger tone and spelter is very firm.

TIN.—A weaker price has again been made in tin this week, the quotation having declined ½ cent per lb., making a new price of 59½ cents per lb.

COPPER. — Although no change has been made in the price of copper, the market has a much stronger tone and the tendency is again upwards. The present price is unchanged and is quoted at 24 cents per lb.

SPELTER.—The present quotation of 10½ cents per lb. on spelter is very firm, although no change has been made this week. The demand is fair, while stocks are none too heavy.

LEAD.—Stocks continue to be rather light, although the situation regarding price shows no change, 10½ cents per lb. still being the quotation.

ANTIMONY.—A quiet period is prevalent for antimony and stocks continue light. The present quotation is from 12½ cents to 15½ cents per lb.

ALUMINUM.—Practically no change is shown on aluminum; the price is also stationary, still being quoted at 37 cents per lb.

LONDON MARKETS

LONDON, July 8.—Higher prices have again been made on important hardware lines and the tendency throughout is for higher quotations. McClosky wire stretchers have been marked up. Alarm clocks are also higher, mirrors with white frame, and Mrs. Potts iron handles all have higher quotations. Poultry netting supplies are still light. Wire nails are very scarce and few shipments are coming forward. This situation also applies to O. and A. and other fence wire.

Business continues excellent. Summer lines are still in big demand, and are moving out freely. Harvest tools, lawn hose and fittings, black wire cloth, rope, etc., are all enjoying a good buying movement.

Jobbers are much concerned for deliveries of many hardware commodities and state their warehouse stocks are becoming very low.

Collections continue good.

McClosky Wire Grips Cost Dealers $1 Each

London, Ont.

WIRE GRIPS.—New and higher revisions have been made on the prices of McClosky fence wire grips and the new price is being quoted at $1 each.

This is said to be due to the situation which has developed in regard to nearly all iron and steel products; and the ten-

dency for nearly all lines made of these materials seems to be for continued higher prices.

Mrs. Potts' Iron Handles Now Cost $2.10 Per Doz.

London, Ont.

IRON HANDLES.—New higher revised prices have again been made on iron handles of the Mrs. Potts pattern and the japanned are now quoted at a new price of $2.10 per doz.

Common White Frame Mirrors Have Advanced

London, Ont.

MIRRORS. — The scarcity and high price of glass, as well as the advanced cost of lumber and other materials, are said to be the cause for higher prices on mirrors. Higher labor costs are also said to be a factor for higher prices. The new higher quotations on the common white frame are as follows:

Mirrors, with common white frames—6 x 9 in., $5.25 doz.; 7 x 9 in., $5.75; 8 x 10 in., $6.75; 9 x 12 in., $8.50; 10 x 14, $10.25.

Lookout Alarm Clocks Marked Up to $2.35 Each

London, Ont.

CLOCKS.—Further revision has been made in alarm clocks, and needless to say the new prices are considerably higher than the former quotations. The Sleepmeter is now quoted at $2.50 each and the Lookout at $2.35 each.

Wire Nails Scarce; Quoted at $6 Base

London, Ont.

NAILS.—Very little improvement has been shown in the situation regarding wire nails, and jobbers state their stocks are still very light. The recent tie-up on the railroads has been the cause of a great shortage of coal and other fuel and as a result some mills have had to close down while other mills have been seriously handicapped. This, on top of the already adverse conditions faced by the manufacturers, may be the means of greatly delaying any early relief that was being looked forward to.

The quotations on nails are very firm, although no change has been made in the price. The wire is being quoted at $6 base and the cut at $7.50 base.

Rope Prices Steady; Remain Unchanged

London, Ont.

ROPE.—A fair demand is being made for all kinds of rope and in some localities a heavy demand is being made for hay and harvest rope of all kinds for harvest needs. The present quotations are fairly steady and while no lower prices are immediately looked for, many would not be surprised to hear of lower quotations in the near future. However, whether this will be the case remains to be seen as there are a great many factors bearing on the situation. The pure manila is still being quoted at 35½ cents per lb. base, while the Beaver manila and New Zealand hemp is quoted at 28 cents per lb. base. The sisal is still quoted at 22½ cents per lb. base.

Fly Destroyer Has Big Demand at Present

London, Ont.

FLY OIL. — The recent changeable weather, raining one day and very hot and bright the next, has been very favorable to swarming flies and other insects, and as a result has created and stimulated a very great demand for fly oil, and jobbers state they are having a big sale of this line at present. The Dr. Williams is quoted at 1 gal. size, $12 per doz., and the half gal. size, $8 per doz. The Crenoid one-gal. sizes are quoted at $11 per doz., and the half-gal. sizes are quoted at $7.75 per doz.

Lawn Mower Sales Show Slackening Off

London, Ont.

LAWN MOWERS.—Some state their stocks of lawn mowers are becoming rather light, although it is believed that the demand for lawn mowers has considerably slackened with the hot weather. Fair orders are still going out. The Daisy, Star, Woodyatt and Empress are still being quoted at 25 per cent. discount off the list.

Hay Forks and Field Hoes Are in Heavy Demand

London, Ont.

HARVEST TOOLS.—A very heavy demand is being made for nearly all kinds of harvest tools and jobbers state they are very well satisfied with the volume being handled.

Hay forks and field hoes are moving especially brisk and the demand for these lines is seasonably heavy. The present price remains firm and no change has been made, the quotation still being quoted at 50 per cent. and 10 per cent. off the list.

Black Wire Cloth Prices Firm at $3.64 Per 100 Ft.

London, Ont.

WIRE CLOTH.—The demand for wire cloth continues to be very satisfactory one and good volumes are still moving, some are of the opinion that owing to higher prices being charged for screen doors and windows that many are making their own screen windows or repairing their last year's doors, etc. This is attributed to the extra heavy demand which has prevailed throughout the season. The price remains very firm, although no change has been made. The painted black continues to be quoted at $3.60 per hundred square feet and the galvanized at $4.75 per hundred square feet.

Poultry Netting Stocks Still Continue Light

London, Ont.

POULTRY NETTING.—The stocks of poultry netting continue to be very light and jobbers state they are daily having more difficulty in securing supplies. Some are entirely sold out of some sizes and the stock is limited to several of the remaining sizes. Manufacturers extend little hope for immediate delivery, especially since the recent tie-up on the railroads which has caused such a shortage of coal and fuel, which in turn has resulted in a serious handicap for some of the mills. In some cases they have been forced to close down.

The present quotations are very firm, although no change has been made. The Canadian 2-inch mesh is still quoted at net list and the 1-inch mesh is quoted at an additional 5 per cent. to the list.

Cold Water Paints Moving Out Freely

London, Ont.

COLD WATER PAINTS. — Despite the shortage of whiting a good volume of business has been handled on cold water paints of nearly all kinds and the demand continues to be very satisfactory. Manufacturers are very optimistic for the future and are of the opinion that business will continue good for this commodity for some time to come. The present quotation on Alabastine is: 5 lb. packages 48 cents each and the 2½ lb. packages 25¼ cents each. The Decotint and Coralite in 5-lb. packages $9.50 per hundred lbs. The Frecota, $7.80 per hundred lbs., and the Perfecto, $7.50 per hundred lbs., while the Muresco is still quoted at $9.50 per hundred lbs.

Paris Green Blowers Sell at $10.50 Per Doz.

London, Ont.

BLOWERS.—The present demand for dry Paris Green blowers is very satisfactory and is in line with the satisfactory sales which are being made for Paris Green. The number 108 dry Paris Green blower is quoted at $10.50 per doz.

Many Lines of Paris Green Sprayers Moving

London, Ont.

SPRAYERS are also having a very good demand, the changeable weather during the past few days has been very favorable to the growth of bugs and other insects and has created and stimulated a very heavy demand for Paris Green and appliances of all kinds for using. Some of the better known lines are quoted as follows:

Sprayers—Tin Wall, $6.00 doz.; Glass jar, $9.00 doz.

Compressed Air—Sturdy Galv'd, $6.15 each; Eureka, No. 110, Galv'd, $7.00 each; Eureka, No. 111, Brass, $9.50 each.

Rubber Hose Sales Continue Heavy

London, Ont.

RUBBER HOSE.—A satisfactory demand has been current for rubber garden hose of nearly all kinds and nearly all in the trade are very well satisfied with amount of business being handled. Manufacturers state there is a ten-

dency towards scarcity and if the present demand keeps up some sizes may be hard to procure. The following are some of the present quotations on some of the better known lines:

3 ply x ½ in., 14½c ft.; ⅝ in., 17c ft.; ¾ in., 19c ft. 4 ply x ½ in., 16c ft.; ⅝ in., 19½c ft.; ¾ in., 21c ft. 5 ply x ½ in., 18c ft.; ⅝ in., 21c ft.; ¾ in., 23c ft. Corrugated, ½ in., 23c ft.; ⅝ in., 26c ft.; ¾ in., 29c ft.

Corrugated in 500 ft. reels, list less 5% discount.

Hose Nozzle Sales Heavy; Jobbers' Stocks Light

London, Ont.

HOSE NOZZLES.—In line with a big demand for garden hose of nearly all kinds the sales of nozzles are very satisfactory, although jobbers state they have great difficulty in supplying the demand owing to the shortage and difficulty of securing their supplies from the manufacturer; the Canadian Gem is quoted at $9 per doz. and the Genuine Gem is quoted at $13 per doz.

Linseed Oil Prices Marked Down 13c Gal.

London, Ont.

LINSEED OIL.—Although the stocks of linseed oil are still rather light, crushers state that more seed is coming to hand and that the great scarcity which prevailed previously has practically been relieved.

This week a lower price of 13 cents per gal. has been made and the tendency is for still lower quotations. The demand is said to be a very heavy one and notwithstanding the fact that the tendency is for lower quotations in the near future there are a great many buyers daily in the market for supplies for immediate shipment. The following are the present quotations:

Linseed Oil—	Raw Gal.	Boiled Gal.
1 to 2 barrels	$2 37	$2 40
3 to 5 barrels	2 36	2 39
6 to 9 barrels	2 34	2 37

Less barrels add 15c gal.

Turpentine Prices Drop 15c Per Gallon

London, Ont.

TURPENTINE.—A very good demand is being made for turpentine and notwithstanding the tendency for lower prices many are buying in fairly heavy quantities for immediate delivery. This is believed to be a result of the recent famine which prevailed and in many cases the stocks have become so low that dealers are forced to replenish even at the higher prices.

Decline of 15 cents a gal. has been made this week and according to reports from the South the tendency is still for lower prices. The following are the present new lower quotations:

Turpentine	Imp. Gal.
1 barrel lots	$3 10
2 to 4 barrel lots	3 09
5 gallons	3 25

Summer Putty Sales Continue Satisfactory

London, Ont.

PUTTY.—A very heavy seasonable demand is being made for putty and jobbers and manufacturers state they are well satisfied with the business that is being offered for this season of the year. The scarcity of English whiting has not altogether been overcome, although it is believed that some fair shipments have come to hand recently. Many are in hopes that larger quantities of this grade of whiting will come forward so that manufacturers will be able to catch up with their orders before the heavy demand which is expected in the fall season.

The present quotations are very firm, although unchanged, and are as follows:

Standard 100-lb. drums, per 100 lbs., $8.30; 25-lb. drums, $8.55. Pure 100-lb. drums, $10.80; 25-lb. drums, $11.05.

White Lead in Oil Has Heavy Demand

London, Ont.

WHITE LEAD IN OIL. — A very heavy demand is being made for white lead in oil and good volumes are going out to the trade. Jobbers state that the demand is so heavy and persistent that at times they find difficulty in securing prompt deliveries, and some state they have had to wait several days before they could get supplies that otherwise should reach them immediately. There seems to be a very heavy export demand for white lead in oil. England has been in the market as a larger buyer, a situation which is believed to be due to the climatic conditions whereby it is necessary to paint all buildings as a preservative, and due to the great war activities this work had fallen greatly behind. Now that all are settling back to peace conditions property owners there are busily engaged in putting their property in a good state of repair, it is stated.

The present quotation is firm, although no change has been made. The pure in ton lots is being quoted at $20.45 per hundred lbs. and in less than ton lots $20.80 per hundred lbs. The Elephant brand is quoted at $20.95 per hundred lbs. in ton lots and $21.30 per hundred lbs. in less than ton lots.

German Iron and Steel Prices to Drop

Berlin.—German iron and steel prices will probably be again reduced on August 1, as a meeting of the Iron Association is called at Dusseldorf for the twenty-fifth to consider a new schedule. In view of the lower cost of imported ore and lack of orders, and with extensive price-cutting by individual producers, interested circles expect that a majority will be found for a new reduction.

The industry is concerned, however, over the possibility of increased freight rates, the Railway Tariff Commission having attacked the problem of upward revision of iron and steel freight schedules to relieve the greatly-increased deficit of the state railways.

The League of German Industry strongly protested against the commission's action.

Glass Stocks Coming Better; Price Unchanged

London, Ont.

GLASS.—Stocks of window glass are said to be light, although the scarcity which has prevailed for some time past has been slightly relieved, and while it is true that very little glass has been coming from the United States factories, the shipments from Belgium have been very favorable, and many express great satisfaction over the timely arrival of this Belgian glass, which came at a time when the outlook for future deliveries for orders in preparation for the heavy demand in the fall season looked very dull.

The price on glass is very firm, although unchanged, and the single and double diamond continues to be quoted at 15 per cent. off the list, while the cut lights are quoted at 40 per cent. off the list.

Further Advance on Felt and Building Paper

London, Ont.

BUILDING PAPERS.—Further revisions have been made on the price of building paper of many kinds, and in line with the changes being made in other kindred commodities are of an upward nature. The following are some of the new quotations:

	Per roll
Cyclone brand, dry	$1 65
Cyclone brand, tarred	1 75
Joliette brand, dry	1 25
Joliette brand, tarred	1 30
"Anchor" brand dry sheathing, No. 1	1 65
"Anchor" brand dry sheathing, No. 2	1 25
Heavy tarred straw sheathing	7 75
"Stag" brand sheathing (Surprise)	1 30
Empress dry sheathing	1 85
Heavy dry straw sheathing	7 75
"Anchor" brand tarred sheathing, No. 1	1 75
"Anchor" brand tarred sheathing, No. 2	1 45
	Cwt.
"Spruce" sheathing, 36 in. and 72 in.	$10 50

All prices are F.O.B. Montreal and Toronto.

Paris Green Prices Advance 10c Per Lb.

London, Ont.

PARIS GREEN.—A heavy advance has been made on Paris green prices, the new quotations being about 10 cents per pound higher. The manufacturers state that a heavier demand has been made than they had stocks to meet, and as a result were forced to buy materials on a higher market. The following are the present quotations:

PARIS GREEN—	Per lb.
Petroleum barrels	0 62
Arsenic kegs	0 62½
50 and 100-lb. drums	0 62
25-lb. drums	0 64
1-lb. papers	0 66
1-lb. tins	0 [illegible]
½-lb. papers	[illegible]
½-lb. tins	0 70

WINNIPEG MARKETS

WINNIPEG, July 8—Higher prices have again been made on many important hardware commodities. Lumbering tools have sharply advanced and peavies, cant hooks, pickaroons, pike poles and skidding tongs, etc., have higher quotations as a result. Beaver board has also been marked up. Bolts, nuts and washers, wood screws, door and cupboard locks are all on the list of higher price changes.

Heavy lines of hardware are still very slow in delivery. The tendency is that until conditions have bettered themselves all lines of heavy hardware will be difficult to procure. Light hardware seems to be coming through more readily, due to the fact that some of the manufacturers are catching up with their booked orders and with this in view dealers can look forward to better deliveries on staple articles. Business is reported very good all through the West, due to the condition of the crops, which are reported to be the best since 1915.

Jobbers state that collections have stiffened up considerably and have recently become slow, a situation which is partly attributed to the banks tightening up with credits and the heavy stock the retail dealer is carrying.

Linseed Oil Situation Shows No Improvement

Winnipeg.

LINSEED OIL.—The demand for linseed oil continues to be a heavy one, and stocks continue to be fairly light for this season of the year, a situation which is said to be mainly due to the shortage of No. 1 flax seed.

The present quotations seem rather firm, although the tendency is downward and lower quotations are being looked for in the near future.

The present quotations are as follows:

Raw Oil in barrels, gal.	2 75
Boiled Oil in barrels, gal.	2 78

Less than barrels, 10c additional per gallon.
5 gal. containers, $1.00 each.

Beaver Board Prices Advance $3.50 M Feet

Winnipeg.

BEAVER BOARD.—A stiff advance has recently been made on beaver board, the new quotation being approximately $3.50 per 1,000 feet over former quotations. The new price is quoted $54 per 1,000 feet and in 5,000 feet lots the price has been marked up to $53 per 100 feet.

An Advance of 50c Cwt. Has Been Made on Nuts

Winnipeg.

NUTS.—In line with other advances in iron and steel products, nuts have also come up for a further revision of price, and new and higher quotations are the result.

Some of the new quotations are as follows:

Nuts advance 50 cents on list.

Square in small lots, blank	5 25
Square in small lots, tapped	5 75
Hexagon in small lots, blank	5 50
Hexagon in small lots, tapped	6 00

Case lots, all styles, 1c lb. less.

Wrought Washers Have Advanced About 10%

Winnipeg.

WROUGHT WASHERS.—A further lowering of the discount on wrought washers has again advanced the price approximately 10 per cent. This latest advance is said to be due to the situation which has developed in iron and steel as well as the recent freight embargo which so seriously tied up deliveries of fuel and raw materials.

The following are the new quotations:

WROUGHT WASHERS

	Case lots	Less
3-16 inch	$22 00	$22 50
¼ inch	19 30	19 80
5-16 inch	18 10	18 60
⅜ inch	16 75	17 25
7-16 inch	15 70	16 20
½ inch	15 10	15 60
9-16 inch	14 95	15 45
⅝ inch	14 80	15 30
¾ inch	14 65	15 15
⅞ inch	14 50	15 00
1 inch	14 50	15 00
1⅛ inch	14 50	15 00
1¼ inch	14 80	15 30
1⅜ inch	14 80	15 30

Sporting, Garden, Paint Supplies Move Freely

Winnipeg.

SEASONABLE HARDWARE.—There has been a heavy persistent demand for nearly all lines of summer goods, sporting goods of many kinds, and particularly baseball and tennis lines, have been moving very freely and some have difficulty in securing sufficient supplies. Garden tools of many kinds are also in good demand. Brushes and brush accessories, paints, oils, varnishes and many general household requirements are all moving very freely.

Higher Revised Prices on Builders' Hardware

Winnipeg.

BUILDERS' HARDWARE.—Practically all lines of interior builders' finishing hardware have been advanced in price. Conditions do not seem to improve, and it is a fact that the reverse seems to be the case and the tendency is for further higher prices. Some of the better informed claim the present quotations show no signs of improvement for some time to come due to the manufacturing conditions which at present exist.

The recent advance is general and includes drawer locks, cupboard locks and inside sets, etc.

Flat Head Iron Wood Screws 62½% Off List

Winnipeg.

WOOD SCREWS.—Another basic hardware commodity affected by recent higher price advances is bright iron flat and round head wood screws. The reason given for this latest higher revision is the shortage of raw material, coupled with the scarcity of fuel as well as the advancing cost of manufacture.

The following lower discounts are now in effect: Bright iron flat head screws, 62½ per cent. discount from the list; bright iron round head wood screws, 60 per cent. discount from the list.

Higher Revised Prices Again Made on Bolts

Winnipeg.

BOLTS AND NUTS.—Following advances made on many other important basic hardware commodities manufactured from iron or steel, a revision has again been made on bolts and nuts and higher quotations are current as a result.

Some of the new quotations affecting the better known styles and sizes are as follows:

BOLTS AND NUTS

Carriage, ⅜ and smaller up to 6 inches, 10% advance on list.
Do., over 6 inches, 20% advance on list.
Do., 7-16 and larger, 20% advance on list.
Machine, ⅜ and smaller up to 4 inches, net list.
Do., over 4 inches, 20% advance on list.
Do., 7-16 and larger, 20% advance on list.
Plow, 10% advance on list.
Sleigh Shoe, 20% advance on list.

Prepared Paint Prices Firm and Unchanged

Winnipeg.

PREPARED PAINT.—In spite of the higher prices being charged for paint this season in comparison with those of last, paint manufacturers state that business has been exceptionally good this season and so far a record season has been experienced by a large majority of dealers.

There seems little probability that changes in prices will be made, and manufacturers point out that the recent price changes were made when linseed oil, turpentine and other ingredients were much lower, and notwithstanding the tendency for lower prices of turpentine and linseed oil that indications point to no lower prices on these commodities than prevailed at time of last advance.

The present prices are as per quotation pages.

Dry Colors Scarce; Greens Advance 25%

Winnipeg.

DRY COLORS.—The scarcity of some dry colors has been very pronounced and higher prices have been made on some

lines of green as a result, the new quotations approximating an advance of 25 per cent.

The demand for nearly all colors has been a very heavy one throughout the season and some have found difficulty in securing sufficient supplies.

Putty Prices Steady; Remain Unchanged

Winnipeg.

PUTTY.—Summer sales of putty have been seasonably heavy and those in the trade seem well satisfied with volume moving. The scarcity of English whiting has been a considerable detriment to manufacturers and some have light stocks as a result.

The present quotations on putty are very firm and are holding steady, and unless some unforeseen factor should arise jobbers are of the opinion that no change will be made in the near future.

The following are the present quotations:

PUTTY—

	Per 100 lbs.
100 lb. irons	8 70
25 lb. irons	9 30
1½ lb. tins, per lb.	0 16¾

$1 *Now Standard Price for 5-Gal. Containers*

Winnipeg.

CONTAINERS.—The wide and varied range of prices on containers for linseed oil and turpentine has been cause for jobbers to standardize their containers, making a standard price also possible. The five-gallon size container will now be charged at a standard price of $1 each.

Differential on Linseed Oil; Turpentine 10c Gal.

Winnipeg.

NEW DIFFERENTIAL.—Jobbers and importers state that due to the advanced cost of handling and hauling, etc., that it is necessary for them to advance the differential on linseed oil and turpentine to 10 cents per gallon.

This, they state, may be insufficient to cover the costs and there is a possibility of this price being revised upwards and a higher price of 15 cents per gallon being charged.

Turpentine Stocks Light; Price Quoted at $3.95 Gal.

Winnipeg.

TURPENTINE.—Stocks of turpentine, although showing considerable improvement, are still light and shipments are still slow on account of the freight tie-up on the railroads and the shortage of freight cars and tanks, etc.

The demand for turpentine, however, is a heavy one, and many buyers are in the market, notwithstanding the high prices current. The present quotation is fairly steady, although there is a tendency for lower quotations in the near future.

The present price is quoted at $3.95 per gallon in barrel lots, and in less than barrel lots an extra of 10 cents per gallon is being charged; five gallon containers are priced at $1 each.

Building Papers Have Again Been Advanced

Winnipeg.

BUILDING PAPER.—Further advances have again been made on building paper. The Anchor brand, dry, is now quoted at $1.40 per roll; tarred, $1.50 per roll; Sunrise, dry, $1.25, and tarred, $1.45 per roll; while the Jubilee is quoted at $1.60 per roll for dry, and $1.80 per roll for tarred.

Oster Stocks and Dies Advance About 25%

Winnipeg.

STOCKS AND DIES.—Higher revised quotations are frequently being made on tools of various kinds, due to the situation which has developed in iron and steel, and Oster stocks and dies have also been affected, having been revised upwards to the extent of about 25 per cent. over former quotations.

Pocket Knives and Table Cutlery Prices Advance

Winnipeg.

CUTLERY.—Higher quotations have been made on pocket knives and table cutlery. The advance is general and a range of about 5 to 20 per cent. has been added to former quotations.

Stillson Pipe Wrenches Are Marked Up 10%

Winnipeg.

PIPE WRENCHES.—New and higher prices have been made on pipe wrenches, and the genuine Stillsons have been advanced as a result. The new quotations are approximately 10 per cent. higher.

PITTSBURGH MARKETS

PITTSBURGH, July 8.—The sheet and tin mill wage matter has been settled, and there is no strike. As noted in our report of a fortnight ago, the Amalgamated Association broke with the sheet and tin plate manufacturers who had formerly recognized the union, the issue being an amendment proposed by the union which would enable it to use its hold on the hot mill labor to induce workmen in other departments to join by being able to promise such men, only ten being required to form a new lodge, that they would use their previous strength to secure signatures for new and additional scales. When the Atlantic City conference broke up, June 14, President Tighe of the Amalgamated Association stated that if an adjournment were had it would be to a date not later than the first Tuesday in September, which of course meant that the men would walk out July 1st, as the existing scale agreement expired June 30. However, probably on account of pressure of the members, the Amalgamated Association officials reconsidered the matter and called for another conference, to which the mills acceded. The conference was in session at Columbus, June 30, when the Amalgamated Association officials telegraphed the lodge that the men should continue at work, and an agreement was reached late last Thursday. At the Standard Tin Plate Company plant, Canonsburg, Pa., the men walked out as a local president refrained from acting on his telegram. A few mills closed because the management had made arrangements in accordance with the common expectation that the walkout would be attempted. Otherwise the mills are working the same as formerly.

Besides the amendment to the preamble, the men had demanded a 20 per cent. increase in basis rates, a six-hour shift instead of the eight-hour shift that has been in force for many years, and a great many other things, but the mills made only small concessions. Outside of some trivial matters the changes were as follows: In the tin mill scale a spell hand is introduced, not a regular member of the crew, who will help the catcher part of the time and help in other ways, the man to be paid about 50 per cent. as much as the catcher, while the catcher's rate is reduced 10 per cent. The increments in the sliding scale rates, when tin plate is selling above the $3.50 base, are to be 1 1-3 per cent. instead of one per cent. Thus when the realized average on tin plate shipments is $7.40, as it was at the last bi-monthly settlement, the men would receive 87¾ per cent. above the base rates instead of 78 per cent. above. In the sheet scale, an extra spell hand is also introduced, to be paid also by the company, but not to be considered a regular member of the crew. In each case, the extra man will conduce to greater output, this benefiting the men. The wage cost per ton will be increased between $1 and $2 per ton, but this may be made up to the management by increased output.

The difference between the American Federation of Labor, which contemplated by its action at the Montreal convention a fresh effort to organize the iron and steel industry, and the Amalgamated Association, which held that it should have sole charge of any organizing of the iron and steel industry, was recently settled between the two bodies on the compromise basis that if the Federation committee were formed by the various unions, the Amalgamated Association would be accorded a 51 per cent. representation on it. The manufacturers believe, however, that this arrangement is made simply to save the faces of the Federation management, and that the committee is not likely even to be formed. The present outlook, therefore, is that little, if any, attempt at organizing will be done and that the iron and steel industry will remain non-union.

Now is Time to Paint Public Buildings

School and Church Boards Now Considering Renovations for the Year—Local Hardware Merchant in Position to Stir Up Local Sentiment in Favor of Protecting Public Property—Big Field for Paint Trade During an Otherwise Slack Season

PAINT business from church and school boards is an important phase of the paint business in any local community about this time of year. The approach of the summer holidays, when school buildings are left free for repairs, renovation and repainting, opens up an opportunity for the sale of various lines—exterior and interior paints, floor varnishes and shingle stains. And in the case of churches there are less functions being carried on in connection with which it is necessary to use the church building during the summer months, and there is therefore less inconvenience caused by painting during the summer than at any other time of the year.

Local influence can have a distinct bearing on both church and school boards which are inclined to neglect this most needful means of protection and upkeep. Whatever excuse the individual members of both church and school board may have for neglecting to repaint their own property, their trusteeship of the property of others should not permit them to neglect painting and re-painting with sufficient frequency to maintain the prolonged service of such properties.

Should Protect Public Property

The need for painting from the standpoint of protection and preservation can be pointed out effectively to the representatives of school and church boards who are responsible for upkeep. To this end the amount of advertising of an educational nature now being done can be linked up with the dealer's own influence. Trustees have an obligation to the community which elected them, and once the necessity of painting has been brought to their attention they cannot pass it up as they might in the case of their private property.

Travelling through the country one can readily see that the protection of such public property with paint has not been given the attention it should. Especially was this the case during the war period and the year immediately following. Now is the time when campaigns pointing out the wastefulness of continuing this practice are having their greatest effect and it is, therefore, timely for the dealer to help to counteract this neglect. The creation of a little public sentiment on the question of painting public property frequently enough to keep it protected will soon bring any governing board to a sense of its responsibility. It should be done on a sound business basis as would be done with the private individual.

2% Deterioration from Lack of Paint

Weather, moisture and climatic conditions attack buildings with deteriorating results that amount up to at least 2% per annum. A few gallons of paint applied every few years will reduce the percentage of loss to one-half of one per cent. and the coffers of the public would therefore benefit in the end by the other 1½ per cent.

In addition to the direct business secured by the paint dealers who are successful in bringing local church and school boards to a realization of the value of such action, the moral effect is good in a community. One hardware dealer stated to Hardware and Metal recently that there is a very contagious element in the sale of paint which can be utilized to good advantage. He meant that once a house on a street was painted there were many others who would follow the lead rather than have their homes look shabby in comparison. The painting of the local school and church would be a big step in starting a painting boom in any town. Every city, town and hamlet maintains a degree of local pride in whatever concerns its public welfare. Townspeople take their friends in motor cars through the town now, and the increasing use of the automobile brings many people to the town located on a popular tourist road. Each community is being given the "once over" more than it has ever experienced before, and this is another reason why due attention should be given to the painting of public properties as well as to private homes.

Rouse Local Pride

The dealer might say, "What's the use of all this?" We point out that the rousing of local civic pride is bound to directly or indirectly influence the citizens of the community in the better upkeep and painting of their private property, and if the town gets a good reputation it is likely to attract additional settlers and visitors—all of whom bring business to the local merchants.

Paint to Maintain Sanitary Conditions

The necessity of maintaining good sanitary conditions in schools and churches and other buildings of a more or less public nature, is another important phase of the matter. School floors should be treated at every holiday session. Softwood floors should be painted and hardwood floors should be either oiled or varnished. The sealing up of the floors with whatever finish is required not only prevents much wear but makes it easier for them to be kept clean and sanitary. The walls of school rooms should be treated with a washable flat tone paint in colors that will have a helpful, restful influence both on teachers and pupils.

Now is the time to get after this business. School boards are estimating the amount of repairs and renovation necessary for the summer and are now in the most receptive mood for suggestions. The local paint dealer is the best one to make the suggestion and if it is necessary to arouse local sentiment, who is in better position to do so than the average hardware dealer who is held in high esteem in his community.

To give an idea of the business that can be developed on buildings of this kind there are upwards of 26,000 public schools throughout Canada in addition to various normal schools, collegiate institutes, private academies, etc. There are upwards of 12,000 church buildings. Both figures indicate a large volume of prospective business by the advancing of the argument to paint as a means of preserving public property.

Subjects for Summertime Ads.

As a summertime painting appeal one dealer advertises the fact that

PAINT—

Preserves buildings.
Protects them from the ravages of heat and dampness.
Is good insurance against depreciation.
Beautifies the building.
Denotes thrift, pride and good business judgment.

These make good subjects for appeal to your readers in the paint advertisements you will be running during the summer months to stimulate business in the paint department.

"Save the surface and you save all" *Paint & Varnish*

Some Suggestions for Brush Displays

Eastern Ontario Dealer Thinks Power of Suggestion is Very Effective in Brush Selling—Enhances Effect of Paint Display to Show Brushes in Conjunction.

ON a recent trip through Eastern Ontario a representative of Hardware and Metal had an interesting talk with a dealer of many years' standing who has sold hundreds of brushes and who has himself made much of the display feature in selling campaigns. He briefly outlined his ideas in stimulating sales:

"I take sheets of beaver board and tint them with a delicate shade of water paint," he stated, "preferably a cream or buff shade, and fasten a variety of brushes against the board by using small snare wire. By placing the beaver board flat on a table or on the floor it is easy to arrange the brushes in circular form or in a square or oblong shape. By using a small pair of pliers, the wire, inserted through small holes made with a badawl in the beaver board, may be twisted and drawn taut, so that when I lift the beaver board the brushes hold fast in position. They make an effective addition to a window display."

The plan carried out by this dealer was to arrange the panels so as to fit in at the back of the window so as to just fill up the background. Dividing strips may be placed at the back where the divisions come and there is little then to be done. By making up these units beforehand the window dressing is readily completed.

Brushes Part of Every Paint Display

"I always make brushes an integral part of paint window displays," said this dealer. "They are effective for this and do not in any sense detract from the impression which it is desired to make regarding the paint itself. As a matter of fact, in my opinion, they improve every showing of paints and painting materials which is made.

It was pointed out that it is important that brushes be placed in the windows and on the panels with care. For instance the bristles ought to be placed so they will hold a natural position. They should be kept from brushing against the glass of the window so that the bristles will not get out of shape. He emphasized the importance of keeping the brush stock in the best of condition always in order to get the fullest profit from sales.

Where brushes are being displayed against a board wall or backing it may be necessary sometimes to drive small nails through the handles, but in such cases the dealer pointed out that care must be taken to use a small brand so that the brush handle will not be split or otherwise disfigured.

"In employing brushes in the forward part of the display," he stated, "these may be tastefully arranged near the glass. Sometimes it is well to use a plate glass shelf on a small pedestal for small lettering and camel hair brushes. At all times I have found that the power of suggestion is very effective in stimulating sales in the brush department and the goods must always be shown to the best advantage."

No Precipitate Decline in Paint Prices

Paint Manufacturers Endeavoring to Bring Production More Nearly Equal to Demand—Paint Prices Will Decline Steadily with Plenty of Notice.

LABOR in many branches of industry continues its playing of both ends against the middle in its attempt to find a wider spread between wages and the cost of the commodities labor produces," says the American Paint Journal. "Strikes at this time may result in an increased wage; but they will not bring down the cost of living. It will be admitted, generally, that the abnormal prices of farm and factory products have been brought about by an actual shortage of goods in relation to demands, and the one method of lowering prices is to still the demand or increase the production, or both.

"Within the past thirty days there have been some sharp cuts in commodities by some of the larger merchants of the country, and while these reductions were not of a permanent nature, they formed a unit in the price decline which, in some lines, has been prevalent for more than a year.

"After having made a careful survey, the National Bank of Commerce of New York calls attention to the downward trend of the livestock market, showing that from July to December last year the price of hogs, for instance, declined more than nine dollars, recovered slightly and has remained fairly steady since last January. Attention is called also to the cattle market, showing that it declined from October, 1919, to last May.

"At this time there practically is no demand for wool. Farmers in many sections of the country are holding, many of them saying because of the low market, and others declaring they can get no offer at all for their spring shearings.

"These figures serve to show that production has caught up with demand, or, at least, they show that production and demand are more closely aligned.

"It is only fair to presume that the relationship of production and consumption of other commodities is such that the tension is being relieved, and that the market will slowly decline.

"The price of some commodities that play their parts in the manufacture of paint is far below that of war time. Zinc ore, for instance, sold for more than one hundred dollars a ton during the war, and with the signing of the armistice slumped off to $45, the present price. With high wages and high cost of all mining equipment, zinc operators are finding difficulty in making both ends meet. This is due to a production that exceeds the demand.

"At this time every paint manufacturing company in the country, retarded by slow delivery of raw materials, is doing its best to make its production more nearly equal the strong demand. There has been a real shortage of raw materials, which, also, has retarded paint production. But occasionally there comes a report to this office that some paint company has splashed through the maze of orders and announced its ability to accept new business for immediate delivery. It's an indication that gradually we are approaching a closer relationship between production and demand.

"Steady price declines in other commodities are not to be considered lightly. Yet there is reason for the belief that there will not be a precipitous decline in the paint price. Instead, it is believed generally that price declines will come steadily when they do come, with long shadows foretelling their approach."

BOECKH'S
Steel Grip Rubber Set Brushes

RUBBER SET

RUBBER SET and Steel Grip, these splendid brushes keep their shape and are forever free from the annoying, aggravating shedding of bristles that makes so many brushes only "one time sellers" at the best.

CHINA BRISTLES

With long-bristled brushes long wear and serviceability are assured. This is a noteworthy point of special interest to your customers. You remember the professional painter's reluctance to "break in" new brushes?

RESILIENT

With these reliable brushes, so pleasant to use, every sale is building permanent trade and greater confidence in your store.

Sherwin-Williams Co. Reported Disposing of Australian Interests

MONTREAL.—It is rumored that the Sherwin-Williams Co., Ltd., is negotiating the sale of its Australian interests, although Hardware and Metal has been unable to get a definite statement from the company in this matter.

Interest attached to this rumor when, early in the present week, the stock of the Sherwin-Williams Company advanced materially on the Montreal Stock Exchange.

Hardware and Metal understands that the Australian plant has been a very successful one, and this was indicated in an interview with the president of the company, Mr. Walter H. Cunningham, given the Montreal representative of Hardware and Metal some months ago. The Australian field, Mr. Cottingham indicated at that time, was developing very satisfactorily, and the present proposed change may have been induced by a favorable proposal from outside interests who have been looking for expansion in the Australian field.

The Sherwin-Williams Company's foreign interests are extensive, it being widely known that the London, England, business of Lewis Berger & Sons, Ltd., has been the British section of the Sherwin-Williams Company in the British Isles. This is one of the oldest companies in the world, having a history of nearly 150 years. The Sherwin-Williams Company also has been conducting an extensive export business for a long time, and their interests are world-wide.

It is understood that Mr. Cottingham is at present abroad and that it will probably be some time before a definite announcement is made regarding the sale of the Australian interests.

How Hardwaremen Advertise Paints--No. 15

THE question as to whether it pays to paint in comparison to costs of rebuilding are again emphasized in this paint advertisement by Smith Hardware, Belleville, Ont. It is pointed out that this is the question to be faced every spring. "Does it pay to allow your buildings to become decayed and dilapidated through lack of paint, or is it cheaper to give them a coat of paint every four or five years, which will keep them practically intact and beautiful?"

These are the kind of arguments which carry weight with the prospect whose enthusiasm is inclined to wane, but care must be taken not to "preach" at him for this attitude will be resented. A good straight talk on the merits of paint as a preservative and a beautifier will do much. This ad. concludes with the statement that the oftener paint is applied, the less will be required and the more satisfying results will be obtained.

The Luxeberry Painter Says:

"Among the penny-wise, pound-foolish folks are thrift-fakers who save a few dollars on the price of varnish, and within a few weeks have to spend twenty times more than they saved to scrape it off and refinish. The only varnish bargains are those that combine beauty and a long-wearing period. This is why I have used Berry Finishes during my entire business life."

"Berry" brands sell readily because they have behind them a sixty-year record for dependability.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 8.—The features of the paint market this week are those of the decline of 20 cents per gallon for linseed oil and for spirits of turpentine. Both these declines were forecast in Hardware and Metal last week and it is likely that even lower prices may be reached if transportation conditions continue favorable.

In a general way the demand for various paint products is quieter than it has been this season, although the paint manufacturers are well pleased with summer demand. Both prepared paint and varnish orders coming to hand are fully as large as can be looked for at this season of the year. Few anticipate any reduction in the basis for either white lead in oil or putty.

Linseed Oil Prices Are Lower

Montreal.

LINSEED OIL.—As forecast in Hardware and Metal last week the trend on linseed oil has been easier and prices are quoted 20 cents per gallon less in some jobbing quarters at $2.15 for raw and $2.17½ boiled. The markets may go somewhat lower gradually, as supplies become more available. The demand has been somewhat more restricted af late after the early spring rush and it will not be surprising if a price of $2.00 is available within the next two weeks. It was stated definitely in Hardware and Metal last week that a price of $2.00 would probably be available during August. With transportation and other conditions being favorable this figure may be reached even before the first of August.

	Imp. Gal.	
Raw—		
1 to 2 barrels	2 15	2 35
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	2 17½	2 37½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Turpentine Lower; Delivery Important

Montreal.

TURPENTINE.—"Turpentine is down; may decline to $3.00." Such was the caption in Hardware and Metal last week regarding the trend of turpentine prices. The situation has improved materially since that time and some are single barrel lots. It is a matter of improving transportation now and if this continues to improve an even lower price than that existing to-day may soon be quoted.

Turpentine—	Imp. Gal.	
Single barrels	2 95	3 25
Small lots	3 05	3 35

(Packages extra.)

Putty Basis Holds; Still in Good Demand

Montreal.

PUTTY.—The basis for putty remains unchanged but steadily firm. For this season of the year there is a fairly good demand from the trade and supplies are going out rather freely.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

White Lead in Oil Still Moves Actively

Montreal.

WHITE LEAD IN OIL.—The basis remains unchanged and some expect there will be no decline of price throughout the balance of 1920. This is difficult to forecast, however, but if the present world demand for white lead continues as heavy as at present, it would seem that there will be no material reduction in this important product. There are ample quantities in hand to satisfy the needs of the trade. Government standard lead is selling as follows. Five ton lots per one hundred pounds $19.50; in ton lots $20.00 and in smaller quantities $20.35.

Prepared Paint Sales Are Somewhat Lighter

Montreal.

PREPARED PAINT.—The season has advanced to such an extent that manufacturers and jobbers are experiencing a somewhat lessened demand. Notwithstanding this, there is a good demand for various products in a sorting way, and the season altogether has been a most active one.

Varnish Prices Firm; Sales Have Been Heavy

Montreal.

VARNISHES.—All grades of varnishes have been in active demand for many weeks past. As a matter of fact one important manufacturer claims that he is not at all able to supply the demand and the basis generally is very firm. There was a temporary reaction in China wood oil, a decline having taken place recently, but Hardware and Metal undertands that prices again advanced and there is little to indicate any reduction on the best lines of varnish.

TORONTO

TORONTO, July 8.—The feature of this week's market is the stiff advance in the price of Paris green, the price having jumped 10 cents per pound. Manufacturers state they have had very heavy demands on them of late for this commodity, and the recent grasshopper epidemic in Western Canada has gone a long way to clean out any surplus stocks that were on hand. Linseed oil has declined 7 cents per gallon, and stocks are more plentiful. A heavy decline has been made in turpentine, the price having declined 30 cents per gallon. Putty prices continue firm. White lead in oil is also quoted from a firm basis and supplies are none too plentiful in some sections. Ready prepared paint is moving briskly and repeat orders are coming very satisfactorily. Collections continue to come forward favorably.

Belgian Glass Relieves Famine; Still Scarce

Toronto.

GLASS.—The arrival of Belgian glass has gone a long way to relieve teh glass famine, and conditicns have shown considerable improvement. Jobbers state that while the scarcity is not as yet overcome, they are at least able to partly fill orders. Little glass of United States manufacture is coming forward and prospects are not favorable for early relief from this quarter. The single and double diamond are still quoted at a discount of 15 per cent. from the list and the cut lengths at 40 per cent. discount from the list.

Repeat Orders Heavy For Ready Prepared Paint

Toronto

READY PREPARED PAINT.— A heavy demand has been made for nearly all kinds of paint and jobbers state they are very well satisfied with the amount of business that is moving. Repeat or-

Sell the Genuine

Jap-a-lac has become a household word in homes throughout the Dominion. The excellent results it has given year after year have established for it an enviable position among household finishes.

There is only one Jap-a-lac and that is Glidden Jap-a-lac. The universal demand for this product has brought many imitations on the market. To be sure of a satisfactory result you must sell genuine Jap-a-lac. Its absolute reliability has been firmly established and has created for it a steady demand.

There's a Jap-a-lac finish for every household need. It comes in all the staple colors and finishes. It answers any of the numerous home requirements. Stock up now and take advantage of the unlimited possibilities Jap-a-lac offers.

THE GLIDDEN COMPANY, Limited
TORONTO, ONT.

BRANCHES : Montreal and Winnipeg

If it's Jap-a-lac it's Glidden

If interested, tear out this page and keep with letters to be answered.

ders are coming in for a very good-sized volume and nearly all in the trade are looking forward to a continuation of this satisfactory condition for some time to come, and base their opinion on t building and house repair situation. The present quotations, although very firm, show no indication of a change in th near future, and the tendency seems to be for the price to hold steady for some time to come. The present prices are as per current quotation page.

Putty Moving Freely; Prices Hold Steady

Toronto.

PUTTY.—Prices are very firm, and while supplies are said to be moving more freely than previously some are of the opinion that stocks are very light. This, they state, is attributed to the scarcity of English whiting, which is said to be coming forward very slowly, a situation which is due to the inability of the English producer to supply the present demand, which is said to be exceptionally heavy. The present prices on putty are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quo-

Shellac and Varnish Prices Steady; Unchanged

Toronto.

SHELLAC AND VARNISH.—A very seasonable demand is at present current for nearly all grades and makes of varnish and jobbers are very well satisfied with the amount of business being offered. Present prices continue very firm. Although no recent change has been made in price, the present prices are as per current quotation pages.

Some Dry Colors Scarce Price Holding Firm

Toronto.

DRY COLORS.—Prces on nearly all kinds of dry colors are very firm and a decided scarcity is noted for some lines. Manufacturers state they have considerable difficulty in securing special colors for certain paints. Although the present price is very firm no recent change has been made, and the quotations are as per current quotation pages.

Linseed Oil Has Declined 7c Per Gal.

Toronto.

LINSEED OIL.—A drop of 7 cents per gallon has been made on linseed oil, and raw linseed oil is now quoted at $2.30 per gallon, and the boiled at $2.33 per gallon. The demand has been rather quiet this week. Supplies are coming forward better and the shortage of supplies has been overcome. The following are the new quotations:

Linseed Oil—		
1 to 2 barrels, gal.	2 30	2 50
3 to 5 barrels, gal.	2 29	....
10 barrels and over, gal.	2 27	....
Boiled		
1 to 2 barrels, gal.	2 33	2 53
3 to 5 barrels, gal.	2 34	....
10 barrels and over, gal.	2 30	....

Prices shown are those ruling on Thursday of curent week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Turpentine Prices Drop 30c Gal.; Demand Quiet

Toronto.

TURPENTINE.—Further reductions have again been made on turpentine and a substantial drop of 30 cents per gallon has been made this week. The present demand is rather light with stocks daily becoming more plentiful. The following are the present quotations:

Turpentine—	Per Imp. Gal.
1 barrel lots	2 80
2 to 4 barrel lots	2 79
5 gal. lots	2 95

Opportunity for Canadian Paints in South Manchuria

The erection of new buildings in connection with the development of South Manchuria should increase the importations of paints, oils, and varnishes, which have amounted to about $1,000,000 annually, approximately 60 per cent. of which was used by the South Manchurian Railway Company. Prior to the war, British and American paints dominated this market, but as it became more difficult to obtain the desired brands, because of the lack of shipping facilities, those of Japanese manufacture became better known. With the return of normal conditions the potentialities of this market have become greater, providing American makes can compete with the prevailing prices, as their superior quality is recognized. One of the brands now in demand is an ordinary lead paint, packed in drums of 28 and 112 pounds, the former selling at $2.50 and the latter at $4.50. Mixed paints, put up in 1-pound tins, sell wholesale at $1.50 per dozen tins. Enamels, which are now in great demand, wholesale at $3.50 per dozen tins of ½ pound each. Varnish is selling at $4.20 per dozen tins of 2 pounds each. There are two kinds of paint oil on the market. One reported to be of pre-war stock is put up in 4-gallon drums, selling at $7 per drum wholesale; and the other, a Japanese product, put up in 36-pound drums, selling at $4 per drum wholesale. Turpentine, principally of Norwegian origin, comes to this market via Shanghai, the wholesale price being $11 per 4-gallon drum. The above prices were those ruling about May 1.

10c Advance on Paris Green

PARIS GREEN.—A heavy advance has again been made on Paris green and the Berger brand will now cost approximately 10c per lb. more. Manufacturers state that the heavy demand has made it necessary for them to procure further supplies and the recently advanced cost of raw materials has considerably increased the manufacturer's cost.

The recent grasshopper epidemic in the West has drawn very heavily on any reserve stock manufacturers had on hand. It is stated that the need for Paris green was so urgent that quantities were shipped by express to the Provincial Government. One of these express shipments weighed over 10 tons, it is stated.

The following are the new higher prices:

PARIS GREEN

	Per lb.
Petroleum, barrels	0 62
Arsenic, kegs	0 62½
50 and 100-lb. drums	0 62
25-lb. drums	0 64
1-lb. papers	0 66
1-lb. tins	0 68
½-lb. papers	0 68
½-lb. tins	0 70

F.O.B. Montreal and other Ontario delivery points.

WHITMAN & BARNES ANNOUNCE PLANS

What They Intend Doing Following the Merger With J. H. Williams & Co.

The Whitman & Barnes Manufacturing Company, Akron, Ohio, are now manufacturers of twist drills and reamers exclusively. The merger of their two drop forge and wrench factories at Chicago, Ill., and St. Catharines, Ontario, with J. H. Williams & Co., of Brooklyn, N. Y., was officially consummated June 23rd.

A. D. Armitage, president of Whitman & Barnes, will be vice-president of J. H. Williams & Co., and W. E. Rowell, Whitman & Barnes' secretary, becomes Western manager of J. H. Williams & Co. at the Chicago factory.

The Whitman & Barnes Manufacturing Company will remain in the twist drill and reamer business, retaining for this purpose its Akron, Ohio, factory where twist drills and reamers have been made in the past. The entire time and energies of its organization in the future will be directed exclusively to the manufacture and sale of twist drills and reamers. A new and enlarged plant will be constructed, the plans for which are rapidly developing. When completed, the new factory will be the last word in equipment and facilities for producing twist drills and reamers, and will rank among the largest of its class in the country. The present plant facilities are unable to supply the demand for W. & B. twist drills and reamers, and the company reports constantly increasing sales over production.

What the "Durabla" Agency Means to You

The Durabla agency for Gauge Glasses and Gasket Packing means for you good profit, minimum stock and maximum turnover.

There is bigger business waiting for you if you feature these Durabla products.

Durabla Packing, in sheet or gasket form, is the standard material for all gasket work. It is guaranteed for air, water, steam, oil, ammonia and acids at all temperatures and pressures and lasts as long as the flange itself. On account of its universal adaptability it minimizes the variety to be carried, and means less money tied up in stock.

Durabla Gauge Glasses withstand hydraulic pressure and temperature changes to a remarkable degree. They have passed every known test for tensile strength, erosion and service, and equal in every respect the best service of the best foreign glasses.

Write to us at once for agency and get your share of Durabla profits.

Goodwill from Your Bicycle Trade

MANY successful dealers are finding it good business to have one person in charge of bicycles who thoroughly understands them and sees that each machine leaves their store in perfect running order. He also informs the buyer on all the little points necessary to obtain the maximum service from his machine and thus give him the greatest satisfaction.

We pass on this suggestion to you. Good Service builds Goodwill. A satisfied bicycle customer will be a good customer for other business.

And to make doubly sure he will be satisfied sell him one of the

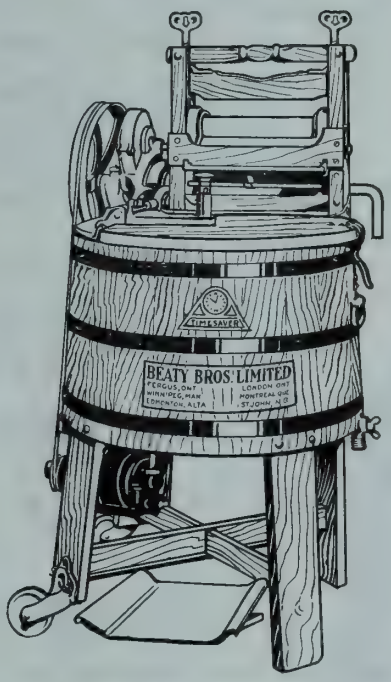
Beatty Bros. Limited Bulletin

Cypress

THE WOOD EVERLASTING



O. W. ROLPH,

Mr. O. W. Rolph is one of five BT Salesmen covering the Ontario Hardware Trade.

He has met with splendid success and is thoroughly liked by the Hardware dealers in his territory.

The oldest thing in the world is a Cypress Tree! This is the "General Sherman Tree" in the Sequoia National Park of California. It was discovered in 1879 by James Wolverton, a hunter, and named after General Sherman. When Christ was born it was a healthy little stripling of some 2,000 years old. It is still very much alive and has attained the enormous height of 1279.9 feet with a diameter of 36.5 feet at the base. This is the oldest living thing in existence

—and it is made of the same material as the tubs in the Time Saver Washer—**CYPRESS!**

The Ancient Egyptians knew what they were doing when they built their coffins of Cypress. They meant those coffins to **last**, and last they did.

The tubs of the BT Time Saver and Red Star Washers are made of Cypress. These trees grow in semi-tropical swamps and so are particularly adapted to withstand the action of hot water in washing machines. Your customers will get years of use out of their Time Saver Washers. The tubs won't rot or decay.

Stephens'

REGISTERED TRADE MARK

Barn Paint

Makes Friends with Farmers

Stephens' Barn Paint makes friends with the farmers and sales for the dealer. Its surface-saving features attract favorable interest among the farmers that results in repeat sales and new business with profit for the dealer, who stocks and sells this popular barn paint. To-day farmers insure their buildings and stock from various dangers. Point out to them the advantage of insuring against decay in their buildings, with Stephens' Barn Paint. It will pay you to sell Stephens

"DULUTH"

Sectional Hardware Store Equipment

A Vital Factor in Making Sales

All wise, experienced dealers appreciate the value of properly displayed goods and a neat, handsome, modern looking store as factors in making more sales. The visible suggestion of well displayed goods creates a desire in the customer to purchase. But increased sales are only profitable when attained at minimum expenditure. Duluth Store Equipment increases sales and reduces costs, because it saves clerks' time, simplifies selling, permitting of cheaper help, saves space—increasing size of store at same rent, increases turnover without additional capital.

It will pay you to investigate this practical, modern and complete line of Hardware Store Equipment. Take advantage of our free store planning service. Write for our new booklet, "Increasing Sales and Cutting Costs." You will find it mighty interesting.

Makers of "Duluth" Sectional Hardware Store Furniture.

Duluth Show Case Company, Duluth, Minnesota, U.S.A.

MILBRADT LADDERS

are made in many styles and to fit all kinds of Shelving. They are made to order.

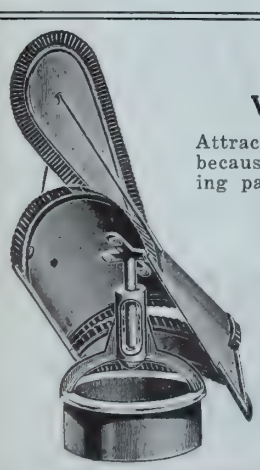
CASE TIRE TOOL - EASY

Takes off—puts on Clincher Tires quickly New great invention. Also **Case Rim Tool** takes rims off tires. Malleable. Ask any dealer, or send $4.50 to

MOTOR NECESSITIES CO. OF CANADA
231 Somerset Bldg. Winnipeg, Canada

Practically all good buyers of hardware in Canada are readers of HARDWARE AND METAL.



O-Rib-O

Volcano Chimney Top

Attracts the customers and closes sales because the Deflector—the lower slanting part shown—receives wind through the sloped opening directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys. Sells readily for homes, stores, churches, factories and as a ventilator for barns and warehouses.

MORROW

High Speed and Carbon Twist Drills

Made in Canada by Canadian workmen, Morrow High Speed and Carbon Twist Drills are an all-Canadian product. Used exclusively, they directly increase production—more holes with less regrinding.

Buy Canadian products and keep Canadian money for Canadian trade.

Barrett Roofings, Cements Industrial Paints etc.

OUR extensive advertising in the leading Farm and Technical publications is creating a big demand all over the Dominion for these Barrett Products. They offer an opportunity you can't afford to miss if you want quick sales, sure profits and satisfied customers.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

EVERY progressive farmer in your community is almost surely a customer for Creonoid.

For every farmer knows that constant annoyance by flies makes cows give less milk and horses do less work; and that lice and mites keep hogs from fattening and hens from laying.

Creonoid is an effective destroyer of flies, lice and other verminous pests. It is easy to use and so inexpensive that it pays for itself many times over in the better health and the increased production of livestock and poultry.

If you are not carrying Creonoid you are missing a chance to increase your profits and, at the same time, confer a real benefit on your farm trade.

Creonoid is put up in: 1-gallon cans (12 to the case), 5 and 10-gallon cans, ½ barrels and barrels.

We can also supply, in any desired quantity, a low-priced sprayer, designed especially for applying Creonoid.

Everlastic "Rubber" Roofing

THIS popular roll roofing covers more farm and factory buildings than any other ready roofing on the Canadian market.

It is made of the best grade roofing felt, thoroughly saturated and heavily coated *on both sides* with durable waterproofing materials. It sells at a low price and can always be depended upon to give long and satisfactory service.

Everlastic "Rubber" Roofing comes in three weights: light (1 ply), medium (2 ply) and heavy (3 ply). Each roll contains 108 square feet of roofing, and nails and cement for laying.

Everjet Elastic Carbon Paint

A LUSTROUS, black carbon paint for use on all kinds of metal and wood, particularly on surfaces exposed to severe conditions.

Positively without an equal as a protective coating on farm implements, machinery, smoke-stacks, steel bridges, metal roofs, etc.

Everjet Paint is waterproof, acid-proof and alkali-proof. Prevents rust and corrosion. Is easy to apply, wonderfully durable and very moderate in cost.

Put up in standard-sized packages, from 1-gallon cans to 40-gallon barrels.

A Sweeping Demand

Dust is dangerous. It is the duty of every merchant who handles necessities of life to eliminate dust as much as possible.

Dust rising before the sweeping broom lodges on the shelves, the merchandise, the display counters, carrying with it all the deadly contagion of disease.

IMPERIAL

FLOOR DRESSING

(Standard)

(*Formerly "Imperial Standard Floor Dressing."*)

—is a non-evaporating, wood preservative that cleans the surface of floors and *prevents dust from rising.* You can sweep your floors without danger of raising the dust if you treat them with Imperial Floor Dressing. One gallon will treat a floor surface of from 500 to 700 square feet, and one application will assure you of clean and dustless surroundings for months.

Stock up! The spick and span appearance of your store will demonstrate effectively the dust-killing qualities of Imperial Floor Dressing and help you sell it.

"Made in Canada"

"I Drove 8 Blocks To Buy Oil Here Because You Have A Bowser"

"I used to buy gasoline and oil wherever I happened to be near a supply, and my car was never giving me the same uniform action I desired. Now, since I come here, my motor is running fine."

Such is the story told to countless BOWSER owners.

BOWSER ESTABLISHED 1885 **Storage Systems**

Bring Profitable Trade

Once you have a BOWSER Curb Gasoline Pump installed you begin to get the motorist's trade. The BOWSER Lubricating Oil Storage completes the service.

Then you have Satisfied Trade, Clean, Accurate, Safe and Profitable Business, because BOWSER SYSTEMS bring just such results.

Figure 64
Lubricating Oil Storage For Single Unit or Battery Installation

You will be interested in reading our literature and studying the pictures of actual installations. Write for it.

THE LESLIE TINWARE CO., LIMITED
114-116 Scott Street OTTAWA, ONT.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

GEO. W. REED & CO., LIMITED
37 St. Antoine Street
MONTREAL

Mincing Machines

The knives and plates are made of wrought Swedish Steel of finest quality. The Mincers may be had tinned all over or enenamelled white inside and japanned red outside. A line that sells on merit with profitable results. Write for more details.

"McDougall" Well Pumps

A Standard in Every Community

This represents one of our best features in Well Pumps. The cog gear head is a distinct advantage over pump heads where links and friction guides are a necessity.

A minimum amount of labour for producing maximum results is a distinct selling advantage.

The Pendulum of Prosperity *for* Daylo Dealers

Still Time to Profit—Wire for Material

FASTER and higher swings popular interest in the vast Eveready $10,000.00 Cash Prize Contest. By hundreds of thousands the public have been crowding to Eveready Dealers' counters and the ring of the cash register sings a song of success for this great sales-increasing plan.

Have you the Contest Picture, the lodestone which is attracting all this attention? If you did not get in at the big getaway, remember that half-a-loaf is a mighty large profit and you can still join the dealers who are doubling and tripling their sales of Daylo and Eveready Tungsten Batteries.

Don't lose another day's sales but wire your jobber for 1920 Team Work Blank and Contest Material.

The Crescent Company, Meriden, Conn.

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

Extending the Uses of Your Product by Informing Dealers

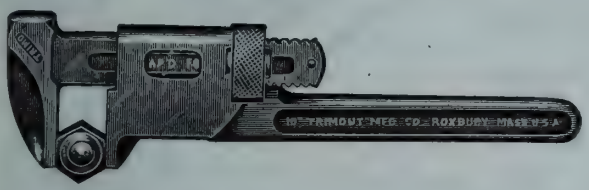
When the efficient, modern advertiser finds his reputation firmly established, the confidence of the trade firmly held, distribution ideal and his product and trade-mark thoroughly familiar, he directs the full force of his continuous advertising toward increasing the uses of his product by showing the dealer and his salesmen each week new uses for his goods that both stimulate sales and increase the consumer satisfaction with the product.

A weekly message to the whole hardware trade of Canada through Hardware & Metal is productive, profitable and reliable "business insurance" for the future.

If interested, tear out this page and keep with letters to be answered.

TRIMO

The Trimo Pipe Cutter can be converted into a one-wheel or three-wheel cutter by substituting wheels for rolls or rolls for wheels. When making changes care must be taken to replace cotter pins which must always be in place to give proper service.



The Trimo Monkey Wrench is built for strength, especially adapted for heavy work and railroad use.

4 Good Reasons --READ 'EM

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 18 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

Those Unnecessary Delays Cost Dearly

Is it not painful to watch or experience the delays in many stores—unnecessary delays. And how often do we hear it stated? "I do not care to trade at B's; theirs is not a good system, and it takes too long to be served."
When the salesmen have to leave customers for change, whether made at an office, from a till, or register, needless non-productive energy is used, and valuable time is lost.
Drop a card for our circular—full of information, and learn more about it.

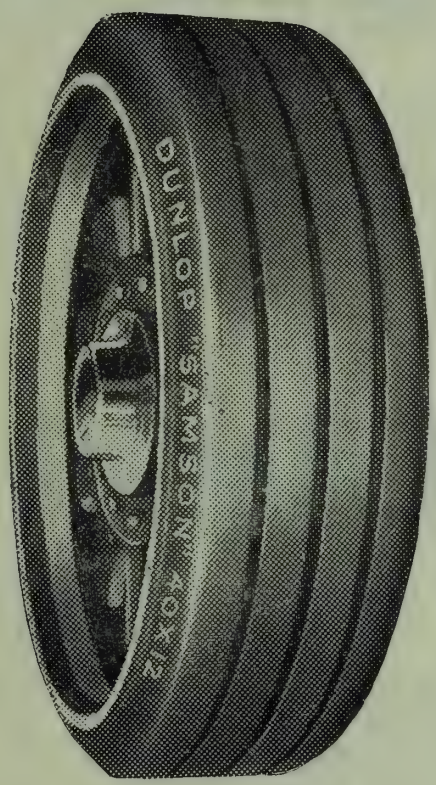
DUNLOP TIRES

SEAL OF QUALITY

MOTOR TRUCK



CHOOSE THESE TIRES FOR ECONOMY

USE THESE TIRES FOR EFFICIENCY

As a Motor Truck owner, with a desire for economy, you should investigate the following:

1. There are more cubic inches of rubber to the cross section in **Dunlop Motor Truck Tires** than in any other make of Truck Tires obtainable. That extra volume of resilient, road-resisting rubber means a lower operating cost-per-mile.

2. **Dunlop Motor Truck Tires** are made from the matchless English Dunlop formula, which has proven its worth in indisputable mileage records.

3. The wear and tear on your truck will be noticeably decreased. **More** resilient rubber means **more** buoyancy—less damage to the truck's mechanism and to its contents—as well as a marked saving in fuel consumption.

4. If you use the new

"SAMSON"

Tire you will enjoy a confidence born of the knowledge that your tires can bear, without injury, an occasional over-load to save an extra trip.

5. From actual tests made, **Dunlop Motor Truck Tires** are the lowest cost-per-mile Truck Tires you can use.

Dunlop Motor Truck Tires absolutely will not split nor come loose from the steel base. You cannot chisel them off.

"3450" Insulators Are Practically Indestructible

They are so hard and tough that they stand up under treatment that is never experienced even in emergency use in a motor or engine.

You can heat them white hot then douse them in water—knock them with a wrench—drive them through a cake of lead—drop them on the floor, and you won't find a chip or crack in the glaze.

Do you realize what this means in ignition efficiency?

Champion

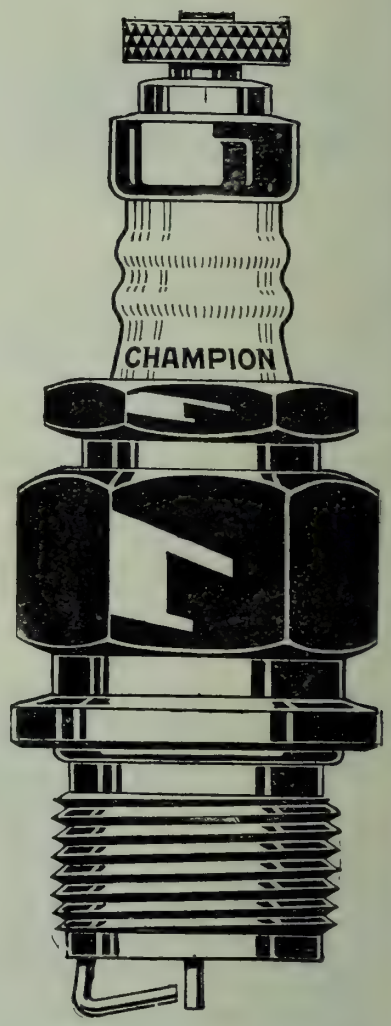
Dependable Spark Plugs

all have "3450" insulators. There's a type that will help to increase the efficiency of every motor car, truck, tractor, farm engine, motor boat, motor cycle or aeroplane.

Knowledge of this wonderful efficiency is a big sales help to the dealer who handles Champions. It creates business without the necessity of having to "sell" each customer.

Link up your store with our advertising and selling campaign, by displaying Champions and our dealer helps. It will put many dollars in your pocket without a great deal of effort on your part.

Keep the full line of Champions on hand, and get the full benefit of our promotion.



Champion A 43

⅞ inch, 18 long

Price $1.00

For use in heavy service motors, trucks, tractors and farm engines

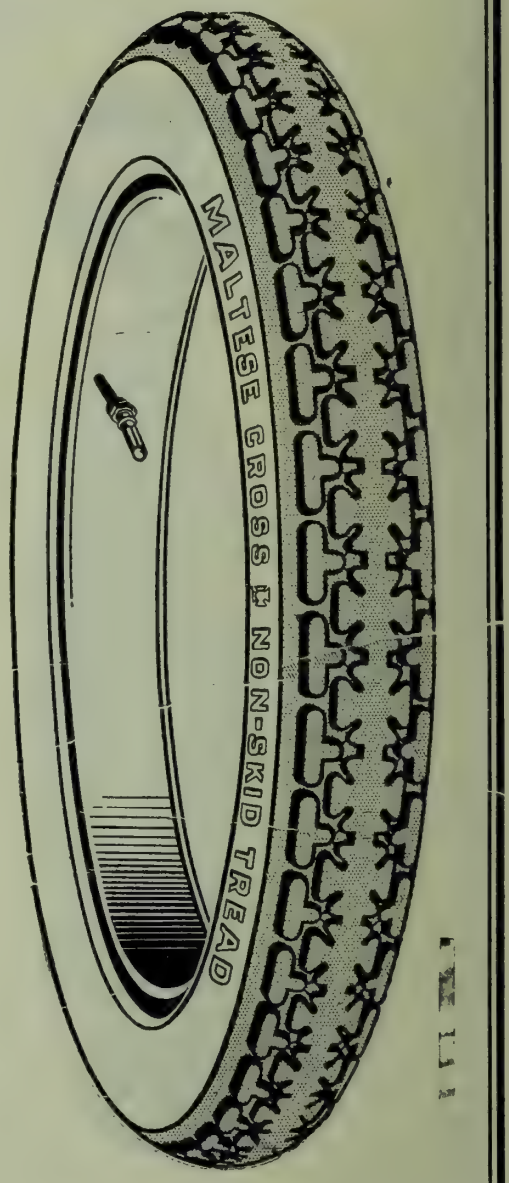
Two Big Tire Months July and August

More tires are bought during these two months than at any other time. Summer calls the motorist to the resort, the woods and the lakes. Touring is largely confined to this period. Keep tires prominently displayed during these two months. The best tires to sell are



"GUTTA PERCHA" TIRES

They will delight your customers and bring new motorists to your store. Motorists demand service from a tire—you are positive they'll get it if you give them "Gutta Percha" Tires —"The Tires that Give Satisfaction."

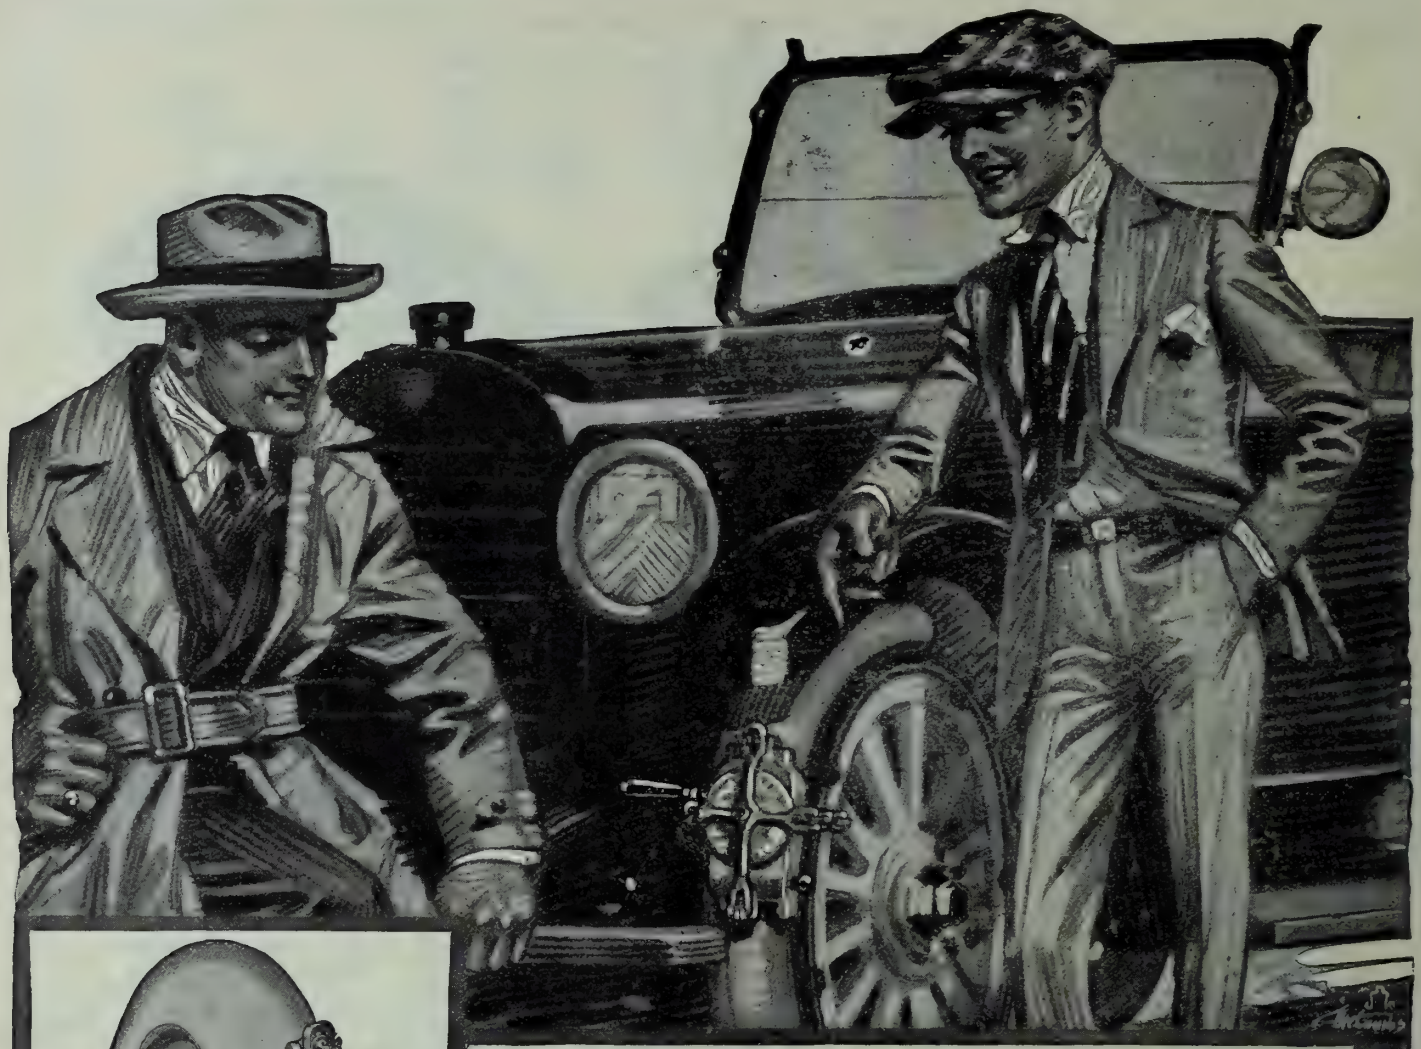
The Standard Spark Plug of the World

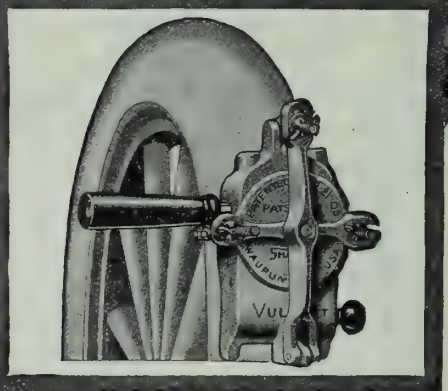
When Tommy Milton sped to seven new world's records on Daytona Beach, driving in one trial five miles in two minutes, sixteen AC Spark Plugs fired the twin engines of his Duesenberg. His faith in them was more than justified by their unfailing reliability and absolute precision. In the mile trial, driven at the rate of 156.04 miles an hour, the sixteen plugs delivered a total of 9,870 sparks in 23.07 seconds without a miss. Every second, 428 jets of flame converted gasoline into smashing power. What eloquent proof of AC superiority! Can you honestly tell your customers that you have a plug of other make that's "just as good"?

Champion Ignition Company, FLINT, *Michigan*

U. S. Pat. No. 1,135,727, April 13, 1915, U. S. Pat. No. 1,216,139, Feb. 13, 1917. Other Patents Pending

If interested, tear out this page and keep with letters to be answered.





"—saves two-thirds of my Tire Expense"

"Once a week I go over my tires—and seal the little holes and cuts that ruin tires by permitting dirt, oil and water to reach and rot fabric. With the SHALER Vul-Kit I 'vulcanize' these holes with tough, new rubber that makes a lasting job of it. It takes only a few minutes—but keeps my tires good as new—prevents tire trouble—*doubles* my mileage—and actually saves ⅔ of my tire expense."

Sell the SHALER VUL-KIT

It's easy to sell. Motorists are looking for a tire-saver like this. Their word-of-mouth endorsement of the SHALER to their friends gives you a chain of sales. The repair material they buy of you to use with this vulcanizer gives you "repeat" profits that come to you regularly—without effort. You make a good profit selling the Vul-Kit itself and big, steady "repeat sale" profits.

SHALER Vulcanizers are advertised regularly throughout the year. Motorists are now reading the large, dominant advertisements in the leading national and motorist publications. Every car-owner needs a SHALER Vul-Kit—sell it to him and make these big steady profits for your self.

Order From Your Jobber Now—Write Us for Catalog

of the complete line of SHALER Vulcanizers for garages, tire repair shops and motorists' use

What are their brake bands lined with?

SAFETY, Service, Economy for your customers and greater profits for you, all depend on the right answer to this question—What are their brake bands lined with?

Too many people give no consideration to this question.

Here's where you can make friends and extra profits. Speak the friendly word of advice before slipping brakes result in costly accidents. Tell car-owners when their brakes need re-lining, to use Johns-Manville Non-Burn Asbestos Brake Lining—The lining that lasts longest and holds best, because it is made of the best asbestos, because it's a Johns-Manville product from mine to brake drum.

You will be surprised how much brake lining business there is and how well it pays when backed by such a dependable product as Johns-Manville Non-Burn Asbestos Break Lining.

Protection
The best you can sell

IN every field the name of some one product always stands forth, establishing a standard of quality by which all others are measured. In the fire-arms field that name is COLT.

For more than eighty years that has been so. In the uncertain hazards arising from the unrest of a congested city—in isolated country—amid the dangers of peace and the conflict of war—COLT protection is the best you can sell. COLT stands for the uttermost perfection in fire arms.

Just as a man owes it to his home to provide the best protection that money can buy, so do you owe it to yourself and the reputation of your house to give them the best you can sell—a COLT Automatic Pistol or COLT Revolver.

334 East King Street, Toronto
London, Eng., New York, Chicago

SCHRADER UNIVERSAL VALVE REPAIR TOOL

M&S The Plug with the Hotter Spark

The ball point of the "M&S" plug creates a larger and hotter spark, causing more complete combustion. This hot spark will give your car new life and more power.

The three-in-one terminal is adapted to any style ignition wiring. The high-grade chemically glazed porcelains are interchangeable—one porcelain fits all plugs.

No.	Models
500—	½" Standard
501—	⅞" Standard
502—	⅞" Long
503—	⅞" Long with Chevrolet Terminal
506—	½" Long
504—	Regular Porcelain
505—	Chevrolet Porcelain

Dealers—The "M&S" plug is standard equipment on the new Overland "4". Ask your jobber for them.

VIKO
ALUMINUM

In Viko—Every Utensil Good Merchandising Demands

Without a stock of aluminum ware no store catering to the House-Furnishings trade is up-to-date. Aluminum is the newest and most satisfactory of all metals for kitchen utensils. It is light in weight and durable; takes heat readily and holds it long. It neither chips nor cracks.

VIKO, The Popular Aluminum, is a good line to stock. It can be sold profitably at a popular price, yet is high in quality and of improved design. Another good thing about Viko is the great variety of utensils that come in this line. Every utensil good merchandising demands can be found in Viko. For further information—

The Line That Never Fails To Increase Your Summer Sales

This is the season when women want "Universal" Electric Ranges and Grills—they make it hot for the food and cool for the cook. Women no longer heap coals of fire on their own heads by lugging kindlings and doing coal-hod calisthenics in summer.

"Universal" Grill and Range Features

Easy to operate and keep clean.
Requires little space.
Quick heat without blaze, smoke, or odor.
Four heats, 175, 300, 350, 650—WXXXS.
Cooks everything within the limits of its capacity.
Dinner for two or three persons at a very low cost.
Two cooking operations at the same time above and below the radiant grill.

Now is the time to push "Universal" Ranges and Grills. They're widely advertised, easy to sell. The housewife is instantly interested when she is shown the "Universal" trade-mark.

WHEN THE GREAT EASTERN LAID THE CABLE

"EUROPE and America are united by telegraph." On August 17, 1858, the operator on one side of the Atlantic received this message from the other side, the first message transmitted by the Atlantic Cable.

Plans for the laying of the cable were made soon after the invention of the telegraph in 1843, but it was not until 1856 that the first steps were taken toward connecting the two hemispheres. The first cable was lost, the second deteriorated after a few months service, and in 1866 the steamship "Great Eastern" laid the first permanently successful trans-atlantic cable.

Forty-two years before the "Great Eastern" completed her work, Plymouth-equipped sailing ships maintained intercourse between the two hemispheres. When steam took the place of sails and rigging, Plymouth was the choice of the ship-masters for hawsers and cargo hoists. With the advent of the cable, Plymouth became an important agency in its upkeep and the expansion of its service.

In every activity of intercourse between the old world and the new, Plymouth is playing an important role. It is the rope you can trust.

GOODELL-PRATT
1500 GOOD TOOLS

Organized Care---A Goodell-Pratt Service

This shows the extreme carefulness with which Goodell-Pratt Company fill their Toolsmith Dealer orders. The original order after being entered in the books of record is immediately delivered to the stock room. To that order its own separate truck and crew is assigned. Item by item your order is set out on that truck then carefully back-checked. Whereupon the truck with the same original order, is run into the shipping room. There other employees recheck the order and then pack it securely in stout, new cases.
The greatest possible speed, least possible chance for errors, and Toolsmith Dealers benefit by this thoroughly organized system.

GOODELL-PRATT COMPANY *Toolsmith* Greenfield, Mass., U. S. A.

Are you "convenient" or "necessary"

HOW many of the bigger manufacturers in a town, when hard pressed for tools, will—after a hurried survey of a telephone directory—'phone in a small order to the nearest jobber and—as a matter of fact—simply use him as a "convenience" in case of emergency?

Are the manufacturers not aware of the ability of the local jobber to handle their larger orders?

Or is it because the jobber has omitted to acquaint himself with the manufacturer's particular needs; or made himself so necessary that his name is bracketed with their requirements?

It is probable that investigation on the part of the jobber would disclose the fact that some of the local manufacturers are having threading troubles, which could be overcome by the introduction of GTD Specialties such as the "*Gun*" Tap with its shearing cut or the "*Acorn*" Die with its precision adjustment and increased production capacity.

When a distributor allies himself with the GTD line of screw-cutting tools and specialties, he commands the advice of a GTD Threading Specialist and also GTD service, and speedily makes a reputation with the local manufacturers as the "GTD Tool Supply House." Consequently he becomes a "necessity" rather than a "convenience."

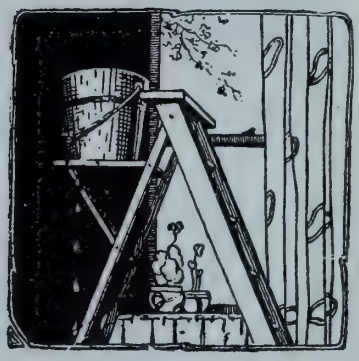
Story for Week Dated July 17, 1920. **Being No. 14 in the Series.**

Eddy Company Enterprise Far From Street and Store

It must not be imagined for a moment that because The E. B. Eddy Company makes use of Birch Bark canoes, and log cabins in their lumber camp operations, they are therefore less up to date in the bush than they are in the city. The two pictures on this page show scenes on the Du Moine Lake over two hundred miles from Hull. The picture above shows the steamer "Alligator" with a scow in tow, plying busily on the same waters that float the birch bark canoes, and the "Alligator" is as much a part of the Eddy plant as the latest match making machines in the Hull factory. Below is shown a view of the Du Moine Depot, with a glimpse of the lake on which the busy "Alligator" plies, helping shepherd the logs that later you will sell across your counter in the shape of matches, paper, or indurated ware.



Eddy's Indurated Fibreware Pails

No More Leaks

Since women have become such liberal patrons of the modern hardware store, the hardwaremen have found less sale for leaky, shrinking, wooden pails and rusty or scaling metal pails that are painfully hot to the touch when filled with water of moderate temperature.

Mrs. Housewife, of Canada, demands the modern, sanitary, unshrinkable, non-leaking Indurated Fibre Ware Pails—Eddy's. She buys 'em too!

If interested, tear out this page and keep with letters to be answered.

Good and Poor Business

Don't make the fatal mistake of selling poor tires. Every bad tire you sell adds the stigma of unreliability to your reputation.

Dependable tires are the only sure foundation on which to build a stable tire business.

Partridge Tires are dependable—they wear and last.

Partridge Tires are made by hand, in a factory where accuracy, precision and ceaseless vigilance in inspection assure that the finished products are as faultless as human endeavors can make them.

You cannot do your customers a greater favor; and you cannot enhance your reputation for reliable judgment quicker—than by selling Partridge Tires.

Partridge Tires are durable, dependable and economical.

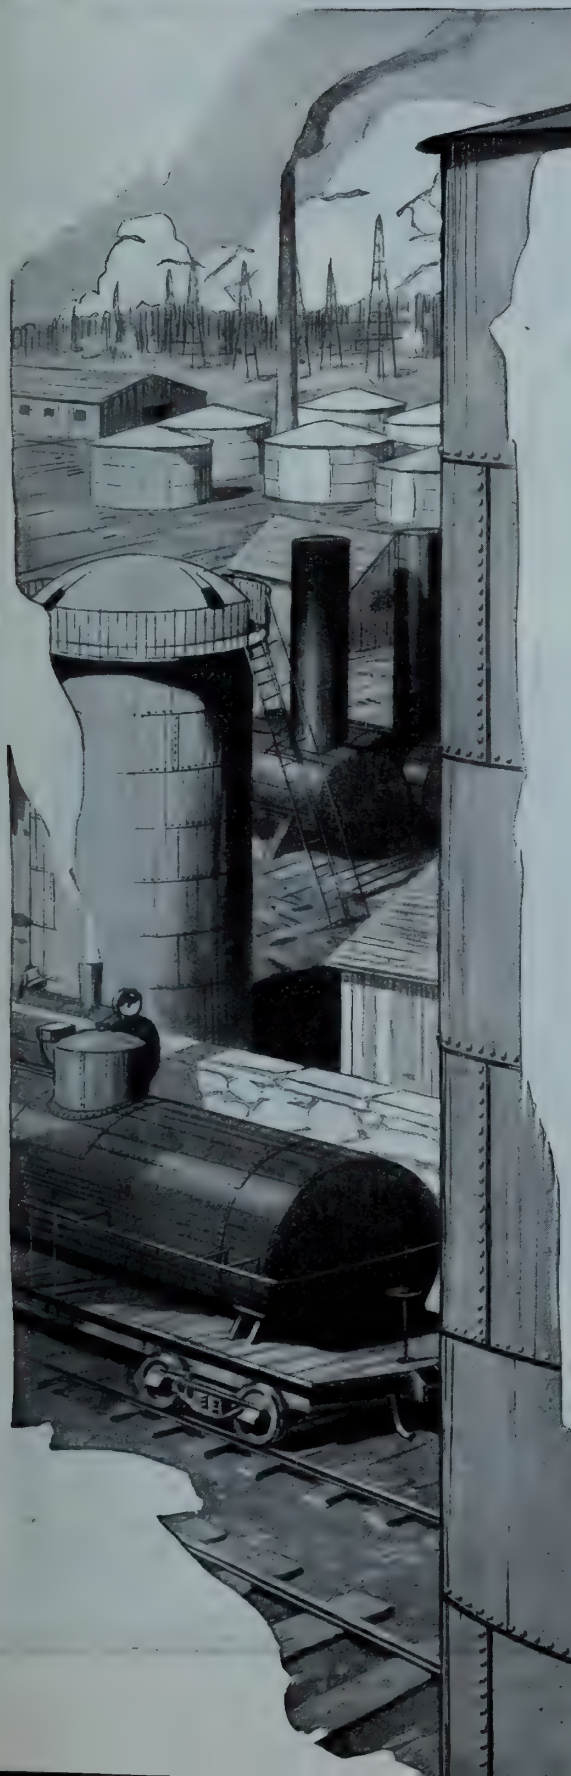
ARMCO
Brand of American Ingot Iron



For Long-Service Oil, Gas, and Water Tanks

OIL, gas, water, and underground storage tanks, welded barrels, and other heavy-gauge metal products made of Armco Brand of American Ingot Iron save modern industry thousands of dollars.

They cost so comparatively little for repairs and replacement that they can be well said to pay dividends on the first cost for many years. Before the big plates leave the factory, they must measure up to the highest possible standards of purity and evenness.

In other words, they must **resist** rust—and resist it long. They must be able to take and hold a coat of paint to an unusual degree. And, indeed, they must justify their investment by an exceptional career of usefulness.

The possibilities of American Ingot Iron merit the careful attention of any manufacturer or user of heavy-gauge metal equipment. Write today for list of manufacturers who are prepared to fill your needs.

THE AMERICAN ROLLING MILL COMPANY
Box 304, Middletown, Ohio

The trade-mark ARMCO carries the assurance that products bearing that mark are manufactured by The American Rolling Mill Company with the skill, intelligence, and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for them. The trade-mark ARMCO is registered in the U. S. Patent Office.

ARMCO

Get the Tourists' Trade

Tourists have unforeseen happenings when on the road, and these will be rectified as soon as the next town is reached, if the motorist can find the goods he needs. An attractive window should be put in immediately with plenty of cards to catch the motorist's eye and remind him of his needs. You'll find it will pay mighty well.

It takes only a few feet of film to show a Starrett sale.

You already have the buyer's confidence. He knows the Starrett reputation. He's constantly reminded of it—by the Starrett Books he reads, by Starrett national advertising. He's sold on the Starrett line, when he enters your store. Find him the particular tools he needs, and the sale is closed.

But it would take a longer movie than has ever been filmed to show the years of service he'll get out of his "buy"—a service that will pay him several thousand per cent on his investment. That's why mechanics come back again and again for Starrett Tools. Why the business of Starrett dealers is constantly increasing. They sell satisfaction every time they ring up the sale of a Starrett Tool.

It's a good idea to have your clerks read, "The Tools Mechanics Buy" Write for as many free copies as you need.

Sporting Goods for Vacation Time

Increasing Popularity of Annual Vacation and Week-End Trips Offer Growing Field for Sales of Many Sporting Lines—Some Suggestions for Displays of Fishing Tackle—Encouraging Rifle Shooting Among Younger Boys—Schools and Churches Install Rifle Ranges to Keep Interest of Young People.

VACATION time, as a stimulant to summer sporting goods sales, is second only to the arrival of spring itself. In the sale of the majority of sporting goods lines these two seasons are most important, and while spring is over for this year, vacation time is only now getting fully under way. It will be a good idea for dealers to emphasize the vacation idea in advertising and displays for the next two months. In showing various goods the statement can be made, "Here is something appropriate for use during your vacation." Every such mention popularizes the idea of taking a vacation and links up with it the suggestion that some recognized form of sport be indulged in.

There are so many goods handled under the category of sporting goods that are made especially for just such outings as many people want to take, that they alone are having a tendency to cause more people to take time off from their work to enjoy recreation. Week-end trips have also come into vogue during the past few years since automobiles have become increasingly popular. This form of recreation also offers a fruitful field for the dealer in sporting goods for many people in every city and town follow the practice of spending week-end vacations, some in the woods where they may fish and shoot, others at resorts where golf, tennis, baseball, etc., are in order. These habits call for more canoes, tents, cooking kits, outdoor furniture, fishing tackle, automobile accessories, golf, tennis, and other sporting accoutrements.

Dealer Issues Week-end Resort Guide

Hardware dealers can make their sporting goods department a live one during the summer months by paying a little attention to customers' requirements and seeking means of giving little extra services in order to win their favor. One dealer issues week-end resort guides for the convenience of customers and keeps a record of good places to fish, hunt, camp and canoe. He does everything to encourage people to get away from the cities and congested communities on Saturday afternoons and Sundays and make use of sporting goods and those items such as vacuum bottles, cameras, refrigerator baskets, etc., which are invaluable for the week-end trip or annual vacation.

Fishing is a popular pastime with a great many men of a class who are desirous of having the best outfit obtainable at any price. For this reason fishing tackle and other accessories are a profitable line. As with all sporting goods, the power of suggestion is important, and, therefore, well trimmed displays in the window and store should be made in season. Articles of fishing tackle lend themselves to excellent and attractive display, comprising as they do, a class of goods that are delicate as to design and beautiful in appearance. An impression of refinement is conveyed by a good display of fishing tackle.

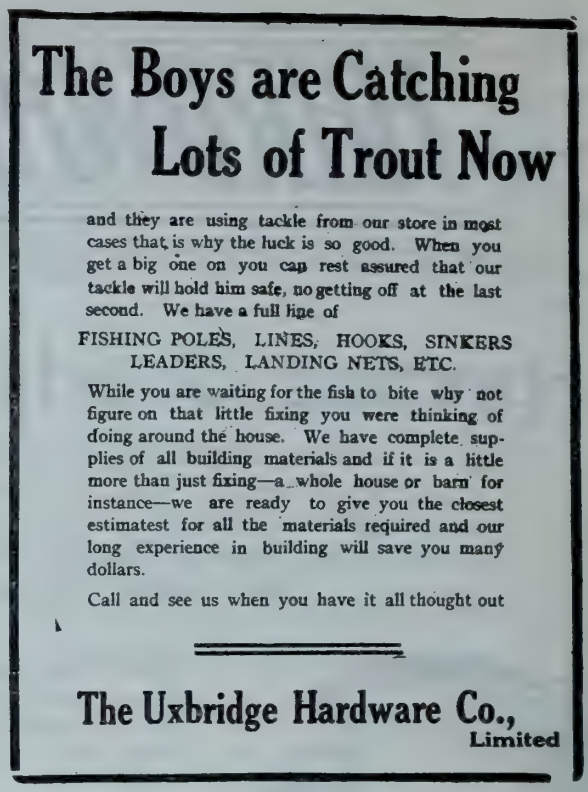
Anglers Planning Vacation at Favorite Fishing Haunts

There are many splendid fishing haunts in all parts of Canada and right now many of those planning a vacation are going through their kits and working over articles of tackle, oiling reels, varnishing rods, making a list of the lines needed to supply those lost last season. Also waders, clothing and other articles, depending upon the whims and fancies of the individual, will

DONATE $2,500 TO ENCOURAGE RIFLE SHOOTING IN SCHOOLS

Bearing out the point emphasized in this article, that military experience in the war would encourage rifle training, comes an announcement from Hamilton, Ont., that the Chairman of the Board of Education of that city has given particulars of a donation of $2,500 by five Citizens who lost sons in the great war, for the purpose of developing an interest in rifle shooting.

It is propsed to use thirty dollars from each donation to procure a half-tone photogravure and copper plate from which can be printed, as wanted, the scroll to be given to the winner each year. The balance of each donation is to be held in trust by the board, the interest on which will be given in cash yearly to the student of the collegiate institute selected for markmanship, and who will compete at the ranges each year for a place on the Bisley team.



An announcement that will catch the eye of the local anglers is contained in this ad. by the Uxbridge Hardware Co., Ltd., Uxbridge, Ont. It makes the point, in a humorous vein, that tackle sold at this store will be sure to hold even the largest catch, and that good luck goes with it. It makes another "bold" suggestion, that while waiting for the fish to bite the fishermen contemplate little fixings they can do around the home.

The other ad., by Ingram & Davey Ltd., St. Thomas, emphasizes many seasonable lines with a little note about each particular sport. Thus it says, "Golf is a science, a study of a lifetime, a test of temper, a trial of honor. It means going into God's out-of-doors, getting close to nature, fresh air, exercise, etc." It states that there will be a great revival of golf playing in Canada this year and urges an early start.

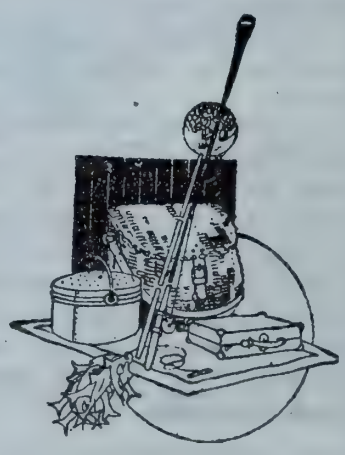
---

require attention. While this is going on the dealer should be getting his windows in shape in order to attract attention.

Feature Map Showing Good Fishing Places

A seasonable display suggestion is to feature fishing rods, reels, lines, nets, waders, lures, etc., in the window, with a map of the local community in the centre. On this map the principal fishing streams and lakes should be marked with small thumb-tacks and a cord or ribbon attached and extended to the window marking a card which bears the name of the river or lake and mentioning the kind of fish which predominates in that water. The use of some branches and ferns as a representation of some shady nook, with a small stream of water representing the river, makes a window which will attract much favorable attention. In such a display the use of imitation bark can be used freely. Bark paper is very convenient and can be used in displays of almost any line of sporting goods, with good effect.

Another suggestion is to use an improvise defence with simple make-up, consisting of hanging a coat and hat on the fence with a fishing rod resting against it and a fishing basket and net on the ground. This display should have a rustic appearance and its effect lies in its simplicity. The boards should be rough and a piece of imitation grass in the foreground will help. The window of fishing tackle should be confined to this line in order to make it most effective.



Army Training Encourages Shooting

The training in shooting given young men in the army during the war has had the result now of popularizing the rifle for sporting purposes. A suggestion from the dealer will do much to bring business from young men whose experience has fitted them to take best advantage of this form of sport. Then, too, the dealer can influence the younger element in the community. In certain sections of the country churches and schools are becoming centres for indulgence and training in clean, wholesome sports along with their respective spiritual and educational growth. There are several instances of where churches and schools have equipped with a regulation rifle range in their basements. This idea might appear repulsive at first thought to some staid churchgoers of the old school but it has been found to be effective in attracting and maintaining the interest of young boys, and in drawing them into closer touch with other church interests.

There are other examples of rifle ranges and gymnasiums in churches and it would seem that there is a very de-

Spectator Could "Almost Feel Mosquitoes Bite"

WHEN a crowd gathers around a merchant's window it can be judged that there is something out of the ordinary on view. The window trim shown here was exhibited by Messrs. W. H. Thorne & Co., Ltd., St. John, N.B., recently at a time when all good sportsmen were preparing to make a raid on the speckled beauties.

It describes a camp scene to perfection. Tent, camping outfit, fire burning, fishing rods, baskets and even a brook. Two large dolls represent the fishermen, one sitting on a rock holding a rod. Birds are perched in the trees, and the latter are the real thing, being cut from the woods near St. John.

Mr. W. J. McIntyre, who trimmed the window, had the gratification of seeing crowds around it, all attempting to get a good view. One spectator was heard to remark, "It is so real I can almost feel the mosquitoes biting." There is a movement on foot in St. John to have a monthly prize for the best trimmed window, with the object of encouraging the art of window trimming.

finite service that dealers can render in helping develop such important training for young people. Dealers can link up their offerings in the way of equipment by encouraging and aiding the development of these organizations and keeping in touch with ministers, superintendents, teachers, school principals, and other local group leaders. This is but one of the fruitful sources of local business which are open to every dealer who would give his sporting goods department a real stimulant.

Canada Biggest Customer of U.S. in Sporting Goods

The monthly statement of the Division of Statistics of the U. S. Bureau of Foreign and Domestic Commerce for the month of April, 1920, shows that Canada again, as in the preceding five months, was the leading customer of the United States in the purchase of sporting and athletic goods, measured by the dollar value, receiving such goods to the value of $90,938. Cuban was second, with purchases to the amount of $37,394; land and Danzig fifth, with $12,910 worth; Mexico fourth, with $16,615 worth; Poland and Danig fifth, with $12,910 worth; Panama sixth, with $8,256 worth; Norway seventh, with $7,872 worth, and the Philippine Islands eighth, with $6,675 worth.

In loaded cartridges there were exported from the United States more to Australia than to any other country, that country purchasing $126,954 worth. Canada was seventh with $14,249.

As to revolvers and pistols, Argentina led in the matter of purchases, as did that country in March, the value of exports to that country in April of this year amounting to $59,258. Canada was sixth, with $5,631 worth.

There were more rifles and shotguns exported to Australia from the United States than to any other country in April, the value being $51,619. Canada was third, with $31,615 worth.

Brantford Hydro Rates Reduced

Brantford.—Chairman Andrew McFarland, of the Brantford Hydro Commission, announces a reduction authorized by the Ontario Commission, in some of the Brantford rates. The reduction became effective June 1. The reduction in power charges constitutes a lowering of 8 per cent. of the rates hitherto charged. As regards the rate for domestic lighting, Chairman McFarland stated that Brantford had now as low a rate as any other city in the Hydro zone.

Still Trucking Raw Materials Into Canada

Would Have Been Greatest Season for Tools in Canada if Railroad Service Had Been Efficient—Canadian Firms Still "Digging" for Materials and Using Motor Trucks to Transport It.

TORONTO.—"We have no complaint about the business we are getting. Of course at this season of the year we expect there will be a little dropping off, especially if the call for the equipment is not pressing. But we are looking for better business, and it is going to get better just as quickly as the railroad situation gets to the point where it can take care of it. It is our firm belief—and there are others who hold the same view—that had there been good railroad service the Canadian trade would never have seen a greater season for the selling of machine tools than right now. A great deal of this business is still good. One of the things that will help in bringing it into the market is a more reasonable and stable level in the figures for building. From what we can judge, conditions in Canada are fundamentally sound, and early fall will bring all the trade we can possibly get the material to accommodate."

The Scrap for Material

Canadian firms are getting to the point where they know what it means to get out and dig for their material. It used to amount to getting out to dig for the orders, but it is not yet a case of that so much as chasing material. For instance, one well-known Canadian firm has a number of men at one of the Pittsburg mills while another group works around Youngstown, in the steel district. They have a number of heavy trucks, and as soon as they locate any material belonging to their mill they grab it, and run it away to a line that is operating fairly well, fill and seal the cars and see that they get headed out pointing to the Canadian border. This performance is costing them quite a penny, but it means that they are able to get production instead of being at the point of closing down.

One Toronto dealer stated that he had instructions from several firms in this district to get material, no matter how it was sent. They are all willing to stand the added expense of having stakes put in as supports around the sides of flat cars, an unusual way of shipping many lines of steel. The mines are getting the preference on anything that looks like coal-carrying cars now. One Toronto dealer was in Chicago a few days ago at one of the mills there. This mill had a shipment of light rails for one of the mines that was shipping coal to them. They could not hold the cars long enough to get this shipment on board and send it on the return trip to the mines. The claim is made that were an exception made in this case it would create a precedent, and in the end defeat the drastic order that has been put into force to deal with the coal situation.

Little Arriving Here

The warehouses here are getting little assistance from any quarters this week. Shipments are dwindling away from the rather small figures of a few days ago. Reports of cars coming in after having been on the road six weeks and two months are quite common, but it is a healthy sign that practically all this business remains good, and cancellations on account of slow delivery are not often met with.

One view was expressed in the steel market this morning, viz., that many of the cancellations in other lines were not due to the fact that people did not want the goods, but rather that they were using the cancellation option as a club to batter down prices from their present high levels, and that once this were accomplished the orders would come in again. The fact that there is a demand for all sorts of material is one of the best indications of the fundamental strength of the market.

Hardly any class of material owns up to getting good treatment now. One can go over the list of material coming in, or rather not coming in, and be assured that sheets, bars, tubes, plate, etc. are all very slow in arriving, although the trade is getting a little more assistance now in the line of bars from the Canadian mills.

There is a scarcity of labor in some of the local steel warehouses. The work is fairly heavy, and apparently the available men can find easier jobs elsewhere.

No Recovery in Scrap

The scrap market is quiet. Some of the larger dealers had to come into the market a few days ago and take on quite a tonnage in order to cover themselves on promised shipments, and this they were able to do at half a cent under the market. Although it is possible to take on material at fractions off the recognized price, the yards show no tendency to buy as they do not want to take on any more stock. In most cases they are advising their customers to hold their material. There are very few buyers in the market now, and the demand is weak.

DEVELOPMENT OF CANADIAN WORKING GLOVES INDUSTRY

Among the minor manufacturing enterprises of Canada to experience marked development during the war period was the glove and mitten industry, particularly in respect to working gloves. During the year 1918, being the last period for which the record is complete, working gloves for men and boys were manufactured, to the number of 399,052, with a value of $4,533,941. These statistics are altogether separate from the total figures including dress gloves, which show a total value of $8,307,677 for the year 1918 compared with $1,877,964 in 1915. The increase in value of the output of working gloves and mittens can be judged proportionately.

AUTO HEADLIGHT BILL IS DELAYED

The regulation on headlights on autos placed by the Ontario Government in a special bill at the last session of the Legislature was supposed to have been effective on July 17. However, the law will not be enforced on that date, as the Department of Highways has not yet sent out the list of its approved lights or apparatus to dim and lower lights now commonly used. This list will not be out until a few days after July 17.

The first list will be of Canadian manufactured lights and apparatus which the Government approves. This list is now being completed. It was suggested to the department that the list approved in New York State be used here, but it was not thought fair to Canadian manufacturers of these articles, and the Government list will place Canadian-made apparatus first. The department may also allow the painting of lens on auto lights to keep the light rays down and the proper strength. At any rate, the law will not be effective until the department issues its lists of approved lights.

Interesting Figures of Canada's Trade

Statistics for Fiscal Year Ended March 31, Show Increase in Both Imports and Exports—Canada Buys Chiefly from United States —United Kingdom and States Buy Nearly Equal Amounts from Canada.

OTTAWA.—Trade figures for the fiscal year ended May 31st have just been issued. Imports for that period totalled $1,064,516,169 as compared with $916,429,335 for 1919 and $618,457,144 for 1914. Exports for the same period totalled $1,239,492,098 for 1920 as compared with $1,216,443,806 in 1919 and $431,588,439 in 1914.

The United States led the list of countries from which our importations came, these totalling $801,428,755 for 1920. The United Kingdom was next, importations from that country totalling $126,269,274.

In exports, both the United Kingdom and United States were customers to a greatly increased extent, and both about equal. Exports to the United States for 1920 totalled $464,029,014 and those to the United Kingdom totalled $489,151,806. Both of these figures show substantial increases over 1914.

Lines showing increase in importations as compared with 1919 include: Brushes, carpet sweepers, clocks and watches, anthracite coal, earthenware and chinaware, electric apparatus, explosives, flax, hemp and jute, glass and glassware, gutta-percha and Indian rubber, hides and skins, ivory manufactures, leather, copper, machinery, miscellaneous metals, oilcloth, vegetable and other oils, paints and varnishes, resin, seeds, spirits of turpentine, motor and other vehicles, waste.

Lines showing decrease in importations as compared with 1919 include: Tiles, cordage, rope and twine, brass, agricultural implements, iron ore, other iron and steel, lead, zinc and other manufactures, oil cake and meal, fish oils and mineral oils, and wax.

Lines showing increase in exports for 1920 as compared with 1919 are as follows: Tiles, brushes, coal, binder twine, flax, hemp and jute, gutta-percha other than for boots and shoes, agricultural implements, machinery, other iron and steel, oil cake, oils, rags and waste, automobiles, automobile parts.

Lines showing decrease in exports for 1920 as compared with 1919 are as follows: Coke, electrical apparatus, explosives, unmanufactured leather, aluminum in bars, blocks, etc., raw asbestos, copper and manufactures of, bars and rods, iron ore, wire and wire nails, lead, nickel, other metals, paints and varnishes, sails, awnings and tarpaulins, vehicles other than automobiles.

EDITORIAL COMMENT

CHARGE LINSEED CRUSHERS MAINTAIN ILLEGAL COMBINATION

A SUIT under the Sherman anti-trust law against members of the Linseed Crushers' Industrial Council of the United States, which is charged with maintaining an illegal combination, comes as a distinct surprise to the paint trade. It is pointed out by the Department of Justice that the price of linseed oil would have fallen to lower levels than the price of $1.80 a gallon which it reached subsequent to 1916, had there been competition among the defendants. Commenting on the suit, the "American Paint Journal" states, as follows:

> "The action of the Department of Justice in filing suit against the members of the Linseed Crushers' Industrial Council came as a genuine surprise. The height of the surprise was increased by the fact that since the organization of the Council, according to every man connected with it, the Federal Trade Commission had been kept informed of every move made by members in relation to the council and, in fact, it has been claimed, and still is cliamed, that the crushers worked as an organized body with the consent and under the direction of the Commission.
>
> "This is a case that should not be tried in advance of legal procedure; but if, as the crushers claim, they originally organized at the request of the Government; if, as they claim, the Federal Trade Commission has been kept posted regarding the council's every move, and acquiesced therein, by its silence at least, then it would seem that in all fairness fair warning should have been given when the Council, by any act, proposed to, or did overstep the law.
>
> "Accepting the claim of the crushers as a true statement of fact, it would seem to one sitting on the sidelines and holding no brief, that either the crushers have been double-crossed or that there is some disagreement between the Federal Trade Commission and the Department of Justice."

ANY EFFICIENT ACCOUNTING SYSTEM COMPLIES WITH BANKRUPTCY ACT

AN enquiry has been received from an Alberta hardware dealer as to what constitutes a "recognized accounting system" as prescribed in the Bankruptcy Act, and which every merchant is required to have subsequent to July 1, 1920.

It is pointed out in this connection, that there are no particular accounting systems which have been definitely authorized for use by merchants. The Government requires that each merchant maintain an accounting system which will show a clear and concise record of every business transaction and which can produce at short notice a correct statement of how the business stands. All receipts and disbursements must be shown.

This will not inflict any hardship on the trade, for no intricate accounting system is necessary, and the benefits of keeping a record at all times will accrue to all merchants. There are a number of simple accounting systems ready for use by dealers, and these will take care of all requirements of the law as well as give protection to the dealer himself with a minimum expenditure of time and energy. The Government merely wants to be shown that the dealer is acquainted with every detail of the progress or otherwise, of his business, so that in the case of failure his liabilities will not be an unnecessarily large burden, and be such as to render difficult a declaration of insolvency.

MANUFACTURERS SHOW DETERMINATION IN FACE OF DIFFICULTIES

FEW stories come in almost every week regarding the manner in which Canadian manufacturers are chasing material across the line. They quit months ago depending on letters, wires, telephone calls, or any such thing, and have substituted the more costly, but more certain, method of placing their own men at various points at the border and at the mills. In some cases the reliable truck is doing great service in getting material direct from the mills to the tracks where freight is moving in the direction of the Canadian border. It is an expensive way of doing business, and it is adding considerable to the cost in Canadian plants, but there is the poor option of doing this or trying to get along with dribbles coming in at the receiving end of the plant. The Canadian manufacturers are showing a spirit of determination that is commendable, and it speaks well for the future development of business in this country.

Important Changes in Shooting Regulations

New Regulations for All Canada Restrict Bags and Methods of Shooting—Further Protection for Migratory Birds

NEW regulations under the Migratory Birds Convention Act have just been issued by the Federal Department of the Interior, and involve important changes.

At present, under Ontario regulations, no person is allowed to kill in one season in excess of 200 ducks. Under the new regulations issued by the Department of the Interior daily bag limits are imposed in various Provinces, including Ontario and Quebec, as follows:

Ducks, 25 in aggregate of all kinds; geese, 15; brant, 15; rails, coots, gallinules, 26; black-bellied and golden plovers and great and lesser yellow-legs, 16; Wilson snipe or jack-snipe, 25; woodcock, 10; doves, 25.

Restrictions for Dominion

The following shooting restrictions are imposed throughout all Canada:

No person shall kill or attempt to kill any migratory game birds during the open season, except with a gun not larger than number ten gauge.

No person shall kill or attempt to kill any migratory game birds by the use of any automatic, swivel or machine gun or battery, or by the use of an airplane, power boat, sail boat or sunken boat.

No person shall kill or attempt to kill any migratory game bird between the hours of sunset and sunrise.

No person shall kill or attempt to kill from any motor vehicle or horse-drawn vehicle any migratory game bird.

There is practically no change in the regulations for scientific permits, but important new regulations are passed regarding the propagation of migratory birds for the purpose of keeping tab upon and controlling the propagation of migratory birds in captivity, whether to be used for food, ornamental or zoological purposes, etc.

Taxidermists have to register in future and secure a license at a fee of $1.

One change has been made in the open season in Ontario. Wilson or jack-snipe open season has been extended and is now the same as Quebec, and the seasons for certain shore birds, September 1 to December 14, instead of October 15 to November 14, as formerly. Woodcock in Ontario remains at the short season named.

Bag limits for the Maritime Provinces are: 25 ducks per day, aggregate, 15 geese, 15 brant, 25 rails, coots and gallinules, 15 plavers or yellow-legs, 25 snipe, 10 woodcock and 25 doves. The season's duck limit is 200.

Stove Prices May be Little Higher

B. C. Beach Discusses Stove Outlook — Can Look After Requirements for Fall Delivery—Prices Withdrawn on July 15th—New Prices Not Much Higher Unless the Steel Situation Tightens Up

DISCUSSING the stove outlook with B. C. Beach, manager of the Beach Foundry Company, Ltd., Ottawa, Hardware and Metal was informed that while some stove manufacturers declare that they are so handicapped that they cannot hope to fill all orders, his firm can, from present indications, meet the requirements now in hand. Mr. Beach stated that the chief difficulty in securing materials was in respect to steel and stove trimmings such as tile. It was difficult to get supplies but by making representations in time and keeping after the producers he finds it quite possible to keep sufficient supplies on hand to maintain capacity production. Nearly all orders for fall are now in and manufacturers know about what to count upon.

In respect to labor, Mr. Beach stated that moulders were difficult to get, and that manufacturers were increasing the pay of this class of labor in order to hold their men and possibly attract others.

In regard to prices, Mr. Beach mentioned a notice which his company had sent to the trade stating that on July 15 all prices as of January 2 will be withdrawn. The letter states: "We had hoped that by now the upper limit of the price of raw materials would have been reached. Instead, during the past five weeks the cost of materials has advanced more rapidly than at any other period since 1914, and even at these greatly increased prices, materials are much more difficult to procure."

Conditions have so shaped themselves that prices will be a little higher than last quotations according to Mr. Beach, but the advance will not be very great unless the steel situation tightens up more than is indicated or unless labor troubles develop.

DO YOU ADVISE CUSTOMERS?

In selling electrical appliances modern hardware salesmen find it an important part of the sale to carefully instruct customers in the use of such new appliances as may be carried in stock and which though very familiar to the salesmen, may not be fully understood by the purchaser.

In Montreal a few days ago several hundred dollars damage was caused by a fire which broke out in a home on St. Lawrence Boulevard. The fire started because the mistress of the house failed to turn off an electric switch attached to an iron she was using.

Little considerations of this kind are vitally important and such circumstances as the above suggest that salesmen cannot be too careful in cautioning housewives and others in the careful use of electric current.

TREATING IRON ORE BY NEW METHOD

Big Future is Assured for the Low-Grade Ores of the Dominion

Ottawa.—Satisfactory results have been obtained from the investigations carried out by Prof. Alfred Stansfield of McGill University into the reduction of iron ores by gases at low temperatures and with the electric furnace.

This research was assisted by a grant of $1,200 from the Honorary Advisory Council for Scientific and Industrial Research. On some of the findings, the council states, patents have been applied for by permit of the commercial development in Canada of the methods which will make the low-grade ores of Canada utilizable and of the greatest value.

Iron ore, iron and steel and their products are annually imported into Canada to the value of more than $150,000,000. Such methods of utilizing Canada's low-grade ores would render the greater part of this importation unnecessary, in the opinion of the council, which, it states, if it had the funds available to do so, would make provision for such investigations as the importance of the subject warrants being undertaken.

Last Saturday about twenty prominent American manufacturers from various points in the United States were in Montreal and spent the day as guests of the Montreal branch of the Canadian Manufacturers' Association. A sightseeing trip along the harbour front, on a special train provided by the Harbour Commissioners, was the feature of the morning. After luncheon the guests were taken for a trip around the city. Heading the party from the States was Stephen C. Mason of Pittsburg, president of the U. S. National Association of Manufacturers.

EVENTS IN THE TRADE

Fire Loss

St. Stephen, N.B.—Mann Axe & Tool Company, Ltd., suffered loss by a recent fire.

Business Changes

R. M. Brice, hardware merchant, at Essex, Ont., has disposed of the harness shop which he conducted in connection with his business, to D. McBrine.

Paint Association Met

Montreal.—The Canadian Paint, Oil & Varnish Asscciation held a meeting this week to discuss the tax arrangement called for in the new Canadian budget.

Memorial Tablet on Factory Wall

St. Catharines.—A tablet has been unveiled at the Welland Vale Manufacturing Company's plant for those of its men who fell in battle. The tablet is on the outer wall of the office building, passed by every employee daily. The name of each hero is upon the tablet.

New Premises for Northern Aluminum Co.

Northern Aluminum Co., Sterling Road, Toronto, will have completed by the 1st of November a fine steel and concrete office and warehouse. The building is ten storeys high, 80 feet x 180 feet. They are also building an additional factory, 100 feet x 250 feet. This added space will give the firm facilities for increasing their utensil output.

Death of Frederick Dowswell

Hamilton. — One of Hamilton's best known business men passed away last week in the person of Frederick Dowswell, 254 Victoria Avenue North. The deceased was vice-president of the Dowswell-Lees Company. Announcement of his death came as a shock to a wide circle of friends. He had been ill but a short time.

Hold Annual Picnic

Watford, Ont.—The annual picnic of the employees of the Andrews Wire Works was held last week when the staffs fro mthe Watford and Strathroy factories went by motor to Hillsboro and spent the entire day in sports and merrymaking. The picnickers were the guests of the management. There were about 140 in the party. Baseball, running, jumping and swimming contests were indulged in. Secretary Bate and Supt. Millar did everything in their power to make the day a success and were tendered a hearty vote of thanks.

Pioneer Business Man Dead

Christopher Sheppard, who died in Toronto this week after a lengthy illness, was one of Toronto's first business men. He was born in the city nearly 76 years ago, a son of ex-Ald. William Sheppard, and for nearly forty-five years carried on the iron and brass fittings business at 154 King Street east, now known as Christopher Sheppard and Son.

He is survived by a widow, a son, A. S. Sheppard, with whom he was associated in business, and two daughters.

Beatty Bros. Extend Factories

Fergus, Ont. — In addition to very large extensions to their factories in London, Ont., Beatty Bros., Limited, manufacturers of stable equipment, churns, washers, ladders, etc., are making extensive additions and improvements to their factories in Fergus, Ont. These include the installation of a patent dry kiln for drying green lumber; and other additions to stable equipment factory in Fergus. By August 1st, an additional floor space of nearly three acres will be available at their main Fergus factory alone.

Montreal Faces Gasless Winter

Montreal.—J. S. Norris, general manager of the Montreal Light, Heat and Power Company, Ltd., who has just returned from a 2,000-mile journey throughout the soft coal mine area of the Eastern States, with the object of finding coal to fill his company's requirements of 800 tons a day, stated this morning that, for the winter's supply of gas it has always been their custom to stock up during the summer, which means getting about 120,000 tons. Of that large amount, the company has not yet even one ton, and it even has great difficulty in securing enough for daily use. The situation in this city is extremely serious, and many families may be unable to get any gas during the coming winter.

Paint Company Buys Warehouse

Toronto.—The warehouse at No. 49 Colborne Street, formerly occupied by the R. B. Hayhoe Tea and Coffee Company, has been purchased by the A. Ramsay and Son, Company, wholesale dealers in paints and oils, and possession will be taken immediately. Construction of solid brick, with four storeys and basement, the building has a frontage of 18 feet by a depth of 70 feet, and the price paid was in the neighborhood of $20,000. The purchasers have been tenants in the building directly opposite at No. 48 Colborne Street for a number of years.

Some Special Attractions for London Picnic

London.—The annual picnic to be held at Port Stanley, Ont., on July 28, under the auspices of the London Hardware Association, promises to be the most successful of the many successful outings held by this organization. The sports committee has arranged a program that is said to be the most varied ever held by the hardwaremen with features that will interest every man, woman and child. In addition, there will be a number of special attractions. The hardware men will travel to the lakeside in their own special train over the London and Port Stanley Railway, and invitations have been extended to a number of district hardware merchants and to travellers to attend and see what a real outing is.

Prefers to Buy Canadian Iron and Steel Products

Montreal.—An indication of the extent to which Canadian trade with the sister Dominion of South Africa is developing and gaining favor, is given by Mr. T. A. Connolly, who has just arrived from that country. Mr. Connolly is a member of the firm of J. W. and T. Connolly, leading steel and iron merchants in Capetown. For many years the firm had been buying from Great Britain, but during the war they started obtaining supplies from Canada. Mr. Connolly was so impressed with the possibilities and advantages of the Canadian trade that he has taken a trip here, with the South African director of the Dominion Exporters, Ltd., and through the Montreal offices, he has come in contact with a large number of the leading manufacturers, with the result that he has placed some important contracts in Canada, with the intimation that further contracts are likely to be given out in future.

As to the class of goods which Mr. Connolly's firm is shipping from Canada, he mentioned nails, pipes, horseshoes, enamelled ware, household utensils, tents, wire and barbed wire, the latter being not for purposes of warfare, but for ostrich farms.

S. F. Bowser & Co., Inc., Hold Annual Convention

S. F. Bowser & Co., Inc., held their sixth annual convention at Fort Wayne, Ind., on June 28 to July 2 in honor of the 1919 members of the Pacemakers Club. The convention was held for the benefit, inspiration, and entertainment of the sales force, everything possible being done to make it a success. Aside from the general spirit of "loyalty and patriotism" which was in evidence at every meeting, there were two specific demonstrations which were interesting. As a surprise to the factory force the salesmen pinned on the bosom of each workman a unique badge of honor. The purpose was, of course, to secure a better understanding between the man on the "firing line" and the producer. A gasoline filter demonstration was made. This was the largest convention ever held by the company and was successful from every viewpoint.

Would Raise Freight Rates 30 Per Cent.

Ottawa.—An application has been filed with the Board of Railway Commissioners asking permission for a flat increase of freight rates in Canada to the amount of 30 per cent.

The application has been sent to the Railway Commission by the Canadian Railway Association, and its request is made on behalf of all the railways in Canada members of the association, and also on behalf of all other Canadian railways subject to the jurisdiction of the Railway Commission.

It is expected that there will be a long fight over this application, one which will probably engage all the best legal talent of the Dominion. It is understood that the railways in making the application have not filed any very lengthy document. Their reasons for asking the increase number eight in all, but in a general way these reasons can be summarized, under the general term of the vast increases in wages, material and operating expenses generally.

Novel Invention to head off thefts

HALIFAX.—A Halifax inventor and vocational student, James W. Howard, is applying for Canadian and American patents for a new electrical device which promises to eliminate a great deal of loss now suffered by large users of electric light bulbs and lights.

Mr. Howard's invention is an improvement in safety locks for tungsten and other electric light globes, and is specially designed for use in public buildings, factories and other places where a large number of lights are used. In such places many of the lights are often stolen or otherwise misappropriated, and this invention will render such blobes useless to those who may take them, as they cannot be used on any other socket than the original one, nor on the original one itself again owing to the presence of the safety lock. It is of no further use once removed from the socket.

Mr. Howard intends to have the lock constructed in such a way that it will be simple and applicable to standard sockets and the lamps and bulbs engaging therewith.

E. K. SPINNEY

Head of the firm of E. K. Spinney Ltd., wholesale and retail hardware, Yarmouth, Nova Scotia, who has been selected by Canada's new Prime Minister as Minister without portfolio in the Union Cabinet.

Lumber Outlook in Relation to Building

A question which has evoked much discussion lately, in view of the building going on, is whether there will be a material slowing up in Ontario this summer and what the effect would be upon lumber prices and the general lumber situation. Men prominent in the lumber business state that the building in cities is running ahead of last year. In the country the operations are fair, in some sections very good, and in others to the contrary, but the average is very satisfactory and the demand for material continues to be good. At any rate some slackening off is generally looked for at this time of year.

There seems to be little prospect of any satisfactory reduction in the price of lumber, while the costs of production remain so high. In the West there has been a drop, but local dealers contend that it is debatable whether it will continue or not. The cut of logs has not been as large in the East as expected on account of the scarcity of labor, and driving operations have been slow. Unfilled orders plus the new ones are taking the new stock about as fast as it comes into condition.

Incorporations

"The Jolliette Castings and Forgings, Ltd., is incorporated with effect from July 3rd, for the purpose of the manufacture in steel and iron products, and to act as importers and exporters for same. Authorised capital stock of $1,000,000, divided into 10,000 shares of $100 each. The chief place of business to be Montreal, P.Q.

* * *

Authority has been granted with effect from June 19th, for "The Anglo-Canadian Malleable Steel Manufacturing Co., Ltd.," to increase their capital from $50,000 to $200,000, such increase to consist of 15,000 shares of $100 each, and sub-dividing six unissued shares of the company now of the par value of $1,000 each, into sixty shares of the par value of $100 each.

* * *

Notice is received of the incorporation of "The Belanger Foundry, Limited," with effect from June 11th, for the purpose of acquiring the firm of O. Belanger, Inc., and to engage in the manufacture of iron and steel in all its branches. The company to have a capital stock of $100,000, divided into 1,000 shares of $100 each. The chief place of business to be Montreal, P.Q.

Britain to Be Independent of U.S. Steel

The opening this week of the blast furnace at Ebbwvale, South Wales, the largest plant of its kind in Europe, having a capacity of 3,000 tons per week at a cost of $5,000,000, marks the beginning of an era in the steel industry of Great Britain which will result in making it independent of United States supplies. Plants are now being constructed which will produce all the steel needed for British consumption, and when this production materializes there is expected to be a break in prices which will make possible the commencement of much work which has been held up owing to high prices. Authorities describe this action as a revolution in the British steel industry and are of the opinion that America has passed the high peak of normal production and must now retrace its steps in development.

Unfilled Orders of U.S. Steel Corp. Indicate Relief of Congestion

The tonnage figures of the United States Steel Corporation for June showing an increase in the volume of unfilled orders at the close of the month of but 38,351 tons was disappointing in one sense, as earlier estimates had placed the amount at 250,000 tons. From another viewpoint, however, the showing was very satisfactory as it reflected the improvement in shipping conditions and the fair movement of finished products from the corporation's mills which will greatly relieve the congestions and preclude the possibility of shutdowns.

The total tonnage of unfilled orders of the corporation on June 30 was given as 10,978,817, compared with 10,940,466 on May 31 and 4,892,855 on June 30, 1919. The June, 1920, figures continue at the highest peak since January of 1917, and a steady increase may actually bring a record figure by the end of the year.

NEWS OF WESTERN CANADA

Vancouver Merchants Make Protest

Against Filing Monthly Reports—Board of Commerce Order Meeting with Opposition—Organization is the Safety Valve Says Secretary of R. M. A.

VANCOUVER—(Special)—A great deal of opposition is evident among the Vancouver retailers to the questionnaire that is now mailed by the Board at Ottawa. As the secretary of the R.M.A., Vancouver, puts it: "After holding up the retailer to contempt and scorn, after attempting to destroy the public confidence in the retailer and hounding and harassing him on every possible occasion, this expiring body, the record of which is one of pandering to prejudice and fanning the air, a body whose very status is in serious question—this body, I say, takes a last contemptuous kick at the retailer, and with its dying gasp insists on a rigid enforcement of its latest annoying futility, the questionnaire."

According to Mr. Hougham, the secretary of the B.C. R.M.A., the whole secret of the retailer getting proper recognition of his rightful place in the community scheme-of-things is in thorough organization.

Believes in United Effort

"While the grocer is getting it 'in the neck' the druggist sits back and says, 'well, really—this does not affect me,' and when the druggist is faced with an imposition the hardware merchant sits tight, but this spirit has simply got to be dug under. What is the hardware merchants' problem this month, is more than likely to be the grocers' next month. We must all strive for more solidarity—not as grocers' or hardware merchants', but as RETAILERS. The time is fast approaching when we retailers must start strong propaganda, demonstrating our place in the community life; we must prove our right to exist, and with that proven—be strong enough to protect ourselves as retailers from the vexatious impositions and ignorant experiments of politicians—both within and without the Government. Our fellow retailers in the State of Washington have retained an excellent speaker, well informed on merchandising and community problems whose sole duty it is to cover the state, addressing meetings of farmers and bankers, manufacturers and labor bodies, educating these classes to the rightful place in the system of present day living occupied and filled by the retailer. In my estimation the retailers in Canada could well employ some means to educate the public to their right to exist."

R.M.A. Notes

The R.M.A. in Vancouver printed in full, giving the text of the luxury taxes as outlined in the budget speech, and had it in the mails 48 hours before the local Inland Revenue officers had their telegraphic instructions.

* * *

Many B.C. merchants are refusing to fill out the questionnaire sent out by the Board of Commerce. The following resolution was passed by the Vancouver R.M.A.

"This meeting of Retail dealers of the Vancouver Branch of the R.M.A. of Canada, protests emphatically against the action of the Board of Commerce requiring retail dealers to fill out the monthly statement of staple commodities as per the form submitted by them for that purpose, for the following reasons:

1. That the attempt to supply the information called for would necessitate the employment of expert help, which, from an expense standpoint, would be prohibitive and would further enhance the cost of commodities to the public.

2. That it is impossible to arrive at an accurate statement of quantities purchased.

3. That in many of the commodities specified, prices are constantly changing during the period specified, i.e., during the month.

* * *

A dealer from Blue River, B.C., who is required to remit his taxes to Vancouver, protests that he is again taxed when buying the money order to make the remittance.

* * *

To show to Vancouver and New Westminster the size of the class in the community known as RETAIL MERCHANTS, the combined associations of the R.M.A. in Vancouver and New Westminster—all branches—will hold a monster picnic at New Westminster on August 11.

Western Notes

Meeting Creek, Alta.—H. P. Sperry has sold out his hardware business.

* * *

Kimbey, Alta.—Beatty Co. have started a hardware store.

* * *

McAuley, Man.—L. A. Leavins has sold his hardware business to Alex. McWilliams, Jr.

* * *

Assiniboia, Sask.—Maza & Darby have commenced a hardware store.

* * *

East End, Sask.—East End Hardware Store has dissolved partnership.

* * *

Hodgville, Sask.—Rose & Boyle have started in the hardware business at Hodgville, Sask.

* * *

Blairmore, Alta. — The Blairmore Hardware Co. are the first to install a substantial incinerator for the destruction of rubbish around their premises.

* * *

J. L. S. Hutchinson, general manager of the Canadian Supply Company, Saskatoon and Winnipeg, was a visitor at the Toronto office of Hardware and Metal this week.

* * *

O. B. Manville, of the Manville Hardware Company, Prince Albert, Sask., was a visitor in Toronto during the week. Mr. Manville was accompanied by his son.

* * *

Winnipeg.—Stanley Brock Ltd., 80 Lombard St., Winnipeg, with offices at Calgary and Vancouver, have secured the selling agency for the Anthes Foundry line for Western Canada.

* * *

Grande Prairie, Alta.—Hardware stores close at 6.30 p. m. except Saturday night and nights before a holiday. The Porteous Hardware Co. states there was considerable objection at first but that the system is now working fine.

Draw Business from Miles Around

Moose Jaw Hardware Company Watch Closely Developments in Outlying Districts for Paint and Other Business—Modern Fixtures Facilitate Carrying of Large and Assorted Stock.

THE paint department of the Moose Jaw Hardware Company, Ltd., Moose Jaw, Sask., is one of the busiest sections of the store. The farmers in the district are of the prosperous type, crops having been good recently, and they spend a good deal of money in keeping their farm buildings and equipment in first-class condition. Hardware dealers of Moose Jaw and district have been preaching paint as an insurance against decay and an important factor in economy for some years, and even when times are not so good a substantial response is made to these efforts.

By pushing the sale of paint, this store has been able to get a great deal of business from farmers for many miles around. An ear is kept to the ground at all times for indications of possible business. Information is secured from customers representing certain sections, as to building and other developments, and if a farmer is contemplating the erection of new buildings a special effort is made to get his business in paints and fixtures.

A view of the paint section of the store is shown herewith. It will be noted that a large and well-assorted stock is kept within easy reach. A counter display of brushes is shown, individual sections being used by the various sized and various priced varieties. The sale of brushes in conjunction with paints has been found useful and beneficial to both lines.

A general view of the main store is also shown herewith. It will be noted that a large stock is well taken care of by modern fixtures, including display cases, wall cabinets with glass fronts, drawers with samples attached, shelving above for surplus stock, store ladders, cash-carrying system, etc. George J. Morrison is president of the company.

Death of Prominent Hardware Merchant

Saskatoon. — Mr. Malcolm Isbister, postmaster of Saskatoon, died at his home, 534 Spadian Crescent, last week, at the age of 69 years 10 months. Mr. Isbister had been suffering from Bright's disease for a considerable period, and had been confined to his bed for the past four weeks. He came to Canada 65 years ago from the Orkney Islands. His parents settled at Galt, Ont., where he lived until manhood. After teaching school and engaging in the merchandise business at Petrolia with his brother, he came West as a contractor on the C.P.R. and lived in Port Arthur for several years. Later he moved to Scuris, Man., and Wawanesa, coming to Saskatoon in 1903, when, with his eldest son, he started the present hardware business. He was mayor of the town in 1906, member of the hospital board from 1906 to 1911, and president of the Board of Trade eight years. Mr. Isbister leaves two daughters and two sons: Mrs. J. Hanbury, Vancouver; Mrs. J. Pretty, Saskatoon; C. Isbister, Winnipeg, and James, Saskatoon.

Paint and Varnish Convention

Vancouver. — The British Columbia Paint and Varnish association met in annual convention in the board of trade rooms last week and after the business session a banquet was held at the Hotel Vancouver. The "Save the Surface Campaign" was a feature of the gathering.

Vancouver Stores Close at 6 p.m.

Previous advices to Hardware and Metal were that hardware stores in Vancouver close every evening at 6 o'clock except Saturdays. We are advised that this is not correct, as they close every evening in the week at 6 o'clock including Saturday.

Vancouver Dealers Entertained in Victoria

Vancouver, B.C.—A few days ago twenty Vancouver and New Westminster hardware dealers were entertained at Victoria by the hardware men of that city. They were driven about the city in motor cars, taken for a visit to the plant of the Sidney Roofing Company, entertained at the Butchart Gardens, and afterwards given dinner. The mainland men will reciprocate with a similar entertainment for their Victoria friends shortly.

Penticton, B. C.—The Penticton Hardware Co. announces that the business which was recently sold by Mr. J. C. Fleming to Messrs. C. L. Lynch and Malcolm Campbell and which has since been carried on by Mrs. Lynch and Mr. Campbell, will continue under that ownership and management. The firm name will remain as formerly, "The Penticton Hardware Co."

Newsy Notes From Here and There

Toronto.—W. H. Rumball, of Mimico Beach, made a business visit to Toronto this week.

* * *

Toronto. — C. M. Cooper, hardware man of Richmond Hill was a visitor to Toronto this week.

* * *

Toronto. — J. Henderson, hardware man of Brampton, Ont., was in Toronto this week on business.

* * *

Toronto.—W. E. Preston, of Prestons, Ltd., Midland, Ont., was a visitor in Toronto this week.

* * *

Toronto. — W. W. Schoales, secretary of Stewart and Woods, Ltd., is holidaying at Bala, Ont.

* * *

Toronto. — J. P. Noonan, hardware merchant of Mt. Forest, Ont., was a visitor in Toronto this week.

* * *

Toronto. — A. Hagerman, hardware merchant of Zephyr, Ont., was in Toronto this week on a business trip.

* * *

Toronto. — A. W. Poole, managing director of Stewart and Wood, Ltd., has returned from a business trip to Montreal and eastern points.

* * *

Toronto. — W. J. Moorish, hardware merchant of Highland Creek made a business trip to Toronto this week.

* * *

Toronto. — J. Beaumont, hardware merchant, of Georgetown, Ont., made a business trip to Toronto this week.

* * *

Toronto.—G. W. Pinkerton, hardware merchant, of Schomberg, Ont., made a business trip to Toronto this week.

* * *

London, Ont.—Work is proceeding on a handsome new summer residence on the lakefront near Kingsville, Ont., for R. Baxter, of the Baxter Hardware, Windsor, Ont.

* * *

Montreal. — Jas. Coleman, formerly manager of the Boss Lock Nut Factory, of Montreal, has become associated with the Consolidated Equipment Company, with offices in the Transportation Building.

* * *

Toronto.—Employees of the Branston factories of Toronto and Buffalo held joint picnic at Queenston Heights last week. A feature of the programme was a ball game between teams from the two factories. Toronto winning by 13 to 6.

Toronto.— Alderman F. M. Baker, Ontario representative of T. S. Simms & Co., Ltd., St. John, N. B., has left for St. John to attend the annual conference of managers and district representatives of the above named firm. He was accompanied by his son Carl, who intends staying over for a period to study the brush industry.

* * *

Montreal. — Edward Goodwill, vice-president, the Thos. Davidson Manufacturing Company, Ltd., Montreal, returned this week from a brief visit to Winnipeg; F. A. Fitchett, manager, Montreal branch of the Hobbs Manufacturing Co., Ltd., spent some days this week at the London office; Arthur W. Brown, manager, A. Ramsay & Son, Co., returned from an extended trip to Western Canada points.

* * *

Montreal.—"Tony" Pautler, of Preston, Ont., has accepted a position as travelling representative for Lewis Bros., Ltd., and will cover Western Ontario territory for this firm; Alexander Gibb, Jr., returned from a trip to Western Ontario points; R. E. Bass, representing Williams Stove Lining Company, Taunton, Mass., was in Montreal this week; A. H. Seeley, representing L. B. Wasserstrom, New York, was in Montreal during the week.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1093. **Nails.**—A co-operative organization in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export nails.

1228. **Shovels and tools for use in tin mines.**—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

1231. **Galvanized buckets.**—A Liverpool firm of West African merchants wish to purchase the above from Canadian exporters for direct export to West Africa.

1234. **Galvanized wire fencing.**—A Liverpool firm of West African merchants wish to purchase the above from Canadian exporters, for direct export to West Africa.

1242. **Aluminum in ingots.** — An Australian firm ask for quotations for aluminium in ingots suitable for casting and alloying. Quotations f.o.b. Vancouver, B.C.

1243. **Pig lead, sheet lead, spelter and tinplate.**—A firm in Rio de Janeiro, with head office in London, England, desire to receive from a good firm in Canada exports of pig lead, sheet lead, spelter and tinplate. They are buyers of these goods, and would be glad to enter into correspondence with regard to agency arrangements.

1252. **Galvanized fencing wire.**—A New Zealand company ask for Canadian quotations on 100 tons galvanized fencing wire, No. 7 English standard gauge, with tensile strength 35 to 40 tons per square inch, able to bend through 180 degrees over its own diameter without failure. Quotations f.o.b. Montreal or St. John, N.B. The wire is required for securing bales of wool. If the first order is filled satisfactorily the company will be purchasers for wire in 500-ton lots from time to time.

1253. **Paints, varnishes, and domestic hardware.**—A firm about to open an office in London and place travellers throughout the United Kingdom are desirous of securing agencies, upon a commission basis, of Canadian manufacturers of paints, varnishes, and domestic hardware.

1254. **Gas and water tubing.**—An engineering company in the north of England ask for the addresses of Canadian manufacturers of gas and water tubing.

1255. **Electric lighting material.**—A Liverpool firm are interested in receiving quotations on ½-watt lamps, 230-volt, 100-watt and 60-watt.

1256. **Electrical and mechanical goods for engineers, etc.**—A Liverpool firm desire to secure agencies for the above.

1257. **Electrical goods.**—A Liverpool firm ask to be placed in touch with manufacturers of all classes of electrical goods.

1258. **Iron shoe rivets and tacks.** — A Liverpool firm are in a position to import the above in 50-ton to 100-ton lots.

1259. **Tools and hardware.**—A London firm wish to secure the agency of Canadian manufacturers of tools and hardware seeking a United Kingdom connection, notably: twist drills, milling cutters, etc., spanners, hand, brace and bench drills, hand and bench grinders, hacksaw blades, carpenters' tools.

1260. **Hardware, hollow-ware, implements and tools.** — A Liverpool firm ask to be placed in touch with exporters of the above, with a view to business on a buying or agency basis.

Warm Merchants Against Swindler

Officials of Local 454, International Brotherhood of Freight Handlers, Station Employees and Railway Clerks, Toronto, have issued another warning to local merchants against a swindler who has been operating for a year by promising good service from freight sheds to their warehouses, and has thus obtained considerable sums of money.

"This man has for the past year represented himself as an official of our organization," said an official of the union. "His usual practice has been to ask for a subscription to the funds of the union, and in return to promise prompt delivery. At some places the merchants have refused to give a subscription, and he has threatened to tie up their business."

Hardware Exports to United Kingdom

Interesting Figures Show Where Canadian Products Stand Among Countries Exporting to United Kingdom—Canadian and U.S. Safety Razors Exceed European Makes in Value—German Trade Dominates Some Lines.

IMPORTS of hardware, hollowware and cutlery into the United Kingdom during May, 1920, from Canada, are as follows:

Hardware, other than hollowware—113 cwt., valued at £799.

Hollowware (cast, not enamelled)—one ton. valued at £83.

Hollowware (cast, enamelled)—Five tons, valued at £1,019.

Hollowware (wrought, enamelled)—Thirty-three tons, valued at £3,207 (third largest country).

Hollowware (wrought, galvanized)—Two tons, valued at £114.

Hollowware (tinned plate)—One ton, valued at £170.

Cutlery—4,402 dozen, valued at £11,-953 (second largest country).

A feature of the statistics just issued shows the continuance of importations of German cutlery into the United Kingdom. During the month, importations from Germany of knives, other than machine knives, totalled 21,934 dozen, valued at £8,190. The next largest country was France, from which 1,274 dozen were imported. This comparison shows the extent of German trade in this commodity. Also in cutlery, under the heading scissors and shears, German importations predominate with 15,195 dozen, valued at £7,811.

In the case of safety razors, French products predominate with 124,600 dozen, valued at £6,371. United States is next with 35,686, valued at £18,923, and Germany, third, with 10,264 dozen, valued at £1,618. In point of value the imports from United tSates head the list, with Canadian products second, indicating that safety razors from America are of a higher value.

In other razors, imports of German goods predominate.

GETTING A BIT RESTLESS

Catalogs and Booklets

A. C. Gilbert Menzies Co.

A. C. Gilbert Menzies Company, 439 King St. W., Toronto, have issued a very complete catalogue covering toys of their line. The catalogue contains 32 pages and is very well illustrated, and shows many lines of erectors and erector cabinets, engineering toys such as hydraulic and pneumatic engineering, also sound experiments, civil engineering machine designs, weather bureau outfits, signal engineering, amateur wireless outfits, wheel toys of many models, and toy makers, tin can toys, toy motors, the chemistry outfit, electrical sets, electrical toys, soldering outfits, designing and electrical accessories, carpenter and picture framing outfits, tool chests, as well as games, jokes, puzzles and coin tricks, etc. Tractors and clock sets, tanks, and air craft, as well as nurses outfits for girls, machine guns for boys, are also shown. Readers of Hardware and Metal interested may have a copy from the above named firm on request.

* * *

Hoods, Limited, Birmingham, Eng.

Hoods, Limited, Birmingham, England, have issued a supplementary catalogue which they call No. 199, which contains 96 pages and covers a great number of articles including galvanized ware, cast and wrought hollow ware and kitchen utensils, ice machines, food choppers, ice cream freezers, wringers, and mangles, washing machines, coal boxes, rubber specialties, lawn mowers, garden tools, lime washing outfits, bicycles, brushes, and hair brooms, polishes, tinware, wire goods, cutlery, cycle accessories, gloves and mitts, brass foundry, locks, latches, and other lines of builders' hardware.

Also aluminum ware, some lines of wooden ware, wheelbarrows, garden and bathing tents, garden settees and chairs, step ladders, club bags, grips, and trunks, carpet sweepers, mirrors, gas mantles, go-carts, lanterns, oil stoves, and many other lines are listed. Readers of Hardware and Metal may have a copy of this catalogue on request from the above named firm.

* * *

Canadian Supply Company, Limited. New Catalogue

Canadian Supply Company, Limited, of Saskatoon, Sask., and Winnipeg, Man., have issued a 434 page loose leaf catalogue which is now being distributed to the customers of the company. The catalogue is printed on particularly fine paper and is splendidly illustrated, many of the illustrations being in colors. The catalogue is divided into sections in order to make it handy for the hardware merchants, and there is also a very complete sectional index. In addition to many regular hardware lines, motor accessories are also featured in the catalogue, and the point is emphasized that the company is a wholesale hardware only.

Patents Electric Heater

James Taylor, Toronto, has been granted a patent on an electric heater which, it is claimed, will heat 30 gallons of water to a temperature of 180 degrees Fahr. in 55 minutes at a cost of two cents, and raise 30 pounds of steam in one hour and a quarter at a cost of six cents. Extensive tests have proved that the heater can be used to heat a house by steam or hot water.

NEW HARDWARE GOODS

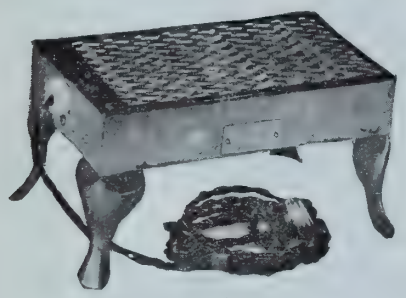
OFFERED TO CANADIAN HARDWAREMEN

ELECTRIC TOASTER AND HEATER

The Bestor Manufacturing Company, Seattle, Washington, are offering the Canadian trade several new electrical appliances, amongst which are electric toasters and electric heaters.

The manufacturers claim their new toaster has many improvements and eliminates crumb nuisance, and when turned upside down all particles of crumbs readily fall out. They also claim this appliance not only toasts quickly, but is ornamental and so sturdily built that roasts of meat or other foods may be kept warm without overheating, and at a trifling expense as the toaster is scientifically constructed on economical lines.

The manufacturers describe their new luminous heater as follows. It is an



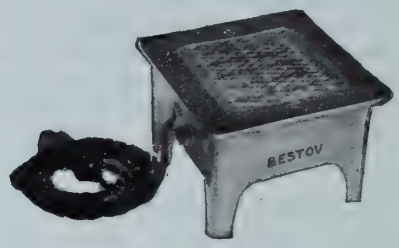
Electric Toaster

electric heater that satisfactorily compares with permanent cold weather heating installations. It is of the glowing coil, open fire place type, built of

Luminous Heater

steel, oxidized copper finish, nickel-plated guard, polished copper reflector, has large nickel-plated handles on sides which are always cool, making the heater easily portable.

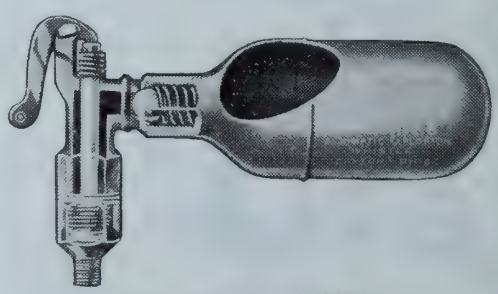
Preparations are being made by this Company to establish a plant in Canada,



and they give it as their intention to be represented from coast to coast.

AUTOMATIC EXPLOSION WHISTLE

The Brookins Manufacturing Co., Dayton, Ohio, are offering the trade a warning device for automobiles and motor engines which they call the Brookins automatic explosion whistle. In describing their new device the manufacturers claim that in appearance it is similar to other types already on the market, but its operation is entirely different. There is a spring and ball check valve which holds its seat against normal compression of about sixty pounds in the cylinder. This valve automatically opens when the explosion pressure of approximately 250 pounds is generated in the cylinder, releasing the full explosion pressure to the whistle. Instantly and automatically this valve closes again and prevents air from being drawn into the cylinder on the intake stroke, which would spoil the mixture in the cylinder for the next explosion. They

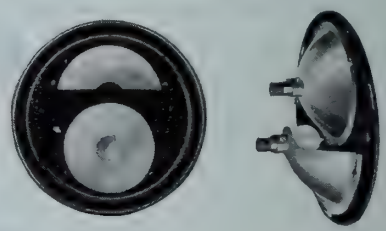


Auto Explosion Whistle

also claim that to install, the only tool necessary is a wrench, in order to remove one of the pet cocks and put the whistle in its place; if the engine is not equipped with pet cocks an adapter for the spark plug connection can be furnished or a priming cup spark plug may be used. The whistle is operated by a strong string or small wire attached from whistle through the instrument board to steering wheel column, where the slight pressure of finger against the wire blows the whistle.

FOUR-RANGE HEADLIGHT

A new four-range headlight is being offered the trade by the Alvo Manufacturing Co., Ashland, Ohio. One of the most important features of the new headlight is said to be the non-glare range which the makers claim is a distribution of light produced by shielding the lamp bulb from view so that the rays have a maximum height of 42 inches above the road and cannot throw a glare into the eyes of approaching motorists. The advantage of this non-glare range is that glare is made impossible without the sacrifice of lighting efficiency.



Four Range Headlight

In describing the device, the manufacturers make the following claims: The four ranges of light are produced by the use of two reflectors, one above the other. The upper reflector is 5 inches in diameter and the lower reflector (which is cut off in the center by a horizontal shield) is 6 inches in diameter.

The upper reflector is a paraboloid, and the lower reflector half of a paraboloid. Both reflectors are scientifically accurate in design, and commercially accurate in the smoothness and regularity of their contour. They are made of spun brass, with a polished nickel surface covered by a highly polished silvered coating.

The second range meets the regulation against glare, the lamp bulb is hidden from view and the light so controlled by being cut off at the horizontal eliminating the possibility of glare reaching the eyes of approaching motorists.

The various ranges of light are obtained by a simple switch arrangement on the dash.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

HARDWARE commodities manufactured from iron or steel continue to advance in price and the tendency is for still higher quotations. Many important price changes have been made this week and with the exception of linseed oil and turpentine all lines have been revised upwards.

Wrought pipe prices have again been advanced. Wire nails also have higher quotations. Nipples, couplings and unions are up several paints. A sharp advance has been made on lanterns. Bar iron and steel, wash benches, wringers and washing machines, clay picks, mattocks, car movers, sisal and jute halters, polishing mops, curry combs, cross cut saw sets, pipe wrenches, toilet clippers, sweat pads, shears, roofing shingles, roofing nails, gem casters, chandelier hooks, rope cleats, hitching rings, nail pullers, stocks and dies, pliers, carpenters' pincers, plumb bobs, band screws, whiffletrees doubletrees and neck yokes bull rings, paper clips, paper files and some lines of cutlery all are on the list of higher revised prices.

Many are concerned for future delivery of goods especially for fall delivery, on account of the set back the majority of industries have experienced, owing to the tie-up of freight transportation. The great shortage of coal is also an important factor in hold back production.

The scarcity of many lines of hardware is not being readily overcome and many will have to be satisfied with a smaller turnover on account of not being able to secure the goods to sell. Wire and wire products are daily becoming more scarce with little signs of an early relief.

Collections are coming satisfactorily.

MONTREAL MARKETS

MONTREAL, July 15.—Hardware activity is remarkably good, considering that the season is so advanced. From the country orders to hand are numerous, and from city dealers there is a demand for certain summer goods. Sporting goods and ammunition are very active—much more so than usual for several years past.

There are some important changes this week. Wrought iron pipe is higher as are also nipples and couplings. There is strong probability of nails advancing again. A stiff advance has been made on lanterns. Bar iron and steel have advanced 25c per 100 lbs. Folding wash benches, wringers, washing machines, etc., have advanced in price. Picks of all kinds are $1 per dozen higher all around. Wheelbarrows are somewhat higher in price. Old scrap materials are down, for the most part, but there is a brisker buying movement this week. Standard anvils are marked higher. The file market is firm and prices may go up. Glass wash boards may advance in price. Wood handles of all kinds are firm, and hickory handles may be higher in price. Lubricating and fuel oils are higher. Solder prices are lower. There is a 5 per cent. decline in the price of steel squares and in some lines of cabinet hardware. The coal and transportation situation are causing some anxiety.

Nails May Advance Before End of Week

Montreal.

NAILS.—The basis for wire nails has advanced 30 cents per keg base. The undertone is strong and supplies are scarce. Present basis is $6.40 per keg, and while some have thought, this to be the peak price, it would seem that conditions have changed and that in common with many other commodities unforeseen conditions have necessitated a change. Cut nails are selling at $6.35 per keg, base.

Charge Higher For Oiling Various Wire

Montreal.

WIRE.—The charge for oiling hay wire and other grades heretofore has been 10c extra per 100 lbs. A change has been made this week and the extra charge is now 25c per 100 lbs.

In general there is a very active demand for wire of all kinds and the jobbers are finding it difficult to fill all orders. There is an exceptionally heavy demand for baling wire and it is doubtful whether there will be nearly enough to go around this fall. In view of the whole situation there is every reason to expect a continued firm market and higher prices will not come as a surprise.

Stiff Advance Is Made on Lanterns

Montreal.

LANTERNS.—A stiff advance has been made in the price of Cold Blast Lanterns with both short and long globes. The present price is $15.00 per doz. It will be recalled that Hardware and Metal predicted a very strong market on this line in a recent issue and an advance was then forecast.

Thirty Cents Added to Iron Prices

Montreal.

IRON AND STEEL.—Another advance of 30c per 100 lbs. has been effected in the price of bar iron and various grades of steel. The new prices are as follows: Bar iron, $4.95 per 100 lbs.; refined iron, $5.05; mild steel, band steel and sleighshoe steel, $5.30; tire steel, $5.50; harrow tooth steel, $5.45; iron finish machinery steel, $5.35; spring steel, $5.80; single reel machinery, $6.80; Coe-casa steel, $6.20. The latter price is for all sizes and there is no base on this one product.

IRON AND STEEL

Iron finish machinery steel		5 30
Norway iron	13 50	15 00
Single reeled machinery steel		6 75
Spring steel		5 75
Sleigh shoe steel		3 75

Tire steel	5 45
Toe calk steel, per 100 lbs.	6 15
Band steel	5 25
Harrow tooth steel	5 40
Mining tool steel, per lb.	0 24½
Black diamond tool steel, per lb.	0 24½
Black diamond cast steel, per lb.	0 24½
Bar Iron, base	4 90
Refined iron, per 100 lbs.	5 00
Mild steel	5 25

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Folding Wash Benches Are Higher in Price

Montreal.

FOLDING BENCHES.—An advance has been made in the price of folding wash benches and this is in accord with the advance made this week in the price of wringers and washing machines. The price quoted on these by jobbers at present is $65.00 per doz.

Prices Picks and Mattocks Up $1.00

Montreal.

PICKS.—An advance of $1.00 per doz. net has been made in the price of various lines of picks. This applies to clay picks, rock picks, pick mattocks, grub mattocks, and grub hoes.

Wheelbarrow Prices Register New Advance

Montreal.

WHEEL BARROWS.—An advance has been made in the price of two lines of wheel barrows of the garden type. Number 1, or the small size, is now selling at $78.75 per doz. and the large or number 3 size, at $105.

Most Old Scrap Is Down; Stove Plate Up

Montreal.

OLD MATERIAL.—Some readjustment of price has been made this week in the old material list, yellow brass being reduced to 9 to 10c per pound, red brass 16 to 17c, light brass 6½c, scrap zinc 6¼c, wrought iron $19 to $20 per ton, pipe scrap $14, heavy melting steel $18 to $19, No. 2 busheling $10 to $12, and boiler plates $15 to $16. On the other hand there has been some improvement in the basis for stove plate which is now quoted $30 per ton.

Since last report improvement has been manifest in the demand from manufacturers. For a long time there was a slump in this respect but conditions are now better and it is expected that this improvement will continue for some time as the manufacturers will be needing more material.

Dealers' Buying Prices

Automobile tires	0 02½	0 03
Yellow brass	0 09	0 10
Red brass	0 16	0 17

Stove plate, per ton	....	30 00
Heavy melting steel	18 00	19 00
No. 2 busheling	10 00	12 00
Boiler plate	17 00	18 00

Binder Twine Active; Difficult to Move

Montreal.

BINDER TWINE.—There is a very active movement at the present time in binder twine and the difficulty which Montreal manufacturers and jobbers experience at the present is that of getting transportation of the same. A strike of teamsters had made it necessary for various firms to do their own carting and this has held back shipments to some extent. However there is a very free movement of this product which is selling steadily at prices arranged some weeks ago.

Wringer Prices Move Upward

Montreal.

WRINGERS.—A new list has been issued on various wringers and the following prices are effective: Bicycle per doz. $115; Royal Canadian, $102; Rapid, $100; Warranted, $127; Easy, $110; Eureka, $79.00; New Eureka, $87.00. These prices are subject to regular discount of 20%. Other makes are also advanced.

Higher Prices for Washing Machines

Montreal.

WASHING MACHINES.—An advance has been made in the price of various washing machines, some of the leading designs selling as follows: Snow-Snowball, $19.50; Magnet, $22.75; Ideal, $28.00; New Century, $19.75; "A". On these prices 20% discount is allowed. It is expected that other lines will be advanced immediately.

Anvil Prices Are Revised Upward

Montreal.

ANVILS.—Sanders make of Anvils are revised in price and are selling on the following basis: for 41 to 56 lbs., the price is 29c per lb.; 57 to 70 lbs. 27½c; 71 to 83, 25c; 84 to 139, 24½c; 140 to 450, 24c.

File Market Firm; Prices May Go Up

Montreal.

FILES.—The undertone of the file market is a very strong one at the present time and it will not be surprising if the prices advance in the near future. If an increase is made effective it will be due to the increased cost of raw materials and also to the high prices prevailing for labor.

$4.00 Per Ton Added to Pipe Prices

Montreal.

IRON PIPE.—Wrought iron pipe has advanced in price about $4 per ton. This is the first increase since April, when the former schedule was made up and the new prices now effective date from July 7. A revised schedule showing the new quotations is appended herewith.

WROUGHT PIPE

	Steel Blk.	Steel Galv.	Gen. Wrought Iron Blk.	Gen. Wrought Iron Galv.
⅛ in.	$ 6 50	$ 8 50	$.....	$.....
¼ in.	5 31	7 41	5 61	7 71
⅜ in.	5 31	7 41	5 61	7 71

1½ in.	21 04	25 99	22 41	27 36
2 in.	28 31	34 97	30 16	36 82
2½ in.	44 75	55 28	....	....
3 in.	58 52	72 29	....	....
3½ in.	74 06	90 62	....	....
4 in.	87 75	107 37	....	....

Couplings and Nipples Are Advanced Somewhat

Montreal.

COUPLINGS, NIPPLES.—Prices are advanced for both these lines through revision of the discounts. The present discounts are as follows: Wrought nipples, 4 in. and under, 50 per cent.; 4½ in. and larger, 40 per cent., and 4 in. and under, running thread, 20 per cent. Wrought couplings, 4 in. and under, 20 per cent.; 4½ in. and larger, net.

Some Cabinet Hardware Lower to Extent 5%

Montreal.

CABINET HARDWARE. — Various kinds of cabinet hardware, including drawer pulls, cabinet handles, drawer locks, etc., have eased somewhat in price and are quoted about 5 per cent. less than previously.

Some Reduction in Price of Steel Squares

Montreal.

STEEL SQUARES.—A decline in the price of steel squares has been made effective this week, the reduction amounting to about 5 per cent. It is a long time since there was any reduction of price on this line, and while the change is a small one will be welcomed by the hardware trade.

Glass Wash Boards May Soon Advance

Montreal.

WASH BOARDS.—There is a strong possibility that an advance may soon become effective for glass wash boards. The supply of glass is very short at the present time, and it is difficult to get the necessary supply from St. Louis, which supplies a good deal of this glass to the manufacturers of wash boards. While recent arrivals have been considerable, these have been required to fill back orders, and there is little stock available for new business.

Scarcity Handles May be Manifest

Montreal.

HANDLES.—It is expected that there will be a shortage of hickory handles again this fall. At the present time it is difficult to get adequate stock of these goods, and in view of the fact that supplies of hickory are not available in large quantities, those selling these lines in Canada believe there will be some diffi-

culty in getting requirements this fall. There is a fair supply of maple handles to be had. Prices are bound to rule high, perhaps higher than they are at present.

Oil and Gasoline Firm and Very Active

Montreal.

OILS, GASOLINE.—The oil market, generally, is very firm. Prices have reached record levels. The consumer appears to buy without reserve, and this is responsible for a very active condition at the present time. Coal oil is selling some 29 cents per gallon and up, while gasoline is selling at 39½ cents.

Lubricating and Fuel Oils Higher

Montreal.

FUEL OIL.—A constantly increasing market prevails on fuel oil. The present basis rules around 23 cents per gallon, and this is, of course, a new high record. There still is considerable shortage of the product, and those having adapted their plants to the use of fuel oil have had some difficulty in securing adequate supplies. Lubricating oils—The various grades of lubricating oils are constantly firming and various manufacturers have had to increase prices from time to time. While it is impossible to give a list of prevailing prices. Standard castor machine oil is now selling at a price of 49½ cents per gallon. Higher prices can be looked for.

Summer "Ware" Trade Has Been Excellent

Montreal.

WARES, STOVES.—Despite the advanced season of the year, when conditions are expected to be very quiet, there is still a considerable outgo of various wares. Enamelled ware, galvanized ware, tin ware, etc., are in active demand, seasonably speaking, and prices are naturally very firm although there has been no changes during the past week. Stoves are rather quiet, but the undertone is a very firm one.

Rope Is Holding Steady But Is Quiet

Montreal.

ROPE, CORDAGE.—The movement of rope is naturally confined to a sorting business, and prices remain unchanged with pure manila selling at 35 cents per pound, base; New Zealand and British manila at 28 cents, and sisal at 23½ cents.

Solders Are Lower Due to Tin Reduction

Montreal.

LEAD PRODUCTS.—Prices are somewhat easier on solder This has been induced by the better prices ruling for tin, which has had a spectacular career in London. Local prices on strictly, commercial and wiping solders have been shaded considerably, and corrected quotations are given below. The market, generally, on other lead products such as pipe, sheet lead, etc., is without change. Any slight favoring of price from the basis lead quotations are offset by the higher cost of fuel, labor costs, etc.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00
Note.—Lead pipe is subject to a discount of 10%

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Some Improvement in Ingot Metals

Montreal.

INGOT METALS.—Some local improvement is noticeable this week in ingots. That is to say, the movement is somewhat better and the price basis more steadied. While a quiet time of the year has arrived some are looking for reasonably good business.

TIN.—London markets have settled down to a better basis and prices hold here at around 58 to 60 cents per pound, with some trading reported.

COPPER.—Prices are 23½ cents for casting grade and 24 cents for electrolytic. The undertone is more settled than it has been.

LEAD.—This is a bit firmer in tone, 10 to 10½ cents being quoted. Trading is only fair in this market.

SPELTER.—Some are quoting higher on this at 12½ cents, although others are offering at 10¾ cents per pound.

ANTIMONY.—At 11 to 13 cents per pound there is some business, although the liquidation is not so heavy as it was a few weeks ago.

ALUMINUM.—A price of 37 to 38 cents per pound is being quoted on this.

TORONTO MARKETS

TORONTO, July 15.—Great activity has been shown throughout the hardware trade as regards to price changes and this week many basic lines of hardware have been marked up to higher levels. Wire nails have advanced 15 cents per keg base and wire and wire products of many kinds are very scarce. Wrought pipe has also advanced and a new list number 45 has been issued. Cold blast lanterns also have had a sharp advance.

Liquid veneer mops, sisal and jute halters, car movers, clay picks, mattocks and grub hoes, pipe fittings, including nipples, couplings, dart unions, etc., are all included on the list of advanced prices.

Although business has been very good considering the season of the year. Sales have slightly fallen off and business is rather quiet. Harvest tools are in good demand also rope, binder twine, and wares. Brush prices are very firm and manufacturers are not prepared to accept spring booking orders at present quotations.

The scarcity of many lines of hardware has not been offered much relief and some commodities are very hard to procure.

Collections are coming forward satisfactorily.

Cold Blast Lanterns Have Been Marked to $15 Doz.

Toronto.

COLD BLAST LANTERNS.—A higher revision has again been made on the price of cold blast lanterns and these are now priced at $15 per doz. Manufacturers state they are daily finding it more difficult to secure supplies of raw material and the glass globe also costs more to manufacture, it is stated. The new prices are very firm.

Liquid Veneer Mops Advanced to $16 Per Doz.

Toronto.

LIQUID VENEER MOPS.—New and higher prices have again been made on liquid veneer mops and the new price is now being quoted at $16 per doz. This is said to be due to the higher cost of manufacture and the advanced cost of raw materials generally throughout the manufacture.

Sisal and Jute Halters Have New Higher Prices

Toronto.

HALTERS.—Some lines of sisal and jute halters have been advanced in price, small sizes now being quoted at $25 per gross and the large sizes at $38 per gross.

Car Movers Advance Now Quoted at $16.25 Ea.

Toronto.

CAR MOVERS. — Further revisions have been made in the price of car movers, and new and higher prices are now in effect, $16.25 now being the quotation:

Higher Prices Made on Various Clay Picks

Toronto.

CLAY PICKS. — New and higher prices have again been made on clay picks, and the new price is now being quoted at, $13 for 5 to 6 pound, $14 for 6 to 7 pound, and $15 for 7 to 8 pound,, while the 8 pound is quoted at $16.50 per dozen.

Mattocks Now Cost $15 Dz. Grub Hoes Also Higher

Toronto.

MATTOCKS have been revised upwards this week, the new quotation now ranging from $14.50 to $15.50 per dozen.

GRUB HOES have also higher revised quotations, the new prices being quoted at $11.50 to $15.50 per dozen.

Pipe Fitting Prices Join March Upwards

Toronto.

PIPE FITTINGS have been revised to higher levels. Dart Unions have had a considerable advance, the ¼ to 2½ inch. now being quoted at a discount of 8 per cent. off the list in place of a former 17½ per cent. discount while the 2½ and larger are now quoted at an additional 55 per cent. to the list in place of a former 9¼ discount.

NIPPLES have also been revised upwards, the discount on 4 inch and up is now 50 per cent. in place of the former 60 per cent.; the 4½ and larger are now quoted at 40 per cent. from the list; the running thread, 4 inch and under, at 20 per cent. discount from the list. Couplings have also been revised upwards, 4 inch and under, being quoted at a discount of 20 per cent. from the list.

Higher Prices Again Made Iron and Steel Pipe

Toronto.

WROUGHT IRON. — A sharp revision has again been made in the price of wrought iron and steel pipe, and in line with the conditions surrounding the manufacture of this commodity the new price are considerably higher. Jobbers state they have great difficulty in securing some sizes of pipe, and it is believed that there are many large jobs held up as a result.

Manufacturers state the fuel shortage has been having considerable disruption to their system of manufacturing, and one manufacturer stated that he was several weeks behind in deliveries of coal, and that if shipments of fuel did not arrive in better quantities he may be forced to close down until supplies come forward.

NAILS.—A further advance of 15 cents per keg base has been made on nails; as previously mentioned in these columns, nails and many other wire products have been very scarce, a situation which is attributed to the scarcity of rods. The tie-up of the freight transporation is also a factor and manufacturers have had great difficulty in securing coal and other fuel.

The present shortage of nails shows little relief and warehouse stocks are very light and notwithstanding the new advanced prices there are some who are offering premiums over these quotations in order to get delivery.

The new price is very firm and is quoted at $6.25 per keg. base:

The new price on pipe is very firm and whether it will hold at this price for any definite time is a matter of conjecture. The following are the new higher quotations:

Wrought Pipe

	Steel Blk.	Gen. Galv.	Wrought Iron Blk.	Wrought Iron Galv.
⅛	$ 6.50	$ 8.50	$.....	$.....
¼	5.31	7.41	5.61	7.71

3½	74.06	90.62	....	....
4	87.75	107.37	....	....

Various Wares are Firm Raw Material Scarce

Toronto.

WARES. — Manufacturers of wares of all kinds are still faced with the difficulty of procuring supplies of raw material, and the prices are very firm as a result, and manufacturers state they have little chance of accumulating any stocks as the demand is so heavy that the goods are practically shipped from the machines to dealer or jobber as the case may be.

Galvanized wares are very firm, and the famine prevailing for sheets is causing the manufacturers a great inconvenience, and many lines are very hard to procure as a result.

Prospects for Fall Stove Business Very Bright

Toronto.

STOVES AND RANGES.—Manufacturers are busily engaged at the present time in making up stoves of various kinds for the Fall business, although it is believed that they have no great stocks ahead of them on account of the scarcity of raw material.

Iron and Steel Bar Prices Firm; Have Fair Stocks

Toronto.

IRON AND STEEL BARS. — The heavy demand on stocks for agricultural flats has lowered many warehouse stocks and in view of being between periods for mill run some sizes are very scarce.

Other bars, however, are said to be adequate to cover the present demand and jobbers are looking forward to fair receipt from the manufacturers for future booking regardless of recent interruptions owing to the shortage of coal and the tie-up on the railroads. The following are the present quotations:

Common bar steel, 3-16 and light......	6 00
Common bar steel, ¼ in. and heavier....	5 50
Common bar iron, 3-16 in. and heavier....	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 95
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Lead and Zinc Products Hold Firm; Unchanged

Toronto.

LEAD AND ZINC PRODUCTS.—A very satisfactory buying movement is being made at present for nearly all kinds of solder and fair volumes are moving out. Lead pipe and lead waste and traps also have a keen demand and many hundred lbs. are daily being used. The situation shows little change over last week and all in the following list have the same quotations as previously, although present prices are rather firm due to the fluctuation of the basic metals. Nearly all products have uncertain quotations and whether any downward change will be made in the future remains to be seen. The following are the present quotations:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb............	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.............	0 18
Zinc sheets, per lb.	0 19

Spring Brushes May Again Be Advanced

Toronto.

BRUSHES.—The present situation on bristle brushes of nearly all kinds is very tight and some who have been accustomed to buying in a stock ahead were disappointed to learn that manufacturers were unable to accept present orders for spring delivery. This manufacturers state is due to their uncertain conditions and to the difficulty of securing their raw materials to cover this booking, and indications point to August before the new spring prices will be announced.

Some have it that these new prices will be at an advance as in most cases it is customary for the bristles to take from one to two years from the time they leave the animal till in the hands of the manufacturer, and this, manufacturers state has necessitated them going into the markets for extensive quantities at high figures. The present higher quotation for the raw material does not augur well for lower prices for some time to come and many are of the opinion that higher prices will be made in the near future.

FIBRE BRUSHES are quoted at very firm high prices with little prospect of any immediate reductions being made. The demand continues to be a fairly heavy one and good quantities are moving out, although manufacturers state they have some difficulty in supplying all sizes.

Rope Sales Seasonably Good; Price Steady

Toronto

ROPE.—Prices continue very steady for rope and a fair volume is being handled. Few are looking for an immediate change in price and jobbers state there is little likelihood for some time at least until warehouse stocks which have been purchased previous to the removal of the war tax of 7½ per cent. become reduced.

BINDER TWINE.—The majority of dealers have now got their supplies of binder twine, and manufacturers state there is very good promise for a big repeat business during the season. The prices are as per current quotation pages:

Sheets and Plates Show No Relief; Still Scarce

Toronto.

SHEETS AND PLATES.—The famine for sheets of nearly all kinds has shown little relief and very few have stocks to supply the demand being made on them. Manufacturers are in a quandary as to when they will receive their orders which have been booked for some considerable time and while it is true that some are receiving small shipments the supplies that are coming through are in no way sufficient to supply the huge demand.

Transportation difficulties have caused many disruptions at the source of supply and a new development in the situation is the shortage of cars for which many are tied up now and are unable to ship their supplies that are finished.

The demand for sheets of nearly all kinds is becoming heavier each day and those depending on shipments which have been booked a long way ahead have not received supplies which have been long overdue, and many contracts and other works are held back as a result.

The following quotations are published here merely as a guide, and while these prices are fairly standard many are charging premiums on account of having to go into the local markets, or where practically recent shipments have been received by the jobbers by paying a heavy premium, and in this case these shipments are also subjected to resale premium prices.

BLACK SHEETS

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Boiler Tube Prices Firm; Show No Change

Toronto.

BOILER TUBES. — A considerable scarcity is noted for some sizes of boiler tubes, and jobbers state they are getting anything but sufficient supplies from the mills who in turn state they have found it almost impossible to secure sufficient supplies of skelp. It is believed that great demands have been made on the skelp mills this season owing to the extension and research work being carried cut on the oil fields, and some have it that many miles of pipe have been secured for this purpose at premium prices for which mills have had to neglect other orders coming from the regular sources. The following quotations are very firm and are quoted as follows:

BOILER TUBES—	Seamless	Lapweld
1 inch	$23 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00

4 inch	98 00	64 00

Waste Material Demand Fallen Off; Price Weak

Toronto.

WASTE MATERIAL. — Little improvement has been made on the movement of materials and the present market is very sluggish. The tendency is still downward and still lower prices would not surprise some of the better informed.

One large dealer stated that the present conditions were such that English materials could be laid down and purchased for practically the same money as is being offered here. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06

Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Tea lead	0 03

Corrugated Sheet Production Still Low

Toronto.

CORRUGATED SHEETS. — Very little improvement has been made in the shipment of flat sheets and manufacturers of corrugated sheets are very materially held up as a result. Many are wondering if this situation will show any relief in the near future as shipments of sheets seem more difficult to procure than several months previously. Part of this, however, is attributed to the recent tie-up of the railroads, the congestion of freight as well as a new situation which has developed regarding the shortage of cars. The mills, it is stated, are also considerably behind in their orders, and it may be some considerable time before they are again in position to ship orders promptly.

Owing to the great difficulty in securing supplies as well as the premiums to be paid in order to secure immediate delivery, many are charging premiums over the prices shown herewith, although these prices generally are conceded to be booking or standard prices.

	Per 100 square feet	
Corrugated Sheets—	Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75

No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Higher Prices Made on Some Machine Oils

Toronto.

MACHINE OIL. — Further advances have again been made on machine oil

prices. The capital cylinder is now quoted at 34½ cents per gallon. The black summer oil at 30 cents per gallon and the black winter oil at 30½ cents per gallon.

Tin is Up 4½c Lb; Spelter and Lead Are Also Higher

Toronto.

INGOT METALS.—The list as shown below for ingot metals is considerably firmer all around, tin has been marked up 4½ cents per lb., lead is up ¼ cent a lb., spelter has also had a slight advance and while the price on other metals is unchanged, the situation is very firm.

TIN has shown considerable strength and a substantial advance of about 4½ cents per lb. has been made. This makes the new quotation 63 cents per lb.

LEAD.—Lead has also been revised upwards and a ¼ cent per lb. has been added to previous prices. Stocks continue rather light with a good demand being offered. The new quotation is 10½ cents. per lb.

SPELTER.—The quotations on spelter are also firmer and an advance of ¼ cent per lb. has been made, making the new quotation 10¾ cents per lb.

ANTIMONY has showed considerably more strength and the demand is somewhat heavier. the quotation remains unchanged, prices being from 12½ cents to 15½ cents per lb.

COPPER.—Quotation on copper shows little change, although the situation is somewhat stronger. The price remains at 24 cents per lb.

ALUMINUM.—Practically no change has been shown on aluminum, the price remaining at 37 cents per lb.

LONDON MARKETS

LONDON, July 15.—Many important changes have again been made on basic hardware lines and the tendency is for still higher prices. Wire nails have been advanced this week and wrought pipe has also been revised upwards pipe fittings including nipples, couplings and dart unions, etc., have advanced and some sizes are hard to procure.

A sharp advance has been made on the price of cold blast lanterns, curry combs, cross cut saw sets, stillson wrenches, mop assortments and liquid veneer mops, auger bits, toilet clippers, sweat pads, japanned shears and roofing shingles all have new higher quotations. A new discount is now current for Dominion ammunitions.

Seasonable lines are all in good demand and good quantities of hay and harvest forks and tools are moving. Window glass is in better demand and stocks show some improvement. Goods are still very scarce and a shortage of many fall lines is anticipated.

Collections are excellent.

Combination Curry Combs Now Cost Dealers $2.85

London, Ont.

CURRY COMBS.—The curry comb with the mane comb attachment has been a very scarce article for some time back, and many dealers were sold entirely out of their supplies. This situation has now been overcome, however, and supplies are beginning to arrive more freely. A new price has been made which is quoted at $2.85 per doz.

Cross Cut Saw Sets are also Marked Up

London, Ont.

SAW SETS.—New and higher quotations have been made on the Whiting cross cut saw sets. The new price is now being quoted at $7.90 per doz.

Stillson Wrench Prices Now Quoted 32% Off List

London, Ont.

WRENCHES AND PARTS.—New and higher revised prices have been made on some lines of pipe wrenches and the genuine Stillson make have been revised upwards as a result. The new quotation is approximately 2½ per cent. higher than formerly and now reads 32 per cent. discount off the list.

Mop Assortments and Oil Mops Have Advanced

London, Ont.

OIL MOPS.—An advance has been made on liquid veneer oil mops, and the new prices are now being quoted at $16 per doz.

MOP ASSORTMENTS — The liquid veneer mop assortments are also higher in price, the new quotations being $15.20 each.

Auger Bit Shipments Come Forward Freely

London, Ont.

AUGER BITS.—The Irwin auger bits have recently been very scarce and many sizes have been hard to obtain. However, stocks are beginning to arrive more freely and are still quoted at the former price list plus 20 per cent.

Toilet Clippers have New Higher Quotations

London, Ont.

TOILET CLIPPERS.—New and higher revised prices have again been made on toilet clippers, and the Brown & Sharpe will now cost the dealer more. The new price on the number 0 and number 1 is now being quoted at $5.40 each.

Ventiplex Sweat Pads Now Cost Dealer $7.75 dz.

London, Ont.

SWEAT PADS have again come up for higher revised prices, and the ventiplex have been marked up to $7.75 per doz. The higher cost of raw material and labor is the main reason for this latest change, it is stated.

New Discount Made on Dominion Cartridges

London, Ont.

CARTRIDGES AND SHELLS. — A slight adjustment has been made in the discount on Dominion cartridges and shells; the new quotation is now 37½ per cent. discount from the list in place of a former 30 and 10 per cent. from the list.

Heavier Shipments of Japanned Shears

London, Ont.

JAPANNED SHEARS.—The Universal Japanned shears have been very scarce for some time back and many were unable to secure supplies. However, stocks are beginning to arrive more freely, and while there has been no change in the price the quotations are very firm. Some of the prices are as follows:

No. 10 x 6 in., $14 doz.; 6½ in., $14.50 doz.; 7 in., $15.75 doz.; 7½ in., $16.75 doz.; 8 in., $17.50 doz.; 8½ in., $18.50 doz.; 9 in., $21.50 doz.

Wire Nail Prices are Marked Up to $6.25 Base

London, Ont.

WIRE NAILS.—As previously mentioned in these columns, the scarcity of nails and many other wire products has been very great and jobbers have been finding great difficulty in secuding supplies from the manufacturers, and in many cases warehouse stocks are becoming very low. This is said to be the reason for a further advance which has recently been made in the priec, the new quotation being 25 per cent. per keg higher than formerly. The wire is now quoted at $6.25 per hundred lbs. base and the cut $7.50 per hundred lbs. base.

Wrought Pipe has Again Advanced

London, Ont.

WROUGHT PIPE.—A further advance has been made in the price of wrought pipe, jobbers state supplies are very light, especially in regard to some sizes, and they state they have great difficulty in securing any replacements from the manufacturers.

The manufacturers state they are greatly handicapped for supplies of skelp, the shortage of coal and fuel is also said to be a serious detriment, and one manufacturer stated he had three weeks' supply of fuel on the road which has been in transit for many weeks, and he has no idea when he will receive

delivery; he also says that if supplies of fuel do not come forward in better quantities, he will be forced to close down as a result. The following are the new quotations on wrought pipe:

Wrought Pipe

	Steel Blk.	Gen. Galv.	Wrought Iron Blk.	Galv.
⅛	$ 6.50	$ 8.50	$.....	$.....
¼	5.31	7.41	5.61	7.71
⅜	5.31	7.41	5.61	7.71
½	7.10	8.63	7.52	9.05
¾	8.80	10.87	9.37	11.44
1	13.01	16.07	13.86	16.92
1¼	17.60	21.74	18.75	22.89
1½	21.04	25.99	22.41	27.36
2	28.31	34.97	30.16	36.82
2½	44.75	55.28	....	....
3	58.52	72.29	....	....
3½	74.06	90.62	....	....
4	87.75	107.37	....	....

Screen Wire Cloth Sales are Seasonably Heavy

London, Ont.

SCREEN WIRE CLOTH.—A very satisfactory business still continues for screen wire cloth and fair volumes are still moving out. It is believed that many are repairing their doors and windows this year in preference to paying the higher prices being charged for new. The present quotation is holding very firm, no change having been made. The black-painted continues to be quoted at $3.60 per hundred square feet and the galvanized at $4.25 per hundred square feet.

Poultry Netting Supplies Still Light; Price Firm

London, Ont.

POULTRY NETTING. — Little improvement has been shown in the supplies of poultry netting and jobbers still report very light stocks. However, the demand has eased up considerably, although there is a very favorable demand for this season of the year. The present quotations are very firm and no change has recently been made. Canadian two-inch mesh is still being quoted at net list and the one-inch mesh is quoted at an additional 5 per cent. to the list:

Roofing Shingles Have Advanced 50c Per Sq.

London, Ont.

ROOFING SHINGLES. — A further advance of 50 cents per square on some makes of ready roofing and roofing shingles has been made, supplies in some instances are rather light, and there has been a very heavy sale for nearly all kinds. The present prices are very firm:

Heavy Demand Made for Various Building Papers

London, Ont.

BUILDING PAPER.—Notwithstanding the higher prices that are being charged for building paper of nearly all kinds, the sales show no falling off and the demand continues to be very heavy. Some of the best sellers are quoted as follows:

Plain Fibre, D2, $1.25 roll; D1, $1.65 roll; Tarred Fibre, E2, $1.45 roll; E1, $1.75 roll; Surprise or Stag, $1.30 roll.

Rope has Fair Demand Price Remains Steady

London, Ont.

ROPE. — The situation shows little change and a fair amount of business is being handled. The price remains fairly steady and present indications point to no immediate change. The pure Manilla is still quoted at 35½ cents. lb. base, and the Beaver Manilla and New Zealand hemp are quoted at 28 cents per lb. base and the sisal at 22½ cents per base:

Harvest Tools Have a Brisk Demand

London, Ont.

HARVEST TOOLS.—A very satisfactory demand is being made for nearly all kinds of harvest tools, particularly is this true of hay forks and field hoes, which are moving very briskly. The quotations have shown no change 50 per cent. and 10 per cent. off the list still being the quotation:

Harvest Tool Handles Are Moving Freely

London, Ont.

HANDLES. — In view of the close proximity of the haying season, a very heavy sale is being made on handles, and many repairing their last year's forks, etc., in preparation of the busy haying season. The following prices are figured net at list plus 20 per cent.:

2nd Growth Bent—4 ft., $6.90 doz.; 4½ ft., $7.92 doz.; 5 ft., $9.12 doz.; 5½ ft., $10.56 doz.; 6 ft., $12.00 doz.

Extra Quality Bent—4 ft., $4.92 doz.; 4½ ft., $5.40 doz.; 5 ft., $6.24 doz.; 5½ ft., $6.96 doz.; 6 ft., $7.80 doz.

Window Glass Prices Remain Unchanged

London, Ont.

WINDOW GLASS.—A very heavy demand is being made for window glass and nearly all in the trade are securing supplies. The recent heavy storms in this district have been the means of breaking many window lights, especially is thus true of hot houses, etc., which has been a considerable stimulant to window glass sales.

Stocks of glass are coming in more freely and this is attributed to the satisfactory way the Belgian manufacturers have overcome their difficulties, and while the scarcity is not entirely relieved the situation is much easier and future prospects are becoming much brighter. The present quotations are very firm, although no change has been made. The single and double diamond still being quoted at 15 per cent. off the list and the cut lights at a discount of 40 per cent. off the list:

No Change Made on Putty Price Remains Firm

London, Ont.

PUTTY.—A continued good summer business is being done for putty, although supplies are still very light. Shipments of English whiting are very tardy and very little is coming forward. The present price is very firm, although few, if any, are looking for change in the near future, and while it is true that some ingredients are declining in price it will be remembered that the latest changes were made when prices were much lower than they are at the present time. The following are the present quotations:

Putty—Standard, 100-lb. drums, $8.30 per 100 lbs.; 25-lb. drums, $8.55; Pure, 100-lb. drums, $10.80; 25-lb. drums, $11.05.

A Decline of 7c Made on Linseed Oil Prices

London, Ont.

LINSEED OIL. — Considerable improvement has been made on the delivery of flax seed and also linseed oil and the situation generally shows a decided improvement. This has been reflected in the price and a decline of 7 cents per gal. has been made.

This quotation seems fairly steady, although many are looking for still further reductions and some have hoped that prices will decline below the $2 mark before the closing of the season. A heavy new crop would also greatly improve the situation and prospects for a large yield seem very bright.

The following are the new lower prices:

	Raw	Boiled
1 to 2 barrels, gal.	$2 30	$2 33
3 to 5 barrels, gal.	2 29	2 32
6 to 9 barrels, gal.	2 27	2 30

Less barrels, add 15c gallon.

Turpentine Declines 30c Per Gal.; Fair Stocks

London, Ont.

TURPENTINE.—A very decided drop has been made in the price of turpentine this week, the new quotations are now quoted at 30 cents per gal. lower, although importers state that deliveries are not coming forward as freely as they would wish for. However, they state the shortage has been fairly well relieved, the tendency is still for lower prices, and some are wondering if there will not be a $2 turpentine this year. The following are the new lower quotations:

	Imp. gal.
1 barrel lots, gal.	$2 80
2 to 4 barrels, gal.	2 79
5 gals., gal.	2 95

White Lead in Oil Steady; Demand Heavy

London, Ont.

WHITE LEAD IN OIL. — A very heavy seasonable demand is being made for white lead in oil, and jobbers state that the corroders find difficulty at times in promptly supplying them with their requirements.

The export demand is said to be still very favorable and good volumes are being shipped to Europe.

The present quotations are very firm, although no change has been made in the price; the pure in ton lots is still being quoted at $20.45 per hundred lbs. and in less than ton lots, $20.80 per hundred lbs. The Elephant brand is quoted at $20.95 per hundred lbs. in ton

lots; $21.30 per hundred lbs. in less than ton lots.

Fair Paris Green Sales at the New Quotations

London, Ont.

PARIS GREEN.—A fair sale of paris green is beign made at the new prices, although it is believed that dealers generally have their stocks already on their shelves. However, jobbers state they are looking forward to a fairly heavy repeat business. The following are the quotations:

PARIS GREEN—

	Per lb.
Petroleum barrels	0 62
Arsenic kegs	0 62½
50 and 100-lb. drums	0 63
25-lb. drums	0 64
1-lb. papers	0 66
1-lb. tins	0 68
½-lb. papers	0 68
½-lb. tins	0 70

The number 30 x 6 inch is now priced at $28 per doz.; the number 30 x 7 inch., at $36, and the number 30 x 8 inch., at $42 per doz.

CARPENTERS' PINCERS have also been revised upwards to the extent of 20 per cent. The 7 inch. now cost $10.25; the 8 inch., $10.80; the 9 inch., $12.40, and the 10 inch., $14 per doz.

WINNIPEG MARKETS

WINNIPEG, July 15—Many higher prices have again been made on important hardware commodities. Shipments of cutlery and other products of British manufacture have been received recently and stocks of these lines are in much better shape. A substantial increase in the price of cutlery is noticeable. Another advance in the price of wrought iron pipe has been made and to-day's prices are enumerated below. There is still a scarcity of hardware commodities manufactured from iron or steel and a gradual increase in prices.

Higher quotations have also been made on the prices of roofing nails and casters. Chandelier hooks are also higher. Rope cleats, hitching rings, Giant nail pullers, Oster stocks and dies, pliers, plumb bobs, iron band screws, Stillson wrenches, wrought pipe doubletrees, whiffletrees and neck yoke all are on the list for higher revised quotations. Bull rings, paper clips and paper files and some lines of shears have also been revised upwards.

Simplex Roofing Nails Now Priced at 27c Per Lb.

Winnipeg.

ROOFING NAILS.—Following recent advances on products of wire of various kinds, some makes of roofing nails have again been marked up 10 per cent., making a new higher price of 27 cents per pound on Simplex in keg lots.

An Advance of About 20% Made on Gem Casters

Winnipeg.

GEM CASTERS. — New and higher prices have been made on Gem casters, which advance the same approximately 20 per cent. The new prices are now quoted at an advance of 20 per cent. to the list:

Chandelier Hooks Come Up for Further Increase

Winnipeg.

CHANDELIER HOOKS.—New quotations have been made on chandelier hooks, advancing the same to the following quotations: Number 240 x 3 inch, $2.65 per doz.; number 240 x 4 inch, $3.50; number 240 x 6 inch, $4.50.

Prices on Rope Cleats Advance About 25%

Winnipeg.

ROPE CLEATS. — Further revisions of price advance quotations on rope cleats, the new prices being approximately 25 per cent. higher. The new quotations are as follows: Number 113, at $1.45 per doz.; number 114, at $1.25 per doz.; number 115, at $1.85 per doz.; number 117, at $1.85 per doz.

An Advance of 25% Made on Hitching Rings

Winnipeg.

HITCHING RINGS.—Further advances have been made on prices of hitching rings, which are now quoted at an advance of 25 per cent. as a result. To-day's prices are as follows: Number 5 x 2½ inches, $2.15, and number 5 x 3 inches, $3.20 per doz.

Giant Nail Pullers Now Quoted at $35 Doz.

Winnipeg.

NAIL PULLERS. — New quotations have been made on nail pullers, and the Giant have been revised upwards to the extent of 10 per cent. and are quoted at $35 per doz.:

Oster Stocks and Dies Have Advanced 40%

Winnipeg.

STOCKS AND DIES.—In line with the many advances which are being made on nearly all commodities composed of iron or steel, Oster stocks and dies have been marked up and the Bull Dog shows an increase of 40 per cent. over former quotations and are now quoted at an advance of 35 per cent to the list:

New Quotations P.S. & W. Pliers 10% Higher

Winnipeg.

PLIERS AND PINCERS.—A further advance has again been added to the price of some makes of pliers and the P. S. & W. make will now cost the dealer more.

50% Advance Has Been Made on Plumb Bobs

Winnipeg.

PLUMB BOBS. — New and higher prices have been made on some styles of plumb bobs. The advance approximating an increase of 50 per cent., making the new price on number 00, $3.75.

Sharp Advance of 25% Made on Iron Band Screws

Winnipeg.

IRON BAND SCREWS.—A sharp advance of about 25 per cent. has been made on the price of iron band screws. The 1 inch. is now quoted at $14, the 1⅛ inch. at $14.60, and the 1¼ inch at $14.75.

Stillson Wrench Prices Have Been Advanced

Winnipeg.

STILLSON WRENCHES. — Genuine Stillson wrenches have until recently been very scarce, but some shipments have been received during the past few days and are higher priced. Genuine Stillson wrenches are now quoted at 25 per cent. off the list. Stillson Pattern wrenches are quoted at 32½ per cent. off the list.

New Price Revisions Advance Wrought Pipe

Winnipeg.

WROUGHT PIPE.—An important revision has again been made on wrought pipe prices and higher quotations are the result. Stocks of pipe continue to be very light and the prospect for early replenishments seem very poor. The scarcity of skelp is given as one of the main factors, although the transportation situation materially affects the supply. The following are some of the new quotations:

Size, inches	Black	Galv.
⅛	$ 6.17	$ 8.64
¼	5.76	8.10
⅜	5.90	8.24
½	7.88	9.59
¾	9.77	12.06
1	14.40	17.82
1¼	19.53	24.12
1½	23.40	28.80
2	31.50	38.84
2½	50.94	63.00
3	66.60	82.80
3½	84.60	103.50
4	99.90	122.40
4½	116.10	144.00
5	135.90	167.40
6	176.40	217.80
7	257.40	.....
8	270.00	.....
9	346.50	.....
10	373.50	.....

Higher Quotations on Double and Whiffletrees

Winnipeg.

NECK YOKES AND WHIFFLETREES.—New and higher prices have

been made on double trees, whiffletrees, neck yokes and other kindred lines. The situation on this commodity has been very tight and may have had great difficulty in securing supplies. However, replenishments are beginning to come in more freely, although stocks are still rather hard to procure.

Bull Rings Have New Price of $4 Per Doz.

Winnipeg.

BULL RINGS. — A slight advance over previous prices has been made on bull rings, and the number 51 are now quoted at $4, and the number 61 are quoted at $4.50 per doz.

Paper Clips Now Cost $2.40; Paper Files Up

Winnipeg.

PAPER CLIPS AND PAPER FILES. —Stocks have recently been very light for paper clips and paper files of many kinds. However, the stocks are beginning to come in more freely and new and higher prices have been made on some lines. The paper clips, number 240, are quoted at $2.40 per doz., while the paper files, number 34, are quoted at $2.65 per doz. and the number 38 at $2.85 per doz.

Higher Prices Made on Some Makes of Shears

Winnipeg.

SHEARS. — New and higher prices have been made on shears of the P. S. & W. make, the advance approximating 10 per cent. The new price on the number 47 is $4 each, while the number 48 are $3.30, and the number 49, $2.80 each.

Some Shipments English Cutlery Coming Forward

Winnipeg.

CUTLERY. — English cutlery is beginning to arrive in fair quantities now and Rogers' make is coming forward in very fair shipments. It has been some time since any great quantity of this line has been received, but during the last few days fair shipments have come to hand. The present shipments, however, were not very heavy, although it is believed that they will be more frequent from now on.

Varnish Brushes Advance 10%

Winnipeg.

BRUSHES.—New revised prices have been made on varnish brushes, which are now quoted at 10 per cent. advance over former prices.

Turpentine Prices Hold Unchanged; Firmer

Winnipeg.

TURPENTINE.—No change has been made on the price of turpentine. The quotation of $3.95 per gallon holding steady and is somewhat firmer, with an upward tendency.

Linseed Oil Prices Show Improvement

Winnipeg.

LINSEED OIL.—A more favorable price has recently been made on flaxseed which in turn has improved the price on linseed oil. The new price is now quoted at $2.50 per gallon raw linseed oil, and $2.53 per gallon for boiled linseed oil.

PITTSBURGH MARKETS

PITTSBURGH, July 15.—Production of steel ingots in June by the 30 companies making monthly reports to the American Iron and Steel Institute was 2,980,690 gross tons, against 2,883,-164 tons produced in May by the same companies, which in 1918 made 84.03 per cent. of the total ingot output. Allowing for producers not making monthly reports, and taking account of the number of actual working days, the rates of steel ingot production for the whole industry appear to have been about 41,050,000 tons a year in May and 42,450,000 tons a year in June, showing an increase in the rate, from May to June, of about 3 per cent.

The production by the 30 companies reporting for the whole half year is 17,634,434 tons, equivalent to a rate for the whole industry of about 42,100,000 tons a year. This compares with estimated production in 1919 (official statistics not being available as yet) of 33,-000,000 tons, and reported production of 43,051,022 tons in 1918 and 43,619,200 tons in 1917, the record year for production thus far. In each of the two best years before the war, 1912 and 1913, production was about 30,280,000 tons, so that production in the half year just ended may be said to have been almost 40 per cent greater than the best average rate before the war.

The half-year's production was, however, far short of capacity, for capacity is between 50,000,000 and 55,000,000 tons a year, given reasonably fair operating conditions. Throughout the half-year there were serious manufacturing difficulties of one sort or another, except that conditions were moderately fair in March. In January there was a serious shortage of coke and this condition was not corrected entirely in February or March. In April came the outlaw rail strikes, greatly decreasing the movement of coal and coke, and after the strikes, as such, became of small moment there was a traffic congestion that greatly interfered with operation. The recovery in production since April has really been greater than might be expected from the loud complaints heard everywhere of insufficient car supplies for moving raw materials. The month of April as a whole showed a rate of ingot production of about 37,550,000 tons a year, but at the worst time in the month the rate was probably down to about 33,000,000 tons, while the rate at the close of June was probably about 43,000,000 tons, showing an improvement from the worst of fully 30 per cent.

Production of pig iron in June was at the rate of about 37,400,000 tons a year, showing an increase over the May rate of about 5 per cent. The production of pig iron increased more than the production of steel, indicating perhaps that the steel works piled pig iron to some extent during June, although it is possible that in May they were consuming some stocks previously accumulated.

In both pig iron and steel the June production was well in excess of the shipments. Pig iron was piled by a number of merchant furnaces, which had plenty of orders but were lacking in cars, while a number of consumers bought pig iron in the open market because they were not getting sufficient deliveries from their regular sources of supply. It has been the common remark of late that buyers of pig iron are really buying deliveries rather than pig iron. What they want is delivered pig iron. No one would at this time buy any pig iron that was to remain in the furnace yard for any length of time.

A rough guess would be that of the steel made in June between 75 and 80 per cent. was actually shipped, the remainder being added to the already large stocks in mill warehouses and yards. Assuming capacity in steel ingots to be 52,500,000 tons a year, the June production was at the rate of 81 per cent. capacity, while if shipments were 75 to 80 per cent. of production they were 60 to 65 per cent. of capacity. Thus whatever scarcity of steel there may be, and there is not as much scarcity apparent as a month or two ago, is to be attributed entirely to the difficulties in making shipments. If the mills could ship at their productive capacity the shipments would be 50 or 60 per cent. greater than they have been of late. A rough guess is that the accumulations of steel at mills now amount to the equivalent of a month's production at the rate lately obtaining.

Corporation Tonnage

The United States Steel Corporation's unfilled obligations increased during June by 38,351 tons, against increases averaging nearly 500,000 tons a month in the three preceding months. The increase in unfilled obligations is, of course, the month's bookings minus the month's shipments, not the month's production. as when the corporation rolls an order to customer's specifications and does not ship the steel it is not a filling of the obligation, the material being invoiced only as actually shipped. The June increase in unfilled obligations was about 5 per cent. of the month's capacity, while the June shipments may be estimated at about 75 per cent. of capacity (actual production in June may be estimated at about 90 per cent.) so that the bookings in a month appear to have been about 80 per cent. of capacity, this comparing with 112 per cent. similarly estimated for May and 94 per cent. for April.

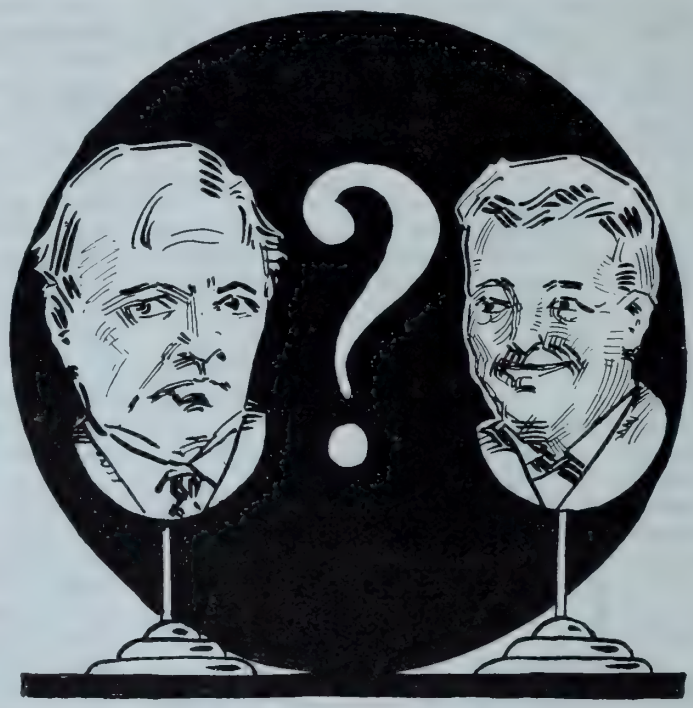
What Kind of a Face Has Your Store?

Has It a "Smile" on or a "Grouch?" — If You Have an Active Paint Department Do Not Let Store Appearance Advertise Differently—Your Lead Will be Followed by Others, So Start the Ball Rolling for Bigger Paint Sales

Written for Hardware and Metal by F. A. FARRAR

IS your store "smiling" or does it wear a "grouch?"

Does your paint department "whisper" or "Shout"? Your paint department should faily yell paint to everyone who comes in, so should the outside to everyone who enters or passes. One of your big departments is that devoted to the selling of paint. Don't let the outside of your store advertise quite a different story. Suggest the use of paint by keeping your store well painted, furnish the example as well as the argument.



Don't Give Well Meaning Customer a Bad Impression

If a person has paint in mind, imagining how well his home or furniture would look with a fresh coat, don't let him come to your store and get a bad impression, and when a man comes in for figures let him find a salesman with a smile, not one who will irritate and send him away with the determination never to return.

A poor, disorderly, shabby looking paint department cannot help but give to the prospect a subtle sense that something is wrong. The front of a store that hasn't been painted in ten years can't help but give a dingy, blistered, peeling, out-of-date impression. When you find a store that is well painted, and a paint department that is well ordered a buyer voluntarily feels that he will get the kind of service there that he is looking for.

Painting Begins at Home

If you believe in paint, that it will save the surface and save all, prove it by painting up your store, outside and in. Painting, like charity, begins at home. The shrewd dealer aims to have everything look at all times just as though it was newly painted, and it is a very strong arguments that he practises what he preaches.

In these days of modern store fronts there is hardly anyone which takes more than a few gallons of paint. You certainly can afford this. A bright, cheerful store is helpful and essential, it furnishes a standing argument in favor of brightening up the stores and homes of your neighbors.

Don't forget that everything you do is an advertisement, either a minus or a plus, and a dull, dingy, unpainted store repels, where a bright, newly painted one invites, attracts the attention of the customer, and sooner or later gets his money in your cash drawer.

The man who talks paint, uses paint, believes in it, and it will be hard to make a customer think otherwise. Paint can also be used to lessen your lighting bills, a careful choice of colors, tints and combinations, will produce a marked difference in the lighting effect of a store, all of which gives you good talking points to refer to when you approach the trade on the subject of painting.

Give the Store Front a Smile

You never realize how much you need paint until your next door neighbor paints up his front, then you suffer by contrast. You see then the difference mighty quickly. Your well painted store front is a good suggestion to others "alongside" your store to go and do likewise. This means business for you; it has worked very successfully for others, and it will not fail to prove a success in your case.

Give your whole store a "smile," take off the "grouch" if it has one.

VARNISH GUMS IN DEMAND

One of the features of the market for paint materials for many months has been the situation in varnish gums. The unusual demand for paint and allied products created by summer weather and trade campaigns has resulted in an excessive consumption of varnish. This condition has caused manufacturers of varnish considerable difficulty in the matter of keeping ahead of orders.

They have consumed all available stocks of varnish gums consequently as quickly as they could get deliveries. This has caused a stringency of offers in varnish gums and importers doing business in the Far Eastern primary markets are hard pressed to keep them supplied. —From the World's Markets, published by R. G. Dun & Co.

"Save the surface and you save all" *Paint & Varnish*

Mooramel

Has Stood the Test of Service

"Mooramel" the excelling and enduring enamel paint for interior and exterior work has found popular favor with careful householders. Made in Gloss and Eggshell White and produces a durable, rich, lustrous, porcelain-like finish that satisfactorily retains its whiteness for years.

Mooramel works easy, has perfect flowing properties, combined with whiteness and other qualities which make it, without any question, the most practical and also the most economical article of its kind ever manufactured.

Mooramel can be used with equally good results on either interior or exterior work and can be cleansed with soap and water as often as necessary without any injurious effects.

Mooramel like all other Moore products sells on its merit. Here are a few of our popular lines:

"Impervo" Porch and Deck. "Tile-Like," Mooramel, Auto Finish, "Muresco," "Impervo" Varnishes, Morelustre Enamel. Barn Paint, Moore's Floor Paint, Sani-Flat, High Gloss Enamel, Carriage Enamel, Wagon and Implement Paint, Shingle Stain.

Illegal Combination of Linseed Crushers

Members of U.S. Linseed Crushers' Industrial Council Charged with Operating Illegal Combination—Lack of Competition Kept Linseed Oil Prices Up—Defendants Say They Welcome Investigation.

A SUIT under the Sherman anti-trust law has been filed in Chicago by the Department of Justice against members of the Linseed Crushers' Industrial Council charging that they are operating under an illegal combination. It is pointed out that the price of linseed oil in October 1916 was 50 cents a gallon; that the price increased to about $1.80 and that since that time the price would have fallen to lower levels had competition among defendants not been restricted as charged in the complaint. No mention is made of the increased price of flaxseed.

The Department of Justice charges that in October, 1918, an ever since the defendants have engaged in an unlawful combination and conspiracy to suppress competition among themselves in selling linseed oil, to enhance their prices for such oil and to prevent the lowering of such prices by means of a so-called open price plan. The complaint shows that this open price plan includes the continuous interchange among the defendants of information as to their quotations and as to the prices given by them in actual sales.

The list of defendants includes the American Linseed Co., and National Lead Co., New York; Archer-Daniels Linseed Company, Midland Linseed Products Company, Minneapelis; Ankeney Linseed Manufacturing Co., Des Moines; William O. Goodrich Co., Milwaukee; Hirst & Begley Linseed Co., Chicago; Red Wing Linseed Oil Co., Red Wing, Minn.; Sherwin-Williams Co., Cleveland; Toledo Seed & Oil Co., Toledo; Mann Bros. Co., Buffalo; The Armstrong Bureau of Related Industries, Chicago, and Julian Armstrong and Montague Ferry, Chicago.

Owing to the fact that at time of formation of the Council the whole plan was stated to have been submitted to Government officials for sanction, the action of the Department of Justice comes quite as a surprise. The Armstrong Bureau have made the statement that they welcome the action, that every assistance has been given the investigators and full information has been supplied. It mentions as unfortunate the fact that the complaint as drafted does not carry all the supporting facts and evidence and that, therefore, an impression unfair to the manufacturers and the bureau is conveyed. It states further that from its inception the bureau has been in close touch with the Department of Justice and kept it fully informed so that there is nothing to conceal. It continues as follows:

"It must be recognized that while this case is started on a friendly basis, according to the bureau's interpretation, it is quite important that the Department of Justice is disposed to obtain a test case of the principles of the open price plan, and the bureau now expects to see conclusively proved the fact that its plan of operation and the bureau itself stand absolutely without parallel in the co-operative field. Certainly there is no institution similar to the Armstrong Bureau and its plan of operation is without duplication although exchange of market information under the true prin-

Outlook for the Paint and Varnish Industry

AN EDITORIAL BY WALTER H. COTTINGHAM
President of The Sherwin-Williams Co.

THE paint and varnish industry has enjoyed unparalleled prosperity for more than a year past. The oldest man in the trade, I am sure, has not before witnessed such a large, insistent demand for our products. For the first time in my own experience, the demand has far outstripped the supply, says Walter H. Cottingham, President of The Sherwin-Williams Co., in the Oil, Paint and Drug Reporter.

Naturally, on account of some slackening up in general business, the question is being asked: Will the paint and varnish business suffer from the forced liquidation apparent in many quarters?

I think not. In fact, I feel sure it will not—for these reasons:

The slowing-down process now under way in general business, in my opinion, will not be drastic; it will be gradual, and it will be helpful.

It is well to remember present conditions have not been brought about because people have not had money, but because they have had an abundance of it and have been spending it too freely and unwisely. So keen have they been to spend, they have outbid one another for the limited supplies, until prices have reached unheard-of levels.

The cure is to curtail speculation and lessen business in non-essentials, by reducing credits and increasing production by more intensive work. Luxuries must be cut down and the money saved for necessities. People must work harder, produce more and spend less.

The paint business is not a luxury (even at present high prices), but a necessity. The greater the production in general business, the larger will be the consumption of paints and varnishes, for they are used by almost all manufacturers. The more money saved by lessening the consumption of luxuries, the more money there will be for painting and varnishing. Economy means preserving things, and the cheapest way to preserve things is to protect them—or, in other words, paint and varnish them.

These are general reasons why the demand for our products should keep up; but, even more important than these, is the immense building program ahead of the country. Thousands and hundreds of thousands of buildings must be constructed to house the growing population. Public buildings and manufacturing plants will follow—must follow, to provide increased facilities for the constantly growing demands of the larger population.

More important than all of these is the fact that during the war repainting of property was almost discontinued. After the armistice was signed the average man still put off painting, hoping and expecting lower prices—which never materialized. The result is there is a larger number of buildings requiring paint—and requiring it urgently—than ever before. It will take yaers, in my opinion, to do all the repainting now necessary—not only in this country, but throughout the world.

Then there are the large, increased demands from shipbuilders, and the still larger overdue demands from the railways and street railways of the country.

I believe that general business is not going to suffer greatly, and that the necessary readjustment now in operation will be gradual and helpful.

The present prosperity of the country is on the sound foundation of increased wealth, increased population and larger markets at home and abroad. Labor, while restless and inefficient, will yet come to see it has been on the whole fairly well treated, and that its continued prosperity depends upon increased production through hard and steady work. Even should general business suffer a serious reverse, I still think, while our industry would not be entirely unaffected, there will be unpostponable demands that will be sufficient to keep us busy. I look for good times in our industry, not only for the next year, but for a number of years to come.

ciples of the so-called open price plan is a part of its co-operative service to its various groups of clients."

Has No Fear of Outcome

John W. Hirst, of the Hirst & Begley Linseed Co., said he was completely surprised at the filing of the suit but had no fear of its outcome as at no time had the linseed crushers conspired to fix prices or to keep them at artificially high levels.

"When the war started we were advised to get together by officials of the War Shipping Board," he said. "We were told that when we had grievances or recommendations not to appear as individuals but as a body. Because of the shortage of raw products and the necessity of getting out large quantities of material on short notice it was necessary for us to get together. In consequence we formed the Linseed Crushers Industrial Council, composed of representatives of each of the large companies. This council met monthly at the offices of the Armstrong Bureau of Related Industries. In this way we were able to keep in touch with what was going on in other parts of the country. Each company sent a report of its increase in price sales and everything of interest. When the war ended the council was continued with the full knowledge of the Government."

Regarding the charge that in 1916 defendants' wholesale selling prices per gallon for linseed oil were in neighborhood of 50 cents; that in October, 1918, prices had increased to about $1.80 per gallon and that since then the price would have fallen to lower levels if competition among the defendants had not been restricted, as charged in the complaint. Minneapolis crushers point out such a report is both misleading and an injustice to crushers because comparative prices of flaxseed in 1916 and 1918 were not quoted along with oil prices. Of course price of oil has advanced like everything else, they say, but so has the price of flax.

Aside from this high price of flax which the crushers had to contend with, there was the increased price of coal, press cloths, machinery, supplies and labor. How then, they argue, could the Government or anybody else look for oil any cheaper than it has been. Fact is, away back last winter, crushers frequently were quoted as saying they could not replace oil they were selling then and make money at current quotations of flax and oil.

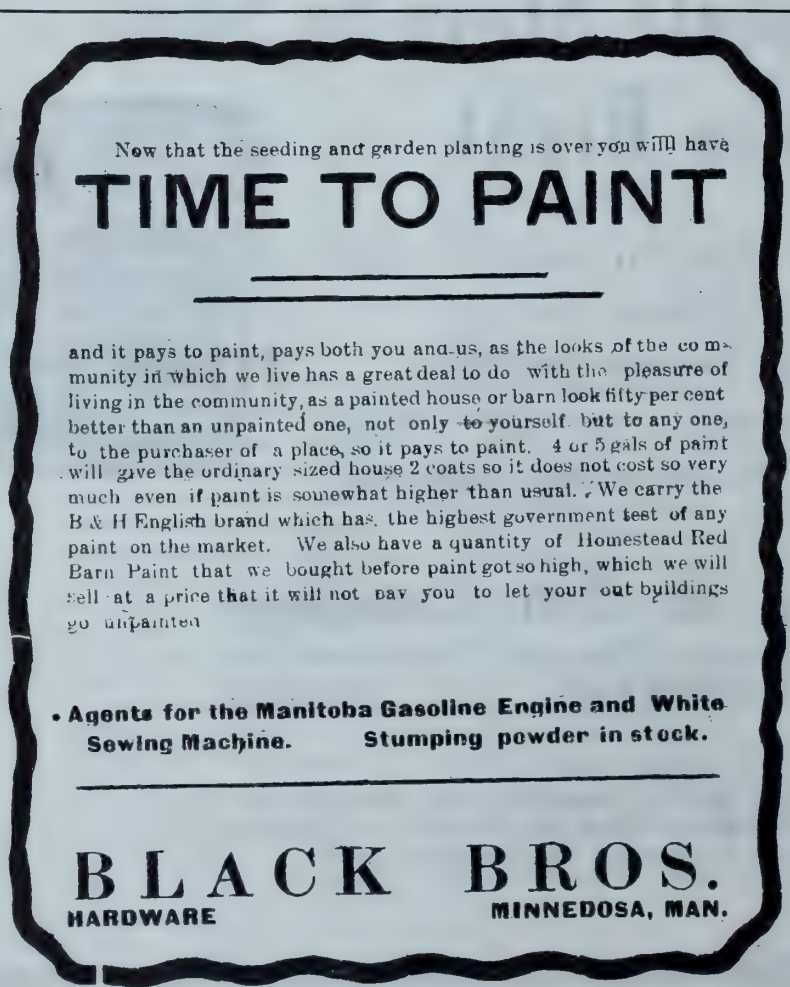
Sherwin-Williams Co. Sells Subsidiary

With further reference to the report outlined in July 10 issue of Hardware and Metal regarding the sale of their interests in the London and Australian subsidiary by the Sherwin-Williams Co., W. H. Cottinghom, president of the company, has confirmed the report. A cable from London reads as follows:

"Walter H. Cottingham, president of the Sherwin-Williams Co. of Canada, Limited, who is now in London, states that he has formed a syndicate to purchase the Canadian interest in the London and Australian company of Lewis Berger and Sons.

"The Canadian company retains a considerable stockholding interest in the English company, Lewis Berger and Sons, in addition to receiving a substantial cash payment. He states that the object of the change is to enable them to extend the English business, and also put the Canadian company in strong financial standing, in view of the rapidly increasing business in Canada."

How Hardwaremen Advertise Paints--No. 16



TAKING advantage of seasonable features to render their advertising more effective, Black Bros. Minnedosa, Man., in this advertisement point out that now that seeding and garden planting time is over, there will be time to proceed with more painting. The ad. continues to point out that from the standpoint of the appearance, and the comfort of living in a well kept community, painting is worth while. For the benefit of those who have little or no idea of the amount of paint required to cover their houses, it states that 4 or 5 gals. of paint will give the ordinary sized house 2 coats.

The Luxeberry Painter Says:

"VARNISHES ARE LIKE FOLKS. Some merely give us a fair weather friendship that does not last, while others retain their charms under every strain, and wear through life. I use Berry Brothers' Varnishes, Enamels and Stains because they always make new friends and new business for me."

The uniform dependability of "Berry" products is known to even the smallest consumers. This is why they are so easy to sell.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 15.—The features of the week are those of declines for both linseed oil and for turpentine. Oil is selling as low as $2.05 to $2.07½, and it is thought by some that there will be a less than $2 basis within a few weeks. Demand is limited and this has caused some to liquidate their holdings. Some crushers look for the low point to be reached soon.

Turpentine is quoted down this week at $2.85 per gallon. There really are a number of prices ruling, as the supply fluctuates. While there is ample stock to meet present needs there is not much surplus, apparently, and the tendencies promise still lower prices, some assert. It is really a matter, largely, of transportation at present. Glass and putty, white lead and varnishes are all holding quite strong, with little promise of any change so long as containers are so scarce and high in price. There is a quieter condition this week, but sorting business is seasonably satisfactory.

Oil Is Likely to Reach Basis of $2.00

Montreal.

LINSEED OIL.—Prices have been softening on linseed oil and there is prospect that the end of the present week may see a basis of $2.00 or even less. Jobbers are looking for this and it will likely come. At this writing some are asking as much as $2.25 per gallon, single barrel basis, for raw, while others are selling at $2.05. The arrival of quite large quantities of English oil is responsible for price decline to some extent and there is every reason to expect that the lower range above suggested will be in effect soon. One other factor that is apparent is that, with orders placed some time ago now satisfied, there is a more competitive selling. This means that quotations are bound to be shaded in some quarters.

	Imp. Gal.	
Raw—		
1 to 2 barrels	2 05	2 15
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	2 07½	2 17½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Some Look For Lower Turpentine Quotations

Montreal.

TURPENTINE.—Prices are tending to lower levels. It is thought by some that the price basis will be lower in a few days, and others state that there may be a reaction upwards. With demand limited, however, it is doubtful if prices will advance. The stocks here are not large, all in all, but there is enough stock to meet requirements. It is probable that prices may decline another 20 or 25 cents per gallon.

Turpentine—	Imp. Gal.	
Single barrels	2 85	3 00
Small lots	2 95	3 10

(Packages extra.)

Whiting Scarcity Will Hold Putty Price

Montreal.

PUTTY.—Prices are steadily held on putty. Although linseed oil is lower and likely to decline more, there is every reason to expect that the difficulty of getting supplies of whiting will hold prices steady. The sales reported are quite active, regardless of the fact that the season is well advanced.

GLASS.—Supplies of glass from Belgium are still arriving, but only of ordinary single strength variety, in volume. There is an active demand for double strength glass at the present time and jobbers state that it is rather difficult to obtain the necessary stock. Transportation conditions from the States have hampered trade to some extent.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Containers Scarce For White Lead in Oil

Montreal.

WHITELEAD IN OIL.—Prices have held firm and unchanged on this product. The manufacturers and jobbers state that the present difficulties of getting containers is an added anxiety. Doubtless with the fruit-canning season here there will be some temporary difficulty in filling orders all around. There is an active sale for lead in oil still, and the prices on Government standard lead are as follows: Five ton lots, per 100 lbs., $19.50; ton lots $20 and smaller quantities, $20.35.

Some Worry Over Tin Can Supplies

Montreal.

PAINTS AND VARNISHES.—Prices have held steady and unchanged on paints and varnishes, though the undertone is quite firm. A variety of conditions have to be taken into consideration and one of these is the price and availability of containers. They are scarce, and the advent of the canning season has not helped matters. Even with manufacturers who have placed orders ahead for these necessary containers there is some anxiety. The delivery of plates to the can makers has naturally been slow and it has not been easy, either, to obtain the stock at the plant. Varnishes, in particular, are very firm and are expected to hold their present levels.

TORONTO

TORONTO, July 15.—Turpentine and linseed oil are the feature of this week's market, both having again dropped in price. The quotation on turpentine has declined 15 cents per gallon, while a lower price of 3 cents has been made on linseed oil.

The demand, while seasonably heavy has fallen off considerably for paint and paint specialties, although jobbers state they are doing a record business considering the season of the year.

Glass supplies are coming forward more freely, the timely arrival of fair shipments of Belgian glass having materially relieved the shortage.

White lead in oil is still in heavy demand and putty is also moving freely. Collections are still coming forward promptly.

Dry Colors Scarce; Prices Hold Firm

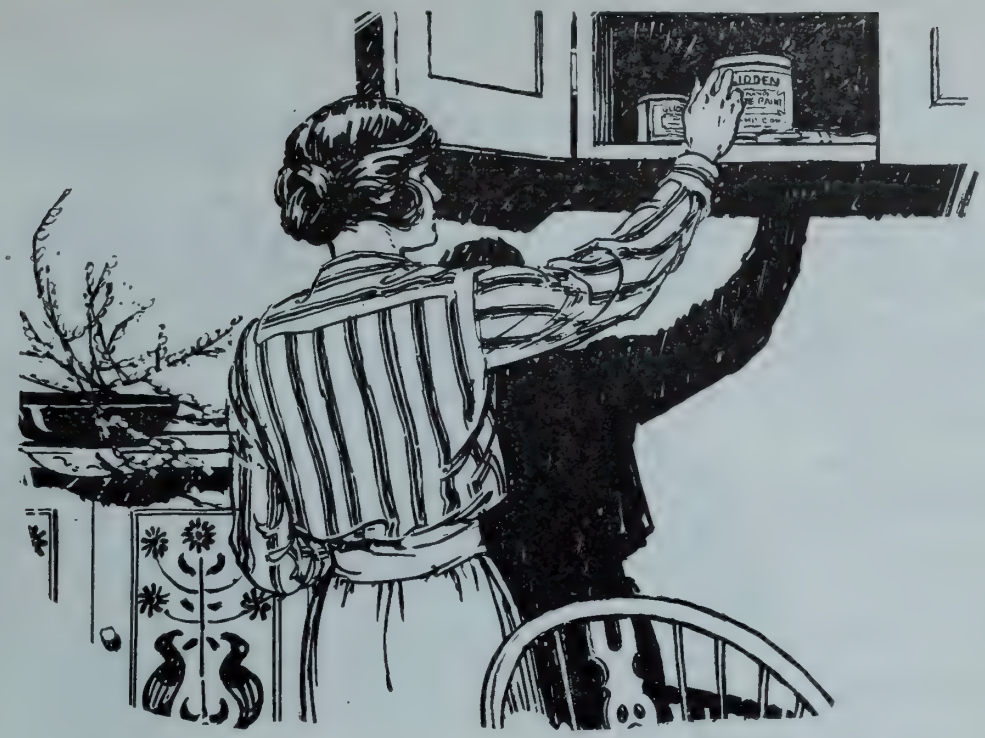
Toronto.

DRY COLORS.—Large quantities of dry colors have been used this season according to the manufacturers and prices are very firm. There are some colors such as green which are very hard to procure, it is stated, and shipments that do come forward are comparatively small. However, no recent change has been made in the price although the present situation is a firm one. The quotations are as per current quotation page.

Repeat Orders Coming Freely for Prepared Paint

Toronto.

READY-PREPARED PAINT.—Repeat orders are coming in very freely for ready-prepared paint, and jobbers express great satisfaction over the amount of paint that is moving for this



Sell the Home Shelf Idea

There is a constant need for paints, varnishes and finishes around the home. Furniture becomes scarred, linoleum gets dull; woodwork fades, stovepipes rust—and many other surfaces about the home need frequent refinishing.

You can make this business a source of great profit for you. Sell the housewife on the idea of always having some on hand for immediate use. That's the way she saves upkeep expense and keeps things about the home spick-and-span—always. Glidden Jap-a-lac is just the thing for this purpose. It is made in a variety of practical colors, ready for immediate use.

Write to-day for complete line and other information.

THE GLIDDEN COMPANY, LIMITED
Toronto, Ontario
Branches at Montreal and Winnipeg

If interested, tear out this page and keep with letters to be answered.

season of the year. Previous forecast regarding the favorable paint season so far have not been unfounded and many in the trade are experiencing one of the best seasons in their history. The present prices are quite firm and no change has been made; there seems little prospect for any weakening or lower prices in the near future, and while it is true that some of the ingredients are showing weaker tendencies, manufacturers point out that the last advance in price was made when these same commodities were at a much lower figure, and considerable more improvement would have to be made before it would effect the price of paint. The quotations are as per current quotataion pages.

White Lead in Oil Has Continued Brisk Demand

Toronto.

WHITE LEAD IN OIL.—Little change has been shown in the situation regarding white lead in oil, and jobbers state that the demand for this season of the year is a heavy one There seems to be a heavy demand also for export, and corroders state that other countries are still in need of supplies. In some cases jobbers state they had had considerable difficulty in securing sufficient supplies and have had to wait several days before they could secure shipments. The present quotation remains very firm, the pure in ton lots continues to be quoted at $20.35, while in less than ton lots the quotation is $20.70 per hundred pounds.

Shellac and Varnish Sales Continue Brisk

Toronto.

SHELLAC AND VARNISH.—The demand for varnish and shellac of all kinds continues to be very good, and makers of varnish and shellac state they are well satisfied with the amount of business being offered. Present prices continue firm, and no recent change has been made in the price. The quotations are as per current quotation pages.

Arrival of Belgian Glass Relieves the Shortage

Toronto.

GLASS.—A heavy demand is being made for window glass of all szies, and the fact that many houses are nearing completion is a great stimulant for trade. There is still a scarcity of some sizes, although it is believed that the warehouse stocks are in better condition than several weeks previously.

Most of the American producers have closed down for their summer period in order to overhaul their machinery, etc., and when they closed their books there were many orders yet to be filled, it is stated. Whether they will easily overcome this situation when they start operations again remains to be seen. There is some Belgian glass coming forward, and it has been mostly due to these shipments that the great scarcity which previously prevailed has been relieved. The present prices are unchanged although quotations are very firm. The single and double diamond are still being quoted at a discount of 15 per cent. from the list, while the cut lights are quoted at a discount of 40 per cent. from the list.

Paris Green in Good Demand; Price Steady

Toronto.

PARIS GREEN.—While it is believed that most dealers have their supplies of Paris green on the shelves, jobbers are looking forward to heavy repeat orders this year owing to the different epidemics of bugs and insects, etc. The new prices recently made are holding very firm and are as per current quotation pages.

Shortage of Whiting Makes Putty Prices Firm

Toronto.

PUTTY.—It is stated the demand for putty is exceptionally heavy for this season of the year, and manufacturers state they still have difficulty in filling orders, the situation is entirely attributed to the diiffculty of securing sufficient supplies of whiting. English whiting is coming forward very slowly and shipments that do come forward are very light. The present quotations on putty are very firm although no change has been made in the price which is as follows.

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotation.

Turpentine Prices Drop a Further 15c Gal.

Toronto.

TURPENTINE.—A further decline has been made on the price of turpentine, reducing same 15 cents per gallon. Some are hoping to see the price recede to the $2 mark, but whether this will be the case would be hard to predict; the past few days have shown this situation to be the reverse in the Southern markets, and the price tendency is now upwards at the stills. Some have been comparing the action of the past few days with a similar movement last season, when it will be remembered that when turpentine reached a comparatively low level European buyers came in the market for heavy shipments, reacting on the price which gradually soared to such high figures. The following are the present quotations:

Turpentine—	Per Imp. Gal
1 barrel lots	2 65
2 to 4 barrel lots	2 64
5 gal. lots	2 95

3-cent Reduction Made on Linseed Oil Prices

Toronto.

LINSEED OIL.—A further downward revision has again been made on linseed oil, making the new quotaaiton on raw linseed oi $2.27 per gallon, and boiled linseed oil, $2.30 per gallon in single barrel lots The demand continues rather quiet although this condition is quite usual at this season of the year owing to holidaying and other business conditions. Crushers, however, are busy trying to catch up with their orders, some of which have been standing for considerable time. The following are the present quotations:

Linseed Oil—		
1 to 2 barrels, gal.	2 27	2 50
3 to 5 barrels, gal.	2 26	....
10 barrels and over, gal.	2 24	....
		Boied
1 to 2 barrels, gal.	2 30	2 53
3 to 5 barrels, gal.	2 29	....
10 barrels and over, gal.	2 27	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

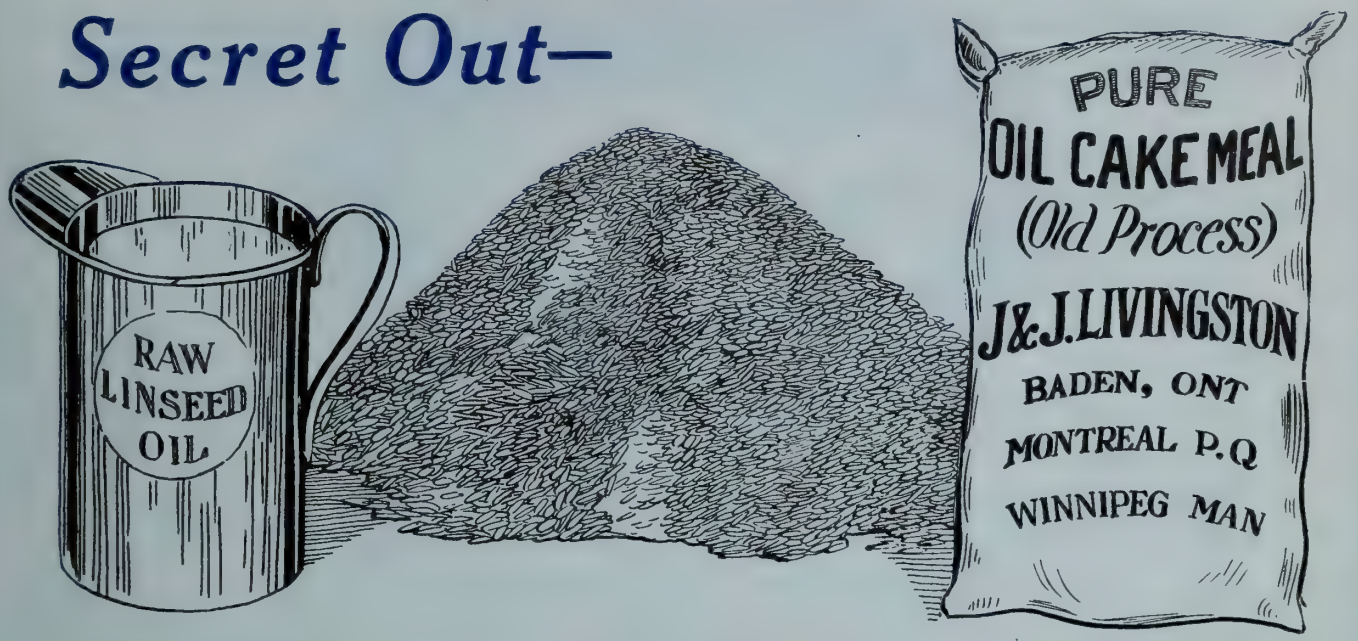
Interesting Point Raised in Action Against Metal Shingle and Siding Co.

An interesting issue has been raised in connection with litigation arising over a contract between the Van Kannel Revolving Door Company, of New York, and the Metal Shingle and Siding Company, of Montreal, in which the former claims $2,560.04 as a balance owing for material supplied and for royalties due on revolving doors of the Van Kannel type that defendant had sold in Canada. The defence that the action should have been directed against the A. B. Ormsby Company, of Toronto, to whom the goods were sold and by whom payments were made, was dismissed by Mr. Justice Surveyor. Another defence was that plaintiff was not justified in demanding payment of royalty for patent rights which, it was claimed, the plaintiff could not exercise in Canada, but this was also dismissed as constituting no defence to plaintiffs's action. The decision was that the plaintiff had proved its case and judgment was given condemning the Metal Shingle and Siding Company to pay the amount with interest from service of the action and all costs.

Sheffield Iron and Steel Trade Unsettled

Conditions in the iron and steel trade of Sheffield continue unsettled, and the loss of confidence in the future is extending. Makers have still plenty of work on hand, but they would like to see more new business coming in or offered. Not only is forward buying extremely quiet, but a number of foreign contracts have been cancelled, including several with Japanese importers. The most serious cause of anxiety, however, relates to difficulties of production, which is being hampered increasingly by lack of materials. Transport gets steadily worse, and for want of coke, coal, pig iron, sheets, plates, and castings men have to cease working for varying periods. The result is declining output and increasing costs, for which the workmen are not wholly responsible. Every foundry is clamouring for pig iron, and those having parcels to dispose of can obtain prices several pounds above the recognized rates. Some people predict that the value of foundry iron will go much higher before it reaches the top. The greatest sufferers from these troubles are the engineering branches, and if a remedy is not forthcoming quickly not many of them will yield much to the national exchequer in the shape of excessive profit tax.

A Livingston Secret Out—



17 lbs. of high quality linseed oil. 56 pounds of first quality flax seed. A bag of oil cake meal (39 lbs.)

Assuming a bushel of flax seed to contain 56 lbs. and that the finest quality commercial oil extracted from the same to be 17 lbs., the residue or other matter, which is known commercially as oil cake meal, would amount to 39 lbs.

To add even a small percentage to the 17 lbs. of oil by greater pressure removes mucilaginous matter from the oil cake meal which while immediately more profitable to the manufacturer lowers the quality of both finished products. It removes the necessary mucilaginous or fattening matter from the oil cake meal and adds to the oil a substance which is greasy and a real detriment to paint or varnish.

This is one of the reasons for the high standing Livingston products hold in the trade to-day—one of the reasons why Livingston-Brand Linseed Oil is used when a high quality article is to be produced. This is the answer to the question, "Why do breeders prefer Livingston Oil Cake Meal even at a higher price?"

They're the kind your grandfathers used. Sold by Jobbers everywhere.

MERCHANTS— Feature these Lines—Now

The lines manufactured by CANADIAN POLISHES, Limited, are being NATIONALLY advertised. There is a big demand being created from coast to coast. Are you getting your share of this profitable business?

RE-NU-ALL AUTO TOP DRESSING

A dressing prepared especially for auto tops of all kinds. Softens and preserves. Waterproofs. Leaves a rich, enamel, lasting finish.

KLEANALL AUTO BODY POLISH

Imports a bright and lasting finish to Auto bodies. Removes grease and dirt. Makes car look like new.

IDEAL SILVER CREAM

There is a big demand for this cream. It is giving satisfaction to users. Works quicker and polish lasts longer. Not injurious. Does not stick in chased parts.

STOCK THEM—DISPLAY THEM

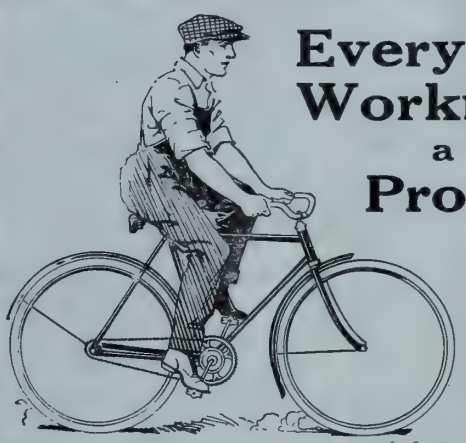
These lines are in demand at this time of the year. Stock them and display them prominently. They are repeaters and make satisfied customers.

Ask your jobber. Write for catalog, in colors, showing the complete line.

CANADIAN POLISHES, LIMITED

Successors to Domestic Specialty Co, Limited

HAMILTON, ONT.



Every Workman a Prospect

WITH a hard day's work either ahead of or behind him, he does not like walking or waiting around for a crowded street car.

In this direction alone there is good business awaiting the progressive dealer who handles these widely advertised quality bicycles which have gained an enviable reputation.

Beatty Bros. Limited Bulletin

An Ideal Pump for the Barn

W. H. STERNE

Mr. W. H. Sterne has been manager of Beatty Bros. Ltd., at Edmonton, since the branch was opened. He has met with great success in developing business in the BT lines in Alberta.

The "London" Syphon Pump is the ideal pump for supplying water in either house or barn.

It has exceptional drawing and lifting power combined with high capacity.

It is supplied for hand or windmill use, and is provided with attachments to make it work with practically any style of pump jack.

Only the finest material is used and it is a strong, substantial, well-built pump in every respect. This pump is fully described in the BT General Catalogue.

If you have not a copy of this catalogue, send a card to our nearest branch and it will bring you one at once.

Frost King

Always Cool Running

High anti-friction properties, unequalled endurance, and cool-running qualities are points that make Frost King preferred by consumers. The fact that the annual sales of Hoyt Metals amount to $10,000,000 is convincing evidence of the superior quality and popularity of these efficient metals.

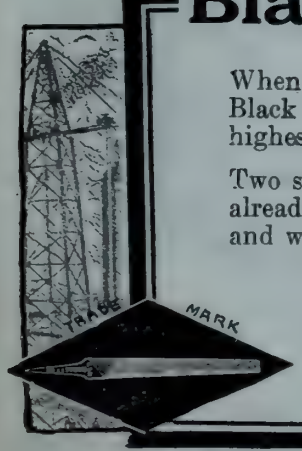
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

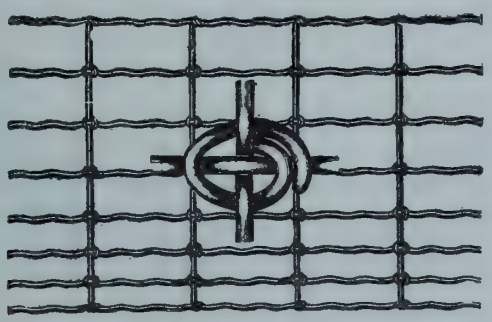
Illustrating Titelock Fastening
This is the method of fastening in our heavy grade fences. A sure and certain fastener that holds throughout the life of the fence.

"Diamond A" Woven Wire Fence

Bessemer Spring Steel

The progressive farmer knows the economic value of a good dependable fence.

Show him why the "Diamond A" gives better service than most other makes. Every farmer in your district is a prospect for "Diamond A" Woven Wire Fence. It is made from the best quality Bessemer spring steel galvanized wire.



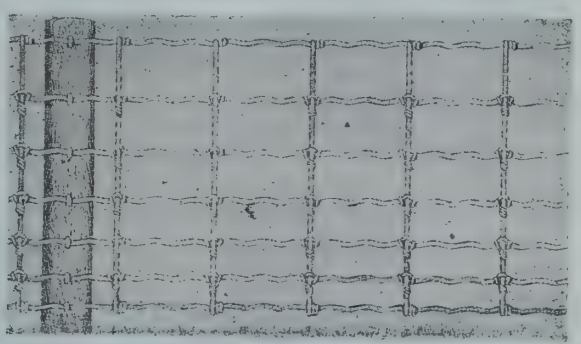
Standard
General Stock Fence. All No. 10 Gauge Wire.

Prompt Shipments

can be made from a complete stock, from any one of our three large Western warehouses.

You can take your prospect's order to-day—there will be no delay.

Write for prices and full information.



Heavy Titelock
Horse, Cattle and Sheep Fence. All No. 9 wire. Made in two sizes only —H 5-40-9 and 7-40-9.

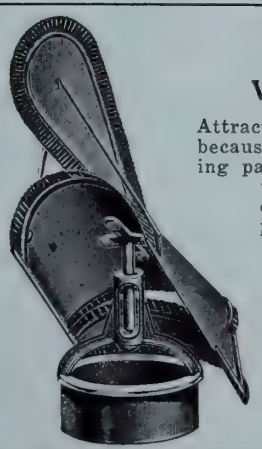
CALGARY ALBERTA



O-Rib-O

Volcano Chimney Top

Attracts the customers and closes sales because the Deflector—the lower slanting part shown—receives wind through the sloped opening directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys. Sells readily for homes, stores, churches, factories and as a ventilator for barns and warehouses.

Morrow
High Speed and Carbon
Twist Drills

Morrow High Speed Twist Drills are made from hammered steel bars and are specially Morrow tempered, and a graduated thickness of web gives strength where strength is needed.

They give more holes with less regrinding

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.

All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly.

"Alloyed under the Stanley Process"

for general service

LIONROYAL BABBITT

MADE IN CANADA

We warrant that no other Babbitt at the price will perform as well in so many different classes of bearings, and are ready to prove this in any case by trial installations in competition with any metal of its type.

The secret of its success is in the method of its alloying. It is produced under the Stanley Process, which is controlled exclusively by us throughout the Empire. Try it and be convinced.

B·S·A

SPORTING RIFLES

LEE-ENFIELD ACTION

The B. S. A. Sporting Rifle illustrated has the same action as the famous Lee-Enfield model which proved superior in the firing lines of France. In extremely cold climates the Bolt always functions perfectly—a feature thoroughly appreciated by many veteran hunters where the mercury is below zero.

Since the war there has been a world-wide demand for B. S. A. Sporting Rifles. Dealers can therefore be sure of ready sales. There is satisfaction also in knowing that you are selling a good article that will help maintain the prestige of your business. The B. S. A. Trade Mark stands for rifles and shot-guns of unerring accuracy, perfect balance and excellent workmanship. It is a pleasure to place one of these firearms in the hands of a customer—to see him test its balance, open and close the breech, bring the butt to his shoulder and decide it will be *his* rifle!

Dealers are invited to write concerning the stocking and selling of B. S. A. Rifles and Shot-Guns.

GLASS

Our stock comprises every kind of glass.

Factory glass is one of our specialties, and we would like to submit to contractors or factories undertaking new buildings, the advantage of ⅛ in. cast glass as against ⅛ in. ribbed. The former does not collect and hold the dirt as the ribbed glass does, and is far more efficient as an effective lighting glass.

We also manufacture mirrors, art glass and Stopglare Lens.

Phone your requirements, long distance on a reverse ticket.

Ontario Plate Glass, Limited

Phones—R. 1939, R. 8026

Hamilton, Ont.

WILSON
"Little Wonder"
MIRROR

The simplest, neatest and most practical mirror on the market.

LIST PRICE $1.00

The **WILSON MIRROR** has a five inch diminishing lens set in a stamped steel frame allowing glass to be easily replaced in case of breakage.

Mirror is fitted with **UNIVERSAL CLAMP** which will fit round, square, oval or channel windshield uprights, and may be easily adapted to go on closed cars or trucks.

A truly universal mirror at a popular price.

DEALERS—Write for prices on the **Little Wonder**—The fastest selling mirror on the market.

Wilson Auto Specialties Co.

Hamilton **Ontario**

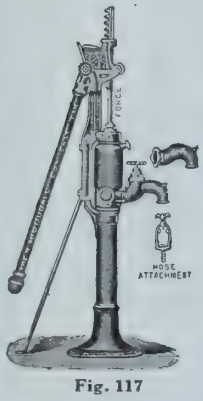

Fig. 117

"McDougall" Well Pumps

A Standard in Every Community

This represents one of our best features in Well Pumps. The cog gear head is a distinct advantage over pump heads where links and friction guides are a necessity.

A minimum amount of labour for producing maximum results is a distinct selling advantage.

Manufactured by

The R. McDougall Co., Ltd.

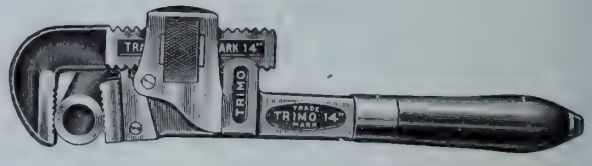
Galt, Canada

TRIMO

The four good points that make TRIMO PIPE WRENCHES superior are the SPIRAL SPRING always in place, STEEL FRAMES that will not break, NUT GUARDS that protect adjustment nut and the INSERTED JAW in handle that can be replaced when worn.

The Trimo Steel Handle Pipe Wrench is also made in the 6″, 8″ and 10″ size with narrow jaws and fine milled teeth, especially adapted for close work.

Your Jobber can Supply



Trimont Mfg. Company

Roxbury (Boston) Mass., U.S.A.

If interested, tear out this page and keep with letters to be answered.

An Axe is as Strong as its Handle

STILL'S

—will give you a stronger working tool, for **STILL'S HANDLES** are made from the best of Canadian Woods.

The sale of

STILL'S HANDLES

far exceeds all other makes.

There's a reason.

Axe, Pick, Sledge and Hammer Handles, Cant Hook and Peavie Handles.

It pays to sell **STILL'S.**

Ontario

Reduces Cost of Production

That Carbalox is available in convenient rolls means a saving in production cost. Workmen equipped with convenient rolls, can use Carbalox as needed without waste or loss of time in cutting up sheets. Carbalox, in hardness and cool cutting qualities is particularly suitable for cutting and polishing aluminum, brass, copper and iron.

The Publisher's Page

TORONTO JULY 17th, 1920

Have This Working for You While You Are on Vacation

THERE is real gratification in feeling that a duty has been well done. It will add much to the enjoyment of your vacation to feel that you have left things working profitably for you even while you are gone.

Reserve space before you go and approve copy to be run in HARDWARE AND METAL, and particularly in the 32nd Annual Fall Number, so that wherever you may be, and whatever you may be doing, the whole Canadian hardware trade will be made more familiar with your product, your trademark or your name through your weekly-message in HARDWARE AND METAL, the hardware trade weekly to which the trade turns for business information on hardware.

The trade purchases invariably those products with which they have become familiar in the pages of HARDWARE AND METAL — make yours one of them!

Be sure to reserve space in the 32nd Annual Fall Sales and Directory Number appearing August 21st, 1920. It is kept by the trade and ordered from for many months. These Fall and Spring Numbers are not "freak specials," but have been established institutions in Canada's hardware trade for over 30 years.

The trade will look for your advertisement in the August 21st number —make sure of its publication before you go. Forms now closing.

HARDWARE AND METAL reaches all the wholesalers and jobbers, 90% of the retailers, and many travellers, salesmen and clerks of the Canadian hardware trade, and is the only Canadian hardware paper that furnishes a circulation statement audited by the Audit Bureau of Circulations. The rates are moderate: $65 per page; $36 for half page; $21 quarter page, and $120 for two pages. Cost of color, and inserts on special stock, supplied on request.

HARDWARE AND METAL

How to Test Advertising

THE man who doubts the power of advertising belongs in the same class with the man who refuses to believe that the world is round simply because he can't get off somewhere at a distance and see its roundness for himself.

The merchant who fears to attempt advertising because he figures it as an "expense" is blind to his own interests. I personally know several men who, because they once tried advertising to the extent of a cheaply printed hand-bill and didn't find it necessary next morning to call on the police to keep the crowds of eager buyers from swamping their store, loudly and solemnly aver that "advertising doesn't pay."

Advertising *does* pay.

The most successful merchants are the merchants who believe most thoroughly in advertising and who practice their belief.

But advertising, in order to pay, has got to be *intelligent* advertising.

The day of hashed-over superlatives—"best goods," "lowest prices," "best stock in town," "greatest bargains ever heard of," and so on—has passed.

People have learned to distinguish the *truthful* advertiser from the blatant behind-the-times storekeeper who believes that, so long as *he* claims to have the best goods on earth, or under the earth, or within wireless distance of the earth, people will break their necks trying to get to his counters in the forefront of the crowd.

Put some *brains* into your advertising.

Don't let the office boy write your announcements in between his other duties.

Don't doubt the business-getting and business-building power of intelligent and informative publicity—and you will find that advertising *does* pay.

—*Jerome P. Fleishman.*

COLLECTIONS

MANUFACTURERS, WHOLESALERS AND Jobbers can reduce their "Collection expenses" to a minimum, by using Nagle One-Per-Cent. Draft-Service. Don't pay 10% or 15% on accounts you can have collected at 1%. Investigate this System. Thoroughly reliable. Established 1909. Send for supply of 1% Drafts today. Nagle Mercantile Agency, Laprairie (Montreal), Que.

For Sale

Metal Products Business

To close an Estate, the undersigned offer for sale as a going concern all the shares of the capital stock of a very successful metal products business being caried on in Toronto.

This is a splendid opportunity for anyone to acquire a business of this character. Inventories and statements of affairs may be inspected or had upon application to

The Trusts and Guarantee Company, Limited, or Lionel Davis, Executor.

DAVIS & MEHR,
12 Richmond Street East,
Toronto,
Solicitors for Executors.

QUICK RESULTS

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

If interested, tear out this page and keep with letters to be answered.

Timid Travellers

Don't Get Your Story Across

YOU have run across the timid traveller, the man who, through fear or inexperience, is afraid to go after the big buyers in the trade? If he does reach the buyer he frequently fails to create the right impression. Perhaps the interview is a short one, the buyer may be hasty, busy, worried and does not absorb all the information you would like him to have. There may have been several travellers ahead of your representative, and half a dozen more waiting outside. In the rush of the interview several important talking points have been overlooked, or if mentioned, may be forgotten in a few days. Your line is only one of thousands sold by the hardware trade. What is the result? Perhaps an order—or a "turn down." It may be but an order for a few dozen, instead of the order for several gross which would have been received if the buyer had known all about your goods. Buyers are busy these days, and their time is valuable.

You can assist your travellers over the rough spots by paving the way for them. Hardware and Metal does not sit outside the buyer's door and wait for an appointment. It goes right into the buyer—Why? Because he pays for it. He invites the paper to call on him each week, and he sends the subscription price along with the invitation. The buyer reads the advertisements and gets valuable information and impressions from them. The advertisements supplement the efforts of the travellers. The buyer looks in Hardware and Metal for information—and he is not disappointed! He finds a large amount of business-building information in Hardware and Metal every week. That is why Hardware and Metal goes by paid invitation each week to every wholesale hardware firm and over 90 per cent. of the entire retail hardware trade in Canada from coast to coast.

Hundreds of hardware buyers in Canada have been regular readers of Hardware and Metal for upwards of twenty years. Several have been subscribers for over 30 years. It is significant that the lines that have been advertised regularly in Hardware and Metal are the biggest sellers and best known lines in the Canadian hardware trade. Ask any retailer or wholesaler. Advertising in Hardware and Metal is the greatest support you can give to the new traveller. The older, more experienced travellers who really know Hardware nd Metal, will invariably recommend it—because they have "been through the mill" and know that advertising in Hardware and Metal is beneficial.

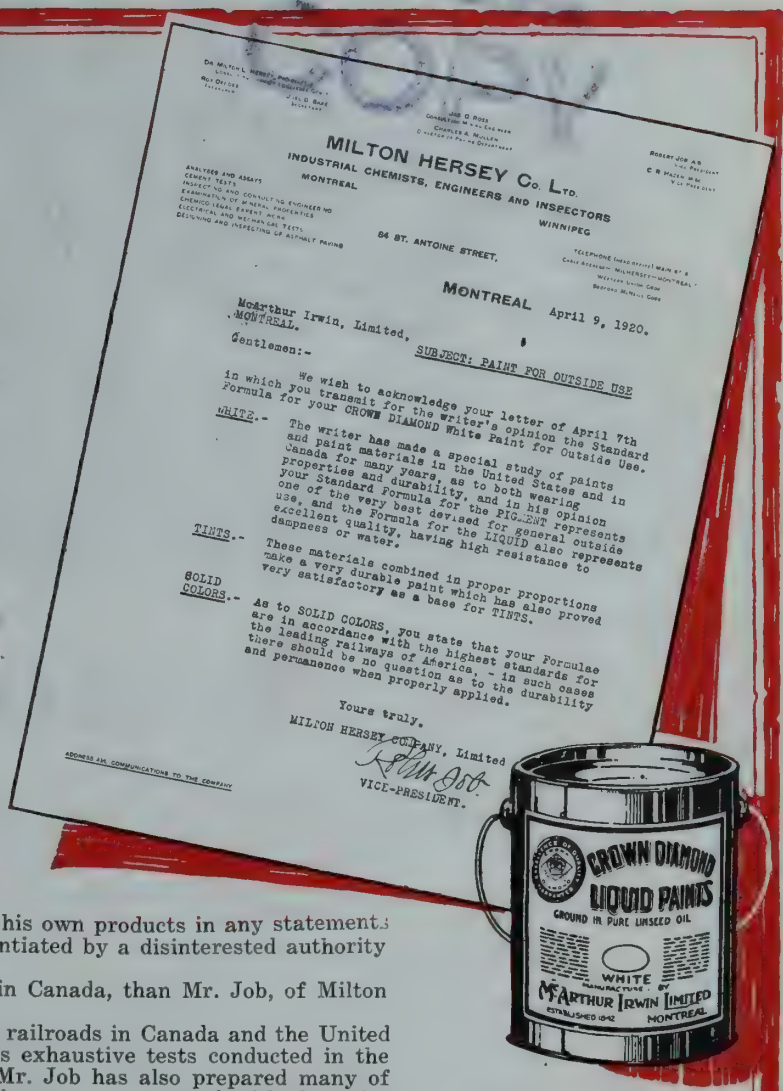
Convincing Proof

from an unbiased authority which furthur demonstrates the fact that

CROWN DIAMOND PAINT

is a thoroughly practical and most serviceable paint for all purposes.



MILTON HERSEY Co. LTD.
INDUSTRIAL CHEMISTS, ENGINEERS AND INSPECTORS
MONTREAL WINNIPEG
84 ST. ANTOINE STREET,
MONTREAL April 9, 1920.

McArthur Irwin, Limited,
MONTREAL.

Gentlemen:-

SUBJECT: PAINT FOR OUTSIDE USE

We wish to acknowledge your letter of April 7th in which you transmit for the writer's opinion the Standard Formula for your CROWN DIAMOND White Paint for Outside Use.

WHITE.- The writer has made a special study of paints and paint materials in the United States and in Canada for many years, as to both wearing properties and durability, and in his opinion your Standard Formula for the PIGMENT represents one of the very best devised for general outside use, and the Formula for the LIQUID also represents excellent quality, having high resistance to dampness or water.

TINTS.- These materials combined in proper proportions make a very durable paint which has also proved very satisfactory as a base for TINTS.

SOLID COLORS.- As to SOLID COLORS, you state that your Formulae are in accordance with the highest standards for the leading railways of America, - in such cases there should be no question as to the durability and permanence when properly applied.

Yours truly,
MILTON HERSEY COMPANY, Limited
VICE-PRESIDENT.

ADDRESS ALL COMMUNICATIONS TO THE COMPANY

A manufacturer is liable to favor the quality of his own products in any statements he may make, but when these statements are substantiated by a disinterested authority they are bound to be convincing.

There is no more unbiased authority on paint, in Canada, than Mr. Job, of Milton Hersey Co., Limited.

He is consulting chemist for some of the largest railroads in Canada and the United States. He is also closely connected with the various exhaustive tests conducted in the States regarding the wearing qualities of paints. Mr. Job has also prepared many of the paint specifications for the Government. He is in no way connected with the paint industry and favors no special brand of paint.

We have submitted our Crown Diamond Paint formulas to Mr. Job for his opinion of its quality and durability.

The letter shown above speaks for itself and verifies the truth of the statements made in our recent advertisements regarding the purity and durability of Crown Diamond Paints.

To All Paint Dealers

It will pay you well to sell this quality line of Crown Diamond Paint Products—Write to the nearest distributor or to us direct for full information.

McARTHUR, IRWIN, LIMITED

Established 1842 MONTREAL

DISTRIBUTORS OF CROWN DIAMOND PAINTS—Stewart & Wood, Limited, Toronto; W. B. Dalton & Sons, Kingston; Crowell Bros., Halifax, N.S.; Robertson, Foster & Smith, Limited, St. John, N.B.; Farquhar & Gill, Vancouver, B.C.

Jumbo Window Sign

25 inches wide by 33 inches deep

This distinctive, 4-color display will attract attention to any window in which it may be placed, and will certainly arouse the interest of motorists when they are thinking of giving their cars a clean-up. Stickers are attached to this poster, so that you will have no trouble putting it up.

WAGELESS CLERKS

EVERY dealer everywhere will be glad to hire these wageless clerks. Not so much on account of their unusual salary which is designated thus .000, but because of their merits which emulate those of many high-salaried clerks.

In addition to being strong on salesmanship there are many human frailties that these clerks do not possess. They are never discourteous, never indifferent. They work overtime without a murmur. They are always on the job and never quit for a better job. They are brilliant examples of patience, industry and good nature.

Their names are *Display,* Window Display, and Store Display. The dealer who puts them to work properly need never worry about the rent, drafts coming due, or the price of gasoline for his flivver.

Suppose, for example, you were to start right now. Put a dozen bottles of O-Cedar Polish on your counter. Then clean out the window, put in O-Cedar Polish in the 25c to $3.00 sizes (and don't forget the O-Cedar Polish Mop). Arrange them nicely, and as a background use the attractive O-Cedar window cards, signs, and posters that you may have free for the asking. You'll be delighted with the happy song your cash register will sing if you do this.

B·S·A

SPORTING RIFLES

LEE-ENFIELD ACTION

The B. S. A. Sporting Rifle illustrated has the same action as the famous Lee-Enfield model which proved superior in the firing lines of France. In extremely cold climates the Bolt always functions perfectly—a feature thoroughly appreciated by many veteran hunters where the mercury is below zero.

Since the war there has been a world-wide demand for B. S. A. Sporting Rifles. Dealers can therefore be sure of ready sales. There is satisfaction also in knowing that you are selling a good article that will help maintain the prestige of your business. The B. S. A. Trade Mark stands for rifles and shot-guns of unerring accuracy, perfect balance and excellent workmanship. It is a pleasure to place one of these firearms in the hands of a customer—to see him test its balance, open and close the breech, bring the butt to his shoulder and decide it will be *his* rifle!

Dealers are invited to write concerning the stocking and selling of B. S. A. Rifles and Shot-Guns.

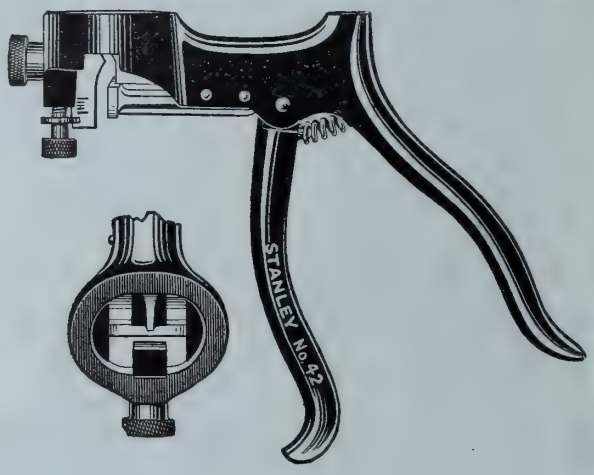
Stanley Tools



STANLEY "PISTOL GRIP" ADJUSTABLE SAW SET No. 42

This Saw Set embodies several unique and important features not heretofore seen in tools of this description.

The shape of the Body and Handle enables the user to operate the tool with great ease and with the least possible exertion, and the saw is held firmly against the gauge while the tool is being set.

It can be readily adjusted by means of the knurled thumb screw to give a greater or less set to the teeth of the saw, according as the saw is to be used for coarse or fine work. As the anvil or part against which the plunger works is graduated, the same adjustment can be easily obtained for duplicate work.

The tool is so designed that the saw teeth are in plain view which enables the user to quickly adjust the tool to the tooth to be set.

The plunger and anvil are made of tool steel—hardened and tempered. All parts are carefully **machined** and are **interchangeable.**

The tool is given a fine black finish.

The "Why" of Starrett Tool sales

Sell Starrett Tools

Write for free copies of "The Tools Mechanics Buy", the book that helps to sell Starrett Tools.

Every time you sell a mechanic a Starrett Tool, you help him to place his money where it will pay him big returns every working day in the year.

Whenever he needs a new tool, he's almost certain to come back to you for another with the Starrett name on it. Mechanics want an investment, not a speculation, and forty years of experience have taught them that the money they put into Starrett Tools comes back to them many times over.

That accounts for the repeat sales of Starrett Tools—for the constantly growing list of steady customers who rely upon Starrett dealers to supply their tool needs. And backing up these dealers is Starrett national advertising, continually blazing the trail for new business. Both for the men who buy and the men who sell them, Starrett Tools are money earners.

JACOBS CHUCKS

---As Advertised

Jacobs Chucks have always fulfilled what has been claimed for them.

Their tested and proven performance has made them the choice of the driller and the preference of the purchaser. Hence their selection as standard equipment by foremost drill makers.

A standard product, widely advertised, makes it imperative for you to handle it. Both for your clients' sake—and your own.

That's why Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most profitable line.

More Sales With Butterfield Tools

They Satisfy

Sales of a well-known, strongly established product like Butterfield Tools mean much more than the single sale accomplished. Butterfield Tools are marked and a connection is formed between the well satisfied consumer and the store where he bought the satisfaction. He comes back. He buys Butterfield again and again, and his confidence in the store leads to the purchase of other lines.

Butterfield superiority has a multiplying effect on the merchants business.

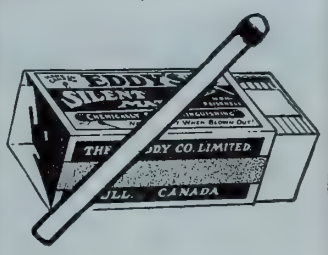
Story for Week Dated July 24, 1920 **Being No. 15 in the Series**

Rocky Roads To Travel On The Eddy Trail To Trade

As a retail merchant you have your deliveries to take care of, and you are probably a judge of horse-flesh. The late Ezra Butler Eddy was a great lover of good horses, about which more may be told later. As you remember, he needed them in his business in 1851, when he took his first matches out by wagon load on the road. The E. B. Eddy Company do a bit of teaming still, and over rough roads too, as you can see in the picture above. This illustrates the bush road to the Du Moine Depot. The wagon and team represent just another little unit in the wide-spread Eddy Company organization. Below are five loyal members of the Eddy Staff whose business it is to know the safest ways over the bumps in that rocky road as part of the work of producing Eddy's Famous "Safe and Silent Five" matches.

Eddy Company Advertising is "Pulling" with You all the Time



He has seventy million brothers

—tomorrow there'll be another 70 million, and the next day, and the day after!

—For that is the daily output of matches at the Eddy factory.

Seventy million! And each one perfect, reliable and satisfactory. *Because they are the best value, insist on* C34

"Built for Endurance"

A Quality Plug

THE fitness of the Spark Plug for its work, the ability of the plug to energise the gas mixture completely, developing maximum power at every stroke of the piston, is what determines the measure of engine power and the quick or sluggish response to the Accelerator.

The Goliath Plug "won its spurs" through giving unfailing satisfaction. The shell is of heavy blued steel; firing points are of meteor wire. The porcelain, designed for super-strength at points of greatest strain, is made of the finest Cornish Kaolin hardened to rock-like strength.

For Ford Cars, the Goliath is without an equal.

SOVEREIGN IRONS

SELLING an electric iron may be a commonplace occurrence—but, there are still plenty of housewives who have yet to break away from the traditions of their ancestors, and discard the old sadirons.

To a woman who has never owned an electric iron it is a specialty—and should be sold as such. Selling a "Sovereign" Iron paves the way for a series of sales. In fact, it is a typical C.G.E. electric appliance, in which you can place explicit confidence.

Make Your House a "GTD Tool Center"

TRY to imagine the mingled astonishment and gratification of a worried superintendent if a local jobber's salesman offers a solution of his threading troubles—and makes good.

That would be some "boost" for the jobbing house and—surprising as it may sound to anyone not acquainted with the possibilities in this direction—it is becoming an accomplished fact.

But how is it done?

Many of our far-seeing supply houses are beginning to realize the advantage of having their salesmen educated by GTD Threading Specialists on the merits of the GTD specialties such as the "*Gun*" Tap with its shearing-cut and also the "*Acorn*" Die with its precision adjustment and capacity for increased production.

Wherever a jobber's salesman introduces either of these specialties, he can rest assured that he is establishing the reputation of his house as a GTD Tool Center as his customers naturally connect his firm's name with their threading tool requirements.

4 Good Reasons --READ 'EM

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 18 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

Create The Right Atmosphere

Cleanliness creates a pleasing atmosphere.

Neat and clean merchandise, well-arranged displays, bright show-cases and an absence of dust, create an atmosphere in your store that makes a favorable impression upon your trade.

Dust and dirt cost you money, not only in the deterioration of your goods but in *loss of trade.* The spick and span type of woman shuns the shop of musty surroundings. Banish dust from your shop and make your store bright and attractive.

IMPERIAL

FLOOR DRESSING

(Standard)

(Formerly "Imperial Standard Floor Dressing.")

is the best ally to wage war on dust. One application cleans and preserves your floor and *prevents the dust from rising.* All dirt and dust which may enter your store is held to the floor so that it may be swept out without contaminating the air. One gallon is sufficient to treat upwards of 700 square feet of floor surface, and one application lasts for months. Imperial Floor Dressing is sold in gallon and four-gallon lithographed sealed cans, half-barrels and barrels.

Vol. XXXII. TORONTO, JULY 24, 1920 No. 30

Sells Blacksmiths Auto Accessories

Codere & Fils, of Sherbrooke, Que., Value This Trade Highly and Find It Profitable—Blacksmiths Are Now Discriminating Buyers—Proper Display is Great Help

TIME was—and not many years ago at that—when the blacksmith and his methods fitted well into the undying poetry of Longfellow, "Under a Spreading Chestnut Tree the Village Smithy Stands," etc. To-day it is different. There has been a "right-about-face," and the performance of the village or the city blacksmith will require a modern poet to revise the business, if not the sentimental estimate of this worthy artisan, if artisan he still be. For he has budded into a full-fledged mechanic, a worthy prospect for the hardware merchant. The clanging of anvil has given place, in part at least, to the trip-hammer and the powerful chain hoist lifting the heavy casting or axle of the damaged car for examination and treatment. The "shop" has a different air now. A spacious section has been devoted to the overhauling of "Milady's" electric coups of "Tom's" touring car—the blacksmith of yesterday is the garage mechanic of to-day.

ONE AUTO TO EVERY 12 PERSONS IN SASK.

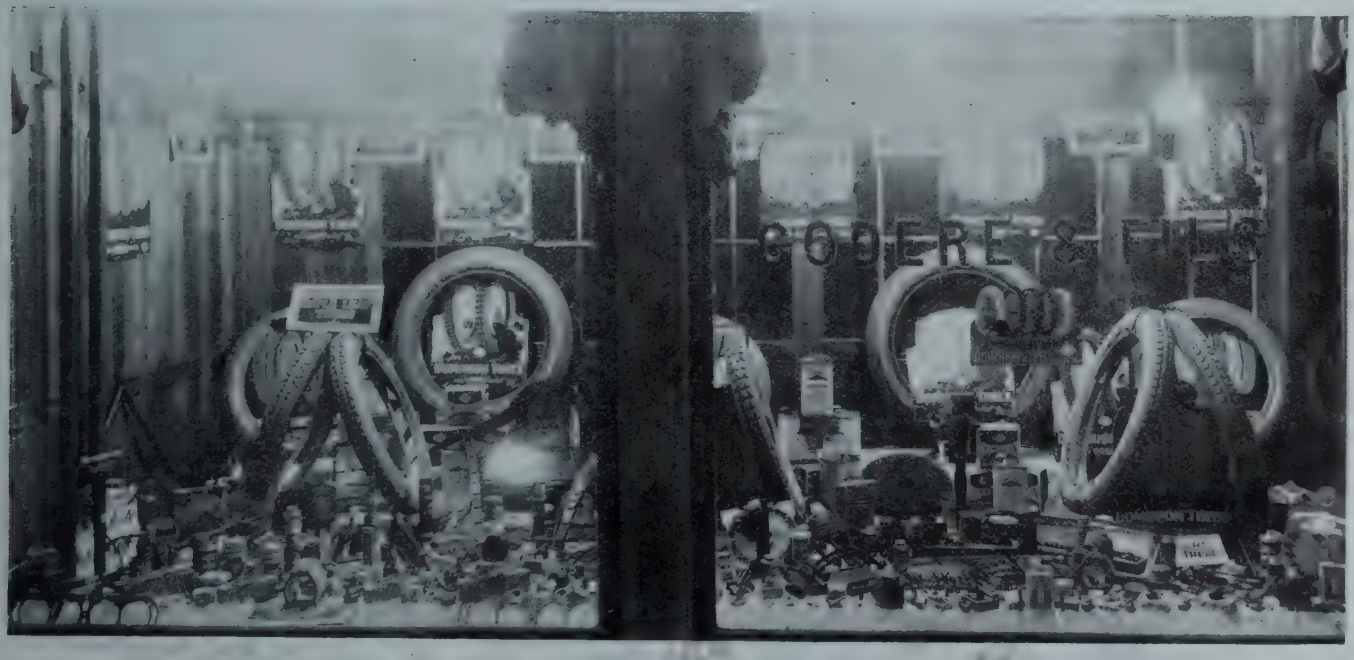
Saskatchewan has a population of 750,000, and about 60,000 automobiles. This is one to every 12 persons, which Hardware & Metal takes as a sign of prosperity. If the prosperity of the last four years has produced that many automobiles, what will the number be if we get a real crop this fall?

According to Charles Codere, buyer for Codere & Fils, Limited, 161 Wellington Street, Sherbrooke, Quebec, the blacksmith is one of the very best customers they have, and he, as a buyer, is becoming an increasing factor daily.

Is Discriminating

"Two years ago," said Mr. Codere to a representative of Hardware and Metal, "we put in auto accessories. The line is developing and we are selling a great many of these goods to blacksmiths. They are splendid customers. When an order comes in—if it be from a blacksmith—we fill it quickly. We never, or very seldom, question it; we prefer, as a matter of fact, to accept this business to that of many other tradesmen."

A somewhat remarkable statement is that, indicating as it does how great and rapid has been the change in the type of customers served by the hardware merchant of to-day. In some communities, if not all, the blacksmith has been looked askance, and because of the fact that he has all too often been a very careless individual regarding settlement of his bills. Careless, perhaps, in the collection of the amounts that have been owing him, it was but natural that those upon whom he depended for his supplies



A window of automobile accessories in Codere & Fils store, Sherbrooke, Que. Tires are one of the chief lines in their accessory trade and it will be noted they are well featured in the display. Pumps, gaskets, springs, oils, tools in kits are also shown prominently. This window will give other dealers some suggestions for an attractive display to secure a share of this summer's business in accessories.

should have to wait unduly for the monthly settlement. Very often three months, and even six, passed before the blacksmith's account was settled. Listen to this:

Take Cash Discounts

"Seventy-five per cent. of these blacksmiths will take their cash discounts. They are good business men, and a far different type of customers than they used to be. The blacksmith has developed good business judgment, is an expert in many cases in repairing automobiles, and dresses up at the close of the day and lives like a gentleman. He realizes, too, that he must charge a good price for his goods. Where he used to charge 12 to 15 cents a pound for his work, made up, he will now charge 40 or 50 cents; he has the money, therefore, to pay his bills with."

These further observations of Mr. Codere are very interesting and revealing. A buyer of horse shoes, iron, nails, borax, a few rasps and farriers' tools, the blacksmith of the years prior to the "teens" of the twentieth century has been superseded by the blacksmith-mechanician of the "teens" and the "twenties." Even for the hardware that should have gone through the local hardware man, many a blacksmith has been a patron of the Supply House, and as such, has been a source of but little revenue to the hardware dealer of his town. That has changed; is changing.

Has Radically Changed

As illustrating the change which has been manifest in the past short while, even in rural Quebec, Mr. Codere had this to say:

"Some years ago, when father was on the road, we would sell enough wagon hardware to finish 400 wagons. The farmers are buying wagons already made, where they used to make them, themselves. This has made a great change in our sales of these special goods. The demand now, for wagon hardware, is a very small one."

In giving publicity to automobile accessories and equipment the Codere Company has made generous use of its windows. These are dressed well, and with a view to getting the prospect interested and of them bringing him inside the store. When accessories are displayed, the windows are given over to such displays entirely, with a consequent deepening of the impression upon the customer.

In connection with this blacksmith patronage, the Codere Company makes it a point to cater to the wishes, as well as to the needs of their blacksmith friends. They wish an interest taken in them, and are as ready to value and appreciate this as is anyone else. And from the remarks of Mr. Codere to Hardware and Metal it is apparent that nothing is permitted to interfere with the service which blacksmiths are entitled to.

It is significant that the growth of the Codere auto accessory department has extended over slightly more than two years.

Prepares for Expansion

In keeping with a policy of progressiveness, the Codere Company recently secured a large area of land adjacent to their premises on Wellington Street. This will afford them additional yard and warehouse space. In time, as circumstances warrant, buildings will be erected on part of this, thus giving proper facilities for handling larger and more complete stocks.

Among important sellers, auto tires are very active. These are stocked in all sizes and are selling increasingly well. Big racks of over-stock are carried in the second storey of this store, while samples are ready for inspection on the main floor, the auto accessories being displayed well toward the front in silent salesmen. A glance at the accompanying photograph will indicate that the very first case of many used on the floor of the store, is filled with accessories of varying type and variety.

A Bird's-Eye View

Within the Codere store, there is an air of spaciousness that enables a customer to walk about without in any sense feeling that he is crowding or being

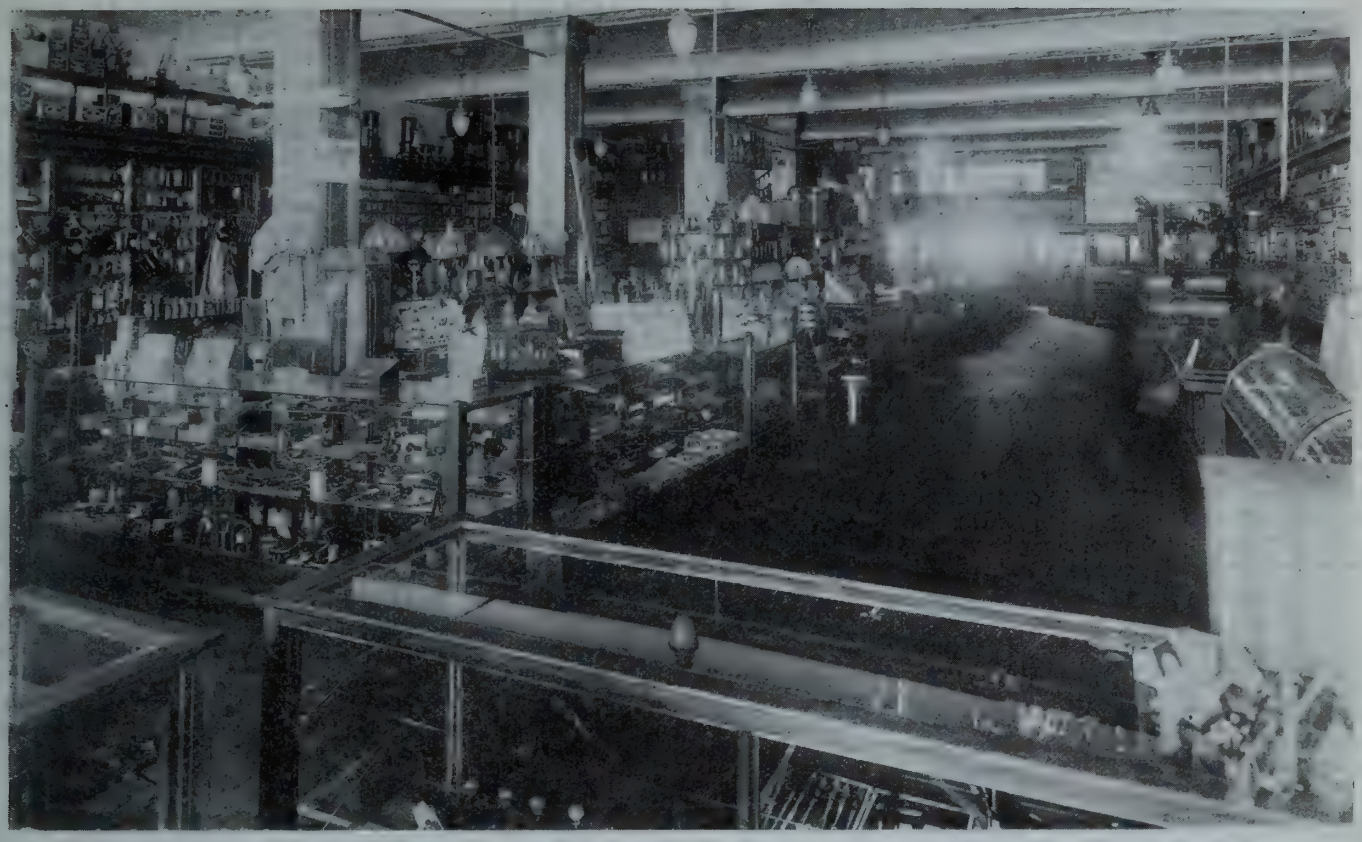
ANTI-GLARE HEADLIGHT LAW ROUNDING INTO SHAPE

The new Ontario Anti-glare Headlight legislation, which was to have been made effective on July 17 or 18, is still being held in abeyance. Enquiry by Hardware and Metal at the office of the Deputy Minister of Highways of Ontario, shortly before going to press, elicited the information that all the department heads are on holidays and the subordinates are still carrying on the examination of various devices for the elimination of headlight glare. It is evident, therefore, that it will be some days yet, and perhaps longer, before the legislation is finally enacted. As soon as possible a complete list of authorized devices will be published for the protection of the trade in Ontario.

How to Figure Out Profit

EXPERIENCE has proven that but few business men have learned to properly figure profit. Remember that 20 per cent. added to the cost does not yield 20 per cent. profit. Profit is properly figured on sales, and to make a 20 per cent. profit you must add 25 per cent. to cost. Keep the following schedule before you and you will find it worth many dollars in the course of a year:

5 per cent. added to cost is 4¾ per cent. profit on profit on selling price.
8½ per cent. added to cost is 7 per cent. profit on selling price.
10 per cent. added to cost is 9 per cent. profit on selling price.
12½ per cent. added to cost is 11⅛ per cent. profit on selling price.
15 per cent. added to cost is 13 per cent. profit on selling price.
16 per cent. added to cost is 14¼ per cent. profit on selling cost.
17½ per cent. added to cost is 15 per cent. profit on selling price.
20 per cent. added to cost is 16 2-3 per cent. profit on selling price.
25 per cent. added to cost is 20 per cent. profit on selling price.
30 per cent. added to cost is 23 per cent. profit on selling price.
33 1-3 per cent. added to cost is 25 per cent. profit on selling price.
35 per cent. added to cost is 26 per cent. profit on selling price.
37½ per cent. added to cost is 27¼ per cent. profit on selling price.
40 per cent. added to cost is 28½ per cent. profit on selling price.
45 per cent. added to cost is 31 per cent. profit on selling price.
50 per cent. added to cost is 33 1-3 per cent. profit on selling price.
55 per cent. added to cost is 35½ per cent. profit on selling price.
60 per cent. added to cost is 37½ per cent. profit on selling price.
65 per cent. added to cost is 39½ per cent. profit on selling price.
66 2-3 per cent. added to cost is 40 per cent. profit on selling price.
70 per cent. added to cost is 41 per cent. profit on selling price.
75 per cent. added to cost is 42 2-3 per cent. profit on selling price.
80 per cent. added to cost is 44½ per cent. profit on selling price.
85 per cent. added to cost is 46 per cent. profit on selling price.
90 per cent. profit added to cost is 47½ per cent. profit on selling price.
100 per cent. added to cost is 50 per cent. profit on selling price.



Automobile accessories are featured in one of the most prominent showcases at the front of the spacious store of Codere & Fils, Sherbrooke, Que., as shown herewith. It will be noted that the best use is made of modern store fixtures for the display of stock in each department. Samples of practically every line are within easy reach and a large and complete stock is available.

crowded. Plenty of room between the cases and counters helps to afford an inviting look, not to say glance, by the customer at the various goods on display. It is always risky to have cases so crowded that only a "Close-Up" view is possible. The impression may not be so vivid and may be partially lost, with a consequent reduction in the number of sales.

The shelf hardware section is effectively "dressed up." Of green fronts, the hundreds of shelf hardware drawers are fitted with neat samples of the several thousands of articles sold, and this display is well looked after by the salesmen. Sales are always easier if a given sample is clean and bright. It pays to spend time in going over the samples to remove dust, etc.

Sporting goods, builders' hardware, electrical goods, cutlery, arms and ammunition are all active sellers, and by carrying generous stocks of these the trade is greatly increased from season to season.

Excellent office accommodation, free ventilation, attached warehouse accommodation, elevators to all floors help in affording the Codere firm an altogether modern hardware plant.

RURAL DEALERS SHOULD GIVE MORE EXPLICIT ADDRESSES

Some hardware wholesale houses are complaining that they are called upon to bear an unnecessary amount of risk in sending out orders to some dealers on rural routes where these dealers are unfamiliar to the wholesalers and they neglect to give retailed information as to their address. In some cases the name of the village or town only will be mentioned, and there is then some confusion as to what rural route the dealer is on. This confusion is multiplied where there may be more than one dealer in the vicinity under the same name, as is often the case. Post Office officials advise Hardware and Metal that their Postmasters are pretty well acquainted with dealers throughout the community which they serve and endeavor to straighten out any such confusion, but it is evident that much unnecessary trouble would be avoided if such dealers give more detailed information as to their location.

Canada Assured of Fuel Supply

New York.—Plans for increased coal car service to Lake Erie ports—the gateways of North-Western States—to prevent all possibility of a winter coal famine were agreed upon at a recent conference here between the Association of Railway Executives and the National Coal Association, the latter representing the bituminous industry.

The adoption of the plan by the Interstate Commerce Commission means," the statement added, "an increased supply with sufficient direction of shipments to insure an adequate coal inflow to Lake Erie ports for transhipment to the North-West States and Canada."

New Ore Treatment May Cut Down Canada's Imports from U.S.

"Satisfactory results have been obtained from the investigations carried out by Prof. Alfred Stansfield of McGill University, Montreal, into the reduction of iron ores by gases at low temperatures and with the electric furnace. This research was assisted by a grant from the Honorary Advisory Council for Scientific and Industrial Research. On some of the findings, the council states, patents have been applied for by permit of the commercial development in Canada of methods which will make the low grade ores of Canada utilizable and of the greatest value," says the Daily Metal Reporter, Chicago.

Iron ore, iron and steel and their products are annually imported into Canada. Low grade ores would render the greater part of this importation unnecessary in the opinion of the council.

Annual Picnic of St. John Hardware Clerks

Held Last Saturday at Fairvale, N.B.—Many Valuable Prizes Contested For—Steps to be Taken to Boost St. John to High Place in Hardware World—Clerks an Important Factor in Local Politics

ST. JOHN, N.B.—One of the biggest picnics of the season was carried out on Saturday last at Fairvale, N.B., under the auspices of the St. John Hardware Clerks' Association and the Fairvale Outing Club. The railway company made a special effort to accommodate the large crowd and added three extra cars. In spite of this every car was crowded with strap hangers. On reaching the grounds the first item was a dive for the lunch counter, which the Fairvale Club had in readiness.

After refreshments the crowd then proceeded to the ball field and settled down to enjoy a game between the St. John Hardware Clerks and the Fairvale Outing Club. The teams were well matched, as the results show: Hardware Clerks 5, Fairvale 3. Photographs of the teams were then taken, and immediately afterwards the sports commenced. In most of the open events the hardware clerks led, owing, perhaps, to the fact that about a thousand supporters had accompanied them from St. John. One of the pleasing features of this big affair was the splendid co-operation of the employers. They were most liberal with donations of prizes. Every hardware merchant in the city came forward with a prize, or several prizes, also merchants in other lines of business were equally generous. Mr. Harry Hart, of Paint & Varnish, Ltd., who was in St. John a few days before the sports took place, was so interested that he donated, on behalf of his firm, a quantity of Floglaze, color to be selected by the winner. The hardware clerks very much appreciated this out-of-town gift.

St. John is a big hardware centre, containing seven large wholesale houses and many retail hardware stores. Taking into consideration the population of the city, St. John is the biggest hardware city in Canada, and the firms the best rated. The employees are aware of this fact, and in the near future are going to make an endeavor to have all the merchants and employees filmed in order to boost the city's importance in the hardware world.

The St. John Hardware Clerks' Association was founded by C. O. Morris, traffic manager for W. H. Thorne & Co., Ltd., in 1919, with the object of promoting co-operation between employers and employees, and goodfellowship between the employees. It has proved to be a big success, and has a large membership. In 1920 the present president was elected, Harry D. Sullivan, who holds an important position with the S. Hayward Co., hardware merchants.

The vice-president, Roy A. Willet, is chief bookkeeper for W. H. Thorne & Co., Ltd., and is well known throughout the Maritime Provinces as a writer.

Mr. Willet writes on topics of the moment in civic affairs. The last civic election in St. John was taken hold of in an active manner by the clerks. The candidates had never spoken in public, nor expressed their views on the various subjects vital to the citizens until the hardware clerks hired the Board of Trade rooms and invited the candidates to address a meeting. A list of subjects had been prepared and each one dealt with. Next morning every St. John newspaper contained an account of the speeches made by the candidates, with the result that every citizen knew the stand every candidate was taking.

It was gratifying to the Association to see the men elected who were the choice of the majority of the members.

NEW TAXES WILL YIELD 100 MILLION A YEAR

The results to date of the new direct taxes imposed by the budget in the form of luxury, excise, turnover and other taxes indicate that they will bring a very substantial addition to Canada's revenues. The prediction that the new taxes would bring $100,000,000 annually promises to be confirmed and the machinery of collection is reported to be working smoothly and satisfactorily.

Lumber Market Bright

Fredericton, N.B.—R. W. McLellan, secretary of the New Brunswick Lumbermen's Association, who has just returned from a trip to Great Britain, says the overseas market offers a bright prospect for Canadian lumber. Ocean freight rates, he said, were lower and there was more tonnage available, whilst the demand is strong and steady.

Explosives Act Has Wide Bearing

Act Now in Operation Affects Manufacturers and Every Dealer in Explosives—Fireworks and Sporting Ammunition Included in Regulations—Dealers Should be Acquainted with Provisions.

THE Explosives Act, now in operation and being administered by the Explosives Division of the Department of Mines, has a wider bearing on the community than is generally realized. Not only manufacturers, but also those who deal in explosives, are affected by its regulations. Fireworks and sporting ammunition are classed as explosives under the Act, though in some regards there are special provisions covering these. No explosive may be imported, stored or manufactured, unless it is classed as "Authorized" explosive by department officials; factories and magazines must be licensed; magazines on mining property come under the inspection of provincial inspectors of mines and are regulated by existing laws.

The quantity of explosive which may be kept by dealers is limited to one hundred and fifty pounds of gunpowder or blasting explosive in a store or twenty-five pounds in a suitable receptacle which may be kept on the premises proper. In each case a larger allowance is made in respect of certain propellants and fireworks and in the case of safety cartridges—which term may be said to comprise all complete cartridges for modern firearms—the limit is certainly in excess of any normal requirements.

The insistence of the observance of these regulations and their development and operation, it is said, are matters which must very largely lie with such authorities. No impracticable conditions, or conditions which should weigh hardly on those concerned, have been imposed, and the officials entrusted with the administration of the act are seeking through co-operation with other bodies in an effort to improve the conditions which in many places leaves considerable room for improvement.

Fire chiefs, it is said, will find the regulations of assistance to them in dealing with the prevention of fires.

Provision has been made for the keeping of explosives by persons engaged in land clearing, mine prospecting, and like work bearing on the development of the country, in quantities in excess of what is allowed in normal circumstances and on the authority of officials of local authorities, justices of the peace, and others. In the case of safety cartridges for the limitation as to quantities are very high and no permits are required for the reimportation. Dealers, however, must keep records of their issues of safety cartridges as well as of any other explosive, except fire works.

The procedure to be followed in most instances by contractors and others who may require to establish temporary magazines has been made as simple as possible consistent with the enforcement of reasonable and practicable precautions.

Interesting Comparison of Hardware Prices

Comparison of Prices on Hardware and Kindred Lines as Between January 1, 1915, and June 1, 1920, Showing Percentage of Increases

AN interesting chart has been prepared and issued by the National Hardware Association of the United States showing a comparison of prices on hardware and kindred lines as between January 1st, 1915, and June 1st, 1920. The comparison is based on prices ruling "at factory," and not "at destination" as the freight advances, inability to secure shipments by freight, necessitating express and parcel post shipments would make accurate figuring of "at destination" prices difficult. This chart will be of interest to hardware dealers throughout Canada as a reference and is, therefore, reproduced herewith:—

	% of Advance
Adjusters—Casement	140
Augers—Carpenter Nut	232
Ship	122
Axes—First quality, Single Bit	135
Balances—Spring No. 20	191
Barrows—Wood Garden	112
Bars—Steel Crow	339
Batteries—Dry Cells No. 6	112
Beams—Scale	198
Bells—Bicycle	90 to 120
Brass Hand	154
Cow	200
Rotary Door, Steel	122
Bicycles—Standard Equipment	49
Bits—Auger, Irwin	70
Snell	166
Expansive, Clark pattern	293
Blocks—Wood Pulley	217
Boards—Stove, Paper-Lined	112
Bobs—Plumb, Iron	133
Boilers—Copper, Wash	162
Bolts—Carriage, small sizes	271
Chain, Antique Copper	122
Eye, Wrought	163
Lag Screws	280
Machine, Large sizes	289
Machine, Small sizes	256
Stove	251

EDITORIAL COMMENT

"ANOTHER OCTOPUS IN THE TOILS"

UNDER the heading "Another Octopus in the Toils," a report in "Hardware Age" states: "Another big mail-order house, this time Montgomery, Ward & Co., has been made the subject of a formal complaint of unfair competition.

"The respondents in this case are called upon to answer charges of false representations in its catalog concerning liquid roofing cement. This article was advertised as 'containing no coal tar' when, according the the Commission, 'the company well knew such cement did contain coal tar.'

"After haling the representatives of the company before it, the Commission decided that it had no case, and thereupon issued the following bulletin:

"The trial of the case developed that the company practises a method of competition in interstate commerce generally known as the 'cumulative quantity discount,' that is to say, deducts from the price of goods purchased from it, a discount rate established by it upon condition that such purchaser shall have bought within a given period a certain quantity of goods, which method of competition was alleged in the Commission's complaint to have the intent and tendency of an exclusive dealing contract. It appears in this case that the company confined its calculations of the quantity discount allowances to periods not in excess of one calendar month, and that, therefore, the tendency of such practice to create an exclusive dealing relationship and to restrict competition is negligible.

"The complaint was dismissed upon the foregoing facts, without prejudice to the right of the Commission to rule against the cumulative quantity discount principle when applied to a different state of facts."

LINSEED CRUSHERS CLAIM GOVERNMENT HAS NOT STUCK TO FACTS

WITH further reference to the suit against the linseed crushers of the United States, as outlined in July 17 issue of Hardware and Metal, the crushers now claim that the Government has not clung very closely to stated facts and failed to state other facts in its bill of complaint filed against them under the Sherman Anti-Trust Law.

It is cited that the complaint says linseed oil sold in October, 1916, for 50 cents, when the records show the lowest point was 70 cents and the highest 90 cents in car lots. The complaint charges that in 1918 the price had increased to $1.80 and it is cited that the records show the price ranged from $1.50 to $1.81.

The crushers point to the fact that flax seed in October, 1916, brought $2.45 to $2.70 per bushel and that in October, 1918, the price was $3.50 to $4.10. A market letter sent out by the Archer-Daniels Linseed Co., after calling attention to these figures, says:

> "Working cost is made up of cost of labor and supplies. In 1916 we figured working cost 15 to 20 cents per bushel; in 1918, 60 to 70 cents per bushel.
>
> "Before the war there was no association of linseed crushers. During the war Government officials requested that an association be formed. This association acts the same as a board of trade or chamber of commerce in furnishing to anyone prevailing prices.
>
> "Naturally, prices only can be named on past transactions. There is no agreement either to maintain, advance or reduce prices or to do anything in opposition to the Sherman Act or any other law. It is difficult at times to explain the changes in linseed oil values. In London on June 29th linseed oil was quoted 81 per 112 lbs., six days previous 75-6 per 112 lbs., and during this time no change in La Plate linseed. At the moment domestic linseed oil for September forward can be purchased for 6 to 8 cents per gallon less than English oil. For many months during our great scarcity foreign oil was being offered at much under our cost. Its quality at times is questionable and the buyer may have to accept a three per cent. loss in weights.
>
> "It is unfortunate that many of our industries are put to great expense by the action of Government officials, caused frequently by statements made by persons not well informed. Before the war Germany's wonderful commercial progress which caused prosperity to everyone was mainly the result of the Government's efforts to assist German industries in every possible way.

Convention of Maritime Wholesalers

Much Business Important to Lower Provinces Hardware Trade Taken Up in Two-day Convention—Representative Gathering of Association Members and Manufacturers' Representatives

DIGBY, N.S. — The 22nd annual convention of the Maritime Wholesalers' Hardware Association recently held at The Pines, Digby, N.S., was one of the most successful and enjoyable gatherings in the history of the association. The Pines is a beautiful spot and is particularly suitable for these meetings on account of its central location, and being within easy reach of all the Maritime wholesale centres. Many of the delegates were accompanied by their wives. In addition to the representatives of the wholesale houses a number of manufacturers had representatives in attendance, which added much to the interest and helpfulness of the general sessions.

A large amount of business affecting the lower provinces was taken up in the two days of the convention, and a general discussion took place on the new taxes. Following are a list of delegates who attended and a list of officers elected for the year 1920-21:

Association Members in Attendance

R. P. Dickson, retiring president, Sumner Company Ltd., Moncton, N.B.; I. L. Crowell, Wm. Robertson & Son, Halifax, N.S.; J. R. Simmonds, Jas. Simmonds Ltd., Halifax, N.S.; W. H. T. Spinney, E. K. Spinney Ltd., Yarmouth, N.S.; George Bishop, McClary Mfg. Company, St. John, N.B.; H. N. Stevens, Douglas & Co., Ltd., Amherst, N.S. Above accompanied by wives. P. D. McAvity, T. McAvity & Sons, Ltd., St. John, N.B.; W. G. Stratton, T. McAvity & Sons, Ltd., St. John, N.B.; J. F. Tilton, W. H. Thorne & Co., Ltd., St. John, N.B.; R. M. Bartsch, S. Hayward Co., Ltd., St. John, N.B.; H. W. Emerson, Emerson & Fisher, Ltd., St. John, N.B.; A. W. Morton, A. M. Bell & Co., Ltd., Halifax, N.S.; Jas. R. Grant, A. J. Grant & Co., Halifax, N.S.; Geo. J. Metzler, Wm. Stairs, Son & Morrow, Halifax, N.S.; M. O. Crowell, Crowell Bros., Halifax, N.S.; O. R. Crowell, Crowell Bros., Halifax, N.S.; Frank Sutherland, Thompson & Sutherland, New Glasgow, N.S.; Miss T. M. Kyle, secretary, Sumner Co., Ltd., Moncton, N.B.

Guests in Attendance

C. E. Heustis, Mann Axe & Tool Co., St. Stephen, N.B.; G. F. A. Anderson, T. S. Simms & Co., Ltd., St. John, N.B.; G. W. Campbell, G. Wilford Campbell & Son, St. John, N.B. Above accompanied by wives.

W. E. Bell, Henry Disston & Sons, Toronto, Ont.; L. M. Farquhar, Steel Co. of Canada, Montreal; G. M. Johnson, Jas. Pender & Co., St. John, N.B.; W. P. Walsh, Martin-Senour Co., Ltd., Halifax, N.S.; J. H. Ward, Gillette Safety Razor Co., Montreal; George Helliar, Brandram-Henderson Ltd., Halifax; A. E. Pay, The Barrett Co., St. John, N.B.; D. R. Fowler, W. T. R. Irving, Canada Foundries & Forgings, Ltd., Brockville, Ont.; H. W. Ferry, Sargent & Company, Boston, Mass.; Wm. Downing, Sherwin-Williams Co., St. John, N.B.; Mr. Blenkhorn, Blenkhorn & Sons, Canning, N.S.; Mr. Coates, Henry Disston & Sons, Toronto, Ont.; Miss Constance Campbell, St. John, N.B.; Miss Mollie Stevens, Amherst, N.S.; Miss Spinney, Yarmouth, N.S.

Officers for 1920-1921

President, I. L. Crowell, Wm. Robertson & Son, Halifax; vice-president, W. G. Stratton, T. McAvity & Sons, St. John; Nova Scotia Executive Committee: A. W. Morton, A. M. Bell & Co., Ltd., Halifax; J. R. Simmonds, Jas. Simmonds Ltd., Halifax; H. N. Stevens, Douglas & Co., Ltd., Amherst. New Brunswick Executive Committee: J. F. Tilton, W. H. Thorne & Co., St. John; H. W. Emerson, Emerson & Fisher, Ltd., St. John; R. M. Bartsch, S. Hayward Co., Ltd., St. John.

60th Anniversary of Thos. Davidson Manufacturing Co.

The Thos. Davidson Manufacturing Company, Limited, has just attained the sixtieth anniversary of its growth. Sixty years ago, the late Thos. Davidson laid the foundation of the business still conducted under his name at Montreal.

On the 31st of March, 1860, the late Thos. Davidson was presented with a letter by those who had been associated with him for many years, expressing their high regard for him on the occasion of his leaving the employ of Wm. Darling & Co., to organize his own business in the Crystal Block, a few doors west of St. Lawrence Main Street.

While wholesale business in Montreal has been conducted very largely in a different section of the city in more recent years, at that time a number of important firms were located in the same block, including Savage & Lyman, Rice Sharpley, John Henderson & Co., Lamplough & Campbell.

In those early days, manufacturing was of a limited nature although a press was installed, this being supplied by predecessors of the E. W. Bliss Co. Most of the goods sold at that time, however, were bought from Lalance & Grosjean, New York, two young men who had come over from Jappy & Frere, Paris, France. It is also interesting to note that both of these firms are still in existence, and among the largest of their kind in the world.

In 1864 a partnership was formed by Mr. Davidson with the late Robert Kerr, and premises were secured on Hospital Street, the upper flats extending to St. John Street, the site occupied now by the 10-storey Lewis Building.

About the year 1867 the present site was bought in St. Henry, and at that time this was quite out in the fields. This section of the district was then known as the Village of St. Henry, and this was afterwards divided into St. Cunegonde and St. Henry, both separate cities at that time, but since taken into the City of Montreal. Adjoining properties were purchased from time to time, comprising at present four city blocks.

In the year 1894 a Quebec charter was secured, and in 1911 a Dominion charter. This naturally was the outcome of great expansion of the business from a manufacturing standpoint.

The late Thomas Davidson, founder of the business, died April 23rd, 1894.

BIG INCREASE IN CANADA'S TRADE WITH ITALY IN HARDWARE AND METALS

Canada's trade with Italy for the year 1919, figures for which have just been issued, amounted to $19,130,079 in value, being almost three times the value of Canadian exports to Italy for the corresponding period of 1918 and much larger than in any year past. It is therefore interesting to note what channels of trade with Italy are being chiefly developed. Among the largest exports to Italy during the year 1919 were locomotives, brass rods, sheets and tubing, hardware, metal, asbestos and mineral wax. The total value of Canadian exports to Italy of iron and its products, including agricultural implements, locomotive and parts, hardware, machinery, tubing, vehicles, tools, etc., was $2,931,603. Non-ferrous metals and their products to the value of $33,387 were exported, and non-metallic minerals, such as asbestos, coal, carbon, etc., to the value of $425,233.

EVENTS IN THE TRADE

Business Changes

Tisdale, Sask.—C. F. Peterson, hardware, has sold out his business.

Swan Lake, Man.—A. E. Downey, hardware merchant, has been succeeded by Victor De Roo.

Canada Foundries & Forgings Co. Deal

A special general meeting of the shareholders of Canada Foundries & Forgings was held at Brockville on July 24 to act upon a by-law by the directors, authorizing the purchase of the business undertaking of the Mann Axe & Tool Company of St. Stephen, N.B., and the sale thereof to the Mann Axe Company, Limited, of the same place.

Pioneer Manufacturer Dead in St. Catharines

St. Catharines. — Reece McKinley, pioneer wheel and spoke manufacturer, died last week, aged 90 years. When the Chapin wheel manufacturing concern moved to Chatham some years ago he went with it, retiring about eight years ago and returning to this city. He is survived by one daughter in this city and one son, George, representative of the Standard Oil Company in London, Eng., and secretary of the American reception committee in London.

Munitions Plant Sold

The Universal Tool Steel Company has disposed of its property and machine shop on the east side of Dufferin street, north of the Exhibition grounds, Toronto, for $155,000 to a United States firm. The lot has a frontage of 258 feet 11 inches and a depth of 300 feet. The large machine shop on the property was used during the war for the manufacture of munitions.

New Ass't for Captain Edwards

Montreal.—Lieutenant A. M. Wiseman (Military Cross) has joined the Montreal staff of the British Trade Commission for Canada and Newfoundland, and will be the first assistant to Captain Edwards, the senior British Trade Commissioner in Canada and Newfoundland.

Lieutenant Wiseman entered the service of the Board of Trade in London after the close of the war and his services there in connection with the London Board of Trade fitted him for the new duties he will perform at Montreal. The work devolving upon Captain Edwards has been increasing of late, necessitating an increase in the staff.

Can Manufacturer Loses Manager

Montreal.—G. A. Willis, who has been Toronto manager for the A. R. Whittall Can Co., Ltd., since the opening of their branch there about six months ago, is dead. The late Mr. Willis was a Toronto man and succumbed after an illness of bettween two and three weeks. A successor has not yet been appointed.

Autostrop Safety Razor Company Outing

The annual employees' picnic of the Auto-Strop Safety Razor Co., Limited, was held at Wabasso Park, on Saturday, July 3. About one hundred and fifty or more of the employees and their families, including Mr. N. R. Maas of the New York office, took advantage of the fine day to enjoy a most delightful lake trip. A programme of games was run off in the Park. All of the events were keenly contested and resulted in some close and exciting finishes. At noon a full-course dinner was served in the pavilion, while a supper and dance in the pavilion in the evening brought a most enjoyable day to a close.

Jenkins Bros., Ltd., Staff Entertains

Some 400 employees and invited guests made merry on the occasion of the recent opening of the new Iron Valve Plant, at Montreal, of Jenkins Bros., Limited. An entertainment was arranged and carried out in the new building, selected decorations adorning the walls.

An announcement was made by the managing director of the company, W. S. Trimble, regarding the inauguration of a group insurance system for the benefit of employees, and also a pension plan, which was most warmly applauded by the employees. Dancing and card playing were indulged in for the greater part of the evening, the Grenadier Guards band being in attendance.

Jenkins Bros., Ltd., Extend Plant

Montreal.—A new machine shop for the Iron Valve Division of Jenkins Brothers, Limited, Montreal, has recently been completed. This covers a considerable area and will afford 16,000 sq. ft. of additional floor space.

The management informs Hardware & Metal that the new facilities will afford the company enlarged facilities for the execution of orders. The company established in Canada in 1906, and is a branch of the parent industry operating in the United States.

I.C.C. Has Jurisdiction Over Canadian Metal Shipments

The Interstate Commerce Commission of the United States has decided that it has jurisdiction over rates from the border on material shipped from Canada to points in the United States. The matter came up on the question of rates on blister copper shipped by the International Nickel Company from Colborne, Canada, to Bayonne, N. J.

Rate charged was 35 cents per 100 pounds; the Nickel company held that a rate of 23½ cents per 100 pounds was the proper rate.

The question of jurisdiction was raised by the Central Railroad of New Jersey. In deciding it had jurisdiction, the commission takes the case and will hear later evidence on the reasonableness of the rate charged.

Annual Meeting of Accessories Branch of N.H.A.

The third annual meeting and exhibition of the Accessories branch of the National Hardware Association of the U. S., will be held in the Coliseum, St. Louis, Tuesday, Wednesday, Thursday and Friday, November 30th, December 1st, 2nd and 3rd. The business sessions of the meeting as well as the exhibition will be held in the Coliseum, which has ample accommodations for the display of the products of associate members. Each associate member will be allotted, without charge, a booth for the display of such accessories, supplies or equipment as would be of interest to those in attendance.

Toronto Hardware Picnic to Long Branch Park

The 5th annual picnic of the Toronto Hardware Merchants and Travellers will be held at Long Branch Park, on Wednesday, July 28. Automobiles will leave Sunnyside at 2 p.m. Special radial cars also leave Sunnyside at 2 p.m. Officials in charge are as follows: J. C. McFadden, chairman; John Caslor, treasurer; F. R. Jackson, W. Cotton, W. Platt, J. Buscombe, O. F. Morrison, secretary. A long list of events has been planned to make the day an interesting one, and some splendid prizes will be given to the winners. Dancing will be held in the pavilion in the evening, commencing at 8.30 p.m.

Varnishes May Be Advanced

Montreal.—In discussing the varnish outlook with W. W. Ingersoll, vice-president and secretary of the Dougall Varnish Company Limited, Montreal, he stated to Hardware and Metal that the tendencies were very strong on this commodity.

"The situation on gums is as bad as ever," said Mr. Ingersoll. There is a lack of supplies all around, and prices are away up. Labor in the primary market is one of the difficult problems at the present time. The freight situation makes the matter difficult and very little gum is arriving on this market."

Containers are Scarce

The container situation is not a promising one at the present time, Mr. Ingersoll states, and supplies are very hard to obtain. Doubtless, were it not for the foresight and early buying in advance on the part of the manufacturer, it would be very difficult to make deliveries of varnish at the present time.

With regard to business conditions generally, Mr. Ingersoll reports that the demand for varnishes from all parts of the country is very heavy and the outlook is most promising.

Costs More to Handle Scrap

Montreal—In discussing the old scrap metal situation with a large operator in Montreal this week, he pointed out one of the great difficulties which may not be generally understood.

"It now costs us $5 to $6 per ton to handle this old scrap, where it used to cost us from 75 cents to $1. Owing to this high cost of labor quite a change has been brought about in handling this old material, and mixed cars of old scrap have been sent in from country dealers. This makes the situation more difficult to fill, as, in handling a straight car of one line of old scrap, the labor-handling is reduced very much. With a mixed carload of old material the cost of handling it is very much greater, and when buying in that way prices cannot be paid that are paid for the straight cars of one line."

The present situation is rather uncertain, mills not buying extensively in Canada. In the United States there has been a great deal of activity lately with prices somewhat higher, while a declining market has been manifest in Canadian trade circles owing to the limited demand on the part of manufacturers.

Celebrates 84th Birthday in Modern Fashion

Leroy S. Starrett, president of The L. S. Starrett Company of Athol, Mass., recently celebrated his 84th birthday by a "trip to the clouds" at St. Petersburg, Florida.

Canadian Metal Duty and Tax Cause of Speculation

"Considerable interest is being manifested in the new Canadian duty and taxes on metals with regard to its ultimate effect upon the metal business in that country and the exports to the Dominion from this country," says the Daily Metal Reporter, of Chicago. With a duty of 1½ per cent. per pound and 2 per cent. turnover tax payable by the Canadian consumer upon the arrival of coppr at the border, it is to be expected that the price will rule higher there than in the United States.

"The new ruling which was made by the Inland Revenue Department of Canada will affect many metal dealers' as the majority conduct a retail business which brings them under the terms of teh ruling which imposes a 2 per cent. sales tax added on purchases from manufacturers or importers.

"A ruling has also been handed down providing that all sales of scrap metal by dealers to consumers shall be subject to a one per cent. sales tax.

Rumor British Interests Seek to Control American Linseed Co.

New York.—According to reports in circulation here the continued strength of the activity of American Linseed Co. shares is due to the belief that the plan for the purchase of a controlling interest in the American company by British interests will be announced in a very short time.

President R. H. Adams has sailed for Europe, it is understood, for the purpose of conducting the negotiations through which a substantial portion of the linseed company will pass to British hands. The terms of the deal, it is said, have not been decided on, but it is understood that the plans have progressed to the point where there is little likelihood of a hitch.

Lord Leverhulme is reported to be at the head of the British group which is seeking to get hold of the company.

Car Supply Still Regulates Steel Operations

"Day to day car supply still regulates iron and steel operations," says The Iron Trade Review. "As this represents a widely fluctuating factor, producers are hard pressed to keep their plants on a steady manufacturing basis. In many respects the situation grows worse each week because of the cumulative effects of the continuing partial stagnation. Extension for 30 days from July 31 of the open top car order by the Interstate Commerce Commission promises to prolong the transportation troubles of the industry. However, the worst features of the original order for the iron and steel industdy have been modified by an amended ruling by the commission that top cars are not meant to include equipment of sides up to 36 inches. Because of the demoralized conditions of traffic during the past few weeks, rolling schedules virtually have been discarded by various mills. Present operations are being governed by the way the material admits of piling or consumers consent to its being put on the yards for indefinite delivery. Every effort is being made to minimize the possibility of cancellations because of non-delivery.

Metal Trades Raise Pay 20 Cents a Day

VICTORIA. — Making its quarterly wage adjustment under a system adopted following the expiration of the Robertson agreement, the Metal Trades Employers' Association of British Columbia announces a wage increase of twenty cents a day. The last increase, made three months ago, was twenty-six cents. The awards are based on the cost of living figures given in the Labor Gazette.

Canada's Steel Needed in England

Sheffield steel makers have decided to advance the price of basic billets 30s. per ton, making soft basic billets £24 and hard basic £25 per ton delivered. These are the highest prices for basic billets ever recorded. Just before the outbreak of war hard basic was quoted £5 5s. to £5 10s. and soft basic £4 15s. per ton. The prices are not firm, all sales still being made subject to the condition that the price to be paid is that which prevails on the day of delivery. One cause of the increase is an advance of £1 per ton in pig iron, the production of which is below the requirements of users.

British steel makers, writes a Sheffield correspondent, hope to find a solution of the troubles associated with short supplies of raw and semi-manufactured material by entering into the alliance already announced, with leading Canadian concerns. It is hoped that by the harnessing of British knowledge of steel-making with the enormous natural and mechanical resources of Canada, the British Empire may be able to oust Germany permanently from the position of being the second largest steel producer of the world.

Germany has already yielded the position to Great Britain, a necessity forced upon her by the fact that, owing to internal troubles, her steel plant is working at only half capacity. The United States still leads as a producer of steel.

Cement Shortage Hampers Building

Hamilton.—Builders are complaining that operations are being held up for a lack of cement. Owing to the car shortage, very little cement is being shipped. The Government will be asked to take some action to improve conditions.

Twenty-Sixth Annual Convention of N.H.A.

The twenty-sixth annual convention of the National Hardware Association of the United States will be held Tuesday, Wednesday, Thursday, Friday, October 19th, 20th, 21st, and 22nd, at the Marlborough-Blenheim, Atlantic City, N. J.

NEWS OF WESTERN CANADA

Turpentine Production in British Columbia

As Viewed by a Writer—Almost Two-Thirds of Forests Have Been Felled—Consumption Four Times Greater Than Ten Years Ago

F. A. O'FARRELL, writing from Aberdeen, Wash., for the "Province" of Vancouver, B.C., on the subject of turpentine production in the North-west, states:

"It is from the spruce that the wings of aircraft get their best material. It is from the Douglas fir thus grown beside the sea that the best turpentine is collected. Fully $100 worth of turpentine and rosin can be collected from an acre of fir trees annually by the simple device of tapping the sap, as the maple tree is tapped for sugar, and fir is helped and not hurt by the tapping. The turpentine is almost in the nature of a disease in the blood of the tree. In escaping it often bursts the bark of the tree and so injures it. It relieves the tree to tap it three feet from the ground, and the tapping can continue for centuries.

"Civilization is felling these glorious forests so rapidly that almost two-thirds of them have vanished. In 20 years more the rest will be gone, save where protected in national parks or forest reserves. I motored out through the glens and valleys, where I had seen those woods not so long ago. They were all gone. Stocks and stumps of trees, debris and desolation were all I saw on every side. Far as the eye could range, speeding at 40 miles an hour, not a fir, cedar, spruce or hemlock was left standing. The whole country looked as desolate as devastated lands I motored over in France after the armistice.

"I never before realized, till this visit to the great lumbering regions of the Pacific North-west, the amazing rapidity with which the forest resources of America are being destroyed. Half the forests have disappeared in 30 years. At the present rate they will all be gone in another 20. Consumption is now four-fold greater than 10 years ago. The tragedy of the war speeded their destruction. Newspapers eat up four or five million tons of forest growth yearly. Every palatial ship that sails the seas has added to the destruction of these forests.

A. Ramsay & Son Co. Established in the West

Announcement is made by A. Ramsay & Son Company, that they are opening a branch warehouse at 123 Bannatyne Avenue East, Winnipeg, where they will be known as A. Ramsay & Son Company of Manitoba, Ltd. This branch will be under the management of H. S. Duncan who has had a wide experience in Western Canada, having been connected with the paint trade there for many years. This new policy will afford the Western customers of the Ramsay Company a larger and more complete stock from which to draw their supplies for Manitoba and Saskatchewan, with more prompt shipments possible.

B.C. Retailers Would Dismiss Commerce Board

New Westminster.—At the concluding session of the British Columbia Retail Merchants' Association on Friday, resolutions were passed urging that the luxury tax be collected from the source of supply, manufacturers and importers, and requesting that the Board of Commerce be dismissed and a more representative body appointed. "Give me a little more time and we'll defeat the Government on this luxury tax," declared Dominion President Banfield during a lively discussion.

Winnipeg Trade is Very Hopeful

In discussing the business conditions as they obtain in the Near West with Edward Goodwill, vice-president of the Thomas Davidson Mfg. Company, Ltd., on his return from Winnipeg, Hardware and Metal was informed the spirit of the West was very hopeful with regard to the outlook for fall business. Mr. Goodwill stated that the prospects were viewed with enthusiasm and that if conditions would only continue as favorable as now large quantities of goods would be required in the West this fall. Stocks there are maintained on a fair average, although in his opinion there had been no overstocking. Larger stocks will be required and will be ordered if the crop is assured a little later on.

Western Notes

Winnipeg.—E. Kelly, director of the British Smelting and Refining Co., Montreal, is on a business trip through Western Canada, and expects to be in Winnipeg shortly.

Winnipeg.—Arthur L. Small, sales manager for the Advance Packing and Supply Co., 64 W. Lake St., Chicago, was a visitor in Winnipeg last week. He is just returning from a trip to the Pacific Coast, and reports business very good.

Winnipeg.—The Social Club of Wood, Vallance Limited, have already had three or four very enjoyable excursions, and a moonlight excursion was held to Grand Beach last Thursday night. The committee spared no efforts to make this a bigger success than ever.

Miss Evelyn Howe, one of the popular young ladies of Wood, Vallance Limited, was recently married to Mr. Thos. McNiece. Before leaving she was presented with a handsome set of carvers and a cut glass berry bowl.

Winnipeg.—Claude Pile and F. J. O'Neill, travelling salesmen for Wood, Vallance Limited, attended the Travellers' Picnic at Winnipeg Beach, and were delighted with the success of the ball team. Their enthusiasm and rooting was a big factor in winning the game.

Winnipeg. — Wood, Vallance Limited baseball team were successful in winning the cup and prizes put up for competition by the North-West Commercial Travellers and U.C.T. The final game was played at Winnipeg Beach, being the feature event of the Travellers' Picnic. The game itself was very interesting, being in doubt right up to the ninth inning. However, the stellar pitching of Dave Miller, and the splendid work at the bat of Gus "Battler" Ward, Chic Little and Morley Paul resulted in a very popular victory. The team deserves a great deal of credit, as they have been playing consistent baseball all season, and are the only undefeated team in "B" division of the Commercial League.

Wakyte Mfg. Co. Suffers Fire Loss

Winnipeg.—Fire breaking out in the premises of the Dominion Equipment & Supply Co., McRae Bldg., this week, spread to the factory of the Wakyte Mfg. Co., causing damage estimated at $7,500, most of which is covered by insurance. The company is still in position to make immediate shipments of stock.

Customers' Convenience First Essential

Safe Ltd., Salmon Arm, B.C., Have Installed Modern Kitchen, Rest Room with Bed and Washroom, for Out-of-Town Customers' Convenience—Have Large Mail-Order Business in Hardware Throughout Surrounding District—Have Developed Extensive Store Business in Shelf Hardware and Accessories

THE hardware department of The Safe Limited, Salmon Arm, B.C., is shown herewith. This company has been in business for a number of years and has many distinctive features of interest. The shares of the company are owned by farmers and others in the community, being run on a co-operative basis with a special discount for cash trading. The name (Safe) was derived from this motto: "Simply Aim for Equity." Their aim is to supply goods at the lowest possible cost. A complete line of shelf hardware, stoves, automobile accessories and other features of an up-to-date hardware department are shown in the illustration. The Christmas decorations were in vogue when this picture was taken.

A feature of this business is an extensive mail-order business throughout the surrounding district. To handle the company records and the mail-order trade an office staff with modern office equipment has been installed, as shown in the other picture herewith. An adding machine, typewriter and other modern fixtures are shown.

"Each department is under separate management and all are separated by partitions so that the customer wishing to shop in various parts of the store feels that the man behind the counter is experienced at his particular line of business and is not merely a general clerk in a general store," said Mr. G. G. Barber, store manager, to Hardware and Metal.

The hardware department of Safe Ltd., Salmon Arm, B. C., photographed when Xmas decorations were in vogue. An extensive trade in general hardware lines and automobile accessories is done through the medium of the retail store and a mail-order trade conducted throughout the surrounding district.

The office of Safe Ltd., Salmon Arm, B. C. It will be noted that adding machines, typewriters and other modern office equipment is used to look after the records of the retail business and the large mail order business which is conducted by this store.

A combined rest room, kitchen and toilet is another feature of this store. The kitchen is fitted up with stove, cooking utensils, table, chairs, dishes, etc., and is for the use of customers coming in from great distances. These customers bring their own food and cook and eat it at the store just as if they were at their own home. It avoids the necessity of relying on expensive hotel fares for their food requirements under such circumstances. The rest room, next to the kitchen, is also complete in its furnishings, even to a bed for anyone who might be taken sick. A toilet and washroom adjoins the rest room.

Customers waiting for late trains are allowed the use of these rooms even after the store is closed for the day, the rooms having a separate entrance from the street and allowing of their being shut off from the rest of the store after closing hour. An addition is now being built to the store, and with its completion at the end of this year some rearrangement of departments is contemplated in order to provide room for extensions.

Newsy Notes From Here and There

Toronto.—Chas. Drumm, hardware merchant of Holstein, Ont., was in Toronto this week on business.

Toronto.—G. A. Binns, hardware merchant of Newmarket, Ont., was in Toronto this week on business.

Toronto.—W. J. Lawson, general manager of Rice Lewis & Sons, Ltd., Toronto, Ont., is away on a vacation trip.

Toronto.—N. F. Culverhouse, manager of the Rogers Supply Co., Ltd., Toronto, Ont., has returned from his holiday trip.

Toronto.—Robt. Pinchin, president of the Ontario Oil and Turpentine Co., Ltd., Toronto, has been laid up for several days, due to illness caused by a severe cold.

Peterborough—J. G. Campazzie has resigned as an official of the De Laval Company to assume the general sales-managership of a Boston company engaged in the manufacture of automobile parts.

Montreal.—G. S. Whitaker, representing Edward Bibb & Sons, Birmingham, was a visitor last week from Toronto. Gordon C. Seybold returned from a brief visit to Sudbury, where he visited his old firm, the Cochrane Hardware Co., Ltd. E. B. Weaver, travelling representative of the Millers Falls Co., Millers Falls, Mass., called last week on the Montreal jobbing trade.

Montreal.—T. H. Jordan, vice-president of A. C. Leslie & Company, Ltd., Montreal, is spending part of his vacation at Murray Bay. George C. Fletcher, linseed oil department, Sherwin-Williams Company of Canada, Ltd., spent a brief period in New York during the week.

Montreal.—D. E. Starr, with the Coleman Farebox Company, Toronto, was a visitor to Montreal last week. Mr. Matthews, representing the Hazard Lead Works of Hazardville, Conn., called last week on Montreal jobbers, and was accompanied by Mr. Calahan of the same firm.

Montreal.—Captain Fraser, representing Campbell Agencies, Toronto, and particularly the firm of Lansom & Goodnow, cutlery manufacturers, Shelburne Falls, Mass., was in Montreal this week. H. A. Smith called on the Montreal trade this week in the interests of J. H. Swift and Sons, Ltd., Sheffield, England.

No Improvement in Cans for Months

Montreal.—That there will be no improvement in the supply or price of tin or steel containers for the next four or five months is the opinion of Fred. S. Whittall, managing director of the A. R. Whittall Can Company, Ltd., Montreal.

"There is a shortage of cans and of tin plate," said Mr. Whittall to Hardware and Metal. "Everyone is wanting cans and I do not see where there is any possibility of improvement coming for months."

The present canning season is calling for a great deal of stock for canning purposes. Added to the demands of paint and varnish manufacturers, and of other users, the can makers find it difficult to take care of additional orders other than those which have been placed some time ahead.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1274. **Leather.**—A leading firm in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export all sorts of leather.

1275. **Leather.**—A leading Roumanian firm are desirous to receive quotations and other particulars from Canadian firms in a position to export leather and skins of all sorts.

1276. **Leather and skins.**—A firm in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export leather of all sorts.

1289. **Iron.**—A firm in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export iron.

1290. **Miscellaneous manufactures.** — A young Brazilian firm of general import agents in Rio de Janeiro wish to hear from manufacturers and exporters of paints and varnishes, motor cars, lorries and accessories, pumps (centrifugal, etc.), electrical equipment, machine tools, shelf hardware, brass goods, saw-mill machinery, shovels and tools, bicycles.

1291. **Miscellaneous manufactures.** — A Brazilian firm of general importers in Rio de Janeiro wish to import agricultural machinery, metal-working machinery, hardware of all kinds, copper and brass sheets, bars and pipes, lubricating oil, paints and varnishes, from Canada.

1308. **Raw hides.**—A firm in Milan wish to buy raw hides in Canada.

1309. **Raw and tanned hides, tanning materials.**—A house in Alessandria wish to hear from Canadian firms exporting raw and tanned hides and tanning materials.

1310. **Raw and tanned hides.**—A firm in Milan state their desire to enter into relations with Canadian firms exporting the above.

1311. **Leather.**—A very old-established Milanese firm are disposed to consider Canadian offers of leather.

1312. **Leather.**—An important Milanese firm are anxious to secure an exclusive agency in leather for all Italy.

1313. **Leathers.**—A firm in Milan are desirous of hearing from Canadian houses wishing to trade with Italy in leathers.

1314. **Leather and leather goods.**—A Durban firm of commission agents are prepared to take up Canadian agencies for leather, all kinds; trunks and bags.

1315. **Tanned leathers.**—An important house in Milan are willing to buy tanned leathers in Canada or act as representatives for Canadian firms wishing to export same to Italy.

1316. **Leather and furs.**—An old-established Milanese firm are anxious to hear from Canadian firms desiring to do business with Italy in the foregoing.

1317. **Leather and novelties.**—A house in Rome interested in leather and novelties are willing to purchase same in Canada provided Canadian prices are competitive.

1318. **Leather and novelties.**—An important firm in Rome asks for the above articles from Canada. The firm would also act as representative for Canadian firms.

1319. **Leather.**—An old-established house in Milan wish to represent Canadian firms in the foregoing.

1320. **Leather and wrapping paper.**—A well-known firm in Genoa would be glad to buy the foregoing in Canada.

1337. **Hardware—Representation.**—A Cape Town agent requests correspondence from Canadian manufacturers or shippers, with view of agency, in hardware of all kinds.

1338. **Hardware, enamelware, and tools—Representation.**—A Durban, South Africa, firm of manufacturers' agents are seeking the representation of Canadian hardware manufacturers; also enamelware and tools of all kinds, except machine tools.

Hardware Letter Box

E. and D. Bicycle

Messrs. Conner and Jones, Marmora, Ont.—Could you kindly tell us the name of the maker of the E. & D. bicycle?

Answer.—This model was formerly made by Evans and Dodge, of Windsor, Ont., but we understand that this has been discontinued for some time.—Ed.

Oil Stoves and Wicks

Norfolk & Rochester Hardware Co., Ltd., Haileybury, Ont.—Kindly advise us as to where we can procure the "Quick Meal" oil stoves and the "Blue Bird" wick.

Answer.—The "Quick Meal" oil stove may be procured from the James Stewart Mfg. Co., Ltd., Woodstock, Ont. The "Blue Bird" wicks could be procured from the Thos. Davidson Mfg. Company, Ltd., Montreal, Que.—Ed.

Vacuum Cleaners

Gilles Hardware, St. Jacobs, Ont.—Please advise us as to where we can procure Hoover vacuum cleaners.

Answer.—These may be procured from the Hoover Suction Sweeper Co., Hamilton, Ont.—Ed.

Vapor Oil Stoves

The Manitoba Hardware and Lumber Co., Ltd., Reston, Man.—Kindly advise us as to the names of the manufacturers of the Monarch vapor gasoline range.

Answer.—This range is manufactured by the Excelsior Stove and Mfg. Co., Quincy, Ill.—Ed.

LETTERS TO THE EDITOR

RETAILERS' ORGANIZATION FOR BUYING ABROAD

Dear Sir,—

As your readers are aware, a huge portion of the manufactured products sold in Canada come from England, which, on the other hand, is a large buyer from Canada of cereals, timber, certain minerals, etc.

This trade from England to Canada is carried on mainly through the jobbers, and the bulk of it undoubtedly is still likely to even if my suggestion in this letter was strongly taken up, but there are most certainly a large and increasing number of tradesmen who could import in lots from say $100 upwards (smaller lots, as a rule, would be cheaper bought through the jobbers), if the assortment was reasonable for the average requirements of a retail business.

But at present there is little or no suitable method for such retail stores to adopt, for obviously the upkeep of a buying staff in England and the Continent would only be feasible if the cost was spread over the purchases of a large number of retail houses.

If, however, say five hundred retail houses formed a limited company, each house making a small investment ranging from say one hundred dollars for small stores and larger sums according to size for the larger firms, a thoroughly business-like company might be formed whose business it would be to give special facilities to its shareholders in buying and sending English and Continental goods to their orders, and for such purpose it would maintain a chief office in London, England, and agents in England and the principal buying centres of the Continent, together with packing and shipping arrangements at such centres as were required.

In such a case the members in Canada should control the company through its shares and profits to the shareholders should, I think, be on a double plan, namely, that the shares bear a fixed interest and that the rest of the profits be divided amongst the shareholders as a dividend on the business they have done during the year with the company, on a similar principle to the English Co-operative Societies, who declare a dividend on all purchases and thus give the greatest benefit to their largest customers and induce them for their own benefit to do all they can with them.

Of course business would be done with non-shareholders, but as the dividend on purchases would only go to those shareholders who held the required number of shares according to the size of their business, those shareholders who were qualified would get divided between them the profit made on the non-shareholders' purchases as well as their own.

With buying facilities such as those outlined and a travelling representative calling regularly on the shareholders and customers throughout the Dominion the retailers would get their goods imported at practically cost price (there being no jobber's profit, and the profits of the buying agency being returned to them in the form of dividends on shares and purchases), and their requirements be better looked after than at present.

Of course to handle cheaply the bills of exchange and other parts of the financial side, the company must be quite sound financially and command a moderately large capital, and have a fair number of retailers buying through its agencies, but given these two essentials there would be no risk in the venture and the benefits would be very great to the retailers who were shareholders of the firm.

I am myself a retailer, and know Canada, in fact have lived in Canada, so know the difficulties and advantages of different forms of buying both here and in Canada, hence you will notice that I do not deny the jobber his proper place, but do say that the retailer in his own interest would do well to handle some of his importing direct, if the proper co-operative means were first established, and I shall be glad to hear of any who think likewise.

Yours faithfully, H. M. Theedam, Ironmonger, Mansfield, England.

Catalogues and Booklets

THE VOKES HARDWARE CO., LTD.

The Vokes Hardware Co., Ltd., Toronto, Ont., have issued a new catalogue containing 140 pages, showing a full line of automobile accessories, including tools and tool sets, many special lines of wrenches, hand chain drills and electric portable drills. Many lines of stocks and dies and hand taps and holders are shown. There are also many descriptive cuts of different parts for cars, as well as accessories, and there is one section on colored stock devoted to Ford parts. A full line of repairs and attaching outfits are shown, as well as full list of electrical attachments and supplies. Auto headlights are illustrated, as well as a full line of flash-lights, tail-lights and spot-lights of all kinds.

Readers of Hardware and Metal wishing a copy of this catalogue may have one on request from the above firm.

Wm. Schollhorn Co.

Wm. Schollhorn Company, New Haven, Conn., have issued a very attractive booklet, containing 25 pages, illustrating and describing very fully their full line of pliers, showing the parallel jaw pliers, the slip-joint, the side-cutting, the Bernard pattern cutting nippers, bicycle and typewriter nippers, diagonal cutters, flatnose pliers, vise pliers, flatnosed light pattern, chain-nose, electrician's, longnose, many kinds of gas pliers, also round belt punches and revolving belt punches, also spring paper punch, card and ticket punches. End-cutting pliers are also shown. Readers of Hardware and Metal may have a copy of this booklet from the manufacturers on request.

Volume of Exports Gradually Climbs

Reduction of Debit Balance Shows in June Trade Report—Dominion Has Been Heavy Buyer of Iron and Steel Products

Montreal.—Detailed figures of the trade of Canada for the month of June, just made public by the Department of Customs at Ottawa, contain one feature of encouragement, inasmuch as the debit balance against the country is reduced by about $7,950,000 when compared with the debit of last May, made up of an increase of $29,195,257 in exports and an increase of $21,244,445 in imports, a total increase in the month of $50,439,702.

During the year a favorable balance of $12,000,000 in June, 1919, has been changed to a debit balance of $28,000,000 last June.

A glance at the detailed figures following shows how the debit balance has been made. Apparently Canada has been a heavy buyer from the outside of textiles, textile products and fibres, of iron and steel and manufactures thereof, and of non-metallic minerals, of which undoubtedly coal forms the principal part,, while in a minor degree the adverse balance has been caused by the excess of buying of vegetables and agricultural products not classed as foods, of chemicals and other articles not classified.

On the other hand, the exportations of agricultural products of animal and animal products, and of wood, paper and paper manufactures showed remarkable increases over the importation of these commodities.

Despite Canada's great mineral resources and her facilities the importations of iron, steel and coal and manufacturers thereof, continue to stand out of all proportion to the exports, iron and steel imports amounting to over $26,000,000, against exports of $9,000,000.

Among the exports to show an increase over May were iron and steel, etc., up about $3,000,000; wood and paper, etc., up about $9,000,000.

Since June a year ago the importations of commodities into Canada have increased by 59½ millions and the exports by 19 millions.

Among the exports iron and steel and manufactures thereof have increased in the export by nearly $3,000,000 and in the import by over $11,000,000. Exports of wood, paper and paper products have increased $17,000,000, and imports of like commodities have increased $2,300,000.

Coal Outlook Causes Anxiety

The coal shortage has been gradually taking on a new and serious aspect as affecting Montreal manufacturers. Close proximity of Montreal to the United States coal fields has made it possible, generally speaking, to take care of the needs of manufacturers and other large users of this fuel. Shortage has become more acute, apparently, than for a long time past, and some of the larger users are now wondering just how long they can continue to operate without closing down.

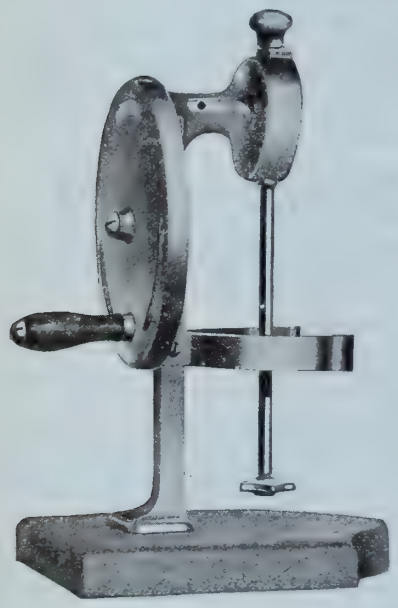
One of the serious aspects of this feature is that production of some manufactured products has not overtaken demand and there is little surplus stock from which to draw. This situation is a disconcerting one for those who are dependent upon manufactured products from week to week and from month to month.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

BEVERAGE MIXER

The Qwik-Mix Company, New York, has put on the market what they call the "Handy Mixer." This is designed for preparing malted milk, coffee beverages, chocolate or coffee float, egg-nogg,



Beverage Mixer

or egg malted milk, churning butter, icings of all kinds, emulsions, etc.

The manufacturers claim that all delicious nourishing, and healthful drinks can be prepared easily, quickly and perfectly with the Handy Mixer. They state that its cost, compared to its advantages and convenience, is small. It is claimed to be an ideal household appliance on account of its sanitary, light, portable and economical construction. The mixer is of neat appearance and is claimed to be perfectly constructed and simple in operation. It is also guaranteed to be rust-proof and that when in operation it will prepare drinks, etc., in less than a minute.

This mixer is being placed on the Canadian market by Richardson & Bureau, 55 St. Francois Xavier Street, Montreal, who are sole representatives for Canada.

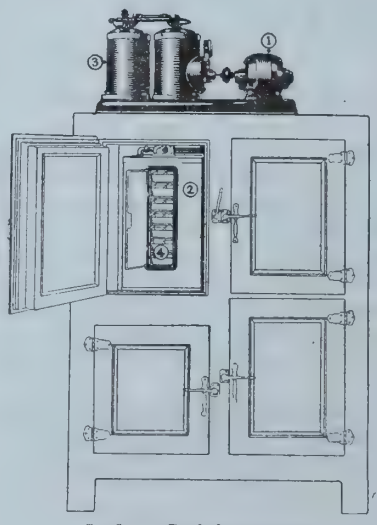
ICELESS REFRIGERATION

A new iceless refrigeration equipment is being offered the trade by the Toronto Laundry Machine Co., Ltd., Toronto, who claim that their new machine will fit any ice box and the motor may be installed either on top of the ice box itself or in any convenient place and attached to electric and water systems. And that after the first switching on of the current the equipment will maintain the exact desired low temperature automatically, day and night.

The manufacturers describe their new device as follows:

The refrigerant in the open air is a gas—harmless and unchanging. When cooled under moderate pressure it becomes a liquid and, as such, is supplied to the expansion coil in the ice chamber of the refrigerator. In the expansion coil the refrigerant expands into a gaseous form and in expanding extracts the heat from the refrigerator. When it has absorbed its quota of heat the pump removes it from the expansion coil and delivers it to the water-cooled condenser. Here the water absorbs the heat units removed from the refrigerator and the cooled gas again becomes a liquid and is ready to start on another journey through the machine. And this simple process is repeated continuously and automatically just as long as the current is on.

The moment that the exact, predetermined degree of refrigeration is reached, "click" goes the thermostat, shutting off the motor. And the moment the inside temperature rises a few degrees, "click" it goes again, starting the motor and turning on the water and the "cold" at the same time.

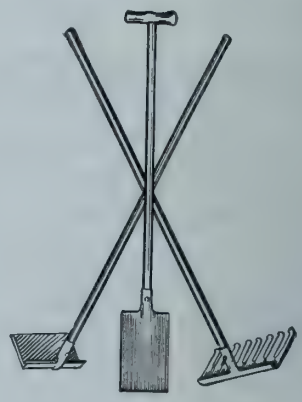


Iceless Refrigerator

CHILDREN'S GARDEN SETS

The Coleman Farebox Co., Ltd., Toronto, are offering the trade a new line of children's garden tools which they state are very strong and handsomely made, a heavy gauge steel being used. They come in two sizes, the small handle measuring ⅝ inch in diameter and the large ¾ inch.

The manufacturers state these sets are put up and sold in such a way that individual pieces or complete sets may be purchased by the customer; the large set being suitable for ladies' use in preference to a trowel or hand fork. They also state their sets are sufficiently



Children's Garden Sets

strong to enable them to be used in hot houses or other places where large tools would be too cumbersome and on account of their great strength will readily withstand the abuse they are usually subjected to by children.

BATTERY-CHARGING OUTFIT

Hobarth Brothers Company, Troy, Ohio, are putting on the market a new battery-charging outfit for which they make the following claims:

The H. B. 250-watt battery-charging outfit is a new device and the outfit is capable of charging from one to four automobile starting and lighting batteries at one time. This sturdy little outfit is much smaller than the Standard and has ball-bearing equipment, automatic voltage control, allowing different voltage batteries to be charged at the same time, ample capacity for the rating, and a complete panel board mounted on top of the motor generator.

It is specially designed for the owner of the small garage who wishes to give service only to customers and desires a dependable, continuous operating outfit. It enables the small garage to give the complete battery-charging service that customers demand, and its economy of operation enables the garage to make a big profit on a small investment.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A HEAVY budget of advances has again been made on the price of many hardware commodities. Few have hopes for a reversal of this condition in the near future, the tendency still being for higher prices. Washing machines and wringers have sharply advanced by a revision of the list prices. Coal tar, ash sifters, rifles and shotguns, grindstones, screw drivers, floor wax, wrought nipples and couplings, paint and varnish brushes, carpet sweepers, saw vises, rubber belting, toboggans, smokeless powder, axle grease, steel cable, chemical closets and chemicals, dash lanterns, power horse clippers and parts, Canada plates, galvanized and black sheets, paper bags, toilet paper, finished nuts and set screws, builders' hardware, copper clout nails, trolley barn door hangers, brass butts, clay picks, mattocks and grub hoes, cross bars, carpenters' bars, cotton wrapping twine and tub stands all have higher quotations.

Little relief has been offered the great scarcity of raw materials, great difficulty being experienced in securing freight cars. In many localities shippers are required to procure a permit for each car and are required to load the car the same day as received or else the car is passed to someone else on the waiting list.

Business is quiet, although jobbers are well satisfied with the volume accorded them for this season of the year, which is the in-between period. Summer lines are still moving well. Collections are very satisfactory.

MONTREAL MARKETS

MONTREAL, July 22.—The hardware jobbers are well pleased with the volume of city and country business accorded them, and for seasonable lines such as summer specialties and haying needs there is really a heavy and continued demand. The difficulties are those of obtaining fresh supplies and it is hard, generally, to substitute.

Advances have been made this week on dash lanterns, power horse clippers and parts, Canada plates, galvanized and black sheets. Wire nails are steady and scarce at the new high basis of $6.40 per keg. Some expect that coil chain will be advanced. It is very difficult to obtain delivery from the mills of many lines of steel manufactured products. Fuel oil is on a new high basis, and is very scarce. Lubricating and illuminating oils are scarce and high. Paper bags and toilet papers are up. Manila rope is firm and the manufacturers are confronted with higher prices for the raw material. The scrap material market lags, and prices may decline further. Stoves are firm but there have been no advances. Further data is to hand on washing machine and clothes wringer prices. Finished nuts and set-screw prices are higher. Alarm clocks are scarce and high. Altogether the price trend is firm to higher on many lines.

Canada Plates Scarce; On Higher Price Basis

Montreal.

CANADA PLATES.—The present scarcity of Canada plates is quite acute. It is doubtful whether supplies will be at all free during the next few months, and outside of orders which have been placed by the trade, it is questionable whether those wanting large quantities will be able to get them. The present basis for ordinary, 52 sheets, is $13.00 per box and for 60 sheets, $13.25.

Dash Lantern List Is $3.00 Higher

Montreal.

LANTERNS.—In addition to the advance made last week for cold blast lanterns, an advance of $3.00 per doz. has been made effective for various makes of dash lanterns. These were advanced during the past week from $15.75 to $18.75 per doz.

Power Horse Clippers Now on a $16.00 List

Montreal.

HORSE CLIPPERS.—Stewart horse clippers, No. 1, are now selling on a list of $16.00 each. This price is subject to a 25% discount to the trade.

EXTRA PARTS are selling as follows: Heads, $4.70; plates, No. 90, $1.35; No. 360, $1.35; No. 99, $2.00; No. 361, $2.00 These are likewise subject to a 25% discount.

Blocks Are Active With Undertone Firm

Montreal.

PULLEY BLOCKS.—There has been much activity in the demand for pulley blocks of various kinds, particularly those used in haying operations. The movement of both wood and steel blocks has been very active, and while no change of price has been made recently the market holds very firm.

New High Basis Now on Standard Wire Nails

Montreal.

NAILS.—The advance of 30c per keg made last week in the price of wire nails makes the present basis $6.40 per keg. Cut nails remain unchanged at $6.35 per keg.

The difficulty of getting ample stocks of nails is still manifest, and it is doubt-

ful if there will be much relief for many weeks to come. Labor and transportation difficulties have not been such as to minimize the difficulties which have existed.

Chain Movement Active With Prices Firming

Montreal.

CHAIN.—The undertone of the chain market is a very strong one, and as pointed out in a recent issue of Hardware and Metal, some jobbers are expecting an early advance in the price. Here, there has been an active demand for certain sizes, particularly for 3-16 in., which is used by some for haying extensively. In a general way the movement is an active one.

New High Basis Now on Fuel Oil

Montreal.

FUEL OIL.—The present basis for fuel oil in tank cars is $18.70 per gal. and in barrel lots $20.70.

The demand is extremely heavy and cannot be met out of the available supplies. One of the largest refiners stated to Hardware and Metal that they were not taking any new business whatever, but were confining their attention to the wants of old customers who had been using the product for manufacturing purposes. The tendencies are very firm and even higher prices may be reported.

Gasoline and Oil Sales Are Heavy

Montreal.

COAL OIL, GASOLINE.—The demands for coal oil for summer use is very heavy at the present time. Prices are decidedly firm, although there has been no definite change during the week. Ordinary grade is selling at 29c per gal. with various advances for other grades. Gasolines: The demand for gasolines is seasonably heavy, and supplies are heavily taxed. The basis is those with motor grade selling at 39½c per gal. and other grades carrying the usual differential.

Toilet Paper Prices Are Revised Upward

Montreal.

TOILET PAPER.—An advance has been made in the price of various grades of toilet papers and small lots, to the trade, are now selling at 33½% off the list. Standard lines are selling at a list price of $15.75 per case of 100 rolls.

Light Paper Bags Are Now Higher

Montreal.

PAPER BAGS.—An advance has been made in standard grocery paper bags. The present discount to the trade is 25% off. Only the one line is affected, the heavy kraft bags not being included in this increase.

Rope Basis Firm; Might Go Higher

Montreal.

ROPE AND CORDAGE.—The movement of rope is fair, and some repeat orders have been received. The haying season is now well under way, and supplies of hay rope have been going forward. In certain parts of the country the hay crop is not all that could be desired, but it is hoped that recent rains will somewhat better this condition.

As to the outlook, manufacturers state that jute may be scarce. Whether this is likely to transpire is as yet indefinite, but some reports indicate that within another 60 days there will be a shortage of this.

The feature of the week has been that of an advance of 1½ to 2c per pound in the cost, to the manufacturer, of manila hemp. If this firming of prices continues, it will naturally tend to call for an advance in the price on the manufactured product. Quotations for the week are ruling without change, pure manila selling at 35c base; British manila at 28c and sisal 22½c per lb.

Stoves Are Firm But No Advance

Montreal.

STOVES, WARES.—The movement of stoves is naturally quiet at this time, but there will be a big sale for them this fall. The undertone is very strong, but a leading Montreal manufacturer stated to Hardware and Metal this week that there was no immediate prospects of advances being made. The cost of raw material and the difficulty of getting it is still great, but this manufacturer said that as long as price advances could be held off they would be. There have been many orders booked for fall delivery on various styles and lines of wares.

WARES.—The demand for wares is seasonably light, although summer goods have been moving very well. Price tendencies are continuing strong, in view of the difficulty of getting various steel plates for the manufacture of this class of goods.

More Complete List Clothes Wringer Prices

Montreal.

CLOTHES WRINGERS.—Last week certain information was given in Hardware and Metal on clothes wringers indicating an advance in price. Since that time prices applying on "Arrow Brand" have come to hand and these are as follows: Melrose, per doz., $135; Warranty Bench, $174; Warranty, $127; Jupiter, $127; Security, $117; Oxford, $123; Bicycle Bench, $162; Bicycle, $105 (10-inch rolls); Bicycle, 11 in. rolls, $115; Venus, $115; Protector, $105; Niobe, $111; Conqueror, 17x3¼, $110; 20x3¼ in., $130; 24x3¼, $150; 30x3½, $155; Ajax, per doz., $225; Trojan, $201; Standard grade wringers are selling as follows: Eze, per doz., $110; Minerva, $110; Royal Canadian, $102; Rapid, $100; Neptune, $100; Apollo, $96.00; New Eureka, $87.00; Eureka, $79.00. Folding wash benches of this make are selling at $65.00 per doz.

List Is Issued on Wringer Rolls

Montreal.

WRINGER ROLLS.—The following list is now applicable for Standard grades clothes wringer rolls: Standard 10x1¾ in., per doz. $28.00; 11x1¾ in., $31.90; 12x1¾, $35.70; 10x1¾, $26.10; 11x1¾, $29.90; 12x1¾, $33.80; 10x1¾, $34.00; 11x1¾, $37.90; 12x1¾, $41.70.

Washing Machines on Revised "Up" Basis

Montreal.

WASHING MACHINES.—As announced last week in Hardware and Metal washing machines have advanced in price. At that time only some numbers and styles could be given and those made by Dowswell, Lees & Company, Limited, are selling as follows: Jubilee, each $12.50; Dowswell, $12.55; Peerless, $14.50; Hamilton, $14.00; Noiseless, $17.50; Snowball, $19.50; Magnet, $22.75; New Century, Style "A", $19.75; New Century, Style "B", $21.75; New Century, Junior, Style "B", $21.75; New Century, Junior, Style "C", $22.75; Patriot, $22.75; New Idea, Style "B", $24.25; New Idea, Style "C", $25.25; High Grade, $27.50.

Power machines are selling as follows: Ideal Water Power, $28.00; Zelox, $30.00; Ideal Motors only, $15.00; Zelox, motors only, $17.00; Ideal, motors only, $19.00; Velox, motors only, $21.00.

Engine machine, Playtime, style "B", $27.00; Keystone, style "B", $55.00; New Century engine drive, $95.00.

Special Finished Nuts Take on Higher Discounts

Montreal.

NUTS.—Semi-finished nuts are selling on a revised discount basis, and this means an advance. Finished nuts up to one inch are selling at 17½% off the list and from 1 to 1½ in. the discount is 12½%. For ½ to 2 inch 10% is added to the list.

Cap and Set Screws Are Listed Higher

Montreal.

CAP SCREWS.—An advance has been recorded this week in the price of cap screws, which are now selling at 17½% off the list.

SET SCREWS.—The discount on set screws has also been changed, the present discount to the trade being 22½%.

Alarm Clocks Firm; Stock Stated Scarce

Montreal.

ALARM CLOCKS.—At the present time there is an acute shortage of various alarm clocks, according to jobbing circles. Prices have not advanced within recent weeks, but the undertone is naturally very firm.

Soft Scrap Market Not Much in Demand

Montreal.

OLD MATERIALS.—The movement of old material this week is limited. While manufacturers in the United States are buying large quantities of old scrap, the same condition does not prevail in Canada according to large dealers. This means that manufacturers who use large quantities of this old scrap either have ample in hand for present operations, or for other reasons are not in the market. Consequently the undertone is weak and further declines may result.

Fairly Good Sale For Manufactured Lead

Montreal.

LEAD PRODUCTS.—Prices are steady at the changes made last week and quite a demand obtains for the various lines used in the trade. Sheet lead, lead pipe and fittings are in fair request and solder is selling quite well. This, at the lower prices quoted last week, is now in a much more favorable basis than it has been for some time.

Black Sheets Scarce; Basis Will be Nominal

Montreal.

SHEETS AND PLATES.—There is very little encouragement in the matter of obtaining necessary supplies of galvanized or black sheets. If there is any difference, this favors galvanized sheets, for black stock is very hard to procure. Advice secured by Hardware and Metal would indicate that there is very little encouragement to be looked for in the immediate future and the price basis will naturally hold as a nominal one. Some have firmed their prices this week.

BLACK SHEETS—

18 and 20 gauge	11 35	11 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Firm on the New Basis

Montreal.

IRON AND STEEL.—Prices as advanced last week are holding very firm. The advance of 30 cents per 100 lbs. has made a material advance all around and the new prices now in effect are record ones. There is a fairly active demand for the various staple stock.

IRON AND STEEL

Iron finish machinery steel		5 35
Norway iron	13 50	15 00
Single reeled machinery steel		6 80
Spring steel		5 80
Sleigh shoe steel		5 30
Tire steel		5 50
Toe calk steel, per 100 lbs.		6 20
Band steel		5 30
Harrow tooth steel		5 45
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Bar iron, base		4 95
Refined iron, per 100 lbs.		5 95
Mild steel		5 30

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

More Settled Tone Rules on Ingot List

Montreal.

INGOT METALS.—The tone of the ingot market is better this week, that is to say there is a fair amount of trading and the wild over-night changes which characterized some of the items for a few weeks are now absent.

TIN.—The tone of the market is better this week and there is a fair amount of trading. The exchange situation has helped somewhat during the past few days and quotations are maintained at 58 to 60 cents per lb.

COPPER.—The copper market has stiffened this week and casting is now quoted at 24c per lb. and electrolytic at 24½c. The demand is active and it is difficult to procure copper from the States. Canadian production is said to be very limited.

LEAD.—This is fairly strong this week and Canada is at present getting her supply largely from English sources. The Canadian production is very short. Price is quoted at 10¼c per lb.

SPELTER.—At 11c per lb. the market is a little stronger this week and sales are seasonably fair.

ANTIMONY.—This ingot is rather quiet in the Montreal market at present and the price of 11c per lb. is being quoted.

ALUMINUM.—There is no change in the basis for aluminum, which holds locally at a price of 37 to 39 cents per lb.

TORONTO MARKETS

TORONTO, July 22.—Higher prices continue to be made on many basic hardware commodities and the tendency is for still higher quotations. A sharp advance has been made on the list price of washing machines and wringers. Coal tar is also higher. A new booking price has been made on Banner ash sifters. Apple parers are in good demand. Rifles and shotguns have also been marked up. Grindstones both mounted and unmounted have been increased in price. Paint brushes are holding very firm. A good demand is still being made for garden hose, hay forks, field hoes, wire nails and wire.

The great shortage of raw materials and nearly all kinds of hardware commodities is showing little relief and many are concerned for deliveries for the near future. Many lines for fall booking are now going out to dealers and all in the trade are looking for a heavy buying movement.

Collections continue good and, although business has slowed down considerable. merchants generally are well satisfied with the volume moving.

New Quotations Steady for Cold Blast Lanterns

Toronto.

COLD BLAST LANTERNS.—The demand for lanterns has been a very heavy one and manufacturers state it is daily increasing. Dealers generally are beginning to call for their booked orders and manufacturers state there is a very

universal demand. The price of $15 per dozen, as quoted in last week's issue, remains very firm. It is interesting to note that, notwithstanding the advances made in many other lines of pieced wares, lanterns have practically remained steady for a period of about three years. Manufacturers state that this is the first advance they have made during that period.

New Higher List Prices Advance Wringers

Toronto.

WRINGERS.—An advance of from $5 to $8 has been made on wringers. The Royal Canadian now costs the dealer $102 per dozen. The Eze, $110 per dozen; the Bicycle, $115 per dozen; the Warranty, $127 per dozen, and the Jupiter, $127 per dozen. All of the above are subject to a discount of 20 per cent.

Washing Machines Have Higher Revised Lists

Toronto.

WASHING MACHINES.—A new list has again been issued by makers of washing machines. These new quotations are higher than formerly as a result of the tight situation which has developed in the securing of lumber. The new prices are as per current quotation pages.

Lower Prices Made on Everjet Black Enamel

Toronto.

BLACK ENAMEL of the Everjet brand has been revised downwards. The new quotations now read: 8 ounce, two dozen to a crate, $1.95 per dozen; 8 ounce, 12 dozen to a crate, $1.70 per dozen.

Refined Coal Tar Now Costs Dealer $9.50

Toronto.

COAL TAR.—New and higher prices have been made on coal tar. The refined in barrel lots is now quoted at $9.50, and the crude, $8.25.

New Booking Price on Banner Ash Sifters $3.45

Toronto.

ASH SIFTERS.—Orders are beginning to come forward freely for ash sifters of many kinds for fall delivery, and many booked orders are being taken.

A new booking price has been made on the Banner, No. 2, the price now being quoted at $3.45 each, net.

Apple Parers in Demand; Hudson Make Quoted $21

Toronto.

APPLE PARERS.—The season now demands many lines of seeders, stoners and apple parers, etc., and many of these lines are showing good movement.

The Hudson genuine rocking-table parer is moving well, and is quoted at a new price of $21 per dozen.

Crackshot Rifles Now Cost Dealers $11.30 Each

Toronto.

STEVENS' RIFLES. — Further revisions have again been made on the price of Stevens' rifles, the new quotations showing an advance over former quotations.

The Crack Shot now has a new higher price of $11.30 each; the Little Scout, $8.95 each, while the Marksman is quoted at $14.35 each.

Grindstones Have Been Marked Higher

Toronto.

GRINDSTONES.—New prices have been made on some lines of grindstones, and the new quotations are an advance over former prices.

Grindstones from 40 pounds up to 200 pounds are now quoted at $5 per 100 lbs. The 12-inch by 2-inch are quoted at $1 each. The Bi-Treadle is quoted at $9.75 each.

No Change Made on Rope; Price Steady

Toronto.

ROPE.—The present quotations on rope are fairly steady, and while no lower prices are immediately looked for, many would not be surprised to hear of further changes in the near future. However, whether this will be the case remains to be seen as there are a great many factors bearing on the situation. The pure manila is still being quoted at 35½ cents per pound, the British manila 28 cents, and the sisal 22½ cents per pound.

Wire Nails Firm; New Price of $6.25 Base Holds

Toronto.

NAILS.—Stocks of nails generally are light and the demand continues to be a heavy one. Building operations continue brisk. Jobbers are greatly concerned for future deliveries. The scarcity of wire nails is said to be universal and some have it that merchants across the border are experiencing much more difficulty in securing their supplies than pertains on this side.

The new quotations made last week continue to hold very firm, and there are some who would still pay a premium for spot delivery of their specifications. The price of $6.25 per keg base is still being quoted.

Higher Prices May be Made on Brushes

Toronto.

BRUSHES. — Notwithstanding the higher prices that have been made on brushes, it is expected that new prices will be made in the very near future and some believe that it will be of a substantial nature. One of the chief reasons is the bristle situation, and manufacturers state that bristles are daily becoming harder to procure.

Garden Hose Still Has Good Demand

Toronto.

GARDEN HOSE.—A good demand is current for garden hose of all kinds, and all in the trade are enjoying a very good business. Manufacturers, however, state that hose is becoming very scarce and that they have great difficulty in keeping pace with the present demand. The following are the present quotations:

Garden Hose—½ x 3, 14½c per foot; ¾ x 3 19c; ½ x 4, 16c; ¾ x 4, 21c.
Corrugated—½, 23c per foot; ⅝, 26c; ¾, 29c

Still a Scarcity for Oiled and Annealed Wire

Toronto.

WIRE.—Oiled and annealed wire continue to be a very scarce commodity, and jobbers state they have great difficulty in securing sufficient to supply the heavy demands that are being made on them. This is also practically true of all kinds of wire.

Hay Forks, Field Hoes Have Brisk Demand

Toronto.

HARVEST TOOLS.—Present indications point to a very satisfactory crop and many are getting ready for the harvest. Sales of harvest tools have been very satisfactory and hay and grain forks are at present in great demand. Field hoes are also moving briskly, and there is also a very heavy demand for handles for each. The present quotation on harvest tools is firm and no change has recently been made in the price, fifty per cent. and ten per cent. still being the discount from the list.

Shortage of Material Affects Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—Manufacturers state that the tight situation which has developed in the delivery of flat sheets is still holding them up in production, and while it is true that they have been fortunate to secure several shipments of sheets for corrugation purposes, they state that any that have come to hand are in such small quantities that it will hardly affect the situation.

One of the main drawbacks at present seems to be the great shortage of freight cars and the demanding of all box cars for grain and all open cars for coal make it very difficult for shippers to secure enough bottoms to carry their products from the mill to its destination. It is also stated that in some parts that it is necessary for the shipper to secure permit for each car, and that he is compelled to fill the car and have it shipped within the day of the permit or else the permit is cancelled and the car allowed to go to some other shipper who would

be able to handle the loading within the time limits. Owing to the great difficulty in securing supplies as well as the premiums that have to be paid in order to secure immediate delivery many are charging premiums, although the prices shown herewith are generally believed to be booking or standard prices.

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Waste Materials Quiet; Price Tendency Down

Toronto.

WASTE MATERIALS.—A very quiet buying movement is being experienced by dealers in waste materials and little improvement has been made on the movement of materials, the present market is very sluggish. Dealers are looking for lower prices and have little hopes for the situation to recover in the near future. Transportation difficulties are given as one of the factors, although the exchange situation is also an important factor. The fact that it is a stagnant market does not augur well for prospective buyers, and many are holding back and are only buying their actual need, and very few seem to be interested in the future purchases.

The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06
Heavy copper	0 17
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Tea lead	0 03

Iron and Steel Bars Firm; Shortage of Some Sizes

Toronto.

IRON AND STEEL BARS.—The demand for iron and steel bars has been considerably quieter during the past few days, but this condition is said to be seasonable and partly attributed to the holidaying season. Many of the mills are getting back into their regular start and production is gradually increasing. The shortage of coal, which was the result of the recent tie-up, has not altogether been overcome, it is stated, and manufacturers state they still have great difficulty in securing their supplies. Stocks of bars are generally conceded to be heavy, although most jobbers find their stocks are not well assorted and that while their tonnage runs into heavy volumes their assortment is not complete, owing to scarcity of some few kinds which are hard to replace. Such is true of agricultural flats, and many are anxiously waiting the next run at the mills for this commodity in order to fill up their depleted stocks.

The following are the present quotations on iron and steel bars:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 75
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Lead and Zinc Products Quiet; Prices Steady

Toronto.

LEAD AND ZINC PRODUCTS. — Practically no change has been made in the price of lead and zinc products this week and trade is rather quiet. This is said to be a seasonable situation and is partly attributed to the holidaying season.

The present quotations are quite steady and firm. Lead pipe is still being quoted at 17c per lb., and a lead waste pipe is still quoted at 18c per lb. Lead traps and bends are unchanged and remain at an additional 30 per cent. to the list.

The following is the list of quotations:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Famine in Sheets and Plates Still Prevails

Toronto.

SHEETS AND PLATES.—The great shortage of sheets and plates continues to inconvenience manufacturers, jobbers and all concerned and reports that are going at present are very pessimistic for future supplies and deliveries.

Nearly all those in close connection with this commodity are of the opinion it is unnecessary for the manufacturers at the present time. One of the main factors given for the great scarcity that is at present prevailing is the great scarcity of shipping facilities, and freight cars of all kinds are at a premium, as nearly all open cars are used for coal and nearly all box cars are being used for grain. In many localities it is necessary for the manufacturers and all those waiting to ship goods to secure a permit for each car, and each permit is only good for one day, and should the shipper fail to make shipment within the specified day, his permit is cancelled and the car goes to someone else.

The following quotations on sheets and plates are published here merely as a guide, and while these prices are recognized as standard, many are charging premiums on account of having to go into the local markets, or are required to pay premiums from the mill for any spot deliveries they may receive.

The following is the list of prices:

BLACK SHEETS

14 gauge	$8 95
16 gauge	9 00
18-20 gauge	9 45
22-24 gauge	9 50
26 gauge	9 55
28 gauge	9 65
3-16 inch plate	9 75
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$12 50	$12 00	$13 25
U.S. 28	11 45	12 70	11 45	12 85
U.S. 26	11 15	12 40	11 15	12 55
22 and 24	11 00	12 25	11 00	12 40
18 and 20	10 70	11 95	10 70	12 10
16	10 70	11 95	10 70	12 10
12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Boiler Tubes Scarce Owing to Car Shortage

Toronto.

BOILER TUBES.—There is still said to be a scarcity of some sizes of boiler tubes, although fair shipments are still being sold. The shipments that are coming forward are very unsatisfactory with regard to quantity, which is due to the shortage of cars at the mills. This shortage is also attributed to the scarcity of skelp, partly due to the shortage of raw material and transportation, although the excessive demand is not to be overlooked. Those closely connected with the situation state that great volumes of pipe and incidentally skelp are being used this year for extension and research work, and which naturally affects the supplies.

The following quotations, although the recognized standard prices, may vary somewhat with some of the prices being charged owing to the shortage of some of the best selling sizes, as it is often necessary for jobbers to go into the local market and buy small lots.

BOILER TUBES—	Seamless	Lapweld
1 inch	$23 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	88 00	64 00

Steady Prices Hold on Various Ingot Metals

Toronto.

INGOT METALS.—Little change has been made on prices of ingot metals this week, although the quotations throughout the list are firm and a fair demand has been made for some metals.

LEAD is steady, although the price is unchanged and is still quoted at 10½ cents per pound.

SPELTER.—The quotations on spelter show no change. The demand is fair. The present price is quoted at 10¾ cents per pound.

TIN has shown considerable strength, although no higher quotations have been made, the price remaining at 63 cents per pound.

ANTIMONY has showed considerably more strength and the demand is somewhat heavier. The quotation remains unchanged, prices being from 12½ cents to 15½ cents per pound.

COPPER.—Quotation on copper shows little change, although the situation is somewhat stronger. The price remains at 24 cents per pound.

ALUMINUM.—Practically no change has been shown on aluminum, the price remaining at 37 cents per pound.

LONDON MARKETS

LONDON, July 22.—There seems little possibility for lower prices in the near future, the tendency being for still higher quotations. This week records a heavy budget of advances, washing machines having been revised upwards through a higher list. This also applies to wringers, grub hoes, clay picks, crow bars, mattocks, builders' hardware, lanterns, copper clout nails, rubber belting, Richards-Wilcox trolley barn door hangers, narrow and middle brass butts, goose neck carpenter bars, cotton wrapping twine, tub stands.

The sale of summer goods is easing off and merchants are beginning to take in shipments of fall goods and are preparing for fall trade, which is being looked forward to with great optimism. However, notwithstanding the slight slowing down of business the demand continues seasonably good, although it is believed great numbers of salesmen and clerks are holidaying. Prices continue firm on most lines. Collections are still coming forward very promptly.

Cotton Wrapping Twine Marked Up to $1 Per Lb.

London, Ont.

WRAPPING TWINE.—Cotton wrapping twine has again been revised upwards. The 3-ply will now cost dealers $1 per pound, while the 4-ply is quoted at $1.04 per pound.

Crow Bars Now Quoted at $11.50 Per 100 Lbs.

London, Ont.

CROW BARS have new higher quotations, the new price being quoted at $11.50 per 100 pounds.

CARPENTER BARS also have been revised upwards, ¾-inch by 24 inch now selling for $7.25 doz. to the dealer.

Lower Prices on Sheep Shears, Horse Clippers

London, Ont.

CLIPPERS AND SHEARS.—A lower quotation is now being made on Stewart's horse clippers and sheep shears. Manufacturers state they are enabled to make this favorable change on account of locating a Canadian branch factory. The new quotation is list less a discount of 25%.

The net prices on some of the better known lines are as follows:

Stewart Horse Clipper, No. 1BB, $12 each; Sheep Shearer and Horse Clipper, combination, No. 8, $23.25 each; Sheep Shearer, No. 8, $15.75 each; Sheep Shearer, No. 9BB, $18 each; Sheep Shearing Attachment, $11.06 each; Top Plates for Horse Clipper, $1.01 each; Bottom Plates for Horse Clipper, $1.50 each.

Higher Prices Made on Clay Picks, Mattocks, etc.

London, Ont.

PICKS AND MATTOCKS.—Higher quotations have been made on pick and edge mattocks, clay picks and grub hoes, etc. The edge and pick mattocks are now priced at $14.50 per dozen, the grub hoes $12 per dozen, while clay picks have the following new quotations: 5-6 pounds $12.50 doz., 6-7 pounds $13.50 doz., 7-8 pounds $14.50 doz.

List Plus 50% New Price on Narrow Brass Butts

London, Ont.

BRASS BUTTS.—Further higher price revisions have been made on some styles of brass butts. The narrow and middle brass butts have a new price of list plus 50%.

Trolley Barn Door Hangers Have Advanced

London, Ont.

BARN DOOR HANGERS.—An advance has been made on the price of barn door hangers and the Richards-Wilcox trolley barn door hanger now costs the dealer $23.04 per doz. for the number 321 and $21.60 per doz. for the number 21. The track for the above is quoted at $25.20 per 100 feet.

Rubber Belting Advances; New Discount 35% Off

London, Ont.

RUBBER BELTING.—An advance has been made on rubber belting prices, a discount of 35% from the list being the new quotation.

Copper Clout Nails Now Cost $10.40 Keg

London, Ont.

CLOUT NAILS.—New and higher quotations have been made on copper clout nails, the new price being advanced to $10.40 per 100 lbs.

Cold Blast Lanterns Advance $2.50 Per Doz.

London, Ont.

LANTERNS.—A sharp advance has been made on cold blast lanterns amounting to an increase of about $2.50 per doz. The new price is now quoted at $15 per doz. for both the long and short patterns.

Some Locks Marked Up From 5% to 7½%

London, Ont.

BUILDERS' HARDWARE.—An advance of from 5% to 7½% has been made on some lines of locks and the present quotations on all kindred lines are very firm.

Builders' hardware is in good demand and those that are able to secure sufficient stock are doing a brisk business. The shortage of supplies throughout this line has greatly inconvenienced many, although it is believed that notwithstanding the variety of drawbacks that merchants generally have had a good turnover for this line.

Folding Wash Benches Have New List $65 Doz.

London, Ont.

TUB STANDS.—A new list price of $65.00 per dozen has been made on tub stands and folding wash benches of the Dowswell make. This is subject to a discount of 20%.

Window Glass Moving Briskly; Price Firm

London, Ont.

GLASS.—There seems to be a good buying movement for glass considering the season of the year. This is attributed to the great shortage which has been felt throughout the trade and may be partly due to the filling and shipping of back orders, which have recently been moving more freely as a result of recent favorable shipments of glass from the makers.

The price continues firm and unchanged, the single and double diamond still being quoted at a discount of 15% off the list, while the cut lights are quoted at a discount of 40% off the list.

Higher List Prices Advance Wringers

London, Ont.

WRINGERS.—A sharp advance has been made on the price of wringers which will approximate an increase of from $5 to $8 per dozen. The discount of 20% off the list remains unchanged, the revision being made by advancing the list.

	Doz. List.
Royal Canadian, plain bearing	$102.00
Eze, ball bearing	110 00
Bicycle, ball bearing	115 00
Warranty, ball bearing	127 00
Jupiter, ball bearing	127 00

Above list subject to discount of 20%.

Higher Lists Made on Washing Machines

London, Ont.

WASHING MACHINES.—Owing to the unfavorable situation which has prevailed in the lumber industries washing machines have again been revised upwards by an advance having been made on the list prices.

Some of the new list prices which are subject to a discount of 20% are as follows:

Jubilee, $12.50 each; Dowswell, $12.75; Hamilton, $14; Noiseless, $17.50; New Century A, $19.75; New Century B, $21.75; New Century Junior B, $21.75; Patriot, $23.75; Ideal Water Power, $28; Velox Water Power, $30; Seafoam, engine driven, $55; Seafoam, electric, $120; New Century, electric, $160 each. Above list subject to 20% discount.

Solid Sash Weights Quoted $4.90 100 Lbs.

London, Ont.

SASH WEIGHTS.—The demand continues to be a very heavy one for all kinds of sash balances and the solid and sectional sash weights are in steady demand. This is no doubt a result of the large amount of building which is being carried out this year. The quotation at present current on the solid sash weights, 3 pounds and over, is $4.90 per 100 pounds, while the sectional 1 pound sash weights are quoted at $5.60 per 100 pounds and the ½ pound sections at $6.20 per 100 pounds.

New Quotation on Wire Nails Hold Firm

London, Ont.

WIRE NAILS.—A big demand continues for wire and cut nails and good volumes are moving, although jobbers state their stocks are becoming very light, and are very much concerned for the future, as there seems uncertainty regarding future deliveries. It is believed that the mills are unable to handle the business being offered at present and are booked considerably ahead. However, it is hoped that this situation will adjust itself in the near future. The present quotation on wire nails is $6.25 base and the cut nail quotation is $7.50 base.

Rope Prices Show No Change; Quiet

London, Ont.

ROPE.—A fair amount of business is being handled throughout the trade on rope, although the situation is somewhat quiet. Prices remain very steady and no change is immediately expected. The quotation on manila is 35½ cents per pound, while the sisal is quoted at 22½ cents per pound, and the Beaver manila and New Zealand hemp is quoted at 28 cents per pound base.

Putty Prices Firm Due to Whiting Shortage

London, Ont.

PUTTY.—Prices remain unchanged although the present quotations are very firm. The scarcity of whiting has shown little relief, and manufacturers state they have difficulty in securing supplies. This is attributed to the unsatisfactory condition of the English market, which has been greatly disrupted, due to the recent war activities, and English producers claim they have difficulty in securing sufficient labor at the chalk quarries to handle the heavy demand which is pouring in from all sources. The increased cost of producing whiting from other sources, as well as the difficulty of keeping production up to the requirements of the demand, is also a factor in this market and high, firm prices for putty is the result. The following are the quotations:

PUTTY—	Per 100 lbs.
Standard, 100-lb. drums	8 30
Do., 25-lb. drums	8 55

Prices on White Lead in Oil Remain Steady

London, Ont.

WHITE LEAD IN OIL.—A good buying movement continues for white lead in oil and the present demand is still very satisfactory to all in the trade, it is stated. The present quotations are very firm, although no change has been made in the price. The pure in ton lots continues to be quoted at $20.45 per hundred lbs. and less than ton lots $20.80 per hundred lbs. The Elephant brand in ton lots is quoted at $20.95, and in less than ton lots $21.30 per hundred lbs.

Turpentine Prices Have Sharp Decline of 15c Gal.

London, Ont.

TURPENTINE.—A sharp decline has again been made on the price of turpentine, the quotation being 15 cents per gallon lower. A good sale for turpentine is prevailing notwithstanding the seasonable quiet period which is at present noted throughout the trade.

The shortage of cars is causing some concern amongst the jobbers, although some are still able to procure tank cars. Stocks locally have shown considerable improvement as far as the shortage is concerned, although stocks are as yet none too heavy.

The following are the new quotations:

1 bbl. lots, gal.	2 65
2 to 4 barrel lots, gal.	2 64
5 gal. lots, gal.	2 80

Linseed Oil Declines 3c Gal.; Tendency Down

London, Ont.

LINSEED OIL.—Further improvements have again been made on the linseed oil situation and a decline of 3 cents per gallon has been made this week. Crushers seem to be able to secure better supplies of seed, although the present condition of railway transportation is not promising for large shipments, especially in the immediate future.

The new lower quotations are shown below:

	Raw	Boiled
1 to 2 barrels, gal.	2 27	2 30
3 to 5 barrels, gal.	2 26	2 29
6 to 9 barrels, gal.	2 24	2 27

Less barrels add 15c gal.

WINNIPEG MARKETS

WINNIPEG, July 22.—A heavy budget of advances has been made on many important hardware commodities this week, and the tendency in most cases is for still higher prices. Screw drivers and floor waxes are higher, also wrought iron nipples and couplings, paint and varnish brushes, soil pipe and soil pipe fittings, carpet sweepers, gauge glasses, saw vises, rubber belting, toboggans, smokeless powder, axle grease, crucible steel, wire rope, chemical closets and chemicals, cabinet hardware and drawer locks.

Business, although seasonably quiet, is brisk for this period in comparison with former years. Crops are looking very promising and all in the trade are optimistic for a heavy fall buying movement. Collections are fairly good.

Perfect Handle Screw Drivers Advance 10%

Winnipeg.

SCREW DRIVERS. — The large amount of building being carried on is responsible for a heavy demand for many lines of tools, and higher prices have been made from time to time on various lines, due to scarcity of supplies,

materials, etc. This week records an advance on perfect-handle screw drivers of about 10 per cent. The following are some of the new quotations:

Screw Drivers—4 inch, $4.85 per doz.; 5 inch, $5.70; 6 inch, $6.85; 8 inch, $9.10; 9½ inch, $11.40.

Floor Wax Prices Revised Upwards

Winnipeg.

FLOOR WAX—New and higher prices have been made on floor wax of some makes. The Johnson make is now priced as follows: Household, 42 cents; auto size, 42 cents; pints, 80 cents; quarts, $1.60; 1-2 gallons, $2.70; gallons, $5.70.

Wrought Iron Nipples Now Cost More

Winnipeg.

WROUGHT IRON NIPPLES. — Following recent advances on the price of pipe, nipples have been revised upwards. The 4 inch and smaller is now quoted at a discount of 45 per cent., while the 4½ and larger are quoted at a discount of 32½ per cent.

Wrought Iron Couplings Have Advanced 10%

Winnipeg.

WROUGHT IRON COUPLINGS. — Scarcity of raw materials, as well as the recent developments which have taken place regarding freight deliveries, have been responsible for a further advance on the price of wrought iron couplings, it is stated. The new quotations are as follows: Up to 4 inches, 10 per cent. discount; 4½, 5 and 6 inch, 10 per cent. added to the list.

Higher Prices Made on Paint and Varnish Brushes

Winnipeg.

PAINT AND VARNISH BRUSHES. —The strong prices as mentioned in last week's issue have developed into a higher revision of price and many lines of paint and varnish brushes are affected. The tendency is still for higher prices and manufacturers seem to be tardy regarding the acceptance of booked orders for spring delivery.

Assortments of Varnish Brushes Advance 25%

Winnipeg.

BRUSHES.—Higher prices have been made on some lines of varnish brushes, the new quotations being an advance of 25 per cent. over former prices. Varnish brush assortments containing brushes to retail at from 5 to 25 cents are now quoted at $8.75 per dozen.

Soil Pipe Fittings Revised Upwards

Winnipeg.

SOIL PIPE FITTINGS. — Higher prices have been made on soil pipe by a lower revised discount. The trade are now required to pay the following prices: 2 and 3 inch, 15 per cent. discount off the list; 4 inch, 20 per cent. discount; 5 and 6 inch, 15 per cent. discount, and and advance on the list for 8 inch of 10 per cent.

Cast Iron Soil Pipe Prices Are Higher

Winnipeg.

CAST SOIL PIPE.—New quotations have also been made on soil pipe. The cast iron 5 and 6 inch has advanced 5 per cent. The following quotations are en effect: 2 and 3 inch, add 5 per cent. to the list; 4 inch, 7½ per cent. discount from the list; 5 and 6 inch, add 5 per cent. to the list; 8 inch add 10 per cent. to the list.

Grand Rapids Sweepers Now Cost $57.50 Per Doz.

Winnipeg.

CARPET SWEEPERS. — A higher price has been made on some lines of carpet sweepers. The new quotation on the Grand Rapids make is $57.50 per dozen.

Shipments of English Gauge Glasses Arrive

Winnipeg.

GAUGE GLASSES.—There has been some difficulty in securing sufficient supplies of gauge glasses. This situation has been at least partly overcome by fair deliveries of English manufacture. The quotation on these new arrivals is 70 per cent. off the list, being an advance of about 15 per cent.

No. 77 Saw Vises Now Cost $30 Per Doz.

Winnipeg.

SAW VICES.—Newer and higher quotations have been made on some lines of saw vices. The number 77 is now quoted at $30 per dozen, being an advance of approximately 10 per cent. over previous quotations.

Rubber Belting Now Quoted at 36% Off List

Winnipeg.

RUBBER BELTING.—New and higher prices have been made on rubber belting. The Western and kindred lines are now priced at: 6 inch and under, 36 per cent. off the list.

Smokeless Shotgun Powder is Up 25%

Winnipeg.

SMOKELESS POWDER.—Nearly all lines of ammunition seem to be leaning toward higher prices; this is also true of smokeless powder, and higher prices have been made on some lines. The Dupont shotgun smokeless powder is now quoted at 80 cents per pound for one-pound tins.

Toboggan Prices Join March Upwards

Winnipeg.

TOBOGGANS. — Those preparing for the coming toboggan season will have to pay more for some lines of toboggans. The new prices are now quoted at:

Toboggans—3 foot, $3.00 each; 4 foot, $4.30; 5 foot, $5.00; 6 foot, $6.00; 7 foot, $9.30; 8 foot, $10.60.

Rifles and Shot Guns Have Further Increase

Winnipeg.

RIFLES AND GUNS.—As Hardware and Metal goes to press it is learned that an advance has been made on some lines of rifles and guns approximating an increase of from 5 to 10 per cent.

Buffalo Axle Grease Has Been Marked Up 25%

Winnipeg.

AXLE GREASE.—Axle grease has been selling in large quantities. There seems to be a good supply available, although prices are still soaring, due mainly to the higher cost of production, it is stated. Present day prices are as follows:

Axle Grease—1M, $1.92; 3M, $5.00; 5M, $8.00; 10M, $15.50; 25M, $42.00.

Crucible Steel Wire Rope is 10% Higher

Winnipeg.

WIRE ROPE has advanced 10 per cent., and in line with other commodities made from steel, is very hard to procure in large quantities. The demand for this line is not so great as more staple lines, however, although the volume moving out is seasonably heavy.

The new prices on crucible wire rope are as follows:

Crucible Wire Rope—⅜ inch, $12 per foot; 7-16 inch, $12.70; ½ inch, $14; ⅝ inch, $17.75; ¾ inch, $24; ⅞ inch, $31; 1 inch, $40.

Chemical Closets and Chemicals Are Advanced

Winnipeg.

CHEMICAL CLOSETS.—A 15 per cent. advance has been made on chemical closets and the Wakyte make have been advanced to the new quotations as shown below:

CHEMICALS have also been marked up, the powder now being quoted at 75 cents per package, and the liquid 75 cents per gallon.

Chemical Closets—No. 2, $9.50 each; No. 3, $8[illegible].25; No. 0, $5.25. Special, $7.25 each.

Drawer Locks, Cabinet Hardware, Etc., Higher

Winnipeg.

DRAWER LOCKS.—Cabinet hardware is in the budget of advanced prices and quotations on some lines of the Yale make have been slightly increased. Other lines of inside builders' hardware are also higher in price. The following are the quotations on some of the lines involved:

Drawer Locks—No. 951, $11.20 each; No. 953, $9.60; No. 963, $14.35; No. 965, $14.35.

Croquet Sets Have Good Seasonable Demand

Winnipeg.

CROQUET SETS.—Many are purchasing croquet sets this year and dealers seem well satisfied with the business being handled on this line. The following are some of the prices current:

No. 04, $2.35; No. 06, $3; No. 14, $3; No. 16, $3.50; No. 18, $4; No. 34, $4.20; No. 36, $5; No. 38, $6; No. 104, $5.30; No. 106, $6.30.

Raw Linseed Oil Now Quoted at $2.25 Per Gal.

Winnipeg.

LINSEED OIL.—The tendency for linseed oil prices is still downward, due, it is stated, to the more favorable condition of the flax market. To-day's prices are: Raw linseed oil, $2.23 per gallon, while the boiled is quoted at $2.26 per gallon.

PITTSBURGH MARKETS

PITTSBURGH, July 22.—The iron and steel markets are extremely quiet. Consumers are buying only what they absolutely must have, and that is not a great deal. As sellers are difficult to find when it is so hard to ship it does not require a great deal of demand to give the markets an appearance of strength.

Pig iron and steel producers continue to complain of railroad conditions and it really looks as though they felt the restriction in freight movement more than the consumers. A very awkward market situation is presented. Whether values will advance or decline is almost as uncertain a question as to which way the cat will jump. In pig iron it is almost impossible to buy prompt deliveries, while pig iron is piling up in furnace yards and buyers are consuming less, partly from not having as much business, partly from not getting the pig iron and partly from not getting coke or other supplies. In steel there is the situation of assured prompt deliveries still commanding premiums over deliveries in say two to four months, if the mills really succeed in making those deliveries, and such deliveries in turn being $10 or $20 a ton higher than the Steel Corporation prices, which are for delivery in rotation, the material to be shipped after present obligations to the customer are filled, whenever that may be. As the Independents have been catching up with their order books for months past while the Steel Corporation has been falling farther behind, on account of its heavy bookings, there is easily a possibility of advancing prices by independents on account of the much earlier deliveries they will be able to make, while just along the same line there is a possibility of their prices declining through their orders running out

Shipping Conditions

It is illustrative of the spirit of the times, which is one of criticism and complaint rather than one of enthusiasm and progress, that Service Order No 7 of the Interstate Commerce Commission, requiring that priority be given to coal cars for coal mines, seems to provoke nothing but criticism and complaint, when obviously the order is necessary and is calculated to provide the greatest good for the greatest number. The coal operators insist that it does not give them any more cars, or at any rate not many more, while the blast furnace and steel interests complain that it has taken nearly all their cars away from them. The newspaper reports put it in the form that closings of steel works are "threatened" on account of the car order, as if that would be a calamity, the circumstances being that the mill warehouses and yards are filled with steel, about 2,500,000 tons, while the northwest is threatened with freezing next winter.

There is little doubt but that in general the shipments of steel thus far this month have fallen behind those in the same period of last month. One large interest reports tonnage figures that indicate a decrease of 20 to 25 per cent. So large a decrease can hardly be typical, but it is illustrative of the general situation.

Improvement in railroad conditions is all for the future, it being certain that no definite improvement has yet begun. Executive officials of the railroads seem now to be alive to the situation. One of the most prominent has admitted very publicly that the officials have not been co-operating as they should. One may infer that the lack of co-operation is due in part to the government guarantee of earnings, which was extended for six months after the return of the roads to their owners, or to September 1. It is common talk in steel circles now that the guarantee has not worked out well and hopes are entertained that when the railroads have to make their money themselves they will do better. Practically no one doubts that if the railroads fail in the test it will be impossible to oppose government ownership and operation of the roads. Shippers are, of course, utterly opposed to that, and they wish they could be sure that the railroad officials are equally opposed. The problem is to get more efficiency out of the physical equipment now existing. Buying cars would not help, the difficulty now being that there are more cars than are being moved, and as to enlargement of yards and terminals, which seems absolutely necessary, that will require years of time. Daniel Willard, president of the Baltimore & Ohio and chairman of the executive committee set up July 1 by the railroad officials, says the best average freight car movement was in 1916, 26.9 miles a day (while of late of course the movement has been vastly less) when the roads ought to and probably can move cars 30 miles a day, that 32 per cent. of the movement is empty, when this proportion could be reduced, and that cars are loaded to only 70 per cent. of capacity, a proportion that must be increased. If the other railroad officials, and the shippers, will co-operate the traffic situation can be greatly improved.

Mill Closings

While much has been said of closing of mills there is no definite evidence that the production of steel has declined from the June rate, which was very good. The difference is in finished product, as finishing departments have been closed or have been running at reduced rates, semi-finished steel therefore accumulating. The idea is that the semi-finished steel can be piled more rapidly than the finished product, and that steel now finished to customers' specifications might prove quite unacceptable months hence when the material would be shipped. While this procedure has some objectionable features the influence upon labor is very satisfactory. The more steel that is piled the more the men value their jobs. When finishing departments are closed the mills always endeavor to arrange closings in rotation so that the men will not lose time for long periods. The labor situation is described as fairly satisfactory, but eminently satisfactory as compared with conditions in some other industries.

Pig Iron

Both Bessemer and basic pig iron have sold at $46, valley, or $1 advance, while foundry iron remains quotable at $45, valley. This, however, is almost a nominal quotation, as prompt deliveries only are inquired for and prompt deliveries are scarcely to be had. One large interest has made a few sales at $45 in the past few days, but states that the sales have been made to old customers only, inquiries from new sources being turned down flat. The question is which will come first, a buying movement or a selling movement. Some consumers of foundry iron covered only for the first half of this year but as deliveries were delayed, they still have iron due them enough to run into September, as an average period, and some of this iron is at $28.75, valley, so that it would be quite a jump for such consumers to have to pay $45 on their next purchases. Connelsville coke for spot shipment is about $18 to $18.50 for furnace and $19 to $19.50 for foundry, per net ton at ovens, when 14 months ago furnace coke sold at $3.50. Thus while pig iron prices are high a blast furnace may easily be in the position of losing money.

Shingle Stains for Cottage and City Trade

Average Summer Resort Shows Signs of Neglect in Painting and Staining—City Dealer Can Share Summer Business—Roof is Vital Part of House Construction—Value of Creosote Oil as Preservative Recognized by Railways.

THE cry for economy has extended to practically every article which comes within the category of human requirements, and this factor has been turned to advantage in connection with the sale of paints and other finishes. One line of finishes which has not, however, come in for a great deal of mention is that of shingle stains. This brings us to the question of the service to the property owner through the medium of single stains, as well as their possibilities for paint dealers.

In the case of shingle stains the great trouble in the past has been that they have been looked upon too much as a decorative feature and have therefore been sold as a specialty where they could very well be established as a staple.

Property Owner Has to be Advised

The property owner is offered a valuable service through the use of shingle stains, and there are great possibilities in their sale for the dealer, but so far the property owner has not been made aware of the preservative service of shingle stains and the dealer has not taken the trouble to develop this channel of business by advising him. The fact of the matter is that the preservative service of shingle stains relative to their cost greatly exceeds their decorative values and places them amongst the forefront protective lines of trade.

The decorative value of shingle stains is their least important feature as they are primarily a preservative medium. The largest single element in their make-up is creosote oil with sufficient coloring pigment to give the shade desired. They can never replace paints as they lack both the covering capacity and the protective body, but shingle stains possess greater penetrating power and sink deeper into the pores of the wood, killing the destructive fungi that destroys wood cells. From a decorative standpoint as well, shingle stains can be used on shingles and half-timber construction with much better effect than paint in most cases.

Creosote Oil is Preservative Factor

In the buying and selling of shingle stains the essential element, creosote oil, should always be kept in mind, for there are many stains in which this necessary element for the purposes of preservation is sacrificed by the substitution of cheaper liquids. This is especially so in view of the fact that the main function of a shingle stain is preservation and unless it has the required content to achieve this purpose it is useless. Highly volatile liquids, or those that tend to mix with water and are substituted for creosote in shingle stains, have nowhere near the relative value to the price asked for them that a pure creosote shingle stain has.

As for the possibilities of developing business in this product, it must be borne in mind that shingles, like every other class of lumber, have gone up in price and must therefore be protected in the interests of economy. It must also be remembered that the roof is one of the most vital parts of the house construction and is deserving of special attention. Shingled roofs are quite likely to remain in favor with many people for years to come, and this class of business is therefore well worth planning for. A few gallons of shingle stain applied at the right time may obviate replacement which would be as costly as replacement in any other class of construction these days. If shingles are dipped in shingle stain before laying, the cost of the stain and labor is more than offset by the lengthened service of the roof.

Preserve Railroad Properties With Creosote

The best indication of the value of creosote oil as a preservative is found in the fact that railroads are now having railroad ties, posts, piling, etc., treated with it in the various creosoting plants throughout the country. This impregnating being done under pressure more than doubles the life of such material. Naturally this means great economy and saving of confusion by replacement. The experience of the railroads should be sufficient to convince the property owner that it is good economy for him to make the greatest use of creosote oil for preservation.

One enterprising dealer has made an approximate calculation and discovered the fact that there is an opportunity for the sale of 6,400,000 gallons of shingle stain for use on the shingle roofs of houses in Canada, and taking into consideration barns, churches, schools and other buildings, he figures this total could be doubled, allowance of course being made for metal roofs, ready roofing and other materials.

It is not even necessary for one to resort to such approximate figures to see the great field open for development of shingle stain business. One need only walk down a street of one of our Canadian towns or cities and observation will show to what extent the roofs have been neglected and what false economy this has proved to be.

Sell Stain for Summer Cottages

In addition to the roofs there are trade possibilities for the sale of shingle stain for shingle sidings, fences and outbuildings. Under this heading also comes the great possibilities for trade from summer resorts. There is plenty of shingle stain business for dealers located near a summer resort. The city dealer must not think he is barred from this class of trade either, merely because he is not located at the resort itself. The chances are that a good bulk of his trade goes away for the summer holidays and a good many summer cottages are owned by this trade. When these cottages are being constructed the owner builders secure hardware and other supplies from the city dealer and by a little energetic sales talk this dealer can secure a portion at least of whatever sales of shingle stain he succeeds in making. Many city dealers find that they can sell shingle stains to their trade for their summer cottages as well as paint for their city homes.

Among the freight, baggage and express dumped off at any summer resort station or dock will be found paint, hardware, boat varnishes and some shingle stain. The average summer resort shows signs of neglect from painting and staining perhaps more than any other single community and it is up to the paint dealers to get after this business whether they are near the summer resort district or not.

U. S. EXPORT OF PAINT, VARNISH, ETC., TO CANADA IN APRIL

Exports of ready mixed paint, varnish and zinc oxide from the United States to Canada during April, 1920, were as follows:

White Lead, 20,861 lbs., valued at $2,189; Ready Mixed Paint, 4,077 gallons, valued at $6,057; Varnish, 9,674 gallons, valued at $11,503; Zinc Oxide, 687,232 pounds, valued at $61,969.

Dominion Steel Enters Merger

Halifax, N. S.—The shareholders of the Dominion Steel Corporation at a special general meeting held here last week ratified the proposals to merge their company in the $500,000,000 British Empire Steel Corporation.

Nova Scotia Steel and Iron Company, another of the companies to enter the British Empire Steel Corporation, has already accepted the plan.

MOORE'S Guaranteed PAINTS

SIGN OF MERIT
BEST B&M MADE

"Save the surface and you save all" *Paint & Varnish*

"Save the surface and you save all" *Paint & Varnish*

Morelustre Enamel

For Interior or Exterior Work

Morelustre is especially adapted for floors, stairs, wainscoting, verandah furniture, canoes, etc., and any other surface requiring a durable finish. Is made with weather-resisting pigments, combined with hard-drying, elastic varnish. A high-grade enamel which can be used with equally good results on either exterior or interior work, and is made in twelve beautiful shades and put in small-size packages for the benefit of the consumer.

The dealer will find it profitable, and a good business builder.

The Brush Department

Brushes for Various Classes of Work

Dealer Should Know Best Materials and Tools to Recommend for Delicate Finishing Work—Trip Through Finishing Dep't of Railway Shops or Furniture Factories Would Teach Much as to Uses of Bristle, Bear, Badger and Other Brushes

THE fact that a proper explanation of the use of each line of brushes goes a long way with the dealer as well as the customer is evidenced by the recent experience of one of our well-known brush manufacturers.

Few customers of the hardware store's paint and brush departments know that different types of brushes give best results on various classes of work. This is proved by the fact that on taking a look through the large paint or varnish room of our railway shops or furniture factories one would find certain work requiring a bristle brush while other work would require bear hair or badger brushes of different sizes.

One thing is certain—that if the best work is expected on jobs of a delicate nature, as good tools and material as are used by experts is required. And even then the chances are that because the application is made by an amateur the results will not be as good as the work turned out by thoroughly experienced finishers. The handicap to the amateur is therefore already enough without his adding further means of turning out inferior work by the use of wrong tools and materials. Here is where intelligent sales work on the part of the salesmen and the dealer can help a great deal.

As an experiment during the last few weeks the brush manufacturing firm previously referred to, was trying out the trade on good quality brushes for finishing automobiles, furniture, pianos, buggies, etc. In nearly every hardware store, after the dealer had been thoroughly acquainted with the uses of each type of brush he bought some of each line—camel hair, bear hair and badger hair, the quantity being varied according to the location, size and expected requirements of the trade in that community.

Should Use More Discretion in Ordering

Manufacturers Experiencing Much Difficulty With Labor, Freights and Raw Materials—Spasmodic Ordering by Dealers Causes Unnecessary Confusion, Says President of Ottawa Paint Works Limited

UNDER the abnormal conditions prevailing in the manufacture and distribution of merchandise, particularly in regard to difficulties concerning the supply of raw material, labor, freight congestion, etc., hardware dealers should use more discretion in the purchase of paint, according to Mr. Charles Hickman, president of the Ottawa Paint Works, Ltd. These sentiments were expressed to a representative of Hardware and Metal who recently discussed the paint outlook with Mr. Hickman, a recognized authority on such matters.

"Dealers should see that they do not either overbuy or underbuy," said Mr. Hickman, pointing out that under present conditions the paint manufacturers are compelled to use the utmost discretion in this respect, and that they cannot, therefore, be called upon on short notice to deliver any appreciable quantity of paint.

"Some dealers will order to-day and expect us to give delivery to-morrow," said Mr. Hickman, "and the manufacturer is the one who has to stand the loss if he ties up too much money in materials to meet this emergency, to say nothing of difficulties experienced in securing raw materials and in having them transported to the factory."

For the benefit of workmen such as painters, Mr. Hickman thought that people should get in the habit of doing housecleaning and all interior work in their homes during the winter months so as to leave the summer months for all exterior work. This plan would give work for certain classes of labor throughout the whole year, whereas these men are now employed only for a few months each year. Distributing their work over the whole year would decrease the cost of such labor on the individual job, and would therefore bring this class of help within the range of people who cannot to-day afford the high prices which these men are forced to charge. The result would be an increase in the total volume of work available. In painting, for instance, it is evident that more men would be engaged in the trade, they would get more work, and their charges would be made so much more moderate that the volume of painting done would be greatly increased.

Linking this thought with labor troubles of the present day, Mr. Hickman stated that the consuming public was the big factor in the matter and that they as a body do not study the problem. "There is too much organization against them and not enough organization on their part," said Mr. Hickman, "hence labor disturbances, high prices, etc., are brought about."

Mr. Hickman stated that materials were now coming forward fairly well and that with his plant running to capacity the demand is consistent. There was recently some difficulty looming up concerning a possible shut-off of tinplate supplies, but so far this difficulty has not materialized.

"People are coming more to a realization of the value of paint as a preservative," said Mr. Hickman, adding that if no building was done during 1920-21 and present buildings were given their rightful measure of paint for protection, there would not be enough paint produced in Canada from plants running at capacity, to cover 25 per cent. of the requirements. The tendency toward purchase of homes on account of high rentals was one of the reasons advanced for this, it being recognized that owners take much more interest in their dwellings than when renting."

Deliver Boston Varnish Co. Products by Aeroplane

In view of the congestion in railroad transportation, the Boston Varnish Company recently chartered an aeroplane for delivery purposes. It was painted a bright blue color wth the Kyanize trademark in white on the wings and a schedule of calls for delivery to dealers was carried out. A day was spent in each town during which some exhibition flying was done and coupons dropped entitling the finder to a ride in the plane as well as circulars featuring a special free can and brush offer. The dealers were enthusiastic over the publicity given by this medium. It is realized that this is not yet a practical method of delivery owing to the fact that planes are limited in their carrying capacity, but the test, along wih others, proves that the time is not far off when aeroplanes will be used to a great extent in express delivery.

BOECKH'S

Steel-Grip Rubber Set Flat Paint

Boeckh's are those superior made paint brushes which improve painting and give general service with complete satisfaction to their users.

Each brush is made to fulfill all the requirements of an ideal paint brush. The bristles are firmly held in a rubber setting and cannot possibly come out. To give additional security and durability the steel-grip feature is added.

The long, durable bristles give splendid wear and save breaking in new brushes. Remember the wild boar's head in the Boeckh trade-mark.

Boeckh's Paint Brushes have so often proved their superiority to the public in general that it is now a case of not "what brushes will I buy?" but, "where can I get Boeckh's?"

Every Brush Guaranteed.

The Boeckh Company, Ltd.
Toronto, Canada
Established 1856

The bristles can't come out.

Sales Tax on Oil and Paint Containers

Two Per Cent. Turnover Tax on Value of Oil and Paint Containers—Credited to Dealer on Return—If Not Returnable, Dealer Must Bear Tax Himself—Five-Gallon Cans and Lithographed Cans Not Returnable

SINCE the Sales Tax came into effect numerous complaints have been made by hardware dealers in various parts of the country concerning the action of the oil companies in charging the tax on oil containers. In view of the fact that containers are used over and over again during the course of the year, it is obvious that if the tax is collected every time they are used, and not refunded, that an injustice is being done somewhere. In this connection a Western paper recently carried a letter purported to have been sent from the Toronto office of the Imperial Oil Company to the R.M.A. in Regina, stating that a ruling by Ottawa required that on all wood or steel barrels charged by the company on its invoices a tax of one per cent. must be added to the value of the container. The company hoped to get a more favorable decision later which would allow of a refund being made.

Hardware and Metal has taken this matter up with the Imperial Oil Company in Toronto and has been advised that a new ruling has now been issued, and that whereas up to July 1 the tax on containers was only one per cent., since that date it has been increased to two per cent. on everything, except on importations by the company, as they are looked upon as manufacturer and wholesaler combined. The tax of two per cent. is added to the value of the containers, but is credited to the dealer on the return of the container, provided the container is allowed to be returned. In the case of the Imperial Oil Company 5-gallon cans or containers which are lithographed are not returnable, so that in such cases the dealer is forced to absorb the amount of the tax just as if he was buying the container for his own use. No tax is levied on inter-company transactions.

Similar containers used by paint and other companies, where the value of the container is shown separately and whether returnable or not, are taxed in the same manner.

How Hardwaremen Advertise Paints--No. 17

DRAWING an effective parallel as to the value of paint, this advertisement by Armstrong, Smyth & Dowswell, Ltd., Regina, Sask., compares paint to an insurance policy. Nearly everyone is acquainted with the advisability of being protected to some extent by insurance, whether it be life, property, automobile or any other form, and a great many people have benefited directly from such insurance. The comparison is therefore favorable and makes a strong impression. The ad. says: "You carry Fire Insurance against a possible loss by fire. Have you paint insurance against the certain loss from depreciation and deterioration due to exposure?"

Paint As an Insurance Policy

You carry **FIRE INSURANCE** against a **POSSIBLE LOSS BY FIRE.** Have you a **PAINT INSURANCE POLICY** against the **CERTAIN LOSS** from depreciation and deterioration due to exposure of your house to weather conditions without an adequate covering **COAT OF PAINT?**

Save the Surface and You Save All.

A GOOD PAINT really costs less than a **POOR PAINT,** as it will cover more surface per gallon, and the labor expense is as great to put on a **POOR PAINT.**

Why Not Use the Best?

We carry a full line of **MOORE'S PAINTS,** a special paint for each use. **HOUSE PAINT, FLOOR PAINT, ROOF PAINT, SHINGLE STAIN, FLAT PAINT,** and **TILE-LIKE VARNISH PAINT.**

Armstrong, Smyth & Dowswell, Ltd.

QUALITY SERVICE

The Luxeberry Painter Says:

"Among the penny-wise, pound-foolish folks are thrift-fakers who save a few dollars on the price of varnish, and within a few weeks have to spend twenty times more than they saved to scrape it off and refinish. The only varnish bargains are those that combine beauty and a long-wearing period. This is why I have used Berry Finishes during my entire business life."

"Berry" brands sell readily because they have behind them a sixty-year record for dependability.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 22.—The features of this week's paint markets are those of a weaker tendency on linseed oil, and of a firming tendency for varnishes. While linseed oil basis is unchanged, favorable quotations are being made on large quantities of oil for immediate delivery. The continued receipt of English oil is a big factor in regulating the price of Canadian crushed oil and some are expecting that still lower prices will be effective. Stocks of seed for crushing are said to be adequate, but the demand from dealers and hardware trade generally is much smaller than it was. Some round lots have been sold to various manufacturers and this is a very satisfactory condition from the crushers' viewpoint. The varnish market is a very strong one, gums being hard to procure, and all indications pointing to higher prices. Generally speaking, the paint markets are seasonably quiet.

Slow Delivery Holds Up Turpentine Stocks

Montreal.

TURPENTINE.—Turpentine is holding at the price quoted last week for fall deliveries. It is pointed out that it takes from four to six weeks to obtain delivery of orders which are placed with Southern shippers, so that, while the market has been ruling easier, it is difficult to forecast what prices may rule in a month or six weeks hence. The demand is seasonably light.

Turpentine—	Imp. Gal.	
Single barrels	2 85	3 00
Small lots	2 95	3 10

(Packages extra.)

Lower Linseed Oil Is Still Expected

Montreal.

LINSEED OIL.—The basic quotations this week are unchanged from those of last, although there is still a weaker undertone. The arrival of English oil serves to keep the price of Canadian oil on a lower level. While dealer demand for oil is rather limited at the present time, one large crusher pointed out that orders received from various manufacturing plants throughout the country were decidedly active. This calls for considerable quantities of oil, and in view of the fact that demand otherwise has been limited, Hardware and Metal understands that competition has been quite keen. In view of this prices have been shaved pretty close in some instances. The flaxseed market reacted upward early in the week 19 points, this being induced by somewhat unfavorable crop reports from the West, where excessive heat, which was then reported, would, if continued, materially affect the yield. Some expect that prices have reached their low point, while others look for a still further decline.

Raw—	Imp. Gal.	
1 to 2 barrels	2 05	2 15
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	2 07½	2 17½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Steady Paint Prices; Business Is Fair

Montreal.

PAINTS, SPECIALTIES.—The movement of prepared paints has naturally been more limited during the past two or three weeks. Midsummer conditions are satisfactory all around, however, and manufacturers expect that the quiet condition will be of short duration. Prices are steadily maintained without change.

Varnish Basis Strong; May be Higher Prices

Montreal.

VARNISHES.—The outlook for higher prices on varnish is such as to indicate that an advance may be made in the near future. Manufacturers state that they have been holding off advancing prices as long as possible, and will do so for some time yet. Hardware and Metal understands that one large manufacturer had already advanced prices, but, that, to date, this is the only increase in price which has been put into effect. The difficulty of getting gums from the Orient, the labor difficulties there, and transportation difficulties form the outstanding features confronting the manufacturer. There is a very active demand for various grades of varnish and prices are decidedly firm with the prospect of advances being made during the next few weeks.

Putty Sales Less But Basis Is Held

Montreal.

PUTTY.—The sale of putty is somewhat more limited, but considering the midsummer season the movement has been well maintained. Although linseed oil prices have declined, the difficulty of getting adequate supplies of whiting from England has constituted a problem to offset the declining price of the oil.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

White Lead in Oil Is Held on Steady Basis

Montreal.

WHITE LEAD IN OIL.—The improvement of white lead in oil, from a seasonable standpoint, is very satisfactory. Prices are maintained without change, five-ton lots of Government standard lead selling on the basis of $19.50 per 100 pounds; ton lots $20, and smaller than ton lots $20.35.

Demands For Double Glass Exceed Supplies

Montreal.

GLASS.—The sale of glass continues quite active, and it is likely that 1920 will record one of the best seasons in history. Supplies from Belgium have naturally been coming to hand in smaller volume in view of the higher prices quoted by the Belgian producers. There has been a scarcity of double strength glass for some time, and the supply has not been ample to meet demands made on manufacturers and jobbers.

TORONTO

TORONTO, July 22.—The paint market shows little change this week, and business is seasonably dull. Turpentine quotations are very firm and some are expecting that higher prices will be made in the near future. Linseed oil stocks are in better condition and seed is freer. Crop conditions in Western Canada augur well for a good crop of seed for next season's oil and should also go a long way to stabilize business.

There is still a scarcity of putty, as a result of the whiting shortage. Dry colors are also none too plentiful, and greens especially have light stocks. Collections are still very favorable and notwithstanding the quiet buying period jobbers state they are doing a good volume of business on repeat orders.

Firm Price Holds on Shellac and Varnish

Toronto.

SHELLAC AND VARNISH. — The continued demand for varnish and shel-

It's Well Advertised

Glidden Endurance Paint is well known among paint users. They know its high quality and are asking for it. Glidden Advertising is continually telling the Glidden story and winning customers for Glidden dealers.

The great popularity of Glidden Endurance Paint makes it a profitable line for you. It means quick turnover and quick turnover means money in your cash register. Put in a supply of Glidden Endurance Paint at once. Its popularity and reliability will prove a valuable asset to your business. Write for the Glidden Dealer's Proposition.

THE GLIDDEN COMPANY, LTD., Toronto, Ontario

BRANCHES : Montreal and Winnipeg

"Save the surface and you save all" *Paint & Varnish*

If interested tear out this page and place with letters to be answered.

lac of all kinds is very satisfying to those in the trade, especially for this season of the year. Present prices continue firm and there is no reason to expect a change in price. Quotations are as per paint quotation page.

Fair Movement of White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—Heavy demand still continues for white lead in oil, considering the season of the year, which is usually quiet about this period, and a fair demand is still being made, it is stated. The situation has a tendency to keep all the trades very busy. The present quotations remain firm. White lead in oil in ton lots continues to be quoted at $20.35 per 100 lbs., while in less than ton lots the quotation is $20.70 per 100 lbs.

Repeat Orders Heavy For Ready Prepared Paint

Toronto.

PREPARED PAINT.—Notwithstanding the season of the year when it is usually very quiet owing to the holidays, and other reasons, repeat orders have been coming in very satisfactorily for ready prepared paint, and nearly all the trade are very well satisfied with the amount of business which has been handled for this commodity. There seems little possibility for lower prices in the near future, notwithstanding the fact that some ingredients have been gradually declining in price, and many are looking for this line to hold a steady price for some time to come. The quotations are as per current quotation page.

Still a Scarcity For Various Dry Colors

Toronto.

DRY COLORS.—The prices of dry colors remain firm and steady, and no changes have recently been made in the price. Large quantities are still in demand and there are some colors, such as green, which are very hard to procure. The present quotations are as per current quotation page.

Season's Demand For Glass Heavy; Price Firm

Toronto.

GLASS.—The demand for nearly all sizes of window glass continues to be very heavy, and as the many houses are being completed, builders seem to be anxious to get the lights in the windows to make sure of delivery before the rush, which usually comes in the Fall season. There is still considerable scarcity of some sizes, although warehouse stocks are said to be in a better positon to supply the trade. American producers are still closed down according to their annual custom, and it is not expected their fires will be started again for several weeks. Jobbers state that the American firms seem to have been better caught up with their orders before the last fire than was expected and many are hoping for supplies to come on more freely.

Communications from Belgian manufacturers show that they are having some difficulty with their workmen and glass cutters especially have been causing considerable disturbance through strikes and other reasons. This, however, they hope to soon overcome, and many have hopes for fair deliveries from this source.

The price remains unchanged. Single and double diamond are still being quoted at a discount of 15 per cent. from the list, while the cut lights are quoted at a discount of 40 per cent. from the list.

Putty Prices Firm; Fair Volumes Moving

Toronto.

PUTTY.—Fair deliveries are being made on putty and while business generally is rather quiet owing to the season of the year when many are away for their yearly holidays and other reasons. There is an indication that some are securing their buying requirements now so as to be well equipped for when the heavy buying season starts for this commodity in the early Fall. The situation which has developed in putty shows little change, and is reported as coming forward very slowly, and shipments that do come forward are very light. The quotation on putty is very firm and no changes are made in the price which is as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotation.

Linseed Oil Sales Quiet; Price Steady

Toronto.

LINSEED OIL.—No change in price has been made on linseed oil this week, and the situation is practically unchanged. There is still some English oil on the market. Crushers are beginning to have better receipts of flax seed, and oil is again moving more freely, although business is rather dull owing to the holidaying and in-between season of the year. The following are the present quotations:

Linseed Oil—		
1 to 2 barrels, gal.	2 27	2 50
3 to 5 barrels, gal.	2 26	....
10 barrels and over, gal.	2 24	....
Boiled		
1 to 2 barrels, gal.	2 30	2 53
3 to 5 barrels, gal.	2 29	....
10 barrels and over, gal.	2 27	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Turpentine Prices Firm; May Advance

Toronto.

TURPENTINE.—This week's quotation is considerably firmer, although no change has been made on local quotations. The market in the South is gradually strengthening, and some have it that the recent low point quoted for this year's crop was below production cost, and notwithstanding the quiet demand prices are already beginning to climb. The following are the present quotations:

Turpentine—	Per Imp. Gal
1 barrel lots	2 65
2 to 4 barrel lots	2 64
5 gal. lots	2 95

Commissioner Says German Goods Coming to Canada

In an address delivered before the Montreal Branch of the Canadian Association of British Manufacturers and their representatives, held recently. His Majesty's Senior Trade Commissioner to Canada and Newfoundland, Captain Evan J. Edwards, stated that considerable quantities of German goods were coming into Canadian markets.

Captain Edwards stated that representatives of British manufacturers here were being requested to represent German firms on the promise of larger commissions and prompt shipments of goods. Captain Edwards expressed his feeling that manufacturers' representatives here should make frequent calls on the trade, and even though they could not immediately supply such goods as are wanted, endeavor to hold the custom of those who had been used to buying British-made goods. In time conditions would gradually right themselves, and goods would be forthcoming then in the necessary quantities.

Captain Edwards believed that agents here representing British houses could help matters cooniderably by urging their principals in the Old Country to allocate a certain proportion of their output for the Canadian markets exclusively.

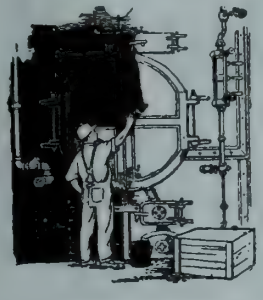
Annual Sales Convention of the Stanley Works

The annual sales convention of The Stanley Works, New Britain, Conn., was recently concluded. Joint sessions were held of The Stanley Works and The Stanley Rule & Level Company's salesmen and officers with Vice President C. F. Bennett presiding and addresses given by President E. A. Moore, Vice-President R. N. Peck and Vice President C. F. Bennett. Matters discussed included production and new goods, process of manufacture, selling and advertising policies, the concluding session was turned over to salesmen from the different sales divisions and much valuable discussion took place.

Barrett Roofings, Cements Industrial Paints etc.

ANY Product bearing the name "Barrett" is first of all a quality article. It is also a fast seller because it insures customer satisfaction. The products described below are the result of long years of manufacturing experience and each of them is the best product on the market for its particular use.

Our advertising in the leading publications and newspapers is telling your trade that the Barrett trademark is always a sure pledge of dependability.



Everjet Elastic Carbon Paint

This high quality, moderately priced, protective carbon paint has the same base as the famous Barrett Specification Pitch. It is positively proof against weather, steam vapors, acids and alkalies. It can be used on either metal or wood and wears stubbornly under the most severe conditions.

Although Everjet Paint has been on the market less than ten years it is used extensively by railroads and large industrial concerns all over the Dominion.

It is particularly recommended for exposed metal surfaces such as machinery, farm implements, tin roofs, smokestacks, etc., as it gives perfect protection against rust—the greatest destroyer of metal.

Easy to apply and comes ready for use in the following sized containers: Barrels (about 40 gals.); ½ Barrels; 5 and 10-gal. cans and 1-gal. cans, Lithographed (cases of one dozen).

There is a big field for Everjet Paint in every community. You can recommend it to your customers with the utmost confidence.

Everlastic "Rubber" Roofing

The fastest selling roll roofing on the Canadian market. Low in price—high in quality—long in service—easy to lay—thoroughly waterproof. Comes in three weights, light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 square feet. Nails and cement packed with each roll.

Everlastic Liquid Roofing Cement

The greatest material in the world for resurfacing worn-out felt and "Rubber" roofs. Comes all ready for use, is easy to apply and forms a smooth, durable, weather-proof coating which adds years of service to the old roofing at very small cost.

Put up in all sized packages from 1-pint cans to barrels of 40-gallons.

Elastigum Plastic Patching Cement

A tough, elastic, waterproof cement for general repair work and waterproofing purposes. Known as "The Plastic Cement of a Thousand Uses."

Unequalled for patching holes in roofs, repairing flashings and gutters, stuffing cornices, etc., etc.

Comes ready for use in 1-lb. tins (24 to the case); 5-lb. cans (12 to the case); 25-lb. packages; 100-lb. packages; ½ barrels of about 300 lbs. and barrels of about 600 lbs.

Creonoid (Fly-Oil) Lice Destroyer and Cow Spray

An inexpensive and effective destroyer of flies, lice and vermin on livestock and poultry. Its use means healthier horses, fatter hogs and increased production of milk and eggs.

Creonoid is a sure and fast seller in every progressive farming community.

Comes in 1-gallon cans (12 to the case); 5 and 10-gallon cans; ½-barrels and barrels.

Hardware and Metal is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Hardware and Metal is the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

Hardware and Metal is the only weekly hardware paper in Canada.

Establishing the Reputation of a New Firm or Extending the Reputation of an Old One

When the shrewd, modern advertiser has successfully harnessed the great power of publicity to his business, his next operation is the selection of a definite objective. Perhaps one of the most familiar objectives that makes his continuous advertising productive and profitable is the establishing or extending of the firm's reputation by a regular weekly message to the whole hardware trade of Canada setting forth the claims and policies of the house. The trade invariably prefers to purchase from a concern that has become familiar in the pages of their favorite trade newspaper—HARDWARE AND METAL.

"I Drove 8 Blocks To Buy Oil Here Because You Have A Bowser"

"I used to buy gasoline and oil wherever I happened to be near a supply, and my car was never giving me the same uniform action I desired. Now, since I come here, my motor is running fine."

Such is the story told to countless BOWSER owners.

BOWSER ESTABLISHED 1885 **Storage Systems**

Bring Profitable Trade

Once you have a BOWSER Curb Gasoline Pump installed you begin to get the motorist's trade. The BOWSER Lubricating Oil Storage completes the service.

Then you have Satisfied Trade, Clean, Accurate, Safe and Profitable Business, because BOWSER SYSTEMS bring just such results.

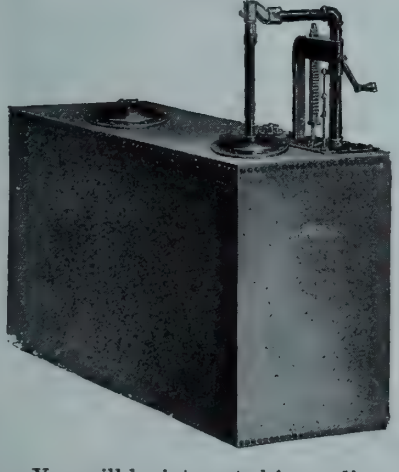

Figure 64
Lubricating Oil Storage For Single Unit or Battery Installation

You will be interested in reading our literature and studying the pictures of actual installations. Write for it.

Beatty Bros. Limited Bulletin

A Double Set of Ball Bearings

W. J. CALVERT,

Mr. W. J. Calvert is one of our most successful salesmen, calling on the Hardware Trade. He works under the direction of Winnipeg branch. He has had an extremely varied experience and is unusually well liked by his customers. He has considerable musical ability and has, in the past, conducted a band.

Everyone is impressed by the *easy running* of the Red Star Washer. This is not only one of its greatest selling points, but a tremendous advantage to the woman operating it. There are many reasons for this feature. One of them is illustrated by the drawing above.

The dolly shaft runs on *two sets of bicycle ball bearings.* This great advantage, combined with compact design, solid iron bed plate and machine-cut gears makes the Red Star the most smooth, easy-running and noiseless washer you can get.

Your customer will want one as soon as she sees how easily it works.

Beatty Bros., Limited

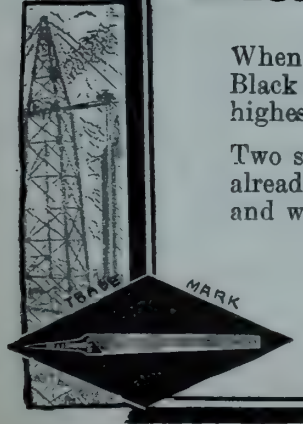
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

Stephens'

REGISTERED TRADE MARK

Barn Paint

Insurance for the Farmer
Sales for the Dealer

Stephens Barn Paint does more than merely color the surface —it gives protection, and increases the life of the barn. It is practical insurance against deterioration for the farmer. Through the medium of his farm journals and favorite publications he is well aware of the necessity for saving and protecting his farm buildings from destruction by weather. You can make lasting friends and steady customers with more profit and increased business, by selling the farmers in your district Stephens Barn Paint. Write about our Agency Plan.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Diamond "A" Harvest Tools

Unsurpassed Quality Reputation

Farmers everywhere recognize Diamond "A" Harvest Tools as the ideal service-giving tools. There is great difference in quality between Harvest Tools and Diamond "A" Harvest Tools. Tines are made of Highest Grade Steel—an attractive feature.

Durability and Strength

are two of the leading selling points. The handles are of extra choice selected wood, tapered pattern. Put one in a prospect's hand and the sale is closed.

MADE IN CANADA

BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

Special Cylinder Oil for Steam Engines

Harness Oil. Neatsfoot Oil

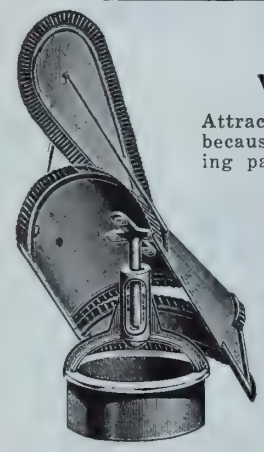
A Gas Engine Oil (for gasoline engines).

Tractorlene Oil (for oil burning engines).

Ideal Thresher's Machine Oil (for general use.)

Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG



O-Rib-O

Volcano Chimney Top

Attracts the customers and closes sales because the Deflector—the lower slanting part shown—receives wind through the sloped opening directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys. Sells readily for homes, stores, churches, factories and as a ventilator for barns and warehouses.

MORROW

High Speed and Carbon Twist Drills have Convinced

Plant Executives

that they get greatly increased production by using these drills exclusively. In other words, they save money and make money for the plant. The design includes a graduated thickness of web, giving greater strength where strength is needed.

John Morrow
Screw & Nut Company, Limited

Ingersoll *London, England—7 Hop Exchange, Southwark Street, S.E.1.* **Canada**

"Oldest, largest and best equipped plant in the Dominion manufacturing Set Screws, Cap Screws, Engine Studs, Semi-finished Nuts."

"Sole Distributors for the Ingersoll File Company's Files."

ARROWHEAD SAWS

Vanadium Steel

Are called "Standard of Canada" because they have been the choice of skilled workmen since they first entered the market.
Arrowhead Saws are perfectly tempered, hang right, are set right and sell right. Cross-cut Saws, Hand Saws, Buck Saws, and Circular Saws.

Our Catalog is a guide to profit; your name and address will bring it.

The Super-Test

¶ BEFORE you were asked to buy or try Dunlop Cord Tires, they must undergo a test such as you would never give them.

¶ Tires, just like your garagemen and dealers now sell are put on our own test cars, and away speed the drivers.

—A Test that is kept up day and night.

—A Test that takes in some of the worst roads in the country and the generality of bumps, bad turns, and all the sudden stops that go with them.

—A Test that specifies the number of miles which must be made by the drivers each day and night.

¶ The results of this crucial test, naturally, have an important bearing on our manufacturing policy.

¶ Tested-in-Advance Service aptly applies to *Dunlop Cord Tires—"Traction," "Ribbed."* Can you ask for a greater guarantee than the story the road tells—a story which in the case of Dunlop Cord Tires proves that our manufacturing methods are not only Right but *Dead Right?*

FYRAC
Spark PLUGS

Canadian Money at Par

Fyrac in your store is instantly recognized—that *one inch firing surface*, just as it is seen in scores of advertisements.

Quick as Fyrac's spark itself, the whole Fyrac story darts through your customer's mind—*one inch firing surface*—instant ignition of every particle of gasoline—freedom from *gasoline-formed* carbon. He is ready to buy.

Be ready to sell—Fyrac.

FYRAC MANUFACTURING CO., *Rockford, Ill.*

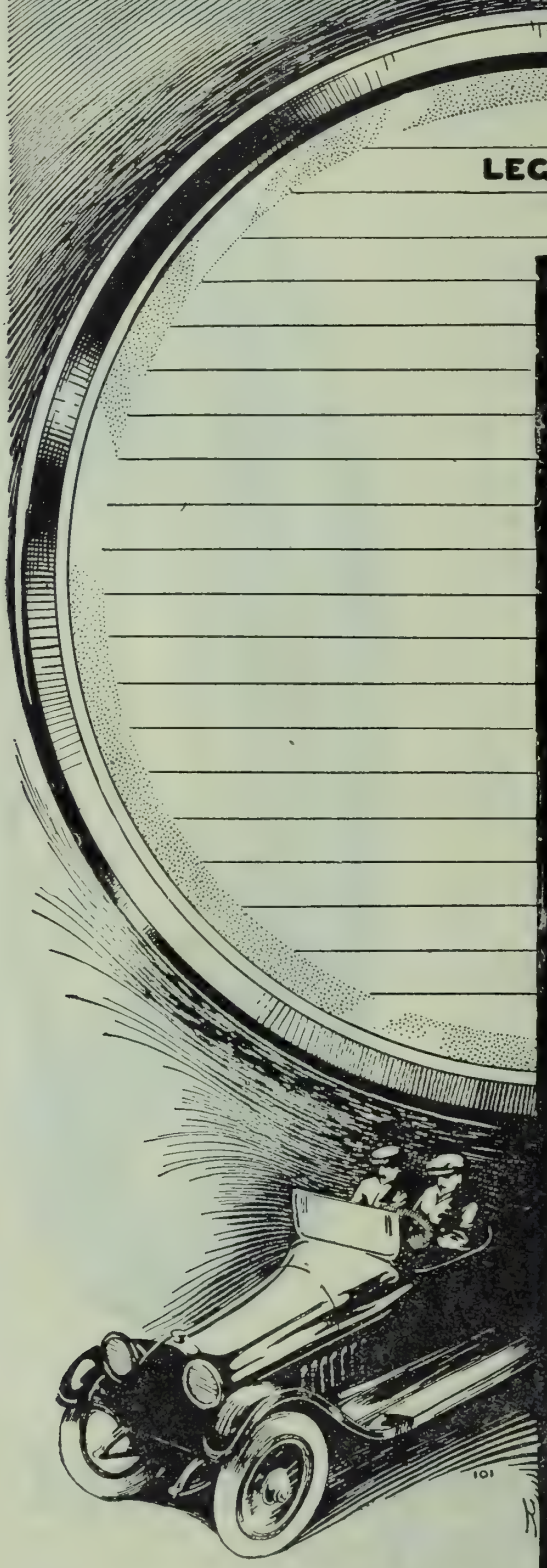
LEGALITE



Comply with the Law

Make Night-Driving Safe

After August 1, 1920, it will be unlawful to operate a motor car in Ontario, unless headlights are equipped with suitable non-glare device approved by proper authorities.

Legalite Lenses comply with the Law

More Light—No Glare

With Legalite Lenses, the light beams are never more than 42 inches above the ground at any distance from the car, as required by the law. You get the light where you need it—on the ground—even when going up or down-hill.

Dealer's Opportunity

150,000 passenger cars, commercial vehicles and trucks—Ontario will be obliged to equip with suitable non-glare headlights within a short time. Be prepared for your share of this business by getting a good supply of Legalite Lenses **at once.**

Prices Per Pair

Sizes 8	to	8⅝″.....	$4.25
Sizes 8¾	to	9⅜″.....	5.25
Sizes 9¾	to	11½	6.75

Special 8½ Legalite Lenses for 1915-20 Fords, Chevrolet "490" and New Overland Four, $3.25.

Why are all Fords Equipped with Champion

Dependable Spark Plugs

The answer is found in the Ford instruction book which says:—

"The make of plugs with which Ford engines are equipped when they leave the factory, is best adapted to the requirements of our motor."

Since 1911 Fords have been and are now, Champion equipped.

For motor owners who have other makes of cars we have developed a type of spark plug to give that same unfailing dependability for which Ford motors are known. Absolute confidence can be placed in Champion Spark Plugs to carry through any emergency that an engine will stand up under.

The right plug has "Champion" on the insulator as well as on the box.

Display the Champion dealer helps and get your share of the business that our advertising has created.

Order from your jobber to-day.

Champion "X"
A 15—½ inch
Price 90c
Adopted by the Ford Motor Co. as standard equipment on Ford cars since 1911.

Champion Spark Plug Co. of Canada, Limited
Windsor, Ontario

Largest factory in Canada making Spark Plugs exclusively and the only factory making "Champions".

The Plug with the Hotter Spark

M&S

The ball point of the "M&S" spark plug concentrates the current and intensifies the heat. This gives a sure, hot spark—producing better combustion and greater power.

The "M&S" plug is made in all styles to suit every make of car—it is standard equipment on the popular new Overland "4."

The "M&S" plug is made in Canada and guaranteed to give complete satisfaction.

Dealers:—Ask your jobber for the "M&S" plug.

Test Tire Pressure With Pump Hose Connected

SCREW the Schrader Universal Pump Connection to the regular hose-coupling of either hand or power pump, and you can use the Pressure Gauge without removing hose from valve. This saves you a lot of time and trouble. You simply place your pressure gauge over deflating pin. This handy little device costs only 65 cents, but it adds greatly to your convenience.

SCHRADER UNIVERSAL PUMP CONNECTION

East or West the North Star is the biggest battery value.

Dependability

The user of North Star batteries knows that he can expect maximum service under all conditions. Heat, cold or humidity cannot affect the strength of the battery—the full power must be delivered in actual spark.

The value of dependability cannot be estimated. Delays, big or little, cost money. Serious loss can be occasioned by unreliable batteries. The North Star cells end delay losses and are a guarantee of continuous operation for engines, tractors, automobiles, telephones, bells, etc.

Made singly and in multiples (perfectly protected and conveniently arranged with handle). The user gets better service and the seller bigger returns and larger turnover from the North Star.

An Industry in Jeopardy

IT seems strange to say that the present exchange situation might mean the death of the shipbuilding industry, that during the war years jumped from a minor place to one of outstanding importance. Yet such is the case. Orders must come from abroad, and are coming from abroad, from France and Italy, from Holland and Scandinavia. Orders, plenty of them, to keep the yards busy for years, but on such ruinous terms that the shipping yards have been unable to accept them. This situation, and the remedies that have been proposed to meet it, are discussed in an article entitled, "A Great Industry in Peril."

Those Unnecessary Delays Cost Dearly

Is it not painful to watch or experience the delays in many stores—unnecessary delays. And how often do we hear it stated? "I do not care to trade at B's; theirs is not a good system, and it takes too long to be served." When the salesmen have to leave customers for change, whether made at an office, from a till, or register, needless non-productive energy is used, and valuable time is lost. Drop a card for our circular—full of information, and learn more about it.

TORONTO JULY 24th, 1920

"We Don't Know Much About Your House or Your Products"

SUPPLIES of many hardware lines are moving more freely. For two or three years, owing to the great scarcity of goods, the hardware trade has not been able to pick and choose to the same extent as in former years. Conditions are changing. There is now a pronounced movement on the part of hardware retailers to specify lines with which they are familiar—to order, through wholesalers or direct, the goods made by well-known firms. Retail hardware men never did like to buy from unknown firms. The hardwareman prefers to handle the goods made by firms with which he is familiar—he wants reliable products that he can recommend to his customers.

The average hardware buyer hesitates about buying goods made by firms who seldom, if ever, come out before the trade and announce their house and their wares in the medium which the retailers pay for and read.

Houses and products that will stand the light of publicity—and use publicity where it will reach the retailer—are invariably given first consideration.

"We don't know much about your house or your products," is a statement fired at travelers hundreds of times daily. Samples may look all right, prices may be reasonable, but what guarantee has a retailer that goods will be up to sample?

The hardware buyers of Canada know that the advertisers in Hardware and Metal have too much at stake to misrepresent their goods. The advertisers in Hardware and Metal have built up reputation, prestige and confidence. The weekly message in Hardware and Metal, reaching every wholesale hardware firm, and over 90 per cent. of the retail hardware firms, from coast to coast, forms a direct connection with the hardwaremen of Canada. It paves the way for your travellers or your products, regardless of whether you sell direct or through jobbers.

During the coming months many lines of goods will be offered to the trade. The goods with which the hardwareman is most familiar will receive first consideration. The hardwareman will decide whether or not he is going to sell your goods. You can't force him, but you can sell him, if you have a good product. The first step should be advertising in Hardware and Metal, and we believe that when you once start advertising in Hardware and Metal you will continue as a regular advertiser. Advertising rates are very moderate and there is no waste circulation. You reach the men who buy our paper for business—read it for business information when their minds are in a receptive mood. On the following pages we give you further information that will interest you.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143-153 University Avenue TORONTO, CANADA

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

WANTED — GOOD ROAD SALESMAN FOR Wholesale Hardware; must be a live wire, have good personality and be of steady habits. This is an excellent proposition for the right man. Territory covered in Western Canada. Apply in own handwriting, stating experience, age, height, etc., to Box 370, Hardware and Metal.

FOR SALE

FOR SALE — ESTABLISHED HARDWARE, general store, flour and feed business, with four acres land for sale in railroad junction town in Quebec Province, sixty miles from Montreal. Business rapidly increasing and farming surroundings best in province. Will sell separately, or en bloc. Buildings all new, with land and stock about $17,000. Unexcelled opportunity for two young men, or man with growing family. Must sell account of failing health. Box 815, Hardware and Metal.

HARDWARE BUSINESS FOR SALE IN TOWN of 2,000. Situated in one of the best farming centres about 60 miles from Toronto on two lines of railway. Stock about $20,000. Real estate and fixtures, $15,000. Box 84, Hardware and Metal.

HARDWARE BUSINESS FOR SALE IN GOOD farming and fruit growing district in Grey County, dealing with the farming public. One opposition. Stock and buildings about $15,000. Ill-health reason for selling. A snap, act quick. Box 146, Hardware and Metal.

HARDWARE WALL FIXTURES FOR SALE— 40 ft. of shelving, consisting of 11 sections of 7 shelves 8" high by 12" deep, with facings of hardwood, two showcases, and 13 sections under ledge 3 ft. wide fitted with two sliding doors with showcase bearings and track. Above will be sold very reasonable as owner has no further use for them. Photo on application. Box 13, Hardware and Metal.

CLEARANCE LINE—GENUINE "SLOCOMBE" Drills are offered at a sacrifice. Sizes "C," "E," "F," and "G." Wholesalers and dealers will find it of interest to communicate their requirements to Box No. 140, Hardware and Metal.

HARDWARE STOCK AND PROPERTY FOR sale. Town of 800, on Provincial highway, good farming district; $10,000 stock. Retiring from business. Write Box 304, Hardware and Metal.

COLLECTIONS

MANUFACTURERS, WHOLESALERS AND Jobbers can reduce their "Collection expenses" to a minimum, by using Nagle One-Per-Cent. Draft-Service. Don't pay 10% or 15% on accounts you can have collected at 1%. Investigate this System. Thoroughly reliable. Established 1909. Send for supply of 1% Drafts today. Nagle Mercantile Agency, Laprairie (Montreal), Que.

SITUATIONS WANTED

EMPLOYER WANTED—EXPERIENCED HARDware and paint traveller, a real business-getter, with good connection Niagara Falls to Windsor and part of Northern Ontario. Best references. Box 87, Hardware and Metal.

WANTED

WANTED—HARDWARE STORE, STOCK SIX to twenty thousand. Must be in Ontario, southwestern preferred. Box 804, Hardware and Metal.

WANTED—GOOD HARDWARE BUSINESS IN live town, stock from four to eight thousand dollars. Box 905, Hardware and Metal.

HARDWARE AND METAL is the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

HARDWARE and METAL'S unique circulation as proven by the A B C Audit is due to 32 years of honest effort to give the retail trade the best possible service.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

"Paints and Varnishes for Every Purpose."

A Prospect in Every Rural Home

There's prosperity in the rural communities to-day. The O.P.W. dealer in such localities is "in right." The farmers and rural men generally are prosperous. They want the farm buildings to look as prosperous as the owners feel. A couple of coats of O.P.W. makes farm buildings look prosperous.

The rural housewife wants prosperity inside the house. She is a receptive customer for O. P. W. lac shades, varnish stains and enamels. Sort up! Supply them all! If you are not selling enough paint now—

You should be under an O. P. W. sign

Good Advertising for *You*

Every Brown & Sharpe tool placed in a mechanic's kit paves the way for numerous sales to his fellow workers. Mechanics generally prefer Brown & Sharpe tools.

The owner points with pride to the fine appearance and workmanship as a whole. Invariably the dealer's name is mentioned and thereby linked with a dependable product in daily use. It's good advertising.

Are **you** a Brown & Sharpe dealer?

"For three generations the choice of the best mechanics."

Known Everywhere—Easy To Sell

Nothing is so easy to sell as the article that is known universally by its branded name.

Famous Five Files are known by name from coast to coast. File users ask for them by name.

This is of utmost value to the dealer. It cuts selling costs to nil.

We keep the name in the public mind by steady advertising, and we carry reserves to enable your jobber to fill orders quickly.

Are you getting your share of profits on these Famous Five brands?

The Part that Advertising Plays in the Introduction of Aladdin

When approached with a new product the modern dealers' first question is—"What advertising will it get?"

It's a proper question; it shows keen business insight, for the future sales possibilities of the article, depend largely on the answer to that question.

When Aladdin Dye Soap entered the Canadian market there were already a considerable number of household dye products being more or less used by Canadian women.

The Distributors of Aladdin Dye Soap knew they had an article of exceptional merit, and they were determined that the winning of the public's confidence should not be left to time. Consequently the advertising plans for Aladdin were laid with exceptional care and study.

Result—demand for Aladdin has been created on a scale even larger than hoped for. Dealers are supplied with a revolving display stand to link up their store with the advertising campaign and as one dealer puts it, "It's like so much found money."

That the advertising carries the right appeal to women is shown by their instant response; and the merits of Aladdin have been proven by the number of women who return for more. This is where the display stand plays its part—the customer turns this stand till she locates the desired colors, the sale is made and the dealer gets the money without time or effort on his part. Order Aladdin from your Jobber.

The revolving display is free with an order of 1 gross—comes in 18 beautiful colors, sells at 15c cake.

A Superior Product

Every "Samson" Shingle is made of the highest grade of waterproofing materials.

The crushed slate surface, in soft natural shades of red or green, furnishes color to the roof, and at the same time gives it added durability.

Each shingle is made of the highest grade waterproofing materials, measuring 8 x 12¾ inches. Packed in bundles containing 106 shingles. Four bundles, or 424 shingles are sufficient to cover 100 square feet of roof surface, laid 4 inches to the weather. Weight per square, 225 pounds.

UNIVERSAL

"The Trade Mark known in every Home"

Home Needs

When the housewife rolls up her sleeves—

She gets something done. When her face is bisected with a smile, something unusually good is around to make her happy. It isn't always her husband. In thousands of cases the **unusually good** is a **complete equipment** of UNIVERSAL Kitchen Appliances.

Every woman who has a home or has one in the making needs the UNIVERSAL Bread Maker, Food Chopper, Percolator, Iron, Grill—all the things that make kitchen work a pleasure instead of nerve-wracking drudgery.

"The Universalized Kitchen" is a joy-maker for the housewife—a money-maker for the dealer. Every-day needs in the kitchen mean every-day sales in your store. Push UNIVERSAL goods and the trade you want—you'll get.

Two Latches With Selling Points That Make Sales

No. 1240 Barn Door Latch

A durable, common-sense latch with japanned frame and handles, tinned bolt and a sherardized spring of piano wire that cannot rust. A dependable latch that operates effectively and gives smooth, reliable action that wins friends and permanent, lasting trade for the dealer who sells it. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

This desirable latch possesses more points of quality and value—selling points—than any other thumb latch on the market. It is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place.

Packed one-half dozen in a box. 12 dozen in a case. Weight, 190 lbs. per case.

Place These On Your Stock List

IMPERIAL Parawax, Imperial Ioco Liquid Gloss and Imperial Household Lubricant are in constant demand ; they are household necessities.

Imperial Parawax lightens the drudgery of wash days—whitens the clothing—adds laundry lustre to ironing. It is highly valued by housewives in preserving fruit. It seals the jars air-tight, retaining the natural fruit flavors in the preserves.

Imperial Ioco Liquid Gloss renews and preserves all finished surfaces. It gives that desired satin-like finish to fine furniture, automobile bodies, pianos and phonographs.

Imperial Household Lubricant keeps phonograhs, sewing machines, bicycles, lawn mowers, locks, and other household devices working smoothly. Prevents rust. Comes in a handy oiler can.

These products have satisfied customers for years; trade is established. Make sure you have sufficient stock on hand.

Why not use *salesmen* as "specialists"

WOULD it be considered a "stretch of imagination" if one were to picture a troubled superintendent or works manager telephoning a local jobber to "send up Stimson your salesman, as we're up against it on our threading job"?

Such a thing is quite possible.

Threading problems are increasing on account of the larger production and closer accuracy demanded in the screw-cutting industry.

Supply Houses who are "looking ahead" can see the benefit to be derived by having their salesmen educated as "specialists" in screw-cutting problems and are using GTD Threading Specialists as instructors.

Why?

Because GTD specialties such as the "*Gun*" Tap with its shearing-cut and the "*Acorn*" Die with its precision adjustment and increased production capacity are overcoming threading troubles wherever they are introduced, and are raising the prestige of the jobbing houses connected with "GTD" Tools, which means, of course—"more business."

Dealers carrying the GTD line of screw-cutting tools and specialties are entitled to the advice and instruction of GTD Threading Specialists for their sales staff, which enables them to "advise" on threading matters, command the respect and attention of their customers, and incidentally promote further trade.

The "Seafoam"

ELECTRIC POWER

Washing and Wringing Machine

is a common-sense washer and wringer that sells for a price that meets the popular demand. It is a Canadian-made machine that has been giving real satisfaction for ten years. Dealers who have not handled the Seafoam are missing much washing machine business. It can be readily sold to people who are keen buyers—who appreciate value, because they can secure a washing and wringing machine at a reasonable price that is not surpassed anywhere, at any price. The Seafoam does thoroughly all the washing and wringing by power without wear and tear on the clothes, and what machine will do more—even at double the price.

Wrings While it Washes, Washes While it Wrings

SEAFOAM FEATURES

Unsurpassed washing principle—wooden dolley moving halfway around and back forces the hot suds through the clothes and thoroughly washes them in a few minutess.

Cypress tub—nothing to corrode or tear clothes—keeps water hot.

Reversible wringer with highest grade rolls—will start, stop or reverse instantly. Controlled by lever conveniently placed at side of tub.

Safe to operate—as being belt driven the motor is protected against overloading. All gears being covered the danger of accidents is removed. Safe for children to be around.

Simple in construction—does not easily get out of order.

Attractively and durably finished. Shipped complete ready to operate on ordinary house lighting service.

Sell Every Razor Customer

A RAZOR THAT WILL SHAVE HIM

Every man who owns a really satisfactory razor prizes it so highly that he would not part with it at any price. He brags about his good fortune in owning it.

The Hardware Dealer that sold him that razor shares in the good fortune. He gets that man's business every time. The customer is a satisfied customer—the kind that gets to calling the dealer "my dealer."

All because the dealer was careful to sell him a razor that was made for shaving **his** particular kind of beard from **his** particular kind of skin.

The dealer that sells real shaving service would no more think of selling the same kind of razor or razor blades to every customer than he would sell a pair of household shears for trimming a hedge.

There is A Genco Razor For Every Condition of Beard and Skin

Handsome Genco Display Cabinets (as illustrated below) are supplied with assortments of Genco Razors which include a wide variety of styles. A brief but thorough clerks' selling chart is attached to each cabinet and always in sight.

Order one of these assortments from your Jobber and sell each customer A RAZOR THAT WILL SHAVE HIM.

If your Jobber cannot supply you, write us.

Goliath

"Built for Endurance."

Nothing Succeeds Like Success

IT is significant that the more Goliath Spark Plugs we sell the more repeat orders we receive. The demand is phenomenal.

A spark plug is more than mere metal and insulation—it is the all-important transmitter of electrical energy, which determines power, pick-up and that smooth purr of the engine, in which all motorists take so much pride.

Every spark plug you sell influences the minds of your customers, favorably or otherwise towards your business. Experimenting is costly. Goliath Plugs have been "Tested for Service."

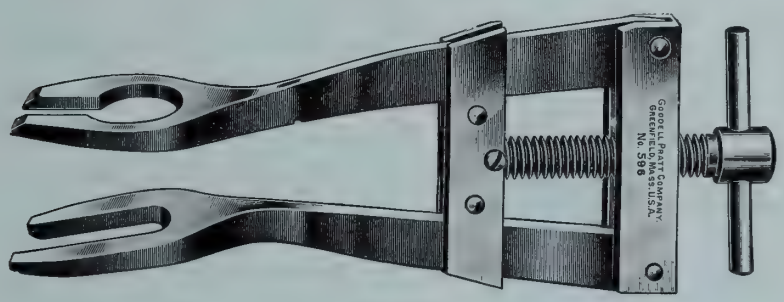
GOODELL-PRATT

1500 GOOD TOOLS

A Valve Lifter

Of Great Power and Strength



No. 596

Every motorist will appreciate the fact that the service rendered him by this improved Valve Lifter cannot be duplicated by any other tool on the market.

This Toolsmith Valve Lifter can be used while working on any and every make of car.

It adjusts to position easily and quickly, and applies a really tremendous leverage without undue effort on the part of the car owner or mechanic. Simply turning the handle does it. The jaws move on hardened rollers, the screw turns on ball bearings. The arms are drop-forged steel. All exposed parts are attractively polished.

Mr. Punch Says:

One of the best friends Hardware Dealers ever had was the man who invented the automobile. Think of all the Accessory business he made possible!

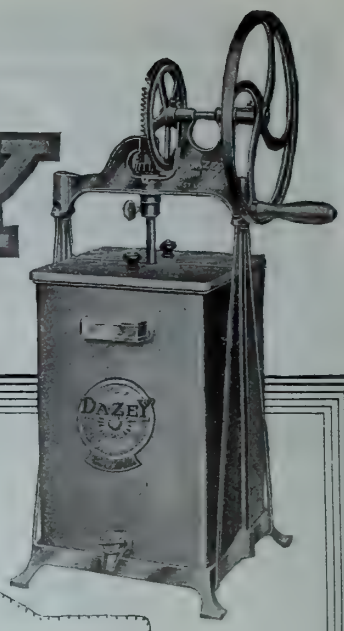
DAZEY CHURNS



Value Convincing Features

The DAZEY incorporates those essential features of a perfect butter-maker — those that are becoming more universally demanded every day.

Apologies are never necessary—but *facts* always.

There is REAL satisfaction in pointing out—

—the *dasher* which produces such powerful agitation that butter is made in 3 to 8 minutes—

—the all-metal *receptacle* which assures perfect sanitation—

—that in *cleaning* receptacle only has to be handled, and how convenient this is—

—then, too, that the DAZEY is substantially built of steel and iron which will last for years.

It is this combination of vital details of construction which goes to make up the DAZEY that appeals to the butter-makers, and that will sell a DAZEY to his neighbor.

National conversion to the "DAZEY SYSTEM" of making better butter means that enterprising dealers are profiting by the demand.

We are anxious to tell you more about the DAZEY and ask that you send for new catalogue showing Glass churns, 1 to 4 quart sizes, and Metal churns 1 to 28 gallon capacities, for hand and power.

Story for Week Dated July 31st 1920. **Hull In 1851.** **Being No. 16 in the Series**

Duck Shooting for the Larder at an Eddy Co. Lumber Camp

IN the life of an E. B. Eddy Company Lumber Camp there is more than merely "saying nothing and sawing wood." Even though the tremendously busy machines of the great plant at Hull keep demanding lumber, and more lumber to keep pace with the call for Eddy Company products, and maintain the marching army of seventy million matches a day, still opportunities now and then occur for a little excursion with gun and game bag into the bush to vary the lumber camp daily bill of fare.

The pictures illustrating this little account of a side line in Eddy Company staff activities show a member of the staff setting forth on a duck-shooting trip, and his return with a brace of fine duck.

To the right are shown a couple of Eddy Company Lumber Camp cooks — the man who can receive a brace of duck with befitting ceremony, and who, even in the wilds of the bush, can supply the sage and onion dressing, for the camp cook is generally a genius with miracles up his sleeve, and always an important personage. This picture was taken in winter, and if you look closely you will find a black cat in the snow at the men's feet.

The lower cut to the right will be familiar to every retail merchant reader of "Hardware and Metal" as an Eddy Indurated Ware Pail, light, strong, durable, an ideal pail for camp or household use. You may be sure the E. B. Eddy lumber camps are equipped with them. They are the goods to recommend to customers in camping season and out of it, just as Eddy's Silent 5's are the matches to recommend to householders or hunters alike.

Winter Scene at One of the Eddy Co Lumber Camps.

"That's the Brace for Me"

says your customer. "It's a Millers Falls. I have one of their hand drills that I've used for over ten years and it's a real satisfaction. Their tools are made right."

Put a Millers Falls tool in your customer's hands. Let him look at it, handle it, get its "feel" and perfect balance. It will be your strongest sales talk.

This inner goodness of Millers Falls tools, their strength, sureness, ease of operation, make them reliable friends of skilled workmen or amateurs. And thousands of skilled workmen and amateurs are being told about Millers Falls tools through a campaign of national advertising appearing every four weeks in the Saturday Evening Post and other publications.

You should get the full benefit of this advertising by handling the full Millers Falls line. Confidence in the tools you sell means confidence in your store—steady customers.

Whether hack saws, braces, hand and breast drills, auger bits, mitre boxes, vises, in and out screw drivers, or any others of our line, you will find that Millers Falls tools make lasting friends for you.

Send for our helpful little handbook "How to Sell Tools"

"That's the brace for me!"

Insert shows ½-page advertisement from the June 26th SATURDAY EVENING POST

Millers Falls Breast Drill, No. 97. "The Mechanic's Favorite" (shown here) is the most complete breast drill on the market. A great time-saver. Five different and distinct actions. Can be used in the most inaccessible places. Its ball thrust bearings give it easy operation and long life. It won't get out of order.

Jobs you can do —yourself

IT is the odd jobs that have to be done around the house and on your car that help run up the cost of living.

Simple jobs, such as putting a horn on your car, are easy if you have the proper tools.

You don't have to be a mechanical genius to drive a nail with a hammer, but you do have to have the nail and the hammer. You can drill holes in wood or metal if you have a drill—otherwise, you have to hire someone who has a drill.

The present-day cost of a single job requiring *only* the use of a certain tool, and a man's time, is often more than enough to cover the purchase price of that tool

Think of "jobs" in terms of the tools required to do them and you will quickly see the common sense of acquiring tools instead of hiring skilled labor to do simple jobs.

Any mechanic, carpenter or hardware man will recommend "Millers Falls" every time when asked about braces, auger bits, hand and breast drills, mitre boxes, hack saws and other boring and cutting tools For fifty years Millers Falls Tools have held the highest esteem of users and sellers of fine tools.

MADE IN CANADA

Westco

A Water System Without a Tank

For operation off Hydro or Farm Light Plant

A New Field for Profit

THE need for such a water system as the Westco is urgent in rural and suburban homes to-day. Wherever introduced it is selling rapidly. For its many interesting and splendid features make instant appeal to the farmer or rural resident who has electricity available.

Get even one Westco System installed in your territory, and it will sell many others. It is a small, compact system, yet absolutely efficient in every detail.

Its chief selling features are:

(a) It has no supply tank.
(b) Simplicity of construction; no complications possible.
(c) Pump has only one moving part—the impeller. Nothing to wear out, except one bearing, which will last for years.
(d) Cheap to install, maintain and operate.
(e) Entirely automatic.
(f) Has no tank, no valves, no gears, no belts, no springs, no oil or grease cups, and it is self lubricating.
(g) Uses less power than Electric iron while supplying water for four faucets.
(h) Pumps 300 to 500 gallons per hour.
(i) Size 16½" long, 14½" wide and 11" high, weighs less than 100 pounds.
(j) Opening of any faucet starts pump; closing of faucet stops it at once.

If your territory is still open, write us at once for full particulars and details of this splendid selling water system.

Westco Pumps Limited

JACOBS CHUCKS

---it's what your customer gets out of them

The dealer who sells Jacobs Chucks is selling his customer better drilling—better, because of the greater efficiency, convenience, ease of handling, and economy in the operation of his drills.

This better drilling is what the man who buys chucks is looking for. Why not give him what he wants, or inform him as to what he needs?

That's why Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most profitable line.

Heats Water in a Minute

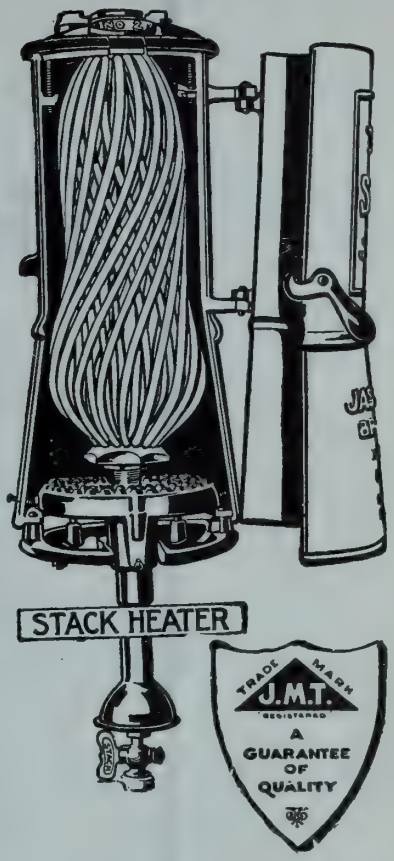
STACK HEATER

Less Gas

The network of small pipes exposed to the hot gas flame will heat water quicker than it would in one large pipe because of the greater heating surface offered. Heats water in a minute; show your prospect. No technical knowledge is necessary to see the advantages of the Stack Heater.

Best for you. Best for your customer.

Send for a Stack Heater Display Card



The James Morrison Brass Mfg. Co., Limited

93-97 Adelaide Street West, Toronto, Ontario

Performance Counts

BURMAN CLIPPERS

Are made for clipping horses and for shearing sheep. They are made of the best materials procurable, by the best skilled workmen it is possible to engage, and by a large company who manufacture only clippers. Never has expense been spared if there was possible the slightest improvement in quality or cut. That means a tremendous lot to the hardware merchant.

YOU DON'T HAVE TO BUY A NEW HEAD

PLATES ARE INTERCHANGEABLE

BURMAN CLIPPERS

Are the acme of perfection when it comes to performance. They cut clean. Heavy work does not frighten the "Burman"; they handle the heavy, tough hair well, giving every service and satisfaction to the user.

One important point for the dealer is that plates are interchangeable, that is, when the purchaser wants to shear sheep he simply requires to change the plates. This does away with the old necessity of buying a new and costly head.

YOU DON'T HAVE TO BUY A NEW HEAD

Building Revival Stimulates Tool Trade

Substantial Increase in Building Throughout Canada—Scarcity of Skilled Tradesmen Forces Property-Owners to Do Repairing—Tools Are Backbone and Sinew of Hardware Trade—Dealers Who Substituted Newer Lines During Slack Years Should Now Push Sales of Good Tools.

THE season for tool selling is now in full swing, and while building in recent years has not been very brisk, yet much construction is now being undertaken despite high costs, it being realized that a fast-growing population must be housed at any price. The stagnation of recent years is passing, to a large extent, and this statement is confirmed by statistics. The pronounced improvement in building figures of the Dominion for the early months of the year has been well maintained for the month of June, the building totals for the month, standing at $13,287,300 as against $7,138,468 for the corresponding month a year ago. Building totals for the half-year period are double the returns for the corresponding period last year and total $59,691,699, while the returns for the first half of 1919 were $28,252,203, the returns this year therefore being in excess by $31,439,496. This increase is due in small measure to the higher prices prevailing for practically every form of building material this year, but the returns are a guide to the development in building in this country.

All Parts of Country Figure in Increase

As to what portions of the country are benefiting most from this building revival it is noted that for the 28 Eastern cities, permits issued totalled $10,011,277 for the month as against $5,798,763 for June 1919. There has been an extensive

The windows are a big help in stirring up action in favor of the use of tools. Here is a well arranged window of tools used by a hardware dealer in connection with local advertising. For the past few years there has been a tendency to relegate the tools to the background in favor of some lines newer to the hardware trade. Don't forget that builders' tools have been the backbone and sinew of the trade for many long years and with the revival of building this line is again coming into its own. Do your part by the extensive use of windows, advertisements and sales talk, to encourage the wider use of good tools.

revival in the West also, as indicated by the total of $3,267,123 for the 15 cities as compared with $1,339,705 last year. Toronto and Montreal are both well in the lead, Toronto's returns totalling $2,-656,193 and Montreal's $2,440,983. Winnipeg also has made a rapid advance, permits reaching a total value of $1,236,-450 as against $22,900 last year. Halifax leads in the Maritime Provinces with a total of $489,435 as against $213,300 for St. John and $163,210 for Moncton. The city of Sherbrooke also has entered upon a period of activity, totals standing at $639,703, as compared with $39,-000 last year. Other centres in the East which are carrying out extensive building programs are: Quebec City, $332,-990; Hamilton, $452,775; and Windsor, $342,290. Ottawa, witha total of $224,-600, is considerably behind last year's figures of $856,205. Vancouver made progress last month, however, with a total of $236,630 as against $62,921 last year. York township continues its steady development with permits totalling $560,000, an increase from the return of $417,800 a year ago. The smallest return is reported by the city of North Battleford, permits issued last month being valued at $625, and for the corresponding period a year ago, $490.

Building Industry in Healthy Condition

These figures indicate the true condition of the building industry in Canada. It is in a healthy and fast-developing stage and it is time for the dealer who put builders' hardware in the background during the war period and since the armistice, to again bring it to the fore and do his part in convincing people that building should be proceeded with under the circumstances. Hardware dealers have been busy during the past few years selling lines which are newer to the trade than tools and builders' hardware; some have adopted furniture, bedding, etc., in place of what was formerly the bone and sinew of the trade. While these new lines are quite in order if they are making a profit, yet the revival of building fully justifies a little more attention to the tools and hardware end of the business.

Two-thirds of Carpenters Have Not Complete Tool Set

Men in the building trades are busy these days; it is very difficult to get skilled help. They are getting a fair remuneration for their work and are therefore prospects for the purchase of good tools. As an ordinary condition it might safely be said that two-thirds of the carpenters in Canada are not the possessors of a complete tool kit. New tools are constantly coming on the market which help to lighten labor. Two tools now do the work the one tool formely did, but it is done in half the time. The production of tools is an industry which has progressed rapidly during the past years, while the building trades, which have been more or less stagnant, are as yet little acquainted with the progress which has been made.

The present season has been a good one for the hardware trade. Sales of automobile accessories, paints, gardening tools, etc., have been in good volume. And now that these lines are passing to a quieter season, building tools come forward with a large and fruitful field awaiting development.

Houseowners Doing Odd Repairs

Not only are the skilled tradesmen prospects for the sale of tools, but also the houseowner who takes enough interest in his house to do a little fixing. There are campaigns under way to economize property values by the adequate use of paint as a protection. Making a few repairs around the house will make the advantages from the use of paint far more lasting and the result will be more pleasing. Summer resort season is also at hand and there is always a good deal of fixing to be done around summer cottages. Strange too how many people forget to bring their tools with them when they go away for summer holidays and this is a harvest for the dealer fortunate enough to be located near the resort. And don't forget it always pays to sell good quality tools. The amateur tool user will be far better satisfied with his work and therefore a much better prospect for future sales of tools if he has good tools and does a good job. And under present circumstances it pays to encourage the houseowner to do his own repairing. Skilled tradesmen are so difficult to secure that they are inclined to pass up the little odd job around the house and it more or less devolves upon the owner to do the work himself if it is to be done within a reasonable time.

Encouraging the houseowner to take an interest in his tools and set up a workshop on a small scale in the basement of his home will do much to increase the sale of tools. There are a limited number of tradesmen who earn their living by the use of tools, and the tools they buy do not wear out in a day, so that new fields have to be developed in order to increase the volume of tool sales. Circumstances were never more opportune for encouraging the property owner to a wider application of his own energies to work of this kind, in combination, of course, with good tools.

WEST END HARDWARE WEST END HARDWARE

SATURDAY SPECIALS

GOOD VALUES IN TOOLS

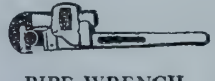
FOR SATURDAY

AUTO STEEL WRENCH

Everyone should have one of these wrenches, very handy and the price so reasonable, only **75c each**

WESCOTT WRENCH

One of the most useful wrenches made. All mechanics buy this wrench, 8 inch, goes at **$1.50 each**



PIPE WRENCH

Why not buy one of these pipe wrenches for yourself and stop borrowing from your neighbor, 10 inch goes at **$2.50 each.**

BULL DOG WRENCH

A well named wrench, will hold like a bull dog on round pipe or square nuts, very handy to have one around the house, price only **35c each.**

VICTOR WRENCH

Most useful wrench on the market. You can get at places with this wrench where you can not touch with others and the price is only **$1.75 each.**

AUTO PLYER

This plyer is known the world over as an indispensible tool, every car owner must have one. Price only **75c each.**

WIRE PLYER

Made of drop forge steel, most useful tool around the house and farm, to go on Saturday at **90c each.**

YANKEE SCREW DRIVER

One of the finest tools on any market, the Yankee is known the country over, hard to do without, one of these, better have one on Saturday at **$1.50 each.**

YANKEE DRILL

Most complete hand drill made, can bore into a corner without turning the handle all the way around. Make your kit complete by adding one of these. A few left at **$5.50 each.**

FRED W. KARN

Ads. such as this one by Fred. W. Karn, Ingersoll, Ont., are ones which greatly help to stimulate interest in tool buying. There have been too few of this kind of advertisements used by hardware dealers in recent years, due undoubtedly to abnormal conditions. Link up the ads. with the window displays now that building revival is taking place and see what it will do for you.

A Call to Sportsmen to Go Fishing and Hunting

A novel suggestion, conveyed effectively through the window display, suggests to the sportsman that the fishing season is here and that he should be fishing. The trim was arranged by the Kingan Hardware Co., Ltd., Peterborough, Ont., and was the centre of much interest.

It will be noted that a stump has been placed at the edge of an artificial pond and on the stump rests a little man holding a fishing rod under his arm and the line in his hand, appearing to catch the live fish that are swimming around in the running water. Trees surround the pond, bearing out the suggestion of an ideal fishing spot, and attempting to resemble some nearby haunts where favored by local sportsmen.

The attractions at the other end of the trim are the arrangement of fishing poles, fishing tackle-box of assorted tackle, fish baskets, nets, landing hooks and different kinds of bait. A few guns have been placed in the background as a gentle reminder that a gun usually has its place on a fishing expedition. The entire background is trimmed with sporting pictures and green boughs.

Such a window as this carries the strongest appeal to those it is desired to reach and the results of such trims are generally sufficient to justify the time and energy spent on their arrangement. In this case they were.

EDITORIAL COMMENT

WHY LEGITIMATE RETAILERS WANT LICENSES FOR EVRYONE ENTERING THE TRADE

A PROFESSED "merchant" of an Ontario village is endeavoring to conduct his business in such a way as to emulate the Hebrew of biblical history who sold his birthright for a mess of pottage. A recent advertisement by this dealer dealt with a clearing sale in which this statement appeared:—"All the above will be sold at a discount of 5 per cent. during the First Week in August; 10 per cent. during the Second Week and 15 per cent. during the Third Week. And 20 per cent. or no reasonable offer refused during the last week in August."

It is because there are so-called merchants of this type in business that legitimate retailers are calling for concerted action to have a closer scrutiny put upon those who wish to enter the trade. Practice of this kind not only reflects upon this individual but upon all other bona-fide retailers who are doing their best to serve the public. At the present time there is too much superficial sentiment against the retailer as the "root of the high price evil," and such indiscriminate and ridiculous advertising only tends to confirm in the public mind the idea that the retailer is making exorbitant profits when he can make such drastic reductions.

Cash and other special discounts are quite within the realm of judicious merchandising when applied by an intelligent retailer who knows enough to allow himself a fair margin of profit at all times. But the pyramiding of a scale of discounts ranging from 5 per cent. to 20 per cent., according to when the goods are bought, within a period of one month, concluding with the statement that no reasonable offer will be refused, tends to put modern merchandising methods in the category of the ridiculous.

GERMAN PRACTICE DISCREDITS ENGLISH AND U.S. CUTLERY, RAZORS, FILES, ETC.

A REPORT appears in this issue that German razors are again on sale in Canada though at greatly increased prices. Commenting on the efforts of Germany to again secure a place in the world's markets, an English authority makes the important statement: that Germany is dumping its surplus of inferior trade stocks in England and America and is marking its exports to England "Made in America" and its exports to America "Made in England." He remarks that this practice is being followed to realize quickly a great sum on manufactured articles which it could otherwise not sell because of popular prejudice. There is no question, however, such a practice is discrediting to American manufactures in England and to English manufactures in America. The chief lines thus offered are cutlery, scissors, razors and files. It is stated that two German firms located in Glasgow were each fined $100 for selling German razor blades trade-marked "Made in America."

Sheffield steel manufacturers are reported to be rushing inspectors throughout Britain to check retailers' stocks and to detect forgeries. The Government has ordered prosecutions to be made. It is stated that the trade has direct evidence that Germans are shipping wares marked "Made in America," and intended for English consumption, to New York from Hamburg, where they are transhipped to Liverpool from New York and seemingly arrive in the ordinary course of trade in the United States. A big trade has similarly developed in the middle Near East, especially in Egypt and India and it looks as though Germany was out to recover its grip of the world's markets at any cost.

ENGLISH PRODUCTION NOW LARGELY DEVOTED TO STAINLESS STEEL

THE demand for English stainless-steel cutlery is so great that the output is now, to a great extent, limited to this class of cutlery. Large quantities of the ordinary kind are wanted but men prefer to work on the stainless, as the rate of remuneration is greater. Orders for many thousands of dozens of ordinary table knives are being held up, as the demands for stainless keep the operatives nearly fully employed.

Electroplaters are unable to get enough bottles for the cheaper grades of cruet sets. Deliveries from Bohemia have increased, but the prices are as high as for British-made.

Outlines Hardware Association Plans

Valuable Service to Be Rendered Members of Ontario Retail Hardware Association Through Efforts of Permanent Secretary—Price Service, Collection Bureau, Freight Audit, Complaints, Information, District Meetings, Part of New Plan.

PROGRESS is being made in connection with extending the service to the trade by the Ontario Retail Hardware Association through the medium of a permanent secretary. In this connection the following letter to association members from the president is of interest:

To The Retail Hardware Trade of Ontario:

Dear Sirs,

At our convention in February last, the consensus of opinion was that our association should have a permanent secretary, who could devote his whole time and energy to the one object of rendering service to the retail trade of the province—and a resolution was passed recommending this step.

Your executive have been fortunate in entering into an agreement with our present secretary, W. F. Macpherson, to take up the work of permanent secretary as soon as he can arrange to dispose of his present business.

Mr. Macpherson has exceptional ability for a position of this kind, with many years of experience in the retail trade, having conducted most successfully for the past twenty years a hardware business in the town of Prescott, with another seventeen years' experience prior to entering business on his own account.

With the time at his disposal to devote wholly to the service of the Association, his energy, initiative and ability will, I am sure, prove of untold benefit to the retail hardware merchants of our Province.

Present trade conditions are such that the need must be apparent to all of us, of a strong, active organization to look after our interests, and the step proposed will, I am satisfied, be the means of realizing that long-felt want. Manufacturers and jobbers have their respective organizations, and we frankly admit their strength in protecting their own interests. With united effort the retailers can wield an influence just as effective, and have an organization just as strong in the protection of their own interests.

Some of the proposed services (any one of them worth the membership fee) are outlined in the enclosed circulars. I would ask you to consider them carefully and advise me on the enclosed card of your interest and co-operation, also any suggestions you wish to make.

Yours very truly,
ED. WANLESS,
President.

PRICE BOOK.—The services mentioned in the letter include the furnishing of a price book to be a loose leaf binder 11 x 8½ inches with heavy canvas cover and leather corners. Ex and expander bolts, with a capacity of 1,000 pages or over. A canvas tab index will also be supplied.

PRICE SERVICE.—This will consist of a complete cost service (sheets to fit binder) covering retail hardware stock—general lines—revised and kept up-to-date. Members will have the right and will be requested to ask for sheets covering any special lines desired. Where possible, the necessary retail prices will be shown to obtain profits on sales at stated overhead costs.

SALES BUREAU.—Members will be asked to submit on forms supplied, lists of goods which they wish to dispose of on account of overstock or any other reason. These lists will be circulated throughout the trade weekly, and should be effective in disposing of overstocks or stickers.

COLLECTION BUREAU.—Collection letter forms will be supplied members and the assistance of secretary's office will be given to aid members in making collections of outstanding accounts. This branch can be readily expanded.

FREIGHT AUDIT.—With sufficient membership to warrant, an audit of freight bills will be made for members by a qualified freight clerk. Thousands of dollars are collected in the U.S. annually, from overcharges through wrong classification, wrong rates and wrong weights.

TRADE COMPLAINTS.—Complaints against manufacturers or jobbers will be taken up through the secretary's office. Adjustments will be more probable and the deterrent effect on offenders will be to the benefit of the whole retail trade.

INFORMATION.—The secretary's office will be glad to give information or procure it, covering any desired line of goods. Catalogues and price lists will be kept on file as largely as available with this end in view.

DISTRICT MEETINGS.—With the approval of convention a series of district meetings will be instituted in different sections of Ontario, to be attended by secretary and members of executive, to discuss matters arising from local conditions, as well as general topics of interest to our particular branch of trade.

ENLARGED SERVICE.—Every effort will be made by the executive and secretary to enlarge the scope and service of the association and suggestions from members will always receive earnest attention.

COST OF SERVICE.—The executive, after carefully considering cost of administration, travelling and office expenses and supplies, estimate that with proper support the service outlined can be given for an annual fee of $15, subject to ratification of convention.

CANADA'S ELECTRICAL-APPARATUS INDUSTRY

Figures of the industrial census taken by the Canadian Board of Statistics show a total of 68 plants engaged in the manufacture of electrical goods of various kinds, 42 of them being located in Ontario, 13 in Quebec, 7 in Manitoba, 3 in British Columbia, 2 in Alberta, and 1 in Saskatchewan. These 68 plants represent a total capital investment of $43,285,405—Ontario leading with $26,426,129, Quebec following with $16,525,454, Manitoba being credited with $253,026, British Columbia with $42,881, Alberta with $19,736, and Saskatchewan with $18,179. Of the total capital $10,635,572 was invested in land, buildings, and fixtures, $6,518,132 in mchinery and tools, $17,071,528 in materials, stocks in process, finished products, fuel and miscellaneous supplies on hand, and $9,059,173 represented working capital. In 1918 the industry had 6,595 male and 2,268 female employees, to whom it paid $8,456,705 in salaries and wages. The selling value at the works of all articles produced during the year is shown by the census returns to have been:—

Products—	Selling value at works
Dynamos, generators, and converters	$1,503,443
Transformers	2,291,874
Switchboards, panel boards, and cabinets	990,898
Motors of all kinds	2,727,673
Storage batteries	212,624
Primary batteries	1,397,635
Incandescent lamps	1,924,745
Sockets, receptacles, bases, etc.	415,855
Electric light fixtures of all kinds	311,844
Telegraph apparatus	71,230
Telephone transmitters	50,000
Telephone receivers	95,000
Telephone interior systems	444,000
Telephone central switchboards	750,000
Telephone private exchange switchboards	110,000
Insulated wires and cables	5,154,984
Electrical machinery of all kinds	1,738,085
Carbons	1,362,666
All other	8,492,843
Total selling value	$30,045,399

EVENTS IN THE TRADE

Obituary

Portneuf, Que.—J. Roger Fournier, hardware merchant, is dead.

Business Changes

Collingwood, Ont. — Ferguson & Wheatley, Ltd., hardware, autos, etc., have sold their hardware stock to Latimer & Johnson.

Would Limit Use of Natural Gas

Bridgeburg.—The Provincial Natural Gas Company, as anticipated for some time, is now seeking to have the use of natural gas limited to cooking and water-tank heating during the winter and fall months.

Cement Orders Cancelled to Conserve Fuel

Brantford.—All the cement orders have been cancelled throughout the province except for rare cases that are absolutely necessary to be finished. Only one cement company is turning out material just now on account of the lack of fuel and orders for roads as well as for buildings have been cancelled.

Picnic of Canadian Westinghouse Company

Hamilton.—The annual picnic of the Canadian Westinghouse Company was held to Grimsby Beach on Friday, July 23. A very interesting list of sports was prepared by the committee. The 91st Highlanders' band was secured for the day, and after accompanying the first train to Grimsby, gave an extended concert in the park there.

Wm. R. Hargan's Death

Ingersoll.—From the effects of paralysis, the death occurred this week of William Richard Hargan. He came to Ingersoll from Seaforth, and up to a year or so ago was employed by the John Morrow Screw and Nut Company. He was in his 76th year. He is survived by two daughters, Misses Mabel and Eva, at home; one son, J. Edgar, works manager of the John Morrow Screw and Nut Company, and three sisters.

Kasement Skrene Dore Co.

Kasement Skrene Dore Co., which for some time past has been located on Church Street, Toronto, has purchased much larger building and property at 269-271 Richmond St. W., Toronto, and expect to move to the new location about Aug. 15. The new buildings will provide much larger quarters with additional room for expansion.

MANUFACTURERS TO MAKE ANNUAL RETURN OF SALES TAX AS AFFECTING RETURNABLE PACKAGES

Owing to the fact that the sales-tax regulation applying to returnable packages, in its original form, created unnecessary labor and expense to manufactures who ship goods to their customers in returnable packages, representations were made by the C.M.A. and a ruling made that manufacturers dealing in goods shipped in returnable packages may make to the Government, not later than the end of March in each year, an annual sales tax return as to such packages, instead of monthly returns; and the sales tax so payable to the Government by the manufacturer shall be paid on the difference between the amount charged for the returnable containers shipped during the year and the equivalent amount rebated for containers returned during the same period; and it shall be optional with the manufacturer to charge the sales tax on the value of returnable containers in invoices to the purchaser subject to credit when returned, or to pay such sales tax himself.

Will Consider Freight and Express Rates Increase

A hearing will be held in Ottawa on August 10th as to the proposed increase in freight rates. On July 9th the Railway Association of Canada, on behalf of member railways filed an application for an increase of 30 per cent. in freight rates. The Transportation Committee of the C. M. A. have decided to retain counsel to assure the proper consideration of the question to the end that any increase allowed must be based on a proper statement of the actual conditions of the different railways. Special consideration will be given to the effect of percentage or horizontal increases on the rate bases, different localities, markets, existing unreasonable and discriminatory rates as well as difference in increase between the East and the West.

The Express Traffic Association of Canada has applied for permission to increase existing rates by 40 per cent.

Hang on to Stove Pipe Stocks

Montreal. — "Hang on to your stove pipe stock," is the advice given to Hardware and Metal by a leading manufacturer. "Canada plates are scarce and hard to obtain and the prices are high. Those who have stock should not sacrifice it."

The great difficulty of obtaining more than meagre supplies of Canada plate has been pointed out in Hardware and Metal of late and there is little likelihood of conditions soon improving. There is bound to be difficulty in getting "repeats" on these lines this fall.

Annual Outing of Dunlop Rubber Co.

A unique feature at the Dunlop Rubber Company's outing this year was the meeting of Dunlop Canada and Dunlop America on the historic grounds of Niagara.

Dunlop America, Ltd., is the big new rubber industry launched this year in the United States by the Dunlop rubber interests of England.

When the outing of the Dunlop Tire & Rubber Goods Co., Ltd., was being planned in Toronto to Niagara-on-the Lake, the suggestion was made to have the employees of the Dunlop America cross over from Buffalo into Canada and hold one big day with their brother rubber men on this side of the line.

The upshot of the suggestion was a series of games—and a medley of sports in general—in which the employees of both companies and their families took part.

Purchase Approved

Brockville.—At the special general meeting of the shareholders of Canada Foundries and Forgings Company last week approval was given to the recommendation of the board of directors of the enterprise involving the acquisition of the Mann Axe and Tool Company, of St. Stephen, N.B.

If certain negotiations now being conducted with the municipality of St. Stephen are carried to a satisfactory conclusion, it is stated, the Mann plant at that town will be rebuilt without delay. The business will be conducted under the name of the Mann Axe Company, in which Canada Forgings will own a controlling interest.

NEWS OF WESTERN CANADA

Dominion R.M.A. Ask More Rigid Customs Inspection at Border Cities

Dominion Association Will Now Be Known as National Association of Retail Merchants of Canada—Important Resolutions Passed at Annual Convention in Vancouver Last Week.

Staff Correspondent Hardware and Metal

VANCOUVER, July 26.—Assembled in the Hotel Vancouver, the president, J. A. Banfield, of Winnipeg, opened the 15th annual convention of the R. M.A. of Canada at 10.30.

His Worship, Mayor Gale, of Vancouver, extended the welcome of the City of Vaucouver. Mr. McRobbie, B.C., member of the Dominion Board; "Mat" Phillips, of New Westminster, the new British Columbia president, and R. M. Miller, president of the Vancouver branch, all supported the Mayor in the kindest terms. John M. Bentley and W. J. Hougood, of Halifax; T. A. Getz, of Red Deer, Alta. (Alberta president); S. E. Fawcett, of Saskatoon; B. W. Ziemann, of Preston; W. B. Ball, of Assiniboia, Sask., and John G. Watson, of Montreal, all replied in fitting terms. All of the visitors were lost for adjectives to describe their impression of the vastness of the Western Empire they crossed to reach the convention. That's the big thing about these conventions. They permit a few of the influential citizens in various parts of our great Dominion to learn what they did not know about their neighboring provinces, and the conditions under which their fellow retailers are working.

The roll call of officers found all present with the exception of the treasurer, who wrote regretting his absence owing to circumstances over which he had no control.

The accredited delegates registered were as follows:—

J. A. Banfield, Winnipeg; Jno. G. Watson, Montreal; E. M. Trowern, Ottawa; Jno. M. Bentley, Halifax; W. J. Hopgood, Halifax; S. E. Fisher, St. John; Robert Strain, Woodstock, N.B.; Walter G. de Wolfe, St. Stephen, N.B.; T. A. Gaetz, Red Deer, Alta.; Jos. Killas, Medicine Hat, Alta.; F. E. Raymond, Saskatoon, Sask.; S. E. Fawcett, Saskatoon, Sask.; J. H. Curle, Manitoba, Secretary; M. J. Phillips, New Westminster; B. W. Ziemann, Preston, Ont.; W. C. Miller, Toronto, Ont.; D. W. Clark, Toronto, Ont.; W. P. Ball, Assinniboia; Geo. H. McRobbie, Vancouver; Geo. S. Hougham, Vancouver; D. H. Kent, Vancouver.

Mr. and Mrs. W. S. Inglis, Winnipeg; J. A. Peters, Woodstock; T. A. Beacock, Woodstock; Lorne Kressy, Kipling; Frank Schroeder, Jonson, Sask.; Jos. Tate, Raymore, Sask.; A. G. McLean, Raymore, Sask.; A. J. Humphries, Raymore, Sask.; J. R. Homer, Saskatoon; G. A. Smith, Halifax; T .G. Watson, Montreal; Mr. and Mrs. L. B. M. Wright, Assiniboia; G. Craddock, Assiniboia; W. P. Ball, Assiniboia; L. Maze, Assiniboia; J. S. D. McNaughton, Mossbank, Sask.

J. A. BANFIELD,

Of Winnipeg, who has been re-elected President of the National Association of Retail Merchants of Canada.

President's Address

President J. A. Banfield presented his address reviewing the year's work as follows:

Gentlemen:

It gives me great pleasure to meet you again at our annual convention on the Western coast of this great Dominion, in this beautiful city of Vancouver, and to present to you my first annual report. Had I known at the time you honored me by electing me president of the Dominion Board and the Dominion Executive Council, that the duties in connection with this office were so far reaching and of such an important character to the retail trade of Canada, I would certainly have hesitated before accepting the office. I think that every retail merchant would admit, whether he is a member of our association or not, that the year through which we have just passed has been one of the most strenuous years in the history of the retail trade.

How the situation could have been met without an association such as ours — which reaches from coast to coast—is difficult to comprehend. In past years, when we were all busy trying to arouse interest in and to point out the necessity of every province being organized, little did we realize what it meant until the time arrived for united action.

Must Double Efforts

We must all be pleased with the results of our efforts, but we must remember that we have only laid the foundation. From now on we must build the superstructure, and in order to do so it will be necessary to more than double any efforts that have been made in the past, no matter how great they have been.

Personally I have great faith in the principles upon which this association is founded and the excellent character of the men who are associated with it. Its aims and objects reach out toward higher ideals in retail distribution. We ask for no special privileges, no attempts to take advantage of any other class, but an earnest effort to serve the public in the best and most economic manner, and to eliminate from the retail trade all methods of a deceptive or unethical character. These are ideals that I am sure the great body of retail merchants in Canada are aiming to achieve. To accomplish them we must make every effort to enroll more members into our association, and this can only be done by individual effort on the part of all the officers and all the members, and should not be left entirely to the paid officials of the association. I must frankly confess that the more time I give to the work of the association, the more work I find there is to do.

It must be remembered that the members of the Dominion Board and of the executive council are all engaged in looking after their own individual business, and receive no remuneration, and I am sure that we would all like to give more time to the association work if it were possible to do so.

Great Progress Being Made

During the past year I have attended a great many meetings of the association, and among others, I attended, by invitation, two conventions of the Saskatchewan Provincial Board, and I am pleased to re-

port that excellent progress is being made in that Province.

I also attended, by invitation, the annual conventions of the Provinces of New Brunswick and Nova Scotia, and I found excellent progress being made in those provinces. I visited also the city of Vancouver, and I was pleased to find great progress being made in this city and throughout the province of British Columbia. I have also kept in close touch with the work of the Manitoba Provincial Board and am pleased to report progress there.

On my way East I twice visited the office of the Ontario Provincial Board, and was pleased to find the work of that province progressing in a satisfactory manner. I also visited the office of the Quebec board while passing through Montreal, and found that their membership is increasing and there is every indication of excellent progress.

In addition to these I visited the head office at Ottawa four times during the year —once in connection with a special meeting of the Dominion Board held in the month of January, 1920; once in connection with interviewing the Government regarding the Board of Commerce; once in connection with a consultation with the secretary and treasurer of the Dominion executive regarding the proposed system of taxation by the Government, and again to attend the National Industrial Conference, as your representative. I also attended a meeting of the Western executive council in Regina for the purpose of assisting in its organization.

Widespread Activities

In addition to these various visits I have received and replied to a great deal of correspondence from the head office at Ottawa, and provincial offices in reference to the work of the Dominion executive council and the Dominion Board. In this connection I desire to state that very few members have any idea of the activities and importance of the Dominion office, only those who have an opportunity of following the work that is being done.

As the association grows in strength and members, in my opinion provision must be made for an increase in the revenue of the board. A resolution will come before you for your serious consideration to amend the constitution so as to increase the present per capita tax paid to the Dominion Board from one dollar to two dollars per member. To pay this additional amount may be difficult for some of the provincial boards unless they increase their membership fee, but we must bear in mind that if we want a continuous and increasing service from the Dominion office we must make provision for an extra assessment, and the more we improve the financial condition of the Dominion office the better the service the provincial boards will receive for their members.

Raising a Welfare Fund

You will also be asked to consider a resolution whereby this convention will discuss the advisability of raising an "organization and legislative welfare fund" of fifty or a hundred thousand dollars from those retail merchants throughout Canada who can contribute extra sums beyond their membership fee for the purpose of assisting in the organization work in every province, and also for the purpose of having funds in hand, when required, to more effectually assist in opposing any legislation of an injurious character or promoting legislation of a necessary character.

I might say that recently the manufacturers found it necessary to raise a fund of one million dollars for similar purposes, and so also have the labor union bodies and the farmers' organizations.

For years, as you know, our organization has been engaged in a great educational work among the retail trade that has cost time and money. In addition it has cost a lot of money to lay the foundation and equip our provincial offices and the office of the Dominion Board. Add to this the large sums of money we have spent in defending our members against injurious legislation, and there is no wonder that we require a fund for the purpose above mentioned. This is a matter that will require your careful consideration and action.

If it is your wish that such a sum as mentioned should be raised and if the securing of this money could be coupled with the formation of a special committee consisting of those retail merchants who could spare sufficient time from their business on occasional times to address meetings of retail merchants in various parts of Canada, and who would know that their expenses were taken care of, I thoroughly believe we could send a call out to the retail trade of Canada that would bring every self-respecting retail merchant into our ranks.

Must Defend Himself

The defence of the retail merchant must be made by the retail merchant himself. The day for sitting down and expecting the other fellow to look after us has gone never to return. We who have our money and our time invested in the retail distribution of merchandise must be awake to our position and we must be prepared to sacrifice our time and our efforts. The strong must come to the defence of the weak. Our plan of organization is based on sound principles; your money is sunk in Provincial and Dominion Board equipment. You have faithful and loyal secretaries and organizers in every province. The foundation stone is laid and I hope that before we leave this convention that every man will go home pledged to greater effort and greater sacrifice, and we can then build on what we have founded, an organization of which not only every retail merchant in Canada will be proud, but our customers, who are the general public, can feel assured that as long as this organization lasts their interests will be properly protected.

In closing, I desire to express my high appreciation of the excellent assistance that has been rendered by my fellow associates on the Dominion executive council, and thank you for your close attention. (Prolonged applause.)

Secretary's Report

Vancouver, B.C., July 22nd, 1920.

To the Officers and Members of the Dominion Board and the Dominion Executive Council of the Retail Merchants' Association of Canada.

Gentlemen:

Owing to the fact that the annual meeting of the Dominion Board this year is held four months later than it was held last year, and in order to cover the entire period between the holding of last year's convention and this year's, the report of

WILL INVESTIGATE PROFITEERING COMPLAINTS

The following resolutions were passed at the annual convention of the National Association of Retail Merchants of Canada:—

That it is the opinion of the members of this convention that the time has arrived for the establishment of a publicity bureau at the head office of our association at Ottawa, for the purpose of sending out notices to the trade press, and to the daily and weekly newspapers, notifying them of our activities, and submitting to them articles which would educate the public on the necessity of the retail merchants.

That whereas a great many statements are being made by men in public life setting forth the enormous extent to which, in their opinion, profiteering is being carried on in Canada, but who so far have failed to name the guilty parties or to take any definite or legal action to prevent the same. And whereas we believe that general statements of the above character, made without any true knowledge of the existence of the same, have a bad moral and commercial effect on the trade of Canada, we, as members of the Retail Merchants' Association of Canada, ask the aid of our customers to assist us by sending to the secretary or to any officer of our association in any city, town, village or province throughout Canada, or to head office of the association in the Banque Nationale Building, Ottawa, any complaint they may have, no matter how small, of any profiteering or over-charging, and we, as an association, will appoint a committee of well-known, honorable retail merchants, and allow the accuser to appoint a similar committee of any persons he may choose, to examine fully into any charge that is made, free of all costs to the accuser, and if we find any case of profiteering among any retail merchants, non-members or members of our association in any part of Canada, we will undertake to prosecute them to the fullest extent of the law, with all the publicity that such action would entail.

That instead of placing the collection of the Luxury Tax on the retail trade it should be collected at the source of supply, namely, from the manufacturer and importer, and in this way it would be absorbed in the same manner as all systems of taxation are absorbed.

That this association favor a "Made-in-Canada" campaign.

That more rigid Customs inspection at border cities be urged.

That the Dominion Retail Merchants' Association be henceforth known as the National Association of Retail Merchants of Canada.

That an effort should be made to have the gold and silver inspectors supervise the False Advertising Act, and to see that the same is enforced.

That this association ask for local provincial option in regard to fire insurance arrangements.

That the press be admitted in future to Dominion Board meetings.

That more care and effort be put in the work of display in members' stores.

That the next meeting place for the association be in Winnipeg.

this, the 15th annual convention of the Dominion Board of our association, covers a period of 16 months instead of 12.

On January 13th and 14th of this year a special meeting of the Dominion Board was held at Ottawa regarding certain orders which were made by the Board of Commerce and which we considered to be very objectionable to the retail trade. Copies of the minutes of this special meeting, together with copies of the minutes of the last annual meeting of the Dominion Board held in Ottawa on March 17th, 18th and 19th, 1919, have been placed in the hands of every member of the Dominion Board and, consequently, it will not be necessary for me to refer at any length to the proceedings of those meetings.

End Restrictions With War

Upon the termination of the great world war I am sure that every retail merchant felt that we had arrived at the completion of the period over which the Government placed restrictions of an unusual character regarding retail distribution. In this it appears that we were mistaken. Not only have we been restricted to an unusual degree through the actions of the Board of Commerce, but we have been especially selected from among the other commercial classes and appointed unpaid collectors of a luxury tax, the operations of which are not only unfair but unreasonable.

Added to this imposition, in looking over the expenditures of the Dominion Government we find large sums of money passed in the estimates to provide better facilities for the agricultural, laboring and other classes, and not one cent allowed for the improvement of the retail distributing classes, who have more money invested in Canada than all the other classes combined.

In addition to this, if we look over the platforms which have been prepared by all the political parties to date, we find every effort put forth to capture the attention of the other classes so as to secure their votes, and nothing but condemnation and almost an entire lack of recognition of the retail distributors as a class, and whatever reference is made to them is made in derision, they being looked upon as being of the "profiteer" and "combine" classes.

This may not make pleasant reading, but I, personally, believe that the time has arrived when we must look the facts square in the face and act unitedly. To prove these statements, all that it is necessary to do is to look carefully over the orders that have been issued by the Board of Commerce, and read the copies of Hansard on the discussion of the luxury tax, and then, to complete the evidence, read the many speeches that have been made at conventions of public bodies, both religious and artisan, and, without having any knowledge of the facts, the retail distributors are held up to ridicule and often to scorn.

Need For Co-operation

These introductory facts are cited for the purpose of calling your attention to the need of closer co-operation between all classes of retail merchants throughout Canada, and to further impress upon the members the fact that more than 90 per cent. of the time of the Dominion Board office is taken up by giving attention to measures that require to be opposed, rather than to those of a constructive character and which would be of benefit to Canada as a whole. This is certainly not as it should be, and every effort should be made to find a remedy.

At the last convention of the Dominion Board a number of resolutions came before the meeting, and they were handed over to the office of the Dominion Board to deal with.

Membership Grows

The number of members appearing on our membership roll from the date of the last convention in March, 1919, as compared with last year, is as follows:

	1918-19	1919-20
British Columbia	86.66	436.69
Alberta and Saskatchewan	1,336.00	2,316.35
Manitoba	748.50	560.65
Ontario	2,736.42	1,982.30
Quebec	637.00	1,023.00
New Brunswick	787.00	655.00
Nova Scotia and P.E.I. ..	198.85	715.00
	6,530.43	7,688.99

Showing an increase over last year of about 1,158.00.

This report must certainly be gratifying to us all because it shows a growth and an increase over last year, but, gentlemen of the convention, I cannot disguise the fact that I am far from satisfied. If our association has grown to be the only organization of its kind in Canada that stands for the defence of the retail trade, why is not every retail merchant in Canada under its banner? The answer to that

F. E. RAYMOND,

Saskatoon, Provincial Secretary, Saskatchewan R.M.A., who was present at the National Association Convention in Vancouver.

lies at our door. We are engaged in a great educational movement; we must be thankful for our advancement, but when we become satisfied we will begin to decline. We must **push forward** and we will not be satisfied until the last retail merchant in Canada becomes a member.

Financial Statement Gratifying

I am pleased to say that the financial statement, as you will notice by the treasurer's report, shows an improvement which must also be gratifying to you.

Before closing, I desire to express my high appreciation of the excellent manner in which the members of the Dominion executive council have looked after your interests during the year. The president, J. A. Banfield, has attended a large number of meetings. He has been ever ready to visit the head office at any time his services were required. His forceful and enthusiastic addresses have inspired every member who has listened to him, and his interest in the work has been unfailing.

The first vice-president, J. G. Watson, of Montreal, has given unsparingly of his time and his counsel. He has been ever on guard, and through his untiring efforts and advice he has been the medium through which the entire Dominion Board has caught the spirit of having everything that is to be done, done in a thorough, businesslike manner, and if you find any advancement in the development of the work of our board it can largely be credited to his persistency and effort.

Tribute to Treasurer

Now, in regard to our treasurer, Henry Watters, who at the last moment found it impossible to be present, I cannot close without making reference to the faithful manner in which he has performed the duties of his office. He has visited our office almost daily. He is always ready and willing to give time, effort and counsel, and he has taken as much interest in the affairs of the association as though it were his own private business, and he has performed the duty of treasurer in a way that must be acceptable to every member. My only regret is that he will not be here to present his financial statement for the year.

The other officers of the Dominion Executive council who live at a greater distance from the head office have given us excellent assistance through correspondence, and have given us the benefit of their counsel whenever it was required.

In addition to expressing my thanks for the great assistance I have received from the president and members of the Dominion executive council, I desire to thank the secretaries and officers of the various provincial boards, as well as our capable office staff, for the great assistance they have rendered me during the year.

I trust the coming year may be full of prosperity.

I remain,

Yours respectfully,

E. M. TROWERN,
Secretary,
Dominion Executive Council and Dominion Board.

Among the correspondence getting a rousing reception was a wire from Ottawa to the effect that the issue of the obnoxious questionnaire was suspended.

A huge luncheon was tendered by the Vancouver Kiwanis Club, where all visitors were introduced, and the luncheon was addressed by Jerry McGeer, the youngest member in the B.C. Legislature. His subject was "B.C.," and briefly and interestingly he marshalled an array of figures regarding the farthest Western province that was a revelation to the visitors.

All last year's officers were re-elected.

Trend is Toward Further Throttling of Steel Industry

"Beneficial results from the modified ruling by the interstate commerce commission on the use of coal cars by the iron and steel industry are still to appear," says the Iron Trade Reveiw "The week has been a repetition o fthe constant struggle by producers to keep plants running even on a reduced basis and finished shipments in motion. Neither aim is being accomplished satisfactorily and the congestion at the works is as severe and as threatening as ever. Except in Chicago district, where slight inroads have been made into accumulated stocks, transportation does not equal production and the trend is toward further throttling of the industry. Effect of the railway wage remand in restoring more adequate and efficient traffic service is awaited with keen interest.

Want Reconstruction of Commerce Bd.

B.C. Retail Merchants' Association Meet in New Westminster at Annual Convention—Number of Branches in British Columbia is Growing—Excellent Reports Presented.

Staff Correspondent Hardware and Metal

New Westminster, B.C., July 20.—"An unqualified success." This seems to be the consensus of opinion of the delegates who attended the third annual convention of the Retail Merchants' Association of Canada, B. C. branch, at New Westminster, B.C., July 19 and 20. Many serious problems confronting the trade were debated before the convention, and it is thought that solutions for many of them have been found. Of course the most vital subject for discussion was the luxury tax and even for this a solution has been found, the opinion of the B.C. convention being that the action suggested by the Saskatchewan branch and endorsed by the Dominion Board is the best under the circumstances.

The Royal City certainly "did itself handsomely" from the moment the convention opened with an address by his worship, Mayor J. J. Johnston, until the singing of the national anthem after the association's official dinner on Tuesday evening.

Splendid Reports

Excellent reports were made by the president, secretary, treasurer and the organizer. Great progress has been made in the organization of the outlying portions of B.C. along R.M.A. lines,—the last few months have been very trying ones to retail merchants generally, and of course the association has had an opportunity to demonstrate the very great necessity for organization. Within the last few days an organization has been commenced in Victoria which was very gratifying to the various branches, as a good strong R.M.A. branch in Victoria will certainly be of great assistance to the provincial office in keeping intimately in touch with the Provincial Government's actions. While the name of the place for the next convention has been left to the incoming executive it seems pretty well understood Victoria will have the honor of entertaining the visiting delegates next year, notwithstanding the pressing invitations that were extended to the convention by the delegates from Alberni, Duncan, Nanaimo, Vernon and other points in British Columbia.

President's Report

In presenting his annual report Provincial President H. McRobbie of Vancouver, dealt with the work of the Provincial Board since the last convention in Vancouver, special reference being given to the appointment of George S. Hougham as joint secretary of the Vancouver and provincial branches; the management of the B. C. Retailer; organization; freight adjustment; fire insurance and collection services; the luxury and sales taxes; the Board of Commerce and the movement to establish a commercial education department in the University of British Columbia.

Touching upon the activities of the Board of Commerce, Mr. McRobbie said:

J. H. CURLE,

Winnipeg, Provincial Secretary, Manitoba R.M.A., who attended the Convention of the National Association of Retail Merchants at Vancouver last week.

"The Board of Commerce also has proved the necessity for and the value of the association. This board started off with methods akin to those of the old-fashioned star chamber, and had it not been for the persistent pressure of the association there is no doubt that the regulations would have proved much more onerous than they are."

The Luxury Tax

"It is not too much to say," said Mr. McRobbie, dealing with the recently imposed taxes, "that the luxury tax as originally proposed was perhaps the most poorly devised and ill-considered piece of legislation ever attempted. Not only was the scheme illogical, indefinite and incomplete, but the officers of inland revenue throughout the country were without one word of information from headquarters, had no machinery set up to collect the taxes, and could give no help to the hundreds of merchants who asked for information in their respective districts.

"The value of our affiliation with the Dominion board was never better demonstrated than on this occasion, and your B.C. office became a veritable public service institution for the time being. Enquiries were received from all sources, manufacturers, wholesalers, boards of trade and retailers, both members and non-members of our association. The promptness of our national secretary can best be illustrated by the fact that Secretary Hougham had a bulletin in the mail three days before the local inland revenue office was able to publish anything. The efficiency of our association officials was gratifying to all and numerous expressions of appreciation were made."

The president went on to enumerate the various meetings held by the trade sections of the association, and of the many telegrams sent to Ottawa in which the weaknesses of the regulation were pointed out to the Finance Minister and the commissioner of taxation. In closing he urged the delegates to attend the Dominion convention at the Hotel Vancouver on Thursday and Friday and thanked the executive for the excellent support rendered during the year.

Membership Increases

Provincial Secretary George S. Hougham of Vancouver was highly complimented upon his very complete report covering the work accomplished by the Provincial Board since the last convention in September, 1919. He said that the membership had been increased from nine branches and 413 members a year ago, to 14 branches and 689 members to-day. New branches were organized at Vancouver, Vernon, Merritt, Cranbrook, Kamloops, Kelowna, Nelson and Ladner.

He went on to say that 76 new members had been added in Vancouver and this with the addition of three new sections, Auto Supply and Tire dealers, Sanitary and Heating Engineers and the Electrical dealers, embracing 118 members, had meant an increase of 194 members since October last in Vancouver. Branches at Enderby, South Vancouver and Prince Rupert had failed to function during the year.

DISMISS PRESENT BOARD OF COMMERCE

"That we, the B.C. Branch of the R.M.A. of Canada, endorse the action of the officers and members of the Dominion Board and the Dominion Executive, in their protest to the Postmaster-General regarding the present parcel post regulations benefiting the large mail order house to the detriment of the smaller retailers.

"Resolved that instead of placing the collection of the Luxury Tax on the retail trade it be collected at the source of supply, namely from the manufacturer and importer, and this way it would be absorbed in the same manner as all systems of taxation are absorbed.

"Whereas the retail merchants suffer loss and inconvenience owing to wholesalers and manufacturers billing shipments in an incomplete and careless manner, steps to have shippers give the correct weight, classification and rate on all bills of lading should be taken.

"Resolved that this convention instruct its Executive to exercise its powers to the fullest extent possible to prevent wholesalers, manufacturers, or importers selling in direct competition with the retailer to consumers or others.

"Resolved that the Retailers of Canada petition the Government to dismiss the present Board of Commerce and form a board consisting of a representative manufacturer, wholesaler, retailer and consumer, who will strive to build up the best commercial interests throughout the Dominion."

Importance of Accounting

A very helpful address was given on Monday afternoon by John Cowan, C.A. (Scotland), treasurer of Vancouver Milling & Grain Co., Ltd., on the subject of accounting, as a feature in successful merchandising. Mr. Cowan described accounting as the art of correct recording in complete, convenient and permanent form. He said that without proper accounting no man had a proper knowledge of how his business stood at any given time. One point brought out by Mr. Cowan was a scheme for checking up losses by pilferage. In this connection he stated that whereas it used to be that the greatest losses were from "tapping the till," in his many investigations of the retail merchants' businesses he found now that the most losses were incurred from pilferage of goods. To offset this, or to at least get an idea of the extent of such losses, Mr. Cowan suggested that in stocktaking a separate column should be run where the selling prices of the various lines might be extended. The invoice book would also carry such a column with the selling prices extended, then with the daily sale slips, one could readily strike a balance to see how nearly the estimated value of stock agreed with the next inventory taken. Mr. Cowan stressed the necessity of employing the very best kind of accountant, "for," he added, "I do not know of any other profession where a poor man can get away with such an amount of bluff."

L. Dashwood Jones, solicitor to the B.C. Board of the R.M.A. of Canada, gave an address on the Bankruptcy Act as applied to retailers.

On Tuesday afternoon, C. L. Greer, display manager for Canada of the Hudson's Bay Co., gave an address on scientific window dressing, assisted by Mr. Mitchell in his department, who arranged the displays as Mr. Greer explained the theory. This was a very practical feature of the convention, and one that was followed with a great deal of interest by all the merchants.

Advertising a Factor

Frank Harris, of the Crawford Harris Advertising Co., gave an address on advertising as a factor in business success, and one of the points made by Mr. Harris which brought forth the applause of the audience was the fact that the retailer has a right to expect advertising by the manufacturer to assist him to market the goods, and that on the other hand he has a special duty to the manufacturer who does so assist him in this way to push the sale of the goods so advertised.

J. A. Cunningham, honorary president of the B.C. Manufacturers' Association, and J. H. Falconer, president of the B.C. Manufacturers' Association, addressed the convention in a plea for special consideration for articles of British Columbia manufacture. Mr. Falconer protested against Mr. Harris' statement that the manufacturer should assist the retailer to popularize his lines, claiming that the B.C. manufacturers could not advertise by reason of their limited finance.

The New B.C. Officers

G. H. McRobbie could not be persuaded by the convention to accept a second term, claiming that as a general principle, new blood should come into the executive every year, and "Mat" Phillips, president of the New Westminster branch of the R.M.A., was unanimously elected to the Provincial Presidency. Harvey Murphy, of Nanaimo, was unanimously elected to the position of first vice-president, and His Honor Mayor Ashwell of Chilliwack was elected to the position of second vice-president. Daryl H. Kent was again prevailed upon to accept the office of treasurer.

Convention Briefs

Professor Boggs, of B.C. University, in speaking on the subject of taxation, mentioned that the word "tax" was derived from a French word meaning "touch." Harry Murphy rose to his feet and shouted: "Man! you said a mouthful."

The member from Wyatt Bay convulsed the gathering by mentioning that in his store, every sale was entered in a book, as made, "and if at the close of the day, there is more cash in the till than balances with the sales entered up —I PUT THE DIFFERENCE DOWN AS SOMETHING, OR OTHER."

Delegate Thorpe, of Duncan, B.C., registered a minority dissenting vote to the proposition to make it obligatory to take the B.C. Retailer and to collect a dollar for same in connection with the fee for membership to the Retail Merchants' Association.

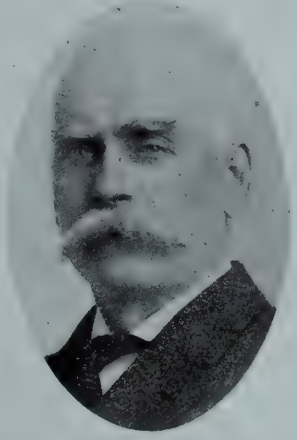
As the Retail Merchants' Association is ambiguous in the clause relating to whether the secretary should or should not have a vote, Cox, of Alberni, made a resolution to have the wording changed to more simple form.

"If the retail merchants will stick together, we will be strong enough to defeat the Government on matters pertaining to our affairs," stated President Banfield; "we pretty nearly did it recently. They only had a plurality of fourteen."

"Trowern looks like Lloyd George," said one delegate, "and if pep were dynamite, the Board of Commerce would have been blown sky high before this."

Said Banfield:—"If the opinions expressed by Meighen and Borden of the members of the Board of Commerce had only been held when they appointed them, what a lot of trouble we would have been saved."

Owing to over zeal in association affairs, and a natural enjoyment of collecting, on the part of the secretary, Alberni branch finds themselves with their dues paid up well into next year. Delegate Cox says the secretary is not an Irishman.



DAVE BURNET

Who has been travelling the main line of the C. P. R. from Winnipeg to Regina for the past ten years for the J. H. Ashdown Hardware Co., and who has now been transferred to the head office staff in Winnipeg to take charge of the new Personal Service Department inaugurated by the company. Mr. Burnet has been calling on the Western hardware trade for the past 39 years.

"By jove," said Wm. C. Miller, secretary Ontario Branch Retail Merchants' Association, "Hardware and Metal is always on hand, at anything pertaining to the retail trade," when he saw the Hardware representative at the various sessions.

Professor Boggs, speaking of the luxury tax, said: "It violates all the axioms of taxation; it will be expensive to collect. It will be easily evaded, and will thus put a premium on false statements."

NEVIN McWILLIAMS

Sales manager of the J. H. Ashdown Hardware Co. at Calgary, Alta., who has been transferred to the travelling staff and will take over the territory recently held by Dave Burnet. Mr. McWilliams has been with the company for 12 years but has not enjoyed the best of health recently on account of climatic conditions.

Western Notes

Palmer, Sask.—The Cash Hardware Store has been purchased by L. F. McRea.

Meeting Creek, Alta.—H. P. Sperry has sold out his hardware business to White Bros.

Tisdale, Sask.—C. F. Peterson, of Tisdale, Sask., has sold out his hardware store to McGratten & Chalmers.

W. N. Bunting, of the Northern Hardware Company, Edmonton, Alta., was a visitor at the Toronto office of Hardware & Metal this week.

Nanaimo, B.C.—R. S. Colclough, formerly manager of the Western Mercantile Company's hardware department here, opened a new hardware store early in July.

Ladysmith, B.C.—Bailey & Vidal, hardware, told a representative of Hardware and Metal who recently called upon them, that they were receiving the paper regularly and found it a great help.

Regina.—All the exterior work has been completed on the new warehouse which is being erected on the north side for Wood-Vallance, Ltd. Already much of the interior work is done and a considerable quantity of stock has already been placed in the building.

Newsy Notes From Here and There

Toronto.—George M. Rice, hardware merchant, of Whitby, Ont., was in Toronto on business this week.

* * *

Toronto.—M. Wood, of Wood & Mason, hardware merchants, was in Toronto on business this week.

* * *

Preston, Ont.—Employees of Clare Bros. & Co. held a picnic on Tuesday of this week to Waterloo Park.

* * *

Toronto.—N. R. Turner, salesmanager Toronto branch McClary Mfg. Co., Ltd., is holidaying at Prescott and vicinity.

* * *

Trois Rivers.—Cyrille Labelle, of Cyrille Labelle and Company, was in Montreal on Wednesday of the present week.

* * *

Toronto.—T. B. Williamson, general manager H. S. Howland, Son & Co., is holidaying at Lake Rosseau, Muskoka district.

* * *

Toronto.—C. B. Green, of McClary Mfg. Co., Toronto branch, has returned from Lake Simcoe and district where he spent his holidays.

* * *

Toronto.—L. J. Williams, manager shipping department of Wood, Vallance & Adams, Ltd., Calgary Alta., was a visitor in Toronto this week.

* * *

Hamilton.—W. H. Dean, a veteran hardware traveller who has visited Western Ontario points for over forty years, was bereaved last week by the death of his wife.

* * *

Montreal.—C. Shipman, representing William Hutton and Sons, Ltd., Sheffield, Birmingham and London, called this week on the Montreal trade; Captain L. Tweedie-Smith, managing-director The Rawplug Co., Ltd., Lenthell Place, Eng., was in Montreal this week.

* * *

Toronto.—W. G. Gartshore, of the Toronto branch of the McClary Mfg. Co., has been transferred to the Calgary branch, where he will represent his firm as city salesman. C. W. Long. Toronto, salesman of the above named firm, is holidaying at Sturgeon lake.

* * *

Montreal.—Robert W. Cruise, Corbin Cabinet Lock Co., Ltd., was in Montreal this week; R. C. Stevens, of Wallace Bros., Wallingford, Conn., was this week in Montreal calling on the trade; L. E. Griffith, representing Surpless-Dunn & Co., New York, was in Montreal during the week.

Montreal.—J. M. Shellenberger, in the interests of his principals, Baeder and Adamson Co., Philadelphia, called this week on the Montreal trade; A. S. Buller, representing B. S. Kahn and Co. and Joseph H. Joseph, New York, were in Montreal this week; Walter E. Walker, general manager of the Vulcan Motor and Engineering Company, Ltd., London, was a Montreal visitor this week.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1354. **Broom-making material.**—A Rhodesian broom manufacturer is prepared to purchase his overseas requirements from Canadian manufacturers. Prices and samples are requested on broom handles, wire, colored tin bands, twine, long tacks and staples. Samples of all requirements, except handles, are with Department of Trade and Commerce in Ottawa.

1362. **Leather.**—A Stafford firm, with establishments in Northampton and Leicester also, are open to represent manufacturers of chrome willow and box calf, velvet splits, etc., or would purchase any leather suitable for the British market.

1363. **Leather.**—A Northampton and London firm are prepared to purchase all kinds of upper and sole leather.

1364. **Leather.**—A Leicester firm are open to purchase all kinds of leather and would act as agents for manufacturers of pure chrome box and sole leather.

1365. **Sole leather.**—A large hardware firm in British Guiana are open to stock Canadian sole leather in medium and heavy makes.

1366. **Leather.**—A Leicester firm are open to receive offers of sole and upper leather.

1367. **Constructional steel, steel bars, etc.**—A London merchant firm which handles large quantities of constructional steel, mild steel bars, rods, plates, and other sections, would be pleased to consider offers from Canadian manufacturers.

1368. **Brass foundry, plumbers' and cabinet ware.**—A leading firm in British Guiana desire to stock for the hardware department brass foundry, plumbers' and cabinet ware.

1369. **Tinware and enamelled ware.**—One of the leading firms in British Guiana desire to be put in touch with Canadian suppliers of tinware and enamelled ware. Manufacturers at or near seaboard preferred, in order to save railway freight.

1370. **Coal, metals, mineral oils, and technical articles.**—An important firm in Rome desire to hear from Canadian exporters of the above.

1371. **Wood screws.**—A Buenos Ayres firm of hardware importers are interested in receiving quotations for at-headed wood screws, all sizes. These screws were formerlyl made in a local factory, which can no longer supply the demand. Samples can be consulted at the Commercial Intelligence Branch, Department of Trade and Commerce.

1376. **Plumbers' supplies and electrical Goods.**—A house of commission agents in Rome desire to hear from Canadian exporters.

1377. **Electrical material.**—A most important limited company in Milan are desirous of purchasing electrical material in Canada.

1378. **Electrical material.**—A Milanese house are anxious to buy electrical material in Canada.

1386. **Tin and steel travelling trunks.**—The hardware branch of one of the leading firms in British Guiana would like to import Canadian tin and steel travelling trunks.

1388. **Sporting goods india-rubber goods.**—A house in Rome handling sporting goods, and india-rubber goods would do business with Canada.

1389. **Lacrosse sticks.**—An important London firm are open to purchase lacrosse sticks, and invite quotations from Canadian manufacturers.

1394. **Paint brushes.**—A retired younger member of a large firm in Cape Town, with several years' experience in the paint brush trade, desires Canadian agency in paint brushes.

May Establish Motor Factory in Canada

Montreal.—Walter E. Walker, director and general manager of the Vulcan Motor & Engineering Company, Limited, a branch of the Harper Bean Industrial Combine, is at present in Canada in the interests of his company. Mr. Walker is in Canada, primarily, to confer with manufacturers, dealers and financiers, relative to introducing British-made trucks in Canada, and is hopeful of being able to establish a factory in Canada ultimately for the production of trucks and cars in a more or less extensive way.

With regard to the future basis of price on various cars, Mr. Walker expressed his opinion that reduced prices would doubtless come about in time. This would depend on increase of production and of course would take time to attain this.

In the Old Country the motor combine had devoted its efforts principally to the production of commercial cars and which were so greatly needed there. Owing to the fact that production of these had greatly increased the price had been reduced £75 per truck. The same thing would transpire when production could be proportionately increased on the production of private cars.

Sarnia Council Reads By-Law to Increase Gas Rates

Sarnia.—The injunction threatened by a number of citizens to prevent the City Council from passing a by-law granting the Natural Gas company supplying the city with gas, permission to raise the price to 75 cents per 1,000 feet in the summer and 50 cents in winter, failed to materialize, and the Council has given the by-law its first reading.

LETTERS TO THE EDITOR

COMPETING WITH MAIL ORDER HOUSES

Editor, Hardware and Metal:

Your magazine, with numerous others of its kind, write lengthy articles, "How to compete with mail order houses." The principal theory seems to be: Advertise.

Needless to say the average farmer is no fool. You can't pull the wool over his eyes by advertising. He knows the prices as well as most merchants.

Take, for instance, the hardware line. It's an easy matter to pick out three or four dozen articles the mail order house sells at the same price the dealer purchases at, and a great many for less.

I put an ad. in the home paper, giving prices on graniteware, tools, galvanized iron pails, tanks, etc. Mr. Farmer reads those prices, and comparing them with the M.O.H. finds that I am 25% to 30% higher. He makes up an order say for $100.00 and comes to me to fill the order. There are one of two things I can do. Sell the goods for less than a living profit, or let it go to the M.O.H. Supposing, in order to not give the M.O.H. the business, I sacrifice my profit, does the wholesaler from whom I buy give me an extra 5%% Oh no, not a bit of it. He gets his full share, rather I get it for him, and I am the goat. Goods well bought are half sold.

I watch prices and buy where I can get the best value for the money. I have bought from mail order houses, for considerably less than from jobbers, barb wire, galvanized iron pipes, guns, saddlery and hardware, and the farmer can buy for the same price as I pay.

Just as long as the retail merchant has to support the jobbers the way he does, the mail order houses will grow fat, and they certainly have every chance of doing it.

FRANK KOEHLER,
Watrous, Sask.

Catalogs and Booklets

MARBLE ARMS & MFG. CO.

The Marble Arms & Manufacturing Co. of Gladstone, Mich., have just issued an attractive trade catalog of their 60 sportsmen's specialties. Dealers selling sporting goods will find this book interesting—it contains a vast fund of information on outing equipment.

The lines dealt with include safety pocket and camp axes, hunting and fish knives, gun sights and cleaning implements, compasses, fish gaff, waterproof matchbox, auxiliary cartridges, shell extractors and nitro-solvent oil.

Lyons & Marks, 58 Yonge St., Toronto, have issued a very attractive catalog covering electric table lamps and shades, aluminum ware and pyrex ware. Many kinds and shapes of table lamps are shown and the line of aluminum ware is also very complete. The above also applies to pyrex ware. Each line is illustrated and a list of prices shown from which general discounts are deducted as classified on the discount accompanying the catalog. Readers of Hardware and Metal may have a copy of this on request from the above named firm.

Henry Disston & Sons, Inc., Philadelphia, Pa., have issued a very attractive booklet on the manufacture of their saws for lumbering purposes, and some very interesting subjects are covered as well as illustrations of large circular saws. There are some discussions of the largest saws made as well as a very interesting article on the forest of Brazil pertaining to the kind of wood that is grown there, also some of the purposes for which it may be used. There is also a discussion on the saw mills in the colonies as well as a page devoted to humor entitled "Saw-Dust." Readers of Hardware and Metal may have a copy of this issue on request from the manufacturers.

O-Rib-O Manufacturing Co., Ltd., Winnipeg, Man., have issued a well-illustrated catalogue on their line of Sheet Metal Products. The catalogue describes Sheet Iron Stoves, Stove Pipes, and Stove Pipe Drums of all kinds, including Drums with oven, also Stove Pipe Elbows and Tees, Taper Pipes, Dampers, Roof Saddles, Flue Stoppers, Smoke Pipe Safetys, Screw Thimbles, Chimney Stack, Grain Scoops, Revolving Chimney Top, Sanitary Closets and Hot Air Furnace Pipes and Supplies, Skylights, Portable Garages, Coal Chutes and Oil Cans and many other lines. Readers of Hardware and Metal may have a copy of this from the above named firm upon request.

Messrs. Sumner Co., Ltd., Moncton, N.B., have issued a new and very novel broadside covering many lines of Automobile Accessories. The broadside measures about 18 in. wide by 23 in. long when fully opened out and could be hung up on the wall or some other handy place for ready reference. A unique border is used, which is made up of different Automobile Accessories in very small cuts. A description is given of tires, inner tubes, jacks, wedges, brake lining, anti-rattlers and spring covers, shock absorbers, tow lines and batteries, foot boards, tire chains, spark plugs, vulcanizer's gum, lights, cut-outs, stick tight windows, tire pumps, mirrors, tire testers, valve insides, accelerators and other lines. They have also issued a very neat circular which accompanies the broadside showing a new device called the Safety Steering Control, which is very plainly illustrated and explained. Readers of Hardware and Metal wishing copies of these may have same on request from the above named firm.

MOOSE JAW CELEBRATES

The merchants of Moose Jaw, Sask., have been benefiting from a mammoth peace celebration and first annual reunion of the G. W. V. A., which was held in that city last week. The posters heralded the celebration as the "most novel, fascinating and enjoyable ever held in the West." A wild west show and round-up was but one of the numerous items on the program. There was everything else that could be thought of from a Bolsheviki court, held on the main streets, water sports and open-air street dancing to an historical pageant of "Britain, past and present," and the impressive ceremony of depositing flowers at a specially constructed cenotaph. It was, indeed—as the posters said—"Fairyland let loose." The executive committee was made up of Mayor Hamilton, Ald. G. L. Dewey, Major M. McNaughton, Ald. R. F. Jackson, Commissioner G. D. Mackie, and Messrs. Geo. Ingram, J. A. Caulder, F. Mitchell, F. M. Hughes, T. A. Currie, E. P. Fields and James H. Drynan.

"TAX STAMPS" ARE EXPECTED AUGUST FIRST

Chances Are That They Will Have to be Placed on Luxuries Purchased

"The luxury tax returns are running more smoothly now that we are beginning to understand the system better," stated G. E. Dunbar, excise officer, at the Inland Revenue Office, Toronto.

"The returns are coming in now in nearly every case as they are supposed to. We send printed forms to all the merchants in the city, which are marked off in columns for the amount of sales, tax and so on, and are sworn to, similar to other tax collections."

A system of stamps for tax collection is expected in August.

"These stamps, I understand, will be of all denominations," said Mr. Dunbar. "They will range from 1, 2, 3 cents up to $5, and so on. It is likely that they may be placed on the purchased article similar to the stamp tax on drugs, etc., and the merchant will be able to check up by the number used. By this we expect to do away with the system of sending in returns each month or two weeks."

Louis McLain Co. Extending Their Plant

The Louis McLain Company, Ltd., Toronto, is now building what is claimed to be the largest factory manufacturing exclusively aluminum cooking utensils in the Dominion of Canada. The company started out in a very small way in the West as jobbers handling a few articles for the kitchen and specializing in aluminum cooking utensils. In conversation with Mr. McLain, of the Louis McLain Company, he informed Hardware and Metal, that when he started in business it was with faith in the Canadian trade, together with the one ideal that with sound business principles a big trade could be worked up, specializing in household and kitchen utensils.

The company in January of this year purchased the Hudson Bros. factory in Toronto and are now building in addition a large factory costing in the neighborhood of $125,000 which will be five storeys high, built of steel and brick, which when completed will treble their present output. Their general offices have been transferred from Winnipeg to Toronto, they still retaining in Winnipeg their branch office and warehouse together with their branch at Kitchener, Ont., where the Eastern business is taken care of. They also have representatives in Montreal and Vancouver and are now covering from coast to coast.

The company is manufacturing "The Louis McLain" and "The Hudson Line" of aluminum cooking utensils. Mr. McLain is president of the company and Mr. Roderick general manager.

NEW HARDWARE GOODS

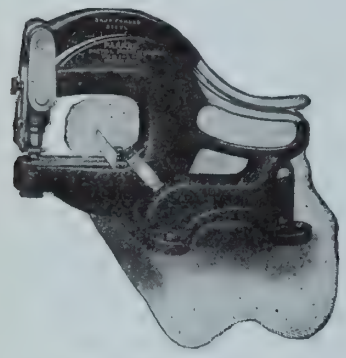
OFFERED TO CANADIAN HARDWAREMEN

METAL WORKER'S PUNCH

A new style of punch is being put on the market by the Parker Supply Co., Inc., 785 East 135th St., New York City, N.Y., who state that their product has an exceptionally wide throat and open jaw, which accommodates work that has rolled or formed edges and the exposed punching parts enable the mechanic to see where the punching is desired.

The manufacturers describe their new product as follows: The punch is a combination bench and hand punch which may be used both in connection with and without the stand, and will be found ideal for field work, owing to its compactness and lightness.

The stand is screwed permanently to the bench. A pull of the pin releases the punch from the stand, permitting the punch to do the work; or the work to the punch. When punching a line of holes parallel to each other, the gauge will be found invaluable. It is made of best grade steel, highly polished. Can be put on or removed in a flash. A spring clip keeps the gauge in place, yet permits of removal, with ease. The stripper can be raised, lowered, or removed, to permit of flat or formed work to enter, and strips the punch automatically. There is also provided on the end of the tripper a screwdriver for the removal of, or replacement of dies. Made to accommodate the full face of



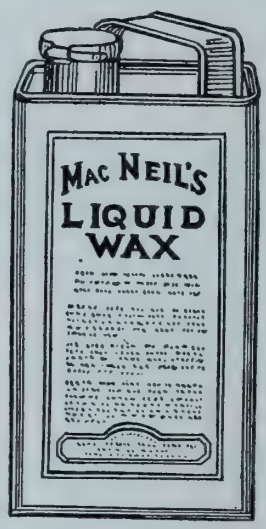
Metal Worker's Punch

the die, it eliminates chipping off of the end, the occurrent fault when a narrow screwdriver is used.

The makers also state the device will punch ½-inch hole in 20-gauge steel, or its equivalent. Depth of throat to centre of punch is 3½ inches, with a height of 2¼-inches. Made of drop forged steel, heat treated, and all working parts properly hardened, so that it can undergo strenuous usage.

LIQUID WAX

MacNeil Liquid Wax Co., Ltd., Halifax, N.S., and Toronto, Ont., who formerly, before the war, made a special line of wax, have again entered the market as manufacturers and are offering to the trade four different weights of liquid polishing wax, No. A being for use on pianos, organs, phonographs and kindred surfaces, and the makers claim it



Liquid Wax

will preserve the glossy finish and overcome tiny hair cracks, scratches, etc.

Other weights the manufacturers describe as follows: No. B is especially prepared for automobiles and highly polished vehicles and protects the metal and woodwork against stains and rust and is easily and quickly applied. No. C is especially compounded for use on furniture, office equipment, painted and varnished woodwork, white enamel surfaces and linoleums, and dries and polishes as it cleans. No. D has special propensities for polishing hardwood floors and cleans, deodorizes, disinfects as well as polishes the surface and the makers claim that when applied will harden the surface and protect it from scratches, shoe nail marks, etc., maintaining an even, smooth, glossy, highly polished, lasting surface without the necessity of using a heavy polishing iron.

MOTOR DRIVEN HORN

The Klaxon Company of Newark, N.J., are offering the trade a new model auto

Motor Driven Horn

horn, under the trade name of Klaxon 5 Ford type. It is a motor driven safety signal especially designed for Ford cars, say the manufacturers, who also claim that it can be installed on Ford cars equipped with self-starters, and give the following directions for starting.

Place a washer under nut on bolt which passes through steering column flange; remove center cylinder head screw on left hand side of engine, pass it through large hole in horn bracket, hold bracket firmly against engine, cut off brass terminal on black horn wire and scrape off 1½ inches of insulation; also remove same amount from the short piece supplied with the device; twist both securely together and tape joint. Change the black wire leading to the push button from its original position to the second terminal on terminal block on the dash and securely tighten the screws.

A loud, clear sound should be produced, and if this is not obtained the makers advise an inspection of all wiring connections as well as the battery to see if fully charged.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

IN SPITE of the quiet holiday period, hardware prices continue to advance and higher prices have been made on many important basic lines. Wrought pipe prices have again advanced over the new higher quotations of last week and the situation is still unsettled.

Gasoline and coal oil have jumped a further 2 cents per gallon. Machine oil of various grades has been marked up 2½ cents per gallon. Many lines of tools are also higher, including machinists and mechanics' wrenches, pipe wrenches, crosscut saw handles, side cutting pliers, electricians' bits and socket firmer chisels.

Other lines that have been marked up are ash sifters, tin roofing caps, barn door rollers, self-wringing mops, anti-rattlers, hand cleaner, hose reels, graining combs, galvanized sheets, paste, sliding casters, horse muzzles, oil and molasses gates, revolvers, shot guns and rifles, horseshoes, ammunition and shells, toilet paper, staples, crow bars, whip stocks, carpenters' chalk, rope clips, clothespins, and glazier points.

High-speed drills and cut laces have been reduced in price and turpentine and linseed oil are also lower.

Business is seasonably quiet and many are taking advantage of the breathing spell for their annual vacation. Many booked orders for fall lines are being shipped and buyers who have held back their orders for various fall lines are beginning to come into the market as heavy buyers so as to insure delivery in time for the season's requirements. Shipping conditions are still very much disrupted owing to the serious shortage of freight cars. Collections continue to come forward satisfactorily.

MONTREAL MARKETS

MONTREAL, July 29.—Despite the seeming quietness that applies to many lines of business at the present time there is still a great deal of activity in hardware trade circles, both jobbing and retail. Mail orders from the country are heavy. Some travellers are off the road for holidays and this, to some extent, accounts for the heavier mail business. There are some important changes this week, including an advance of two cents per gallon on coal oil and the same advance on gasoline. Rope prices are very firm and the manufacturers have been faced, within the past three weeks, with advanced prices for their raw materials. Stoves are firm and are likely to stay high. Stove pipes and elbows bid fair to be scarce this fall and jobbers and retailers should conserve stocks, according to the manufacturer. Canada plates are very scarce and high, as are also black and galvanized sheets. Lubricating oils are firm. Nails are still scarce, as are also all wire products. The galvanized wire basis is a nominal one and some lines have advanced to the extent of a dollar and a quarter per 100 lbs. Staples are higher, and the differential for annealing has been advanced. Crow bars are firm. Wheelbarrows are in short supply and may be advanced in price. Solid leather whipstocks are advanced this week to $9 per dozen. Carpenters' chalk is higher. Snap hand cleaner has advanced to $2.20 per dozen tins. Rope clips are 20 per cent. higher, both galvanized and black. Spring clothespins are 5c per gross higher. Glaziers' points are five cents a pound higher for the zinc-coated. Malleables are scarce and this makes a new difficulty in that manufacturers find it hard to complete manufactured products. Galvanized sheets are fifty cents per 100 lbs. higher. Annealed and barb wires are higher. All horseshoes are fifty cents per keg higher. A decline of 10 per cent. is made on high-speed drills.

Coal Oil Advanced 2c; Same For Gasoline

Montreal.

COAL OIL.—An advance of two cents a gallon has been made this week on coal oil. The ordinary grade is now selling at 31c per gallon and the better quality at 33c.

GASOLINE.—This advanced, on the 21st instant, to 41½c per gallon, motor grade. The increase is assignable to the soaring basis for crude oil, and which has attained a record figure. The demands are very heavy and transportation from the producing centres of the States is reported as very difficult, shipments being delayed considerably. High-grade illuminating gasoline is selling at 46½c per gallon.

Summer Stoves Active; Fall Bookings Heavy

Montreal.

STOVES.—Summer sales of stoves by the retail trade have been quite large, as applying to the various lines of oil stoves, and kindred lines. These, despite the shortage of plates for making sheet metal stoves, have been available in fair quantities and prices have been fully maintained.

HEATERS and ranges for fall delivery have been specified extensively by the trade and there is likely to be a big movement outward within the next few weeks. Prices are very firm; some expect that advances will have to be made, while others state that the market will rule firm, but will probably remain unchanged.

Rope Is Very Firm; Higher Raw Materials

Montreal.

ROPE AND CORDAGE.—Prices have been steadily held on rope and cordage, and while there have been no definite changes in the basis, manufacturers have had to pay from one and a half to two cents a pound more for the raw

material. It is expected that when the manufacturers go into the market in a few weeks for supplies that they may have to pay even higher prices, particularly if competition is keen from these factors.

BINDER TWINE has been moving actively on unchanged basis and hay fork rope has been moving out actively. Pure manila basis is still 35½c.; British and New Zealand 28c., and sisal 22½c. per lb.

Stove Pipes and Elbows May be in Short Supply

Montreal.

STOVE PIPES, ELBOWS—A shortage of stove pipes may be manifest this fall. Manufacturers state that there may be difficulty in filling new orders and the advice is to not sacrifice stock, as prices will be high and stock for renewing orders scarce. This applies alike to stove pipes and elbows. Booking orders for these lines have been fairly heavy.

Canada Plate Stocks Will be Very Small

Montreal.

CANADA PLATES.—The receipt of Canada plates from abroad has been very limited, as related to the supply, and it is questionable if the trade will be able to obtain, this fall, what they require. The basis is very firm and conditions approach those of a nominal nature, when price is considered. Present Montreal basis is $13 and $13.25 per box for "ordinary" 52 sheets and 60 sheets, respectively.

Lubricating Oils Held on Firm Basis

Montreal.

LUBRICANTS—Prices on the various lubricating oils are firm, with a tendency to advance. The demands now are for motor car and truck lubricants and special brands have from time to time advanced. The tendencies are strong.

Nails Selling Freely But Supplies Short

Montreal.

NAILS.—Wire nails still hold at the advanced basis of $6.40 per keg, and cut nails still are $6.35. The movement of wire nails is heavy, and demands cannot yet be satisfied by the mills to the jobbers or by the jobbers to the retail trade. It is unlikely, many think, that conditions can possibly be improved for some time to come.

Staple Prices Higher; Differential Changed

Montreal.

STAPLES.—An advance was made this week on barbed wire staples and these are selling as follows: Ordinary per keg of 100 lbs., $6.25; galvanized, $7.65. For boxes of 25 and 50 lbs. the charge is $1.00 per 100 lbs. extra.

An extra charge for annealing of 15c has been in effect for some time but this has been advanced to 25c per 100 lbs. extra.

Crow Bars Firm at Last Advance

Montreal.

CROW BARS.—At the present price of $11.50 per 100 lbs., the undertone on crow bars is very firm. While no advance has been made since the last change two or three weeks ago, there is no assurance that prices will not advance. The demand has been quite active this season.

Wheelbarrows Scarce; May be Advanced

Montreal.

WHEELBARROWS. — There is a great scarcity of wheelbarrows at the present time and it is difficult for the jobber to maintain a full line of samples. While no definite advance has been made for the week the undertone i svery strong and prices are likely to be high with advances probable.

$9.00 *Is Quoted on Leather Whip Stocks*

Montreal.

WHIP STOCKS.—Solid leather whip stocks have advanced in price in this market and are now selling to the trade at $9.00 per doz.

Charging More Now For Carpenters' Chalk

Montreal.

CHALK.—A revision upward in the price of carpenters' chalk has been registered in jobbing circles this week. Red and blue are now selling at $2.75 per gross, and the price for white is $2.25 per gross.

Railroad chalk is now selling at a price of $2.75 per gross.

One Brand Hand Cleaner Selling at Higher Price

Montreal.

SOAP.—An advance has taken place in the price of Snap hand cleaner. This is now selling to the trade at a price of $2.20 per doz.

Decline of Ten Per Cent. on High-speed Drills

Montreal.

DRILLS.—A weaker undertone is manifest in the market for high-speed drills. A reduction of about 10 per cent. applies to this line generally.

Rope Clip Prices 20 Per Cent. Higher

Montreal.

ROPE CLIPS.—An advance has been made to the trade in wire rope clips, the increase amounting to 20 per cent. This is for both black and galvanized grades.

Spring Clothes Pins Advance 5c Gross

Montreal.

CLOTHES PINS.—An advance has been made in the price of ordinary spring clothes pins, the same having advanced 5c per gross.

Glaziers' Points Advanced Five Cents

Montreal.

GLAZIERS' POINTS.—An advance of 5c per lb. has been made in the price of zinc-coated glaziers' points. Some are now selling these at around 27 and 28 cents per lb.

All Malleables Are Scarce; Is Important

Montreal.

MALLEABLES.—There is a great scarcity of various malleables at the present time, jobbers report. This has made it difficult for manufacturers to supply various finished tools requiring a certain amount of malleable in their construction, such as wrenches, etc. Such lines as clevises and other hardware are naturally affected and the price of these manufactured lines is very strong.

Black and Coated Sheets Remain High and Scarce

Montreal.

SHEETS.—There is still a great scarcity of both black and galvanized sheet. One manufacturer required a quantity of rather heavy gauge black sheets for a certain manufacturing need and bought up all he could get from local jobbers This is a condition which applies in many places at the present time and no one seems to have a complete stock.

Galvanized sheets are somewhat firmer in price and an advance has been made this week of 50c per 100 lbs. on U. S. gauges.

BLACK SHEETS—		
10 gauge	....	10 00
12 gauge	....	10 00
14 gauge	....	10 10
16 gauge	....	10 45
18-20 gauge	....	9 50
22-24 gauge	....	10 45
26 gauge	....	10 50
28 gauge	....	10 50
GALVANIZED SHEETS—		
U.S. Standard—		
10¾ gauge	....	13 00
28 gauge	....	12 60
26 gauge	....	11 25
22 to 24 gauge	....	12 05
20 gauge	....	12 05
18 gauge	....	12 05
16 gauge	....	10 75
English Standard—		
28 gauge	13 00	13 50
26 gauge	12 75	13 25
24 gauge	12 15	12 65
22 gauge	11 80	12 30
18 and 20 gauge	11 35	11 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Annealed Wires Are Higher and Scarcer

Montreal.

ANNEALED WIRE.—Annealed wire has advanced in price in common with other grades of wire and No. 13 is now selling at $6.55 per 100 lbs.; No. 14, at

$6.65, and No. 15, at $6.80. Other grades of baling wire, such as bales ties, are very strong and the prices will likely be higher, as well as the supply very short for the fall's requirements.

Barb Wire Higher; Is in Short Supply

Montreal.

BARB WIRE.—The basis for barb wire has advanced, due to the extreme shortage of this product. The 4 by 6 by 80 rod spools are now selling at $5.90 whereas the price previously was $5.30.

Higher Prices and Basis Nominal For Gal. Wire

Montreal.

GALVANIZED WIRE.—The difficulty of obtaining requisite stock of various grades of wire has given the trade a great deal of cancern. Manufacturers are now declining to name prices for delivery and the situation is a decidedly nominal one. This applies to plain galvanized, barbed, plain wist, and coiled spring. The present basis for plain galvanized with one leading jobber is as follows: No. 8 per 100 lbs., $7.00; No. 12, $7.15; No. 13, $7.25. These prices show an advance over those quoted previously of about $1.25 per 100 lbs.

Wash Boards Scarce; Some May Advance

Montreal.

WASH BOARDS.—The basis for wash boards, particularly those made of great deal of concern. Manufacturers had difficulty in getting the necessary supplies of glass and it is doubtful if the supplies will overtake the demand for sometime. Late advices to Hardware and Metal suggest that an advance of price is probable in the near future.

Fifty Cent Advance in Price Horse Shoes

Montreal.

HORSE SHOES.—An advance of 50c per keg has been made in the price of all grades of horse shoes. Prices are revised all along the line and the new basis is as follows:

Horseshoes—

Patterns	Sizes made	Price per keg No. 2 and larger	No. 1 and smaller
		Less 20c	
Light iron	0-7	$8 25	$8 50
Long heel light iron	3-7	8 25	....
Medium iron	1-8	8 25	8 50
Heavy iron	6-8	8 25	....
Snow	1-6	8 50	8 75
New-light "XL" steel	1-6	8 70	8 95
Featherweight "XL" steel	0-4	10 10	....
Special-countersunk	0-4	10 60	....
Toe-weight, front only	1-4	11 10	....

Packing—Up to 3 sizes in one keg, 10c per 100 lbs. extra. More than 3 sizes, 25c per 100 lbs. extra.

F.O.B. Montreal and Belleville. Terms—Cash in thirty days, less 2% discount.

Not Easy to Obtain Iron and Steel Bars

Montreal.

IRON AND STEEL.—It is still difficult to obtain necessary quantities of iron and steel bars, and jobbers are not always able to supply. The undertone is very strong and new prices announced two weeks ago, and the basis is likely to hold form until supply overtakes demand.

IRON AND STEEL

Iron finish machinery steel		5 35
Norway iron	13 50	15 00
Single reeled machinery steel		6 80
Spring steel		5 80
Sleigh shoe steel		5 30

Mild steel		5 30

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Sale Lead Products Seasonably Better

Montreal.

LEAD PRODUCTS.—There is a seasonably active demand for various lead products, and this indicates that there is still a considerable amount of building the present time. Prices, however, are these lines and quite steady, and no immediate change of any kind is looked for.

Lead pipe, per 100 lbs.	....	17 00
Lead waste, per 100 lbs.	....	18 00

Old Material Slow But Basis Is Held

Montreal.

OLD MATERIAL.—Manufacturers are not buying a great deal of old scrap at het present time. Prices, however, are holding without change and the usual quiet period is likely to continue for a few weeks longer. Arrivals of old scrap from the country districts have been fewer of late.

Dealers' Buying Prices

Ingot List Better in Tone; Activity

Montreal.

INGOT METALS.—The ingot list is rather firm this week and there is a summer activity of considerable volume. Prices generally are firm.

COPPER.—This is holding firm at 24c for casting and 24½c for electrolytic.

TIN.—Supplies are still arriving from the Old Country and the basis is more settled than it was a few weeks ago. Quotations are still held at 58c to 60c per pound.

LEAD.—At 10¼c per pound the market is ruling steadily firm and supplies are not any too easy to obtain. It has been somewhat difficult to get supplies from Canadian sources and also from the Old Country, jobbers report.

SPELTER.—The basis of 11c still stands.

ANTIMONY.—This metal is considered quite firm and although some are quoting as low as 11c per pound it is selling several points higher than this price.

ALUMINUM.—A basis of 37c to 39c per pound is held an aluminum and there is a fair amount of trading at this price.

TORONTO MARKETS

TORONTO, July 29.—The tendency for hardware prices still continues upwards and many lines have been advanced in price during the week.

Wrought pipe quotations have again been revised upwards. Gasoline and coal oil have been advanced 2 cents per gallon and various machine oils are also higher. Bulldog wrenches have been marked up 10 per cent. Stillson wrenches also have new lower discounts. Toilet paper has advanced and is now quoted at 33½ per cent. discount from list.

Wire nails and wire of various kinds are still very scarce, also galvanized sheets. Preserving kettles are in good demand . Binder twine is moving in heavy volumes. Rope sales are quiet.

Business has considerably slackened off during the week and many in the trade have taken this opportunity to enjoy their annual holidays.

Prospects for heavy fall business were hardly ever better, it is stated, and many are preparing for a heavy fall season by demanding shipment of their booked orders so as to be assured of having the stock to sell when the season opens up in full swing.

Collections are coming freely.

Bull Dog Wrenches Now Priced at 10% Discount

Toronto.

WRENCHES. — Higher prices have again been made on many styles and makes of wrenches. The Bull Dog is quoted at a discount of 10 per cent. The Everready wrenches are also quoted at a discount of 10 per cent. from the list. These prices are quoted for present stocks and orders are only being accepted at prices ruling at time of shipment.

Stillson Wrenches Now Quoted 25% Discount

Toronto.

WRENCHES.—Higher prices have again been made on some lines of mechanics' tools which affects the price of Stillson wrenches. The new quotations are approximately 7 1-2 per cent. higher and are quoted as below. The discount for the Canadian make is 40 per cent. off the list.

Stillson Wrenches

6 inch	$18.20 per doz.
8 "	20.40 " "
10 "	22.80 " "
14 "	31.80 " "
18 "	35.60 " "
24 "	66.00 " "
36 "	123.00 " "

Preserving Kettles Have Seasonable Demand

Toronto.

PRESERVING KETTLES.—A good demand is current for various preserving kettles as a result of the abundant crops of seasonable fruit. Prices are as per current quotation pages.

Barn Door Hangers Now Cost Dealers More

Toronto.

BARN DOOR HANGERS.—An advance has been made on the price of barn door hangers and the Richards-Wilcox trolley barn door hanger now costs the dealer $24.00 per doz. for the number 321 and $22.40 per doz. for the number 21. The track for the above is quoted at $25.60 per 100 feet.

New Discount on Toilet Paper is 33 1-3% off List

Toronto.

TOILET PAPER. — New advanced prices are being quoted on various lines of toilet paper, the new quotation being list less a discount of 33 1-3 per cent., the list price of the standard price being $15.75 per 100 rolls.

Stove Business Quiet; Wares Firm; Unchanged

Toronto.

STOVES AND WARES.—Firm steady prices continue for stoves and ranges with a fairly quiet buying period being experienced by the manufacturers. However, prospects for fall business seem very bright and all are looking for good business for this season.

Difficulties are many in manufacturing circles, and the greatest is that of getting renewed supplies of raw material. The booking received for fall shipment are reported to be fair, but makers cannot guarantee any delivery, and it is likewise difficult to name a price.

Wares are very firm. It is most difficult to obtain supplies of black, galvanized or tinned sheets, and the supplies are entirely dependent upon what the makers can obtain in the way of raw material.

Gasoline and Coal Oil Have Advanced 2c. Gal.

Toronto.

GASOLINE.—New and higher prices have again been made on gasoline, having advanced 2 cents per gallon, making the new quotation 40 cents per gallon. Many are of the opinion that prices on this commodity have not as yet reached the peak and the tendency is still upwards. It is hard to state the direct factors bearing on the case as there are so many phases to the situation, and while the price on crude oil has remained firm, higher cost of refining, handling and hauling and other charges have increased, it is stated.

COAL OIL has also been revised upwards and will now cost the dealer 29 1-2 cents per gallon for Royalite and 32½ cents per gallon for Polacine, being an advance of 2 cents per gallon.

Black Machine Oil Marked Up 2½c. Gal.

Toronto.

MACHINE OIL, in line with other kindred products, has also been revised upwards. The new price is very firm and the tendency is still upwards. The black summer oil now costs the dealer 30c. per gallon, while the black winter oil has been marked up to 30 1-2c. per gallon, being an advance of approximately 2 1-2 cents per gallon.

Stocks of Fence Wire Still Very Light

Toronto.

FENCE WIRE.—It appears as though fall fencing operations may be held somewhat in check owing to the great scarcity. Wire of nearly all kinds is proving to be a very scarce commodity at the present time and jobbers state that any stocks they have on hand are moving out very rapidly, but owing to the position the mills are in at the present time they state they are unable to place orders for immediate delivery. This being the case, they are anxious for the future, especially the very near future, as there is an intimation that a great scarcity will prevail in nearly all kinds of wire, including fence wire.

Wire Nail Famine Shows No Relief

Toronto.

WIRE NAILS.—Little relief has been offered the wire nail situation and a great scarcity continues. The recent higher quotation of $6.25 per keg base is firmly held. The demand for wire nails still exceeds the supply and many are concerned for the future. The trade generally have experienced a very heavy building year and it is believed that most stocks are very low, and present prospects are poor for immediate delivery. The present indications are that no immediate change will be made. This may be on account of the manufacturers not having any nails to sell for immediate delivery. It is believed this condition applies to nearly all countries, and a great shortage is noticed throughout the world. Canadian trade reports show that Canadian exports for wire nails have greatly increased; considerable of this going to the United States.

Rope Sales Quiet; Binder Twine Moving

Toronto.

ROPE.—Business is rather quiet for rope, although manufacturers express themselves as well satisfied with the business that is coming forward, which may be an intimation of the demand when business generally picks up after the holiday and seasonably quiet period.

BINDER TWINE is moving very briskly and dealers generally seem to be greatly rushed to receive their full supplies before the harvest season opens up in full swing. Present indications point to a heavy crop and a good tonnage of twine, it is expected, will be handled this season.

Wrought Pipe Has Again Been Revised Upwards

Toronto.

WROUGHT PIPE.—A new higher revision has again been made on wrought pipe and has been a big surprise to many, owing to the very recent advances that have already been made. This time the price mostly affects the wrought iron products, although other changes have been made.

The situation has little prospect of an early relief as regards supplies, deliveries and other conditions, and while in the majority of cases manufacturers are willing to sell with the privilege of delivery 4 to 6 weeks after receipt of order, there is some indication that this period may be lengthened and purchasers will have to wait probably several months for regular size orders, while special large orders may have to be arranged specially.

The following is a list of new net prices on the best known lines:

Price List No. 46, July 26, 1920

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Steel Galv.	Gen. Wrought Iron Blk.	Gen. Wrought Iron Galv.

Boiler Tubes Scarce; Hard to Get Shipments

Toronto.

BOILER TUBES continue to be a very scarce article and jobbers state that few shipments are coming forward, and state that shipments are being materially held up on account of the great shortage of freight cars and the congestion of freight, which has not as yet been cleaned up on some of the U. S. railroads. Many are surmising if it would be possible to secure these shipments were the railroads in better condition to handle the transportation. They state the skelp mills are very far behind with their orders and raw materials are very scarce and as a result manufacturers have to go begging for some of the best selling sizes.

There is also the coal situation, due to the freight transportation problem. The coal has become very scarce and some industries have been closed down as a result. It is hard to state what the future will show for this commodity, although many are in hopes that the situation will have recovered and righted itself before the big rush, which commences in the early fall.

The following are the present quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	$23 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	98 00	64 00

Lead and Zinc Products Quiet, Price Steady

Toronto.

LEAD ZINC PRODUCTS.—Business is rather quiet on this line at present, although jobbers and manufacturers state they are doing an excellent business considering the season of the year. It is believed that many who have building contracts are anxious to push their work through before the advance of cold weather. Wire solder is still quoted at 43 cents per pound and strictly at 35 cents per pound. The commercial and wiping are still quoted at 33 cents per pound, while the guaranteed is quoted at 39 cents per pound.

The following are the quotations current for some of the better known lines:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Fair Demand for Iron and Steel Bars

Toronto.

IRON AND STEEL BARS.—Although business is generally quiet at this period of the year, jobbers state they are having fair demand for bars of all kinds. This, however, may be on account of the number of contracts that are being handled requiring heavy tonnages for construction.

Some of the lighter gauges of agricultural flats are very scarce and jobbers are anxiously waiting the period when the mills will be able to run this size for them. Other sizes, they state, are fairly well stocked, although some state they have an unbalanced stock at present owing to the difficulty of securing the sizes they are short of and the light demand for sizes that they have heavy stocks of. The following are the present quotations:

Common bar steel, 3-16 and light......	6 00
Common bar steel, ¼ in. and heavier....	5 50
Common bar iron, 3-16 in. and heavier....	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 95
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Waste Materials Quiet; Price Tending Downward

Toronto.

WASTE MATERIALS.—The heavy downward sagging tendency that has been experienced of late by dealers of waste materials continues to exist and jobbers can see very little hope for an early revival of the situation. Another feature of the market probably is the fact that this is the holiday period, and many are away on their yearly vacations.

Transportation difficulties are also a factor for this condition, and owing to the mills having difficulty in securing cars to ship their products and raw material naturally their requirements are not so heavy and the market for this material is dull as a result. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06
Heavy copper	0 17
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes....	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Tea lead	0 03

Corrugated Sheets Still Very Scarce

Toronto.

CORRUGATED SHEETS.—The famine for flat sheets continues to greatly hamper the manufacturers of corrugated sheets, who state they have great difficulty in supplying their orders. Some have been fortunate to secure several shipments, however, which went a long way to fill back orders of long standing.

The trouble is mainly due, it is stated, to the freight transportation difficulties that are experienced, to the effect that cars are almost impossible to procure without being a long waiter on the waiting list, and any who are fortunate enough to secure cars are required to have them shipped the same day as the permit is received or they are forced to miss the shipment, on account of the car being transferred to someone else.

Owing to the great difficulty in securing supplies, as well as the premiums that have to be paid in order to secure immediate delivery, many are charging premiums, although the prices as shown herewith are the booking of standard prices. In some cases the premium prices are said to be from $2 to $3 higher than the prices shown herewith:

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Shortage of Canada Plate Affects Stove Pipes

Toronto.

STOVE PIPE—Considerable shortage is reported throughout the trade for stove pipe. This is said to be due to the great scarcity of Canada plate which is prevailing and few, if any, are looking for an early relief from the present situation.

Horse Shoe Quotations Advance 50c Keg Base

Toronto.

HORSE SHOES—A sharp advance has been made on horse shoe quotations, practically the whole list having been marked up 50 cents per keg base. The new quotations are as per current quotation page.

Famine in Sheets and Plates Not Relieved

Toronto.

SHEETS AND PLATES—The situation regarding delivery of sheets and plates is daily becoming more acute and manufacturers and jobbers are in a quandary as to future prospects. The latest development, whereby there is a great shortage of cars, is another worry to the manufacturers, who have experienced great difficulty for some time past in securing supplies of raw material.

A great number of cars are being used for the transportation of coal and grain, the open car being assigned for coal and the closed box for the transportation of grain, and it has been stated that on some occasions these cars have been hauled empty to their destination rather than load with freight and have the uncertainty of when the car would again be available for grain or coal as the case may be.

The following quotations o nhseets and plates are published here merely as a guide, and while these prices are recognized as standard many are charging premiums on account of having to go into local markets or are required to pay premiums from the mill for any spot deliveries they may receive. The following prices are in effect:

BLACK SHEETS

14 gauge	$8 95
16 gauge	9 00
18-20 gauge	9 45
22-24 gauge	9 50
26 gauge	9 55
28 gauge	9 65
3-16 inch plate	9 75
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$12 50	$12 00	$13 25
U.S. 28	11 45	12 70	11 45	12 85
U.S. 26	11 15	12 40	11 15	12 55
22 and 24	11 00	12 25	11 00	12 40
18 and 20	10 70	11 95	10 70	12 10
16	10 70	11 95	10 70	12 10
12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Demand for Ingot Metals Light, Prices Steady

Toronto.

INGOT METALS.—Any slight changes that have been made on the price of ingot metals during the week have been offset by the rate of exchange, leaving present quotations unchanged. Business is fairly quiet although the amount of business being handled is satisfactory considering the season of the year.

TIN.—Practically no change has been made on the price of tin this week, the quotation remaining at 63 cents per pound.

LEAD is steady although the price is unchanged and is still quoted at 10½ cents per pound.

SPELTER.—The quotations on spelter show no change. The demand is fair. The present price is quoted at 10¾ cents per pound.

ANTIMONY has shown considerably more strength and the demand is somewhat heavier. The quotation remains unchanged, prices being from 12½ cents to 15½ cents per pound.

COPPER.—Quotation on copper shows little change, although the situation is somewhat stronger. The price remains at 24 cents per pound.

ALUMINUM.—Practically no change has been shown on aluminum, the price remaining at 37 cents per pound.

LONDON MARKETS

LONDON, July 29.—Many advances have again been made on many lines of hardware during the week. Chief on the list is the higher quotation on wrought pipe. Gasoline and coal oil are also up 2 cents per gallon. English goods are coming forward in good quantities and some lines are higher in price. English graining combs and side cutting pliers are higher in price. Cut laces and high-speed drills have been marked down a few points.

Tin roofing caps, ash sifters, R. W. trolley barn door hangers, self-wringing mops, anti-rattlers, electricians' bits, Snap hand cleaner, firmer chisels and steel hose reels are all higher in price.

Business continues seasonably good in London and surrounding district. There is a fair sale for most lines of summer goods.

Prices continue very firm and a decided shortage continues on wire nails, fence wire, staples, roofing nails and many lines of roofing. Many firms are shipping booked orders of fall goods now.

Steel Hose Reels Marked Up to $3.00 Each

London, Ont.

HOSE REELS.—Higher prices have been made on various makes of hose reels, the steel, number 10, are now quoted at $2.10 each and the number 20 at $3.00 each.

Socket Firmer Chisels Priced at List Less 25%

London, Ont.

CHISELS.—A new and higher price has been made on chisel prices, the socket firmer chisels being advanced by a lowering of the discount, which is quoted at 25 per cent. off the list.

Snap Hand Cleaner Marked Up $2.20 Doz.

London, Ont.

HAND CLEANERS.—In line with higher quotations that are daily being made on many hardware commodities, special lines are also being marked up An advance has been made on the price of Snap hand cleaner, the new quotation being $2 20 dozen net cash.

Electricians' Bits Advance to $10.20 Doz.

London, Ont.

ELECTRICIANS' BITS.—New and higher quotations have been made on electricians' bits. The 11-16 are now priced to the dealer at $10.20 per dozen and the 12-16 at $11.50 per dozen.

English Graining Combs Now Priced at $1.60 Set

London, Ont.

GRAINING COMBS.—Arrivals of English make goods are becoming more frequent and fair shipments are daily coming forward. This, it is hoped, will help supply the heavy demand for lines which have been very hard to procure.

English graining combs are coming forward in fairly large shipments and the latest arrivals are somewhat higher in price, the quotation being $1.60 per set.

Shipments of English Pliers Coming in

London, Ont.

PLIERS.—The advancing cost of raw materials, labor and other factors is given as the reason for the higher prices that are being made on many lines of tools. This week an advance has been made on the price of English side- cutting pliers, which are quoted as follows:

No. 1001 x 5"	$ 9 00
6"	10 75
7"	12 50
8"	15 00

Johnson's Anti-Rattlers Advance; Cost $1.80 Doz.

London, Ont.

ANTI-RATTLERS.—The advanced cost of raw material continues to affect the price of the finished product, especially where the basic material is iron or steel.

This week an advance has been made on the price of Johnson's anti-rattlers

the new price being quoted at $1.80 per dozen pair. The Fernald quick-shift anti-rattlers have also been marked up, the new price being $4.50 per dozen.

Self-Wringing Mops Marked Up to $6.50 Doz.

London, Ont.

MOPS.—Higher prices are quoted on self-wringing mops, the dealer now being required to pay $6.50 per dozen for future supplies.

Barn Door Hangers Have Again Advanced

London, Ont.

BARN DOOR HANGERS.—A further advance over prices quoted last week for trolley barn door hangers has caused some surprise, and while last week's quotations were firm, not a few expected them to hold unchanged for some time to some. This, however, is in line with the serious situation which has developed for many products of iron or steel, and many are concerned for future prices, which point to still higher levels if materials do not come forward more satisfactorily.

The Richard Wilcox No. 21 hange er is now quoted at $22.40 per dozen, while the number 321 is priced at $24.00 per dozen.

Ash Sifters Will Cost Dealers More This Season

London, Ont.

ASH SIFTERS.—Shipments of various ash sifters are beginning to move freely for fall business, while some dealers who have been holding back their orders are beginning to feel concern for future deliveries and have been ordering more freely as a result in order to be sure of securing sufficient stock when the season arrives.

The prices on some lines are slightly advanced over those of last season. The Banner number 2 is quoted at $3.65 each, while the rocker is priced at $6.25 each for the number 1.

Lower Prices Made on Cut Laces; Now Priced at $2.85

London, Ont.

CUT LACES.—Lower revisions have been made on lace leather quotations and the cut laces are now quoted at somewhat easier prices, the ¼, 5-16, ⅜ and ½ inch are now quoted at $2.85 per pound.

Fence Wire Famine Shows No Relief

London, Ont.

FENCE WIRES.—Practically all kinds of fence wires are enjoying a very good demand and supplies are moving very freely, although jobbers state they have great difficulty in securing sufficient supplies from the manufacturers to satisfy the present demand. Especially is this true of barb wire, and coil spring and other galvanized wires.

Roofing Caps Have Been Marked Up to 14c Per Lb.

London, Ont.

ROOFING CAPS.—A revision has been made on the price of roofing caps and dealers will now be required to pay more for future supplies. 100 lb. bags are naw quoted at 13½ cents per lb., while small lots are quoted at 14 cents per lb.

Binder Twine Has Heavy Demand; Rope Quiet

London, Ont.

ROPE.—The present shows a quiet buying movement for rope, although fair quantities are moving for this season of the year.

BINDER TWINE, however, is in heavy demand and dealers are rushing to secure stocks in order to be in readiness for the anticipated demand in the very near future. Present quotations are as per current quotation page.

Famine in Wire Nails; Price Firm; Unchanged

London, Ont.

WIRE NAILS.—The situation in regard to wire nails shows little change and stocks aret becoming very nearly exhausted. When it is considered the condition that the mills are in at present on account of the shortage in coal, the future prospects for receiving wire nails in any quantity do not look very bright. The demand continues to be a very heavy one and the quotations are very firm, although no change has been made this week, $6.25 per keg base still being the quotation.

Shovels and Spades Still Move Freely

London, Ont.

SPADES, SHOVELS AND SCOOPS. —A very good demand is noted for spades, shovels and scoops and stocks are steadily going out to the merchant Reports generally are that merchants are having a good truover in this line which is said to be on account of the building activities and other improvements. The present discount continues to hold at 35 per cent. off the list.

Further Advances Made on Wrought Pipe

London, Ont.

WROUGHT PIPE.—Notwithstanding the recent advance made on the price of wrought pipe, further advances have again been made.

The following are the new quotations:

Price List No. 46. July 26, 1920.

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Galv.	Gen. Wrought Iron Blk.	Galv.
⅛	$ 6.50	$ 8.50	$.....	$.....

Scythes and Snaths Have Good Buying Movement

London, Ont.

SCYTHES AND SNATHS.-The heavy growth of weeds, etc., is attributed to be the main factor for the heavy demand for various lines of scythes and snaths. Present quotations are firm although unchanged and are as follows:

Scythes—	Doz.
Cast steel	$17 25
Clipper	18 25
Double bead	18 75
Cutlery steel	19 25
Brush	17 75

Snaths—No. 1 Patent, $15.85 doz.; No. 2 patent, $15.20 doz.; No. 3 patent, $14.00 doz.; No. 2/0, $16.50 doz.; Brush. $17.20 doz.

Fair Demand Continues For Poultry Netting

London, Ont.

POULTRY NETTING.—A good sale is noted for poultry netting at present and nearly all jobbers state that their stocks are very low in this line. Especially is this true of the one-inch mesh. The prices are firm although quotations are still unchanged. The Canadian two-inch mesh is still quoted at net list, while the one-inch mesh is quoted at an additional 5 per cent. to the list.

Linseed Oil Prices Steady; Unchanged

London, Ont.

LINSEED OIL.—Sales are rather quiet this week for linseed oil. Stocks are beginning to accumulate in better quantities and the situation shows considerable improvement throughout.

The present quotations are unchanged and prices are fairly steady. The following prices are current:

	Raw	Boiled
1 to 2 bbls., gal.............	$2 27	$2 30
3 to 5 bbls., gal.............	2 26	2 29
6 to 9 bbls., gal.............	2 24	2 27

Less bbls., add 15c gal.

Turpentine Prices Steady; Unchanged

London, Ont.

TURPENTINE shows no change this week. Although the present price is fairly steady, the tendency is still for lower prices in the near future. It is stated that many are looking for a decided increase in his season's receipts over that of last and base their opinions on the satisfactory returns which are coming forward daily. One of the main draw-

backs, it is stated, has been the tardy delivery by the railroad companies, and many have had shipmens tied up in transit for some considerable time, and have not as yet received them. The following are the present quotations:

1 bbl. lots, Imp. gal.	$2 65
2 to 4 bbl. lots, Imp. gal.	2 64
5 gal. lots, Imp. gal.	2 80

Shortage of Whiting Firms Putty Prices

London, Ont.

PUTTY.—The demand for putty is seasonably heavy and manufacurers are much concerned over the shortage of whiting and chalk. They state they cannot get sufficient to make up into putty and at present even in a quiet season the demand is greater than the supply.

European operators state they have great difficulty in getting men to handle the chalf and any they are able to secure the chalk and any they are able to secure the present quotations:

PUTTY—	Per 100 lbs.
Standard, 100-lb. drums	8 30
Do., 25-lb. drums	8 55
Pure, 100-lb. drums	10 80
Do., 25-lb. drums	11 05

White Lead in Oil Firm; Price Remains Unchanged

London, Ont.

WHITE LEAD IN OIL.—The sale for this commodity continues to be good and a fair volume is moving although the price at present is very firm. Although white lead in oil is considered to be selling at a high figure in comparison with normal times it is stated the present prices is very reasonable in comparison with other commodities and authorities on the subject state that it has only advanced in accordance with the higher cost of living. The following quotations are current: Tons—Pure, $20,45 per 100 lbs., $20.80 less tons; Elephant, $20.95 per 100 lbs., $21.30 less tons.

WINNIPEG MARKETS

WINNIPEG, July 28.—Greater activity has been shown throughout the hardware trade this week as regards changes in prices. Many lines have been marked up to higher levels. Scarcity of many lines still prevail. Manufacturers are still hard pressed for raw materials, but they still have some manufactured goods on hand, not sufficient, however, to fill all orders. They are also finding difficulty in getting cars to ship out goods.

The coal situation is causing a great deal of trouble. It has eased up considerably but not sufficiently to take care of future needs.

The shortage of steel metal is a cause of general complaint and those dealers who have contracted well ahead are only able to get a very limited quantity.

Stoves are a scarce article and dealers state they are getting their requirements in small installments. Many customers are on the waiting list anxious to buy certain lines of stoves and ranges.

Paint materials are remaining steady and would seem that perhaps the worst is over. The general opinion is that prices with an upward tendency have ceased, although there is no definite sign of a fall taking place. Linseed oil has eased up a little more since last week. White lead is still in big demand and the supply is none too good.

Sporting goods and ammunition are very active, and the demand is greater than the stocks will take care of. The prices on many lines of guns, ammunition and sporting goods have been advanced to a higher level as notated below.

In general, trade is good and collections are somewhat better than they were.

Bonney Wrench Sets Have Advanced About 10%

Winnipeg.

WRENCH SETS.—A good business is being handled for various tools and mechanics' tools are still in heavy demand. In line with the advancing cost of materials and manufacture, etc., some lines have again been marked up. The number 32 Bonney wrench set has sharply advanced and is now quoted at $4.50 per set, being approximately an advance of 10 per cent.

28 Gauge Galvanized Sheets, $13.75 per Cwt.

Winnipeg.

GALVANIZED IRON.—A great scarcity continues for galvanized iron sheets, a condition which has been prevalent practically since the termination of the recent war. Jobbers state it is still impossible to secure stocks and the demand is daily increasing as a result. The present drawback seems to be the shortage of freight cars for transportation purposes, and it is stated that some of the mills have been held up with production on account of not having available space to pile the heavy tonnages which they daily turn out. As a result of insufficient cars, to daily move their product, 28 gauge galvanized sheet iron is quoted at $13.75 per 100 pounds.

Plumbers' Oakum Has Heavy Buying Movement

Winnipeg.

OAKUM.—A sharp advance of 25 per cent. has been made on the price of plumbers' oakum. The demand seems to be somewhat greater than the supply, although orders have usually been filled complete up to the present, it is stated. Some have it that if the present demand continues supplies will not hold out in sufficient volume to meet the heavy buying movement.

Good Buying Movement For Various Lines of Glue

Winnipeg.

GLUES.—A good business is being handled for many lines of glues, pastes, etc. Stocks are in fair condition, most orders up to the present being filled promptly. Sementol is also moving freely. Gallons are still quoted at $8.40 each and quarts at $2.40 each, while quarts in half dozen lots are quoted at $2.00 each.

High Speed Drills Are 10% Lower in Price

Winnipeg.

HIGH SPEED DRILLS.—A reduction of 10 per cent. has been made on high speed twist drills. There seems no prospect or probability, however, that a reduction will be forthcoming on carban drills, at least not in the near future, it is stated.

May be Famine in Whiffletree Supplies

Winnipeg.

WHIFFLETREES.—Wooden singletrees, whiffletrees, etc., are scarce. It it difficult at the present time to get adequate stocks of these goods, and it is felt that the shortage will be still worse and prices are bound to rule high, perhaps higher than they now are. Handles, of all sorts, have the same ruling. Higher prices are anticipated when new shipments arrive.

Great Scarcity for Shovels at Present

Winnipeg.

SHOVELS.—All makes of shovels seem scarce. Orders are coming in very regularly for all kinds of shovels, but they cannot be filled on account of their being hard to get from the factory. Stocks are very low at the present time and the outlook is not very promising. Prices have not changed but higher prices would not be unexpected in the near future.

Harvest Tools Have Heavy Buying Movement

Winnipeg.

HARVEST TOOLS.—A good demand is being made for all kinds of harvest tools and the stocks are in fair shape. Prices have not changed and it is likely they will remain as they are for the present, quoted 50 per cent. and 10 per cent.

Number 3 Saw Handles Now Quoted at 55c. Pr.

Winnipeg.

SAW HANDLES.—The new prices which have been made on saw handles is 10 per cent. higher than former quotations and are now priced at 55 cents per pair for the number of 3 two-man saw handles. Orders for fall delivery are coming forward freely and altogether business is very satisfactory.

New Prices Have Been Made on Sliding Casters

Winnipeg.

SLIDING CASTERS.—An advance has been made on the price of Onward sliding casters, the number 4 is now quoted at $4 per 100 set, the number 3 at $4.30, the number 2 at $4.50, and the number 1 at $4.80 per 100 set.

Present stocks have shown considerable improvement and it is believed that dealers are in better position to fill their orders and a fair business is anticipated.

An Advance of 10% Made on Horse Muzzles

Winnipeg.

HORSE MUZZLES have been marked up 10 per cent. A good demand is anticipated in this particular line. Stock is in fair shape. The following prices are quoted: No. 4, $4.00; 3, $3.10; 11, $4.40 per dozen.

Oil and Molasses Gates Advance About 10%

Winnipeg.

OIL AND MOLASSES GATES.—New and higher prices have been made on oil and molasses gates and the Stebbins have been advanced 10 per cent. The demand at present has slackened and business in this line is rather quiet. The new quotation is net list.

Revolvers Join March Upwards

Winnipeg.

REVOLVERS AND PISTOLS. — A sharp advance has been made on the price of some lines of revolvers, both with hammer and hammerless. Automatic pistols have also been marked up. The new prices on some of the better known lines are as follows:

Iver Johnson Hammer Revolvers—32 x 3 NP, $16.80; 32 x 3 B, $17.20; 38 x 3¼ NP, $16.80; 38 x 3¼ B, $17.20; 32 x 4 NP, $17.20; 32 x 4 B, $17.60; 38 x 4 NP, $17.20; 38 x 4 B, $17.60; 32 x 5 NP, $17.60; 32 x 5 B, $18.00; 38 x 5 NP, $17.60; 38 x 5 B, $18.00; 32 x 6 NP, $18.00; 32 x 6 B, $18.40; 38 x 6 NP, $18.00; 38 x 6 B, $18.40; Iver Johnson Hammerless Revolvers—3 B, $18.25; 3 NP, $17.85; 3¼ B, $18.25; 3¼ NP, $17.85; 4 B, $18.65; 4 NP, $18.25; 5 B, $19.05; 5 NP, $18.65; Savage Automatic Pistols—32 cal., $32.00; 380 cal., $34.00.

Many Lines Shot Guns Revised Upwards

Winnipeg.

SHOT GUNS.—In line with advances which have been made on many kinds of fire-arms, shot guns have again been revised upwards, practically all makes being higher in price. The following list shows the new quotations on some of the better known lines:

L. C. Smith—00, $73.50; 00E, $92.40; 0, $89.25; 0E, $110.25;

Fox—FA, $93.00; FAE, $110.00; FSS, $74.55; FSSE, $91.55;

Parker—Trojan, $73.50; VH, $97.75; VHE, $134.40;

Winchester—1897 T.D. x 12 or 16, $64.35; Model 1912, Standard, $74.20; Tournament, $109.60; Trap, $134.30;

Remington—10A, $67.45; 10S, $80.00; 10C, $92.15;

Stevens—520, $52.50; 522, $74.55;

Higher Prices Made on Ammunition and Shells

Winnipeg.

AMMUNITION.—New prices on ammunition show advance slightly over former quotations. Ammunition orders are pouring in and at present stocks are in just fair shape. Loaded shells are in big demand, probably on account of the chicken season re-opening this fall. Ammunition quotations are as follows: Winchester and Savage, 33 per cent., U. M. C., 37½ per cent., Dominion 40 per cent. off Dominion list.

Various Rifles Have Again been Marked Up

Winnipeg.

RIFLES.—Higher revisions have again been made on some lines of rifles. The Winchester, Remington and Hamilton make again come up for further higher revision and some of the new prices are quoted below. Many orders are being received for rifles, but stocks generally seem very light, the majority having only a few sizes in stock.

Model 1890—22 Short, $38.10; 22 Long, $38.10; 22 W.R.F., $38.10. Model 1892—Round barrel, all sizes, $45.00; Octagon barrel, all sizes, $47,70; Carbine 44-40, Oct., $40.65. Model 1894—Round barrel 25-35 and 30-30, $47.40; Octagon barrel 25-35 and 30-30, $52.15; 30-30 Oct. T.D., $69.80; 32 Spec. Rd. barrel, $47.40; 32 Spec. Oct. barrel, $52.15; 32-40 and 38-55 Rd. barrel, $45.95; 32-40 and 38-55 Oct. barrel, $49.50. Carbines 30-30 and 32 H.P., $45.05; 38-55, $42.40. Model 1886—33, $52.50; Model 1895—All calibers, $64.35; Model 1905—All calibers, $59.50; Model 1907—All calibers, $74.50; Model 1910—All calibers, $74.50; Model 1902, $12.70; Thumb trigger, $11.90; Model 1904, $15.25; Model 1906, $34.75; Model 1903, $54.20.

Hamilton Rifles.—To-day's prices: No. 17, all calibers, $12.10; No. 44, all calibers, $21.50; No. 70, $19.50; 12A, $31.50; 6, $11.60; 12B, 12C and 12CS, $35.40; 14A and 14½A, $64.60; 14R and 14½B, $62.30.

PITTSBURGH MARKETS

PITTSBURGH, July 29.—A better freight movement is reported from the Chicago district, where it is said some of the accumulations of steel have gone from mill, in addition to current production. In the rest of the Central West, including Pittsburgh, shipping conditions are even worse than a week ago, and as production of steel continues substantially at the former rate this means that steel is being accumulated at mill at a more rapid rate than formerly. More of the steel is being left in unfinished form, for prudential reasons, and the actual production of finished steel is smaller than a month ago.

The blast furnaces and steel mills stood to gain some advantage in car supplies by the recent modification. At their request, Service Order No. 7, according preference to coal mines, was interpreted as not including as "coal cars" those flat bottom gondolas that are under 36 inches high, inside measurement, but it seems now that there are not many cars in this region that would be affected. Previous to the new interpretation most of the roads were regarding as coal cars any that were over 30 inches. The industry gets a definite backset in that the requirement that cars regarded as coal cars may be loaded only when the destination of the loaded material is toward coal mines that should be furnished the cars. Previously this rule had been very largely evaded. As it is now, nearly all the coal cars that reach furnaces and mills have to go out empty, while formerly the shippers were taking advantage of their possession of the cars to load them out.

According to some claims the railroads are really handling a great deal of freight the insufficiency of movement being due to the particularly large volume of business offered. At any rate, the shippers at present have little hope of their condition being improved as long as any improvement in car movement redounds only to the benefit of the coal mines, under Order No. 7. However, the shippers have recently found hope that within a few weeks the coal mines will be supplied with all the cars they are able to load. The deficiencies in car supplies at coal mines, from the mine ratings, average about 50 per cent., and it is not thought that the car supplies are going to be doubled in the near future, or at any time, so as to provide 100 per cent., the expectation being that with a moderate further increase in car supplies a so-called "labor shortage" will be developed at the coal mines, say when car supplies get to 65 or 70 per cent. of ratings. These labor shortages are not shortages in the number of men, but shortages in the amount of work the men on payrolls will do, as the men will not put in full hours for any length of time. As long as cars are in shorter supply than mining performance all the deficiency is attributed to "car short-

age," for the labor shortage is not actually developed.

If a decided improvement in car supplies for shipping steel products does not occur within 30 days, or perhaps 60 days at the outside, it will be necessary for the mills to decrease their production of steel, the production of pig iron being of course curtailed at the same time. Thus far the situation has been met, first by simply piling finished steel as made, and later, in the past few weeks, by curtailing finishing operations and piling part of the steel in unfinished or semi-finished form. This process could not be continued indefinitely, even if there were unlimited storage facilities for semi-finished steel such as billets and sheet bars, for the reason that eventually all the steel would have to be finished and the finishing departments can carry only a very moderate overload. A fair estimate seems to be that even the present accumulation of steel will at the very best require from three to six months' time for working off if the railroads get to the point of rendering the maximum service cenceivable with their present physical equipment.

Picking Out Shipments

On account of the improbability of all the finished steel now in stock at mills, rolled to customers' specifications, being acceptable to the customers at the late date at which it will have to be shipped, the mills are now making an effort to pick out and ship the more perishable forms of steel, such as merchant bars that are cut to length, and other descriptions of steel at all special in character. This steel is picked out from stocks or from current rollings, as the case may be, so that as far as possible the steel left for later shipment will be more or less in stock sizes, either useful to the customers for whom rolled, or saleable in the open market.

Variations in Demand

Current market demand is excellent for merchant steel bars, particularly small sizes, and in fact almost everything under 2-inch. Demand for shapes and plates, on the other hand, is very light and has been so for several months. The testimony of the mills in this respect is confirmed by the June report of the Bridge Builders' and Structural Society, showing lettings of fabricated steel contracts this month to have been only 50 per cent. of the fitting shop capacity. June is sometimes a light month if this business has been done earlier, but the average for the six months ending with June is only 72 per cent. The fact is that investors are quite indisposed to go ahead with large construction jobs, on account of great delays promised for such work and the high cost of labor and materials generally. The mill prices of the plain structural shapes are not particularly objected to, for as a matter of fact they are rather moderate compared with prices of some building materials and with the cost of labor on construction jobs.

All present indications suggest that with construction work involving the consumption of steel at a low ebb, with the operations of various manufacturing consumers materially curtailed by various causes, and with large stocks of steel accumulated at mills, the steel market is going to be an easy one, but the steel market is one of surprises, and present indications may possibly be found to be somewhat misleading.

Pig Iron

As to pig iron, the market such as it is shows rather an upward than a downward trend. Deliveries are very difficult to secure, and some furnaces are piling iron. The stiffness of the market may be due simply to the transportation condition, but a loosening in transportation may increase consumption so as to enable the stocks to be absorbed without weakening the market. The average consumer, at least in this district, has become very conservative and will buy no iron except what is absolutely needed in the near future. The buyers seem to expect the market to decline, but if they all overstay the market they may produce an advance when they come to buy. A fair guess seems to be that there will be simply hand-to-mouth buying of pig iron for months to come.

British Manufacturers May Establish Here

Desire to Make Connections for Making Certain Goods—May Result in Establishing Factories in Time—Mass Production to Help Cost Control

MONTREAL.—That British manufacturers of various products desire to make closer connection with Canada was evidenced in an interview given Hardware & Metal by H. T. Bates of London. Mr. Bates is in Canada in quest of connections for his principals, Alloy Welding Processes Limited; Fullers' United Electric Works; S. Wolf and Company, and Twiss Engineering and Electric Transmission Company, all of London.

May Be Widespread

In reply to a question Mr. Bates stated to Hardware and Metal that he believed there was quite a widespread desire on the part of British manufacturers generally, to make some arrangements to either manufacture in Canada, or to make connections with manufacturers here that would enable them to turn out their products through Canadian plants. This, for the time being at least, would ensure the British maker a considerably increased output, and at a more favorable production cost. That is to say, when the cost of manufacture is taken into consideration, with duty added, many products can be produced here to better advantage than to be made in England and shipped here in the finished state.

It was further pointed out that the home market was in need of great quantities of goods, and this made it awkward, and sometimes inconvenient, to spare large quantities of some goods for export. Under the plans and specifications and patents held by British houses, it would be an easy matter to make connections here that would result in a satisfactory production of such goods. This might, in many cases, result in the establishing eventually of branch factories in Canada.

Mass Production

"Mass production is a great thing in England just now," continued Mr. Bates. "It has been necessary in order to keep the cost of production under control, and so meet outside competition."

With reference to the German competition that is bound to come, Mr. Bates stated that the German manufacturer was protecting himself, as was every manufacturer, by inserting a clause to the effect that prices would be dependent upon circumstances that might develop in the course of manufacturing a given product. He instanced a case in which, where a certain repair was wanted for a special type of engine made in Germany, a price of $59 was quoted. A little later word was received to the effect that the price was now to be $98. This seemed to be altogether too much like profiteering and the order was cancelled.

A high standard, Mr. Bates stated, is still maintained with regard to the various British manufactured products, and with mass production it will be possible to produce much less than under the old system.

New Position for Hardware Traveller

Winnipeg.—Dave Burnet, who has been travelling the main line of the C.P.R. from Winnipeg to Regina for the past ten years for the J. H. Ashdown Hardware Company, has been called off the road to take charge of the new Personal Service Department of the company. This is a new development for this firm. Mr. Burnet is well-known to the trade, having travelled for the past 39 years. In his new position he will have charge of all customers calling on the company's head office, insofar as rendering them personal service is concerned. The object is to give more efficient service and to save the customers' time by putting them immediately in touch with the right department.

Encourage Children to Use Paint and Teach Them Economy of Painting While on Holidays

Many Children's Playthings Can Be Brightened Up During Annual Vacation—Sowing the Seed Early Will Make These Future Property-Owners Enthusiastic for Paint Preservation—Dealer Can Develop This Field for Immediate and Future Business.

SUGGESTIONS for livening up summer trade are about the most desirable which can be offered to any hardware dealer at this time of the year, for while the serious falling off of paint sales which characterized years gone by has been eliminated to some extent, yet the summer season is obviously a quieter period in the sale of paint than is the spring of the year. It therefore behooves the dealer to use all resourcefulness in developing what channels of trade are offered.

To the dealer who is thus looking for suggestions we say, have you ever considered the possibilities of trying to encourage children's trade in paints? There is no question an effective argument taken into the home through the child will bear fruit, and now is the time to go after this trade while the children are home on summer holidays. The young hopefuls will want to brighten up many old articles dear to their hearts during the summer holidays, and the dealer may not only derive present business from this source but teach the children an early lesson in the economy of property values. Early impressions sink deepest and much building for the future can be done.

Bicycles, Carts, Carriages, Etc., to be Brightened Up

Returning to the question of immediate trade there's Billy's bicycle and express cart and the garden swing and little Teddy's scooter and Billy's old go-cart which can be renewed. Then there is sister's miniature domestic furniture.

The Save the Surface idea can be planted in the young boy's mind at an early age, and it will be found that while on holidays he will be very keen to accomplish something by way of painting, and no more fertile ground can be found for profitable future trade promotion than by implanting in the minds of children the value

Making use of current events in connection with paint display, Sumner Company Limited, hardware, Moncton, New Brunswick, had this window trim arranged to be on display during the convention of the Dominion Police Chiefs in that city this month. It was trimmed by Mr. Clifford. Much attention was attracted to the novel display showing a model house which was illuminated at night. Such a window does much to maintain interest in painting during the summer months.

of paints and varnishes as a means of protection and preservation of property.

Children Will Be Property Owners of To-morrow

The children will be the property owners of to-morrow, and to them will be given the trusteeship of our towns, cities and country. To them the problem of conservation of our national resources will become more keen as we draw upon and diminish these each year.

The schools are teaching economics, but insufficient emphasis is being placed on the economics of property values in the sense that it represents real dollars and cents. Every board or brick or piece of structural steel that must be replaced because of deterioration through lack of paint is an economic sin against the welfare of the nation, whether or not the property owner willingly pays the shot for his negligence. It has been suggested that some enactment might be made whereby a property owner would be compelled to paint his property with sufficient frequency to keep it protected and well preserved.

Sowing Seed Early Accomplishes Big Purpose

As an indication of the value of sowing the seed in the minds of the children of to-day, it can be pointed out that it was during the public school days of many men now grown to maturity, that lessons were given in temperance which undoubtedly have played a large part in producing the dry wave which has swept this continent. This and many other present day advancements can be directly or indirectly traced to educational work in one form or another. Many of these movements did not overlook the children in their work.

Few advertised commodities have as deep and as sound economic reason for educational work as paint, so why not incorporate paint among other articles and advocate property economy in schools and elsewhere?

Children's Day to Feature Hardware Specials

An idea followed out by the hardware merchants of an Eastern city recently was to hold a children's day and feature goods pertaining to children. This is an indication of how valuable this branch of trade has been found to be when intelligently developed. The suggestion is made that merchants can work out a dad's day, a mother's day and a children's day any week in the year with seasonable goods. As far as the pail of paint is concerned, special points could be mentioned making a strong appeal to any of these groups of prospective purchasers.

A permanent foundation for the paint department in the future can be laid by teaching the children the value and enjoyment of using paint to conserve and to brighten appearances. Every father realizes the constantly increasing purchasing demands his children bring before him and by a little special effort the local dealers can possibly get the parents lined up to assist in directing the children's energy along the lines suggested.

CANADA LARGE BUYER OF U.S. ROSIN AND TURPENTINE

Exports from the United States to Canada of rosin and spirits of turpentine during the month of May 1920, were as follows:—Rosin, 12,264 barrels valued at $237,812. Spirits of turpentine, 53,025 gals. valued at $103,865. Canada was the largest importer of rosin from the U.S. and was second only to England insofar as importations of turpentine were concerned.

Mineral Production in Canada During 1919

A PRELIMINARY report of mineral production in Canada in 1919 has been prepared by John McLeish, B.A., chief of the Division of Mineral Resources and Statistics Department of Mines in Canada, and from which the following is taken:

Copper

"The production of copper in 1919 amounted to 75,124,653 pounds (37,562.3 tons) which at the average price in New York of 18.691 cents per pound, would be worth $14,041,549, as against 118,769,434 pounds (59,384.7 tons) valued at $29,250,536, or an average of 24.628 cents per pound in 1918; showing a decrease of 36.7 per cent. in quantity and 52.0 per cent. in total value. The 1918 production had been the highest recorded. That of 1919 is the lowest since 1911.

"Of the total production 54,320,182 pounds were contained in blister copper and in matte produced in Canada, part of which was refined at Trail, B.C, and Port Colborne, Ont., the balance being exported for refining, and 20,804,471 pounds estimated as recovered from ores exported to United States smelters.

"The total production of refined copper in 1919 was 3,487 tons, practically all produced at the electrolytic refinery of the Consolidated Mining and Smelting Company at Trail, B.C., though a few tons were also produced at the refinery of the International Nickel Company of Canada, at Port Colborne, Ont. The major part of the copper production at this plant is in the form of blister. The production of refined copper in 1918 was 3,809 tons, and in 1917 it was 3,901 tons.

"The production in Quebec from pyritic ores was 2,691,695 pounds, valued at $1,445,577 in 1919. These ores are nearly all shipped primarily for their sulphur content. The copper is treated as a by-product and the figures of production are the quantities reported as being 593,502 in 1918. This production is being paid for, the actual metal contents of the ores being much higher. The production in 1918 was 5,869,649 pounds.

"The production in Ontario amounted to 24,361,934 pounds, valued at $4,443,489, as against 47,074,475, valued at $11,917,rived from the nickel-copper ores of the Sudbury district, and of the Alexo Mine in Timiskaming, supplemented by a small recovery from the silver ores of the Cobalt district, and the copper ores of the Bruce Mine, Sudbury district.

"The production in Manitoba amounted to over three million pounds as against a production of over two million pounds in 1918 and was derived from a rich chalcopyrite lens found in the Mandy ore deposits at Schist Lake, north-west of The Pas. About 25,000 tons of this ore were mined containing 18 to 20 per cent. copper, 0.10 ounces of gold and about 2½ ounces of silver per ton.

"Both this property and the Flin Flon on the east side of Flin Flon Lake have been extensively developed and a large tonnage of low grade ore determined. The rich ore lens on the Mandy having been exhausted, operations were discontinued.

"The production from Manitoba was 611 ounces, as against 1,926 ounces in 1918, and was derived from the gold and copper ores of The Pas district, Northern Manitoba.

"The British Columbia production in 1919 amounted to 165,319 ounces, valued at $3,417,447 as against 180,163 ounces valued at $3,724,300 in 1918. The production for the last four years has been much below the usual production of five to six million dollars per year.

"The production from the Yukon territory amounted to 90,447 ounces valued at $1,869,705 as against 102,474 ounces valued at $2,118,325 in 1918. In addition to the production from the alluvial sands there is included a small production from the gold and copper ores of Conrad and White Horse districts. There has been a gradual falling off in production since 1913, when a production of nearly six million dollars was reported.

"The exports of mine gold bullion, gold-bearing dust, nuggets, gold in ore, etc., in 1919 are recorded as $5,037,123, as against $10,040,813 in 1918, and $15,929,051 in 1917."

Toronto.—W. N. Bunting, Northern Hardware Co., Edmonton, Alta., is visiting in Toronto this week.

"Save the surface and you save all" Paint & Varnish

Moore's Automobile Finish

A Smooth Elastic Finish

Moore's Automobile Enamel renews the appearance of Automobiles and makes them look like new. It is easy to apply, self levelling and dries over night. There are nine shades—a shade to suit every taste. The dealer will find this durable enamel an important and profitable addition to his accessory department. It dries with a dependable lustre. It "grips the metal" and leaves a strong, elastic finish that does not chip or crack — a powerful selling point with the motorist. He buys, and once he buys repeat orders are assured.

German Razors on Sale in Canada Again

German Boker razors, which used to sell in competition with the Sheffield razors at about $2.50, are again on sale in Canada at the price of $7.00. Following the matter up further, it is found by deduction that in the old days the razor cost in Germany about five marks. With the mark at its normal price of 24 cents, this meant $1.20, and a duty of 30 per cent. on this brought the cost with incidentals to, say, $1.60. Assuming that the values in Germany have gone up in ratio with the decline of the mark, which is now 2¾c valued in Canadian money, it would take nearly ten marks to equal the former one, and the German price would accordingly be some 50 marks for the razor.

As the Canadian duty is collected on the normal value, the customs would collect on $12, or $3.60, making the cost to the importer nearly $5. If, however, the razors were brought in through the States, where duty is collected on the current value of the currency of the exporting country, the price would work out something like this: German cost, 50 marks at 2½ cents, $1.25; duty, say, 40 per cent., $1; total cost $2.25. If re-exported to Canada at $2.50, there would be duty, 30 per cent., 75c.; and 14 per cent. for exchange on $2.50, say 35c, making the razor cost by this route $3.60. Here is a nice question for the customs and for the people generally.

Changes in Directorate of Ass'n of Canadian Advertisers

The following changes in the directorate of the Association of Advertisers, Inc., have recently been made:

President—D. Geo. Clark, McClary Mfg. Co., London, succeeding W. C. Betts, resigned.

Vice-President.—W. G. Stewart, Goodyear Tire & Rubber Co., of Canada, Limited.

Director.—H. E. Mihell, The Imperial Varnish & Color Co., Toronto, succeeding E. G. Hogarth, resigned.

New Member.—The Hoover Suction Sweeper Co., of Canada, Ltd., Hamilton, with Thos. F. Kelly as their representative.

How Hardwaremen Advertise Paints--No. 18

THE announcement reproduced herewith was used in the form of a leaflet by Fabien Limited, hardware merchants of Montreal, Quebec. It was used as part of a publicity movement to stir up enthusiasm for a clean-up and paint-up week. Such leaflets can be given away to customers while in the store prior to the campaign, or can be distributed throughout the surrounding community. Where intensive effort is required in a very restricted locality this method is of value. It makes a point of the fact that when one house on the street is painted, others must follow suit or look much more shabby as a result. It makes an appeal for painting in connection with the general clean-up. A catchy rhyme is linked up with a straight talk on the value and advantages of painting.

Helps Land the Big Jobs

Painters, architects and builders have learned to depend on the sureness of the Glidden result They know the reputation Glidden products enjoy and the added prestige Glidden reputation gives them That's why they're glad to specify Glidden.

Go after the big jobs in your vicinity. They require little more effort than the smaller transactions, and the volume they represent means a bigger profit for you. Glidden products will help you land this business and Glidden quality will hold it.

If you are not now carrying Glidden products let us tell you more about the opportunities they represent. Remember that Glidden is a complete line of inside and outside paints, varnishes, stains and enamels for every purpose everywhere on everything.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 29. — The outstanding points of interest this week in the paint market are those of lower prices for both linseed oil and turpentine. The present basis for linseed oil in barrel lots is $1.90 per gallon and some expect the price will soon be as low as $1.75. It is nearly a year since prices were so low and in view of the fact that the market undertone is so strong, the trade withholds buying. Certain quantities are going forward to manufacturing interests, who require the product for immediate manufacturing, but others are holding off their purchasers and will doubtless do so until there is a reaction the other way. Turpentine is also lower in price, being quoted as low as $2.75 per imperial gallon. This is coming to hand a little more freely and the sales are very slow in view of the high price. For many months past substitutes have been employed very extensively and it is doubtful whether the sale will increase greatly until prices are considerably reduced, even from present levels. With regard to white lead in oil, putty, prepared paints and specialties, varnishes and other lines, the market conditions are reported as rather quiet.

Softer Tone and Lower Linseed Oil Basis

Montreal.

LINSEED OIL—The market has further reacted this week and while some are asking a little more, others are selling on a basis of $1.90 per gal. in single barrel lots. The price may further react to $1.80 or $1.75 per gal. and in the meantime there is not much trading on the part of retailers. Considerable quantities have been shipped out to manufacturing interests who need the product for immediate use. Flax seed basis has softened appreciably, the price on Wednesday being as low as $3.33 per bushel. The basis has weakened in sympathy with other grains and the favorable crop reports from the Canadian West have also been a further factor in softening the undertone on flax.

Raw—	Imp. Gal.	
1 to 2 barrels	1 90	1 95
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	1 92½	1 97½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Less Money Asked For Pure Spirits Turpentine

Montreal.

TURPENTINE.—The arrival of turpentine is a little freer this week and prices have declined to $2.75 per gal. barrel basis. The high price, however, is affecting the sale and many substitutes are being extensively employed. Some think that prices should decline further and doubtless they will.

Turpentine—	Imp. Gal.	
Single barrels	2 75	2 85
Small lots	2 85	2 95

(Packages extra.)

Putty Holds Steady; Glass Firm and Active

Montreal.

PUTTY, GLASS.—The demand for putty is seasonable and the price basis holds unchanged. While there has been a decline in the price of linseed oil entering into manufacture of this, the difficulty of getting supplies of whiting has served to counterbalance matters quite well. Prices are holding without change.

GLASS.—The demand for glass is very heavy this summer and Hardware and Metal understands that a considerable quantity has been re-exported to the United States. This has made a very busy season for Canadian glass firms and the undertone is quite firm with discounts held unchanged.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

White Lead Holds; Supplies Rather Scarce

Montreal.

WHITE LEAD IN OIL—The difficulty of getting pig lead at the present time has been expressed from several sources. Importers state that the delivery of lead from Trail has been rather slow and that difficulty has also been encountered in getting supplies through from Great Britain. Under the conditions of heavy demands from all parts the basis is naturally holding very firm and manufacturers do not hold out much prospects of getting lower prices on their requirements. The basis for Government Standard are as follows:—5 ton lots per 100 lbs. $19.50; ton lots, $20.00; smaller quantities, $20.35.

Prepared Paint Quiet; Basis to Hold For Now

Montreal.

PREPARED PAINTS.—While the future price basis of prepared paints will naturally receive the attention of manufacturers before the close of the fall season, there is little prospect, the makers assert, of any change being brought about in the near future. Sales are limited now, to a great extent, and while there is no probability of advances being made, several manufacturers have stated to Hardware and Metal that there will be no early change of any kind.

Higher Varnish Prices May Become Necessary

Montreal.

VARNISHES.—Higher prices are probable for various grades of varnish. The lowering prices on linseed oil are naturally a favorable factor, but manufacturers state that the difficulty of getting supplies of containers, coupled with their high price, more than offsets this. The higher price of gums reported from the Orient is also a big factor. Prices are very firm and advances are suggested from several different quarters.

TORONTO

TORONTO, July 29.—A quiet period is being experienced throughout the paint department and while business is seasonably good a lighter buying movement in comparison with a few weeks ago is being experienced by the majority in the trade.

Prices throughout remain steady and fairly firm and considerable shortages have been reported on many basic lines. Whiting is still scarce and shipments are very tardy. White lead in oil is held at a firm figure and the tendency is still upward.

Perhaps the feature of this market is a further decline on the price of turpentine, as some were of the opinion that the former quotation would remain steady in line with the firmer market in the South. Linseed oil has also been reduced a further 10 cents per gallon as a result of the favorable prospects for a good crop of flax, which resulted in a decline for present holdings of flaxseed.

Collections continue to come forward promptly.

The Luxeberry Painter Says:

"VARNISHES ARE LIKE FOLKS. Some merely give us a fair weather friendship that does not last, while others retain their charms under every strain, and wear through life. I use Berry Brothers' Varnishes, Enamels and Stains because they always make new friends and new business for me."

The uniform dependability of "Berry" products is known to even the smallest consumers. This is why they are so easy to sell.

Shipments of Whiting Still Very Tardy

Toronto.

WHITING—The prevailing shortage of whiting is said to be due to the inability of the English producer to handle the heavy demand which is being made upon him, and it is believed that the scarcity is world wide. However, many are looking forward very optimistically for the future and the opinion is that this situation will soon be cleared up. The present quotations are as per current quotation page.

Scarcity For Dry Colors Continues

Toronto.

DRY COLORS—The same price continues to be quoted for dry colors of all kinds and the scarcity which has previously been quoted has shown little relief. It is still very hard to procure some kinds of chalk. The present quotations are per current quotation page.

Price Steady Unchanged For White Lead in Oil

Toronto.

WHITE LEAD IN OIL—A fair demand continues for white lead in oil, although those in the trade state that sales have dropped off considerably. This, however, is said to be customary for this season of the year, owing to holidaying period and other factors. The present quotations on white lead in oil remain firm and little change is expected. The quotations on pure in ton lots continue at $20.35 per 100 lbs., while in less than ton lots the quotation is $20.70 per 100 lbs.

Shellac and Varnish Prices Remain Firm

Toronto.

SHELLAC AND VARNISH—A very good demand is keeping up for shellac and varnish of all kinds, which is very satisfactory to jobbers and manufacturers, etc. The price continues firm, there being little indication that a change in price will be made in the near future. The quotations are as per paint quotation page.

Prepared Paint Business Quiet; Price Unchanged

Toronto.

PREPARED PAINT—Although repeat orders are coming in very favorably, jobbers state that business is rather quiet in the paint line during the past few days, although they state this is nothing unusual and is quite seasonable, and the fact that many are holidaying would also be a factor for a quiet period.

Notwithstanding the tendency of some of the ingredients of prepared paint to decline, the price continues fairly steady. Lower prices are hardly to be expected in the immediate future, present indications being very firm and are as per current quotation pages.

Glass Business Quiet; Situation Improved

Toronto.

GLASS—A very quiet buying period is being experienced by glass jobbers, who in many ways are thankful for a let up, as they are anxious to accumulate stock to a certain extent. The United States mills are still closed down and no indication of the second fire being started for some few weeks. There has been some rumors of the American mills advancing their price in the near future. However, this may be only rumor. The Belgian manufacturers seem to have the situation well in hand and are making very fair shipments, considering the difficulty with which they have to contend. Plate glass is still very scarce, although some very favorable shipments have been made. Window glass is not so plentiful in the double diamond and heavier sizes.

The following are the present quotations: Single diamond and double diamond, 15 per cent. discount from the list, while the cut lights are quoted at 40 per cent. discount.

Putty Shipments Are Fairly Heavy

Toronto.

PUTTY—A fair amount of business is being handled on putty. It is also the belief that many are gradually getting in their stores for the fall business. A very good future seems to be in store for the putty business this season and many are wondering whether they will be able to secure sufficient supplies to cover the demand which is expected to be very heavy during the fall months.

The shortage of whiting continues to materially affect the manufacturer of putty and manufacturers state they have great difficulty in securing sufficient supplies of the proper grades.

Further Decline of 5c on Turpentine Price

Toronto.

TURPENTINE.—New lower quotations have again been made on turpentine prices. This quotation is fairly steady and the consensus of opinion seems to be for steady prices for some time to come, which may not vary to any great extent from to-day's prices, it is stated. The following are the new lower prices:

Turpentine—	Per Imp. Gal
1 barrel lots	2 60
2 to 4 barrel lots	2 59
5 gal. lots	2 90

Linseed Oil Price Declines 10c Per Gal.

Toronto.

LINSEED OIL.—Further reductions have again been made on the price of linsed oil, the decline amounting to 10 cents per gallon. This is said to be due to the recent declines which have recently been made on Western flax, in view of the splendid showing the new flax is making generally throughout the West.

Linseed Oil—		
1 to 2 barrels, gal.	2 17	....
3 to 5 barrels, gal.	2 16	....
10 barrels and over, gal.	2 14	....
		Boiled
1 to 2 barrels, gal.	2 20	....
3 to 5 barrels, gal.	2 19	....
10 barrels and over, gal.	2 17	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Montreal Varnish Maker Passes

Montreal.—Brodie Jamieson, for the past forty years a resident of Montreal, and connected with the firm of R. C. Jamieson & Company, Limited, passed away at his home on Madison avenue, on Saturday last. The late Mr. Jamieson's death was unexpected. He collapsed in his room about 8 o'clock, having suffered from heart trouble.

Mr. Jamieson was a native of Glengarry County, Ontario, where he was born seventy-five years ago. For the past forty years he had been a resident of Montreal and for thirty years had been connected with the varnish department of R. C. Jamieson & Company. Besides his wife, who was formerly Miss Ella Bell, of New York, he leaves two sons, Thomas Bell Jamieson and Brodie Jamieson, Jr., both of Montreal, and Mrs. James W. Jamieson and Mrs. Thomas Parsons, also of Montreal. The late Mr. Jamieson was a member of the American Presbyterian Church.

English Plan for Continuous Building Operations

One of the features in a home building experiment in Manchester, England, as given in the last Monthly Labor Review, is the provision made for full week or all-weather employment by having one staff for both inside and outside work. In fine weather all the workers are concentrated on outside jobs and in wet weather they are shifted to the inside. This method will result in having many houses at different stages of completion at one time and calls for a corresponding large working capital, but Manchester stands ready to meet this difficulty.

The municipality is to provide the funds for erecting 1,000 houses in one of its suburbs while the building guild is to furnish not only the manual labor but also the technical and administrative workers. The city is to pay the labor cost and 10 per cent. additional and is to receive houses when they are built. The extra 10 per cent. is to cover losses, transportation cost, etc., and the city council is to buy the building material.

Transportation Outlook Uncertain

Coal and Fuel Scarce—Raw Materials Also Held Up on Account of Transportation Difficulties—Freight Cars Are Scarce.

THE great shortage of coal and fuel, which has been greatly hampering production in many industries as well as the scarcity of supplies, are in a large way attributed to transportation difficulties. The American metal market has the following to say regarding the transportation outlook:

To the bald question how transportation conditions are affecting the iron and steel industry have changed during the past week to date, many observers will answer that they have grown somewhat worse, while a few will say there is on an average no appreciable change, while very few will say there is any definite improvement.

As to what the present outlook is, the opinions show on an average a considerably more favorable complexion. Some observers remark that the transportation situation is rapidly growing no better, meaning that it looks like a good time to give up hopes of important improvement recently entertained, but others put much faith in the coal car preference order effective at the beginning of last week. At the outset this created some disturbance, decreasing car supplies to many steel mills, but that is now past and the coal mines are at any rate getting more cars. A better movement of coal would of course greatly benefit the iron and steel industry as a whole, giving it more by-product coke as well as more coal for steel mill use, and that would be an advantage even if the steel mills could not ship any more of their produc

An increase in lake coal shipments will result in more iron ore coming with the back haul.

There is some question as to what will occur with cars that have been used in the coal service but are not drop bottom. The order as to coal cars means drop bottom cars, for nowadays a "coal car" is nothing else, and the cars not drop bottom but of late used for coal may get into other channels and find their way to steel mills and blast furnaces.

One guess made to-day is that the Railroad Labor Board will announce its awards in between two and three weeks from to-day, and everyone believes that the official announcement will at once effect an improvement in railroad performance. In the iron and steel trade there has been all along a great deal of sympathy with the railroad workers, though not of course with the outlaw strikers. The iron and steel industry pays good wages and feels that railroad wages ought to be in keeping. It wants good railroad service, is willing to pay for it, and feels that to get good service wages should ge paid proportionate to those paid in the industries.

If Present Crop Harvested West Will Prosper

Wonderful Growth in Store if Grain Crop Now in Prospect is Harvested—Reports from All Sources Optimistic, Says Montreal Paint Man.

"IF ONLY the crop can be harvested and stored in the elevators, then the West will be very prosperous this fall, and in fact it will be a fine thing for the whole of Canada," said Arthur W. Brown, manager of A. Ramsay and Son Company, Montreal, to Hardware and Metal, after returning from an extended tour of the Western provinces. While in the West Mr. Brown had an opportunity of seeing the growing crops, and stated that they are most encouraging as well as the reports that he secured from many different sources.

"I have travelled to and from the West for the past thirty years," said Mr. Brown. In all that period I have never seen conditions better or more promising, and the people eevrywhere, almost without exception, are very hopeful and optimistic. If they can harvest this crop it is going to be a wonderful thing for business."

Winnipeg business men sound a cheerful and optimistic note. All of them are getting a large volume of business and conditions there are very satisfactory. From the standpoint of building activity Mr. Brown states that quite an amount of money is being expended

"There is a crying need for accommodation out there, too, and some big blocks are being erected. In Edmonton one large wholesale hardware house is duplicating a very large warehouse which they now occupy, and in other cities there is considerable building activity.

"In the Prairie Provinces the outlook is good, and Calgary and Edmonton are busy cities. Recent reports from our Alberta representatives state that the outlook is greatly improved in Southern Alberta as a result of recent rains. And British Columbia is very prosperous at the present time. Her fruit, lumbering and fishing industries are all in normal state of development, and there is good business everywhere. Shibuilding, too, is in a prosperous state at present.

Little Unrest

"While there has been some talk of the possibility of prices being lowered, there seems to be little or no justification for this," continued Mr. Brown. "I discussed this matter with a number of buyers from leading wholesale houses who had recently returned from Europe, where they had made extensive purchases. These goods were bought at high prices and there seemed to be no indication of prices coming down there. Delivery of these goods will not be made for some time—not for eight or nine months in some cases. The general expression is that there will be little or no readjustment of prices for a considerable time to come.

"As far as we are concerned we find that nearly all raw materials are costing us more than previous purchases, and there is nothing to indicate that prices will be reduced."

As to the amount of business being transacted for paint and paint materials, Mr. Brown states that there is a continued activity. Even though there has not been an excessive amount of building, all in all, the sales of paint right through the country have been heavy and very encouraging. In discussing this condition with various dealers in the West, Mr. Brown stated that there was, on every hand, the most satisfactory evidence that a big volume of business was being transacted.

Cutlery from Abroad to Be Scarce and High

Montreal.—In discussing the prospects for various lines of cutlery with C. Shipman, representative of William Hutton & Sons, Limited, Sheffield, Birmingham and London, Hardware and Metal was informed that the outlook is still for short supplies and high prices.

"The prospects are poor, with regard to any improvement in the situation for some time," said Mr. Shipman. "We are booked up at the present time at home, and for export purposes 12 months ahead. The Canadian market is being treated preferentially, however, and some lines are being exported to Canada more freely than to other countries. Stainless cutlery supply is hopeless and this is booked up for twelve months ahead.

In referring to the availability of pocket and pen knives, Mr. Shipman said that these are still very scarce. The supplies have been used up right along and the manufacturers have been unable to more than undertake the execution of part of orders.

As to the price tendencies, Mr. Shipman said that as costs were still approximately 125 per cent. higher than in pre-war period, there was little probability of any lower prices being available. There is a big demand for these lines from all parts of the world, and prices will continue high and supplies scarce, in the estimation of Mr. Shipman.

Livingston

Because

Livingston Brand

"THE KIND YOUR GRANDFATHER USED"

Oil Cake Meal is first in Quality

Livingston Brand

"THE KIND YOUR GRANDFATHER USED"

Linseed Oil is also first

THE BLUE BARREL
is the Outward Mark of Inward Quality.

The more mucilaginous matter is squeezed out of the meal the more there is in the oil. This matter, the substance which enhances the quality of the oil cake, is detrimental to the oil and absolutely harmful to paint.

Livingston Brand Linseed Oil contains little or no mucilaginous matter. It is left in the meal. That's why both Livingston products stand ace high in their respective fields. That's why you should insist on the jobber and manufacturer supplying and using the old reliable Baden oil.

Sold everywhere by leading jobbers and paint manufacturers

Bulletin

Only the Best of the Hide is Used

J. A. MILLER

Mr. J. A. Miller works under the direction of Winnipeg branch and calls on the Hardware Trade. Stands six feet two and built in proportion. Threw up a Lieutenant's Commission to go overseas. A road man of considerable experience and an excellent musical entertainer.

No skirts or roundings are used in making BT Pump Leathers.

Only 46% of the whole hide is used by us for this purpose.

In order to be sure of the right leather of the right thickness, we contract for 2,000 hides a year.

Special tanning is given and hard oil of the right quality and to the proper amount is worked into the hides to make them stand up against the water.

BT Leathers are packed in square cartons, which will not roll around on the shelves, with the size and kind clearly marked on the ends.

If you have not handled BT Leathers, give them a trial. They will make lasting friends of your pump customers.

Another Use for Galvanized Sheets

The cut below features STANDARD GALVANIZED VEGETABLE SINK as made and sold for hotel and similar kitchen equipment by the McClary Manufacturing Co., London, Canada.

SPECIFICATION

BODY Sink is made of 14 ga. galvanized iron rivetted and soldered. Edge around the top one inch wide and turned down one-half inch. Fitted with 1¼" brass waste connection, standing overflow, and fitted with removable strainer.

FRAME Legs are of 1½" x 1½" x ⅛" angle iron securely rivetted to corners of sink extending up to and below turned down edge on top of sink. Rivets are soldered on inside of sink. (Finished in Black Japan.)

DRAIN BOARDS (extra) Made of 18 ga. galvanized iron with ¾" standing rim on three sides. Corners are rounded. Drain Boards are turned down into sink one inch and bolted securely, supported by angle frame 1" x 1" x ⅛" under the drain board braced to sink legs with angle of same dimensions.

SPLASH BACK (extra) Made as integral part of the sink, carried up 12" higher than sink, of 14 ga. galvanized iron. Splash backs can be carried over drain board, if desired.

The winning list showing products made of Galvanized Sheets did not have this item, although it contained two hundred other items and will be published in next week's space in Hardware and Metal. New uses are being developed every day.

ARROWHEAD SAWS

Vanadium Steel

Are called "Standard of Canada" because they have been the choice of skilled workmen since they first entered the market.
Arrowhead Saws are perfectly tempered, hang right, are set right and sell right. Cross-cut Saws, Hand Saws, Buck Saws, and Circular Saws.

Our Catalog is a guide to profit; your name and address will bring it.

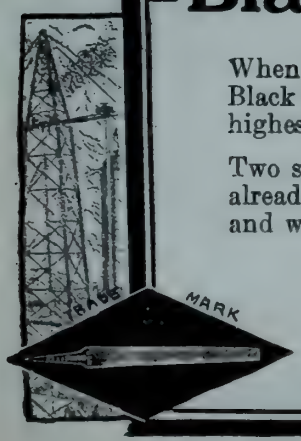
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

CROWN

A Complete Line of Thoroughly

As an organization, we have maintained a position of pre-eminence in paint making for seventy-eight years. In that time we have gained extensive experience and added resources and facilities that give us every advantage in meeting the needs of users of paints, for commercial or domestic use, the World over.

It has been a matter of policy with us to control, as far as possible, all the raw material that enter into our products.

We feel that this is the only way in which we can possibly maintain permanently the high standard we have set for *CROWN DIAMOND PAINT PRODUCTS.*

We corrode our own white lead—produce our own dry colors, import direct our heavy chemicals from the four corners of the earth and grind our own paints.

"Save the surface and you save all" *Paint & Varnish*

If interested tear out this page and place with letters to be answered.

DIAMOND

Practical and Tested Paint Products

By this method we have continuous control of practically all the materials that enter into our paints, ensuring the highest and a constantly uniform quality as well as an extensive production.

Severe tests, both physical and chemical, are made at various stages in the making of our paints, varnishes and allied products, so that it is never possible for an inferior batch to reach the user.

You can buy *CROWN DIAMOND PAINT PRODUCTS* with complete confidence as there are no paints made anywhere that can give better results or have withstood the severe practical tests to which *CROWN DIAMOND PAINTS* have been subjected.

We have special facilities for export business and have representatives in a number of foreign countries. Write us to-day and we will gladly advise you fully regarding the complete line of *CROWN DIAMOND PAINTS* and our exceptional ability to take care of export orders.

"HERCULES" SASH CORD

Has a reputation in the Canadian market, thoroughly established for the last eighteen years.

Compares in quality with the best imported brands, but is considerably lower in price.

Tests made by Strength of Materials Laboratory (University of Toronto) prove our claims as to quality.

All wholesale hardware dealers carry Hercules Sash Cord.

Manufactured in Canada

TORONTO CANADA

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

Manufacturers of

BAR IRON and STEEL: Rounds, Squares and Flats

Also Twisted Steel Bars for Reinforcing

SELLING AGENTS:

CANADIAN TUBE & IRON COMPANY, Limited, MONTREAL

Cow and Calf Weaner

Impresses Every Stock Owner

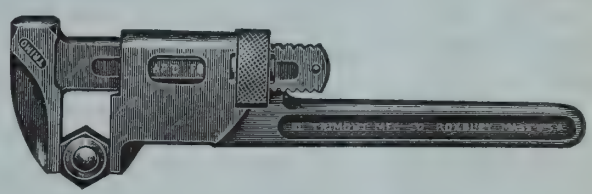
KANT-SUK

A humane and efficient device. The hinge construction permits grazing—cow and calf together—yet prevents sucking. Easily applied. Sells the year round.

Imperial Bit & Snap Company, Racine, Wis.

TRIMO

The Trimo Pipe Cutter can be converted into a one-wheel or three-wheel cutter by substituting wheels for rolls or rolls for wheels. When making changes care must be taken to replace cotter pins which must always be in place to give proper service.



The Trimo Monkey Wrench is built for strength, especially adapted for heavy work and railroad use.

Trimont Mfg. Company

Roxbury (Boston) Mass, U.S.A.

NOTICE TO THE TRADE

FOR 6 MOS. MAY JUNE JULY AUG. SEPT. OCT.

You can make quick sales and big profits selling the

"COMFORT" IRON

Seasonable. Enables women to take their ironing anywhere. Two-pointed, self-heating, self-cleaning. Operates easily at low cost. Saves time, labor, money. Guaranteed. Get samples and see them sell.

Big Demand, Good Profit

We aid you with sales helps. Your jobber will supply you. Ask for the "COMFORT."

Made by

NATIONAL STAMPING & ELECTRIC WORKS

CHICAGO, U.S.A.

Increasing Canadian Representation in World's Markets Indicated by Increased Exports

Increase of Approximately $23,000,000 in Value of Canadian Exports for 1920 Over 1919—Exports to British Empire Heads List with United States Next; France, Greece, Belgium, Italy Next in Order—Formation of British Empire Steel Corporation Will Be Big Factor in Canadian Export Trade.

WHILE conditions in the home market make it difficult to secure the required production to justify an extensive export trade, yet it is evident that during the past year Canadian manufacturers have been taking advantage of the opening up of the world's channels of trade to place Canadian products on an equal footing with those of other countries, and conditions in the future should even strengthen the showing which Canada's products can make.

New Steel Corporation Will Boom Export Trade

There have been several developments of the past year which have a bearing on the future development of Canada's export trade. Unquestionably the chief significance of the merger of the Dominion Steel Corporation, the Nova Scotia Steel & Coal Co., the Canada Steamships Lines Ltd., and the various other companies involved in the formation of the new British Empire Steel Corporation, rests in the possibilities that are unfolded for the building

up of an immense export trade in coal, pig iron and steel billets.

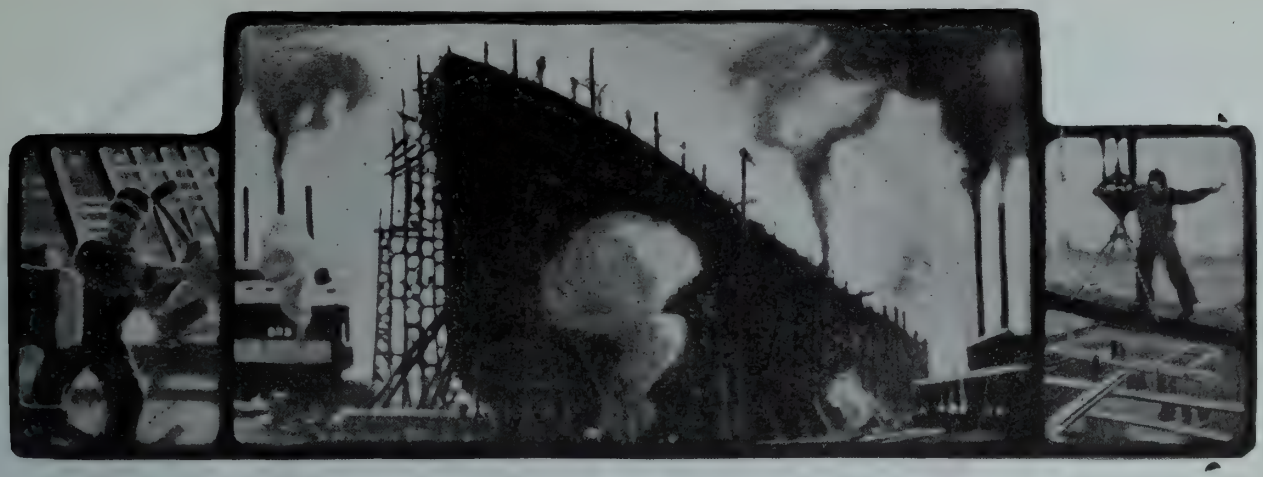
The known resources of the constituent companies in coal and iron ore and their close proximity to the seaboard, have all along been reckoned as advantages that would in time redound to their profit, but hitherto there have existed obstacles which have hindered their greatest possible development. Now, with the powerful combination of British and Canadian capital behind these industries, and the more efficient and economical operation which will be possible, their progress should be unhampered and continuous.

Nova Scotia Will See Great Development

The province of Nova Scotia, in which the principal constituent industries are located, is destined for great expansion as a result of the merger. Already a good start has been made, and the Atlantic seaboard province will feel the effects of the new development in increased population and greater all-round prosperity. For not only should existing industries expand, but a plentiful supply of fuel and raw materials should attract other industries as well.

Coal, Pig Iron and Steel Potentialities Equal Half the Value of Western Crop

Potentialities in the way of exports of coal, pig iron and steel are immense, and in some quarters have been estimated at half the value of the Western wheat crop. This will be practically new business for Canada, swelling the Dominion exports with amazing rapidity. But, in addition, the new Corporation will have the output of its shipyards, car shops and factories, which will be using the raw material of its steel works. So far as shipbuilding operations are concerned, there is every reason for prophesying great



developments. With plants at Halifax, Quebec, Kingston, Collingwood and Port Arthur, there will be a large capacity, which it is expected to operate to the full. Then, too, the inclusion of the Canada Steamships System takes care of one very important feature—the provision of water transportation.

Trade Figures Show Export Conditions

Indication of the increasing activity of Canadian manufacturers in going after export trade is found in the trade figures for the fiscal year ended May 31st, which have just recently been issued. Exports for the fiscal year ending May 31st, 1920, totalled $1,239,492,098 as compared with $1,216,443,806 in the same period ending May 1919, and $431,588,439 in 1914, prior to the war. It is evident from these figures that taking the war period out of consideration Canada has had a big increase in her export trade as compared with the pre-war period.

Lines Showing Increase

Lines showing increase in exports for 1920 as compared with 1919 include the following: tiles, brushes, coal, binder twine, flax, hemp and jute, gutta-percha other than for boots and shoes, agricultural implements, machinery, other iron and steel, oil cake, oils, rags and waste, automobiles, automobile parts.

Canada's export trade with the United Kingdom for the period ending May 31st, 1920, was $489,151,806. This was a slight falling off from the figure for 1919 but was quite an advance over the figure of $215,253,969 for 1914. Among the other colonies in the British Empire Newfoundland was the next largest importer of Canadian goods, our exports to that country totalling $16,175,443 for the 1920 period, being an increase of nearly five million dollars over 1919 and being four times the figure for 1914. Australia was the next largest importer of Canadian goods in the British Empire, the figure being $11,415,623 for 1920, being a little less than the 1919 period but nearly three times the exports for 1914. Other colonies in order are as follows:—British West Indies, $10,869,263; British South Africa, $8,649,756; New Zealand, $6,987,008. Including other parts the total exports to other parts of the British Empire totalled $561,787,159 as compared with $233,642,517 in 1914.

United States First Among Foreign Countries

Among foreign countries the United States stands first. Our exports to that country for the period ending May 31st, 1920, totalled $464,029,014 as compared with $454,873,170 for 1919 and $163,372,825 for 1914.

France stands next, our exports to that country totalling $61,106,938 for 1920 as compared with $3,632,444 for 1914. There was a slight falling off from exports for 1919. Greece was next with $29,588,984. Belgium next with $28,463,855. Italy with $16,961,312; Roumania, $12,953,605; Japan, $7,732,514; China, $6,659,802; Cuba, $6,329,783; Argentine Republic, $6,126,457; Netherlands, $5,653,218; Norway, $4,798,299; Denmark, $2,938,026; Brazil $2,703,488; Dutch East Indies $1,492,775; Russia, $1,492,041; Porto Rico, $1,489,667; Switzerland, $1,484,416; Spain, $1,096,053; Chile, $896,960; Uruguay, $689,538; Germany, $610,528; Mexico, $410,825; Venezuela, $404,007; Peru, $273,967; San Domingo, $169,186; Hawaii, $163,970; Columbia, $101,578; Austria-Hungary, $33,168.

GUARANTEED

On the Other Side of the Counter

Assume, for a moment, that you are a motorist—on the customer's side of the counter. You ask for a good radiator repairer. The dealer shows you one brand at $1.25 per can and another—at 75 cents. Which would **you** buy—the inexpensive brand being **guaranteed** to do as much and as good work as the larger and higher priced can? Why, you'd just naturally hand the dealer 75 cents, of course!

That's the SE-MENT-OL argument exactly! That's why thousands of dealers who used to carry several brands of radiator preparations now concentrate on the 75 cent can of

SE·MENT·OL
(LIQUID AND POWDER)

the **original,** self-acting radiator repairer.

One 75 cent can of SE-MENT-OL is enough for even the largest cooling system. This means a quicker turnover—more profit, with a smaller investment—and you give the motorist the best value for his money.

SE-MENT-OL is **guaranteed** to repair quickly and **permanently** cooling system leaks. SE-MENT-OL Liquid kept in the radiator will keep the cooling system leak-proof for the life of the car.

Better get acquainted with NORWESCO products —they are the best-selling chemical goods on the market.

BURLINGTON STEEL FENCE POSTS

Make Strong—Permanent—Economical—Fireproof Fences

Special Advantages

Durable
Fireproof
Convenient
Economical
Will not rot
Rust resisting
Will not break
Drive easily
Last a generation
Posts grounded—
Helps prevent loss from lightning

Our experience in manufacturing special steel bars for reinforcements has been of untold value in the making of steel fence posts.

These posts are made of the same high quality of steel as used for concrete reinforcement and for other purposes where strength and rigidity are absolutely necessary.

The Special "U" Shape

The "U" shape is exclusive with our posts. It allows the post to be driven easily and straight. It makes it anchor firmly and prevents sagging or bending. No sharp points—no special devices needed to hold it in the ground. Can be set in place in a fraction of the time required to set wooden posts.

The Clip Fastener

fastens the clips quicker than staples can be driven. Clips hold the fence tight. It cannot slip.

Export Orders

Burlington Steel Fence Posts are now being used extensively in foreign countries. We can make immediate shipment from stock.

Write for book on these posts, sample sections and prices. Your enquiry will receive prompt attention.

COMPODISK

BRASS VALVES

"With the Composition Disc"

Fig. 550-S

"Outside Bonnet Construction"

The first improvement made in brass valve construction in generations past

Government Approved for 175 lbs. Steam Pressure

What the outside bonnet construction means—

It prevents corrosion of threads. It prevents spreading or enlarging bonnet end of body when tightening down bonnet to place. It eliminates all strains or stripping of threads. It makes a more compact valve, consequently a stronger one. The discs used in these valves will give long life under severe conditions. Every valve is fitted with packing gland and follower. Workmanship and finish unequalled anywhere.

PENBERTHY VALVES and SPECIALTIES are distributed throughout all countries of the British Empire. We solicit correspondence from anyone interested in our products, to whom we will furnish on request a free copy of our General Catalogue.

BRASS GATE VALVES

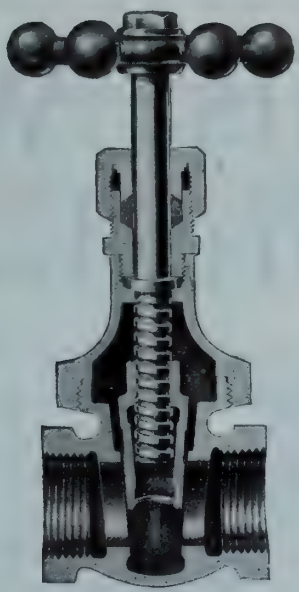

Fig. 567

"Outside Bonnet Construction"

Improved Design ***Improved Efficiency***

All Penberthy Gate Valves are designed with outside bonnet construction, same as our compodisk and regrinding lines of valves. It is the most practical and reliable idea of valve construction.

Penberthy Gates are made with solid wedge disc, which has proven much superior to the split or two-piece disc type.

Penberthy Gates are Government registered for 150 lbs. steam pressure.

Design, workmanship and finish unequalled anywhere. Be sure this name is on the valve you buy.

PENBERTHY VALVES and SPECIALTIES are distributed throughout all countries of the British Empire. We solicit correspondence from anyone interested in our products, to whom we will furnish on request a free copy of our General Catalogue.

JUST THE THING FOR CUTTING HAY

THE "LIGHTNING" HAY KNIFE

Manufactured by the successors to Hiram Holt, Patentee, and Original Manufacturer

Made of the finest hand forged tool steel, hardened and tempered like a scythe, serrated cutting edge, painted red with polished edges.

Stained hardwood handles, tangs extend through handles and riveted, brass ferrules. Made in two lengths, 36 and 39 inches.

The **"Lightning"** without doubt is the best hay knife on the market.

Round Trolley Hangers

1917 *and* 1918

NO. 1917 ROUND TROLLEY HANGER

(Shown below)

Made of best grade steel, wheels of deep drawing steel fitted with steel roller bearings, malleable loops and steel hasp. One pair in a carton with two end stops and bolts, full instructions to apply. Half or one dozen to case.

THE 1918 ROUND TROLLEY TRACK

Made of 14 gauge high carbon steel supplied in 3 ft. lengths only. Packed in 48 ft. and 60 ft. crates. Brackets fit perfectly. Brackets required every three feet.

1918 FLUSH DOOR HANGER

(Shown above)

This is the same hanger as 1917 with the exception of the steel hinged apron, which enables the door to be swung into the opening and fitted as tightly as any hinged door. This is a wind and storm-proof feature which should not be overlooked.

The Ideal Hanger for Saw Mill or Flour Mill use, where dusts of any kind are liable to corrode crevices (absolutely self-cleaning.)

Easy Operating - Weatherproof

The Round trolley hangers and track have jumped into popularity in the past few years very largely because of their excellent wind and storm proof features. The round track has no grooves to hold dirt or water, is self-draining and cleaning. There is absolutely no possibility of the hanger jumping the track, no binding, always runs smoothly.

Canadian weather conditions make this style of hanger and track a good one to push. Fit up a demonstrating door in some convenient place to show your customers.

Ask for our new Catalog showing complete line.

NOTE.--We can make immediate shipment of these two-style hangers and track.

Millions Have Bought It
—millions more need it!

Millions of SHALER 5-Minute Vulcanizers have been sold to motorists.

Millions of other motorists are being induced, through our large advertising campaign, to want the SHALER 5-Minute Vulcanizer.

The dealers who sell it make the profits.

Dealers predict larger sales of SHALER 5-Minute Vulcanizers for the future than during the past. Larger repeat-sales—and profits for dealers—must follow.

SHALER 5-MINUTE VULCANIZER

Every sale of a SHALER 5-Minute Vulcanizer is *not* one sale and one profit alone—it means that more sales will follow from the same customer, because he needs to buy the Patch-and-Heat Units regularly for use with the SHALER.

This repeat business comes to you—and brings you regular profits—in addition to your profits from selling the SHALER Vulcanizer—and without any effort on your part.

Get Your Share of This Big Business—Order from Your Jobber Today!

Keep a good stock of SHALER 5-Minute Vulcanizers and SHALER Patch-and-Heat Units. Display them prominently in your windows and on your counters, so that motorists know you sell them. Our advertising will bring customers to your store—the SHALER sells itself. Order from your jobber today or write us at once for full information and catalog of the complete SHALER Line.

The Most Popular Ratchet Combination

The "Keystone" **Reversible** Ratchet combination No. 200 has been proven by many hardware dealers to be the best seller in their localities. It consists of ratchet for taper shank drills, sleeve for square shank drills, and short boiler socket for square shank drills, sockets are interchangeable. All working parts are enclosed, preventing dust and grit from clogging up mechanism.

Sales of Keystone Ratchets open the way to sales of Keystone drilling posts—the time-saving brace. "Keystone" tools are known the world over for high quality. Sell them for profit and prestige.

Let us know if your jobber can't supply you.

It's the Adjustable Feature that Counts

The adjustable feature of the Empire Adjustable Aluminum level is important. It makes possible a tool that will work on both straight and pitched surfaces. Merely loosening two screws on each vial case makes it possible to adjust the glass as necessity demands. When the screws are tightened the cases are secure—cannot possibly be jarred loose. Another important feature is the fact that when a glass is broken the level need not be sent away for repairs. Just loosen the screws and insert a new vial case—it takes but a minute—and the level is again ready to use.

The Empire line includes adjustable aluminum and stationary aluminum levels, millwright's, carpenter's, brass-bound, black walnut, and various other types of levels in many sizes. Write for complete catalog.

Empire Level Manufacturing Co.
313 First Avenue, Milwaukee, Wis.

Canadian Office:
140 McGill Street,

The Empire Aluminum Hawk
is a decided improvement over the old type. Workmen who use them once will not be without them.

The Empire Aluminum Level is More Accurate, Lighter and Easier to Handle, and Lasts Much Longer than the Ordinary Level

If interested, tear out this page and keep with letters to be answered.

Safety, Protection, Dependability

The Three Big Iver Johnson Selling Arguments

THE safety feature is the big selling point of Iver Johnson revolvers. Every day, folks walk in to Iver Johnson dealers and ask for the "Hammer the Hammer" revolver—the one that can't go off accidentally. Such people realize the possible danger of ordinary revolvers and therefore insist on the Iver Johnson—the one they know is safe to keep in the home.

And so, while the Iver Johnson is essentially a man's revolver, its absolute safety from accidental discharge makes it the accepted and ever-present assurance of protection to the home, property, and personal safety of the American woman.

Another big selling feature is the fact that the Iver Johnson is dependable and always ready for use. Drawn-tempered piano wire springs keep it alive, alert, ready for use on an instant's notice. And the perfect rifling and true alignment of barrel and cylinder speed the bullet straight as a streak of light just where you aim.

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Why not carry Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

Write for catalog and complete dealer information on firearms, also on bicycles and motorcycles.

NIAGARA WROUGHT STEEL HARNESS SNAP

How to Test Advertising

THE man who doubts the power of advertising belongs in the same class with the man who refuses to believe that the world is round simply because he can't get off somewhere at a distance and see its roundness for himself.

The merchant who fears to attempt advertising because he figures it as an "expense" is blind to his own interests. I personally know several men who, because they once tried advertising to the extent of a cheaply printed hand-bill and didn't find it necessary next morning to call on the police to keep the crowds of eager buyers from swamping their store, loudly and solemnly aver that "advertising doesn't pay."

Advertising *does* pay.

The most successful merchants are the merchants who believe most thoroughly in advertising and who practice their belief.

But advertising, in order to pay, has got to be *intelligent* advertising.

The day of hashed-over superlatives—"best goods," "lowest prices," "best stock in town," "greatest bargains ever heard of," and so on—has passed.

People have learned to distinguish the *truthful* advertiser from the blatant behind-the-times storekeeper who believes that, so long as *he* claims to have the best goods on earth, or under the earth, or within wireless distance of the earth, people will break their necks trying to get to his counters in the forefront of the crowd.

Put some *brains* into your advertising.

Don't let the office boy write your announcements in between his other duties.

Don't doubt the business-getting and business-building power of intelligent and informative publicity—and you will find that advertising *does* pay.

—*Jerome P. Fleishman.*

Do Not Recommend The Patented

BANNER ASH SIFTERS

(Trade Mark Registered)

If you know of any more practical, any easier to operate, any more dust-proof or more satisfactory for household use.

The No. 1 Banner has two screens, the top screen is of half-inch mesh, the lower one-third mesh. This combination, together with the easy rocker or gravitation motion separates the good fuel rapidly. You thus gain time and save extra fuel by less effort. Besides, you have the choice of using the coarse, fine or both screens. Screens are easily renewed.

This is the only sifter with a closed scuttle. The lid is on hinges and all parts fit tight so that it is practically dust proof.

There are many more good features.

The No. 2 Banner is similar to the No. 1 with the exception of the double screens and scuttle.

The low price of the No. 2 Banner Ash Sifter has made it so popular that we have found it necessary to install special machinery to supply the demand.

What better way to sift ashes than by the easy rocker motion. It almost eliminates work.

We stand back of you in recommending either sifter.

It is advisable to place your orders well in advance. Ask your wholesale house or write to us for particulars, price, etc.

Significant Features

THE goods which are featured most in Canadian hardware window displays are goods which are advertised regularly in Hardware and Metal. We have proof of this.

The goods which are featured most in the advertisements of retailers in their local newspapers are goods which are advertised regularly in Hardware and Metal. We have proof of this.

Go into a list of hardware stores in any province in Canada and ask the proprietor, or any of the senior salesmen, to name six or more of the best known firms whose goods are sold through the Canadian hardware trade. They will invariably name firms whose advertisements have been appearing regularly for years in Hardware and Metal.

We have tried this experiment successfully in all parts of Canada.

Pick out a list of 100 hardware firms in any part of Canada. Ask them which paper they read for business information. We are always willing to let the hardware trade of Canada act as judges in a test of this kind. This test has been successfully tried out many times.

There is only one hardware paper in Canada that gives weekly market services from Montreal, Toronto, London, Winnipeg, Pittsburgh. There is only one hardware paper in Canada that has had its circulation audited by the Audit Bureau of Circulations. That paper is Hardware and Metal.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143-153 University Avenue **TORONTO, CANADA**

Montreal Branch, Southam Bldg. **Winnipeg Branch, Union Trust Bldg.**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

HARDWARE AND METAL

is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

There's a good amount of business in your town in Babbitt Metals that you could capture by stocking Owl Babbitt

You can measure 'most anything with Starrett Tools—except the satisfaction they give the men who buy them.

That's what counts in a sale—satisfaction. It brings buyers back to your store again and again, and changes "drop-ins" to steady customers.

For forty years, Starrett Tools have been giving a full measure of satisfaction. Machinists, toolmakers—every man who uses precision tools knows Starrett Tools and Starrett Hack Saws.

"The Tools Mechanics Buy" is full of good tips about winning friends through selling Starrett Tools, and it's snappy, interesting reading, besides. Write for free copies for yourself and your clerks.

They never get a chance to forget them, for Starrett national advertising is a constant reminder. That's why there is a steadily increasing demand for Starrett Tools and Hack Saws. The business of Starrett dealers is always growing, because the Starrett service brings buyers right to their stores.

PUBLICATION OFFICE : TORONTO, CANADA

AUGUST 7, 1920

How Would You Dress This $40,000 Window ?

THE United Cigar Stores Company is said to pay a yearly rental of $40,000 for a two-sided corner window in the Flatiron Building in New York City.

Astounding! You say. Yet we all know the United Cigar Company are a mighty progressive and keen business organization. They certainly would not pay such an enormous sum for a window if it did not return them actual profit, on the investment.

It hardly seems necessary to say that this window display is changed frequently and much attention and thought given to its arrangement.

You dealers may not have $40,000 rentals but the mere fact that store rentals are figured on a front foot basis shows how important the front show windows are.

Your windows may not cost you $40,000, but they are valuable. More than ten people pass your store to every one who enters. Attractive window displays not only bring more customers into your store but often decide a sale before they come in.

Much time, thought and expense are put into the O-Cedar posters, window cards, and signs that are offered to you to make your displays attractive, and we will gladly help you or give suggestions, if you desire, to make your O-Cedar display a real business getter.

Dealers find that a frequent O-Cedar window display serves to focus the attention of the buying public who have read of O-Cedar Merits in the papers and magazines; in which a steady and extensive advertising campaign appears.

O-Cedar Polish

Channell Chemical Co., Limited, Toronto

HARDWARE AND METAL, Aug. 7, 1920. Volume XXXII., No. 32. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

AUTUMN brings bushwork: wood cutting, chopping, splitting; brings "after dark" chores and the many duties around the farm and country home which call for the use of cross-cut saws, buck saws, axes, manure forks, lanterns, etc.

The "Rice Lewis" man can quote prices on a most complete line of such makes as:

Simonds', Shurly & Dietrich's, T. F. Shurly Co.'s, and "Our Jewel" Cross-cut Saws; Happy Medium, Happy Medium Lance, Strathcona or Prince Rupert Bucksaws; Welland Vale and Sager Axes; best makes in Manure Forks; E. T. Wright Co.'s Sheet Metal Products, and Ontario Lantern and Lamp Co.'s Lanterns; Eveready Flashlights, etc.

UNIVERSAL

The Trade Mark known in Every Home

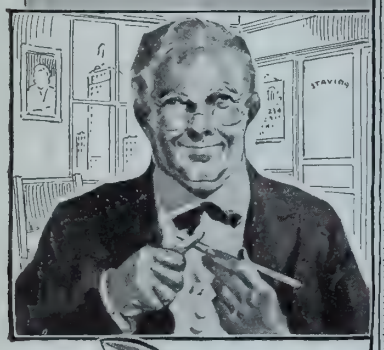
CUTLERY

Cuts A Big Figure In Getting And Holding Trade

When two boys swap knives "sight unseen" each hopes to get the better of the bargain. Neither is willing to subject his knife to scrutiny lest he be worsted in the deal.

There is no "sight unseen" element between the buyer and seller of Universal Cutlery. Neither has desire, nor is it possible to take advantage of the other. One has the goods—the other the money. It is an open visible exchange of **value** for **value.** One gets what he expects in quality the other what he is honestly entitled to in profit.

Cutlery that cuts a big figure in business is keen to please trade. "Universal" is that kind. It is the line for every person, purpose and purse.

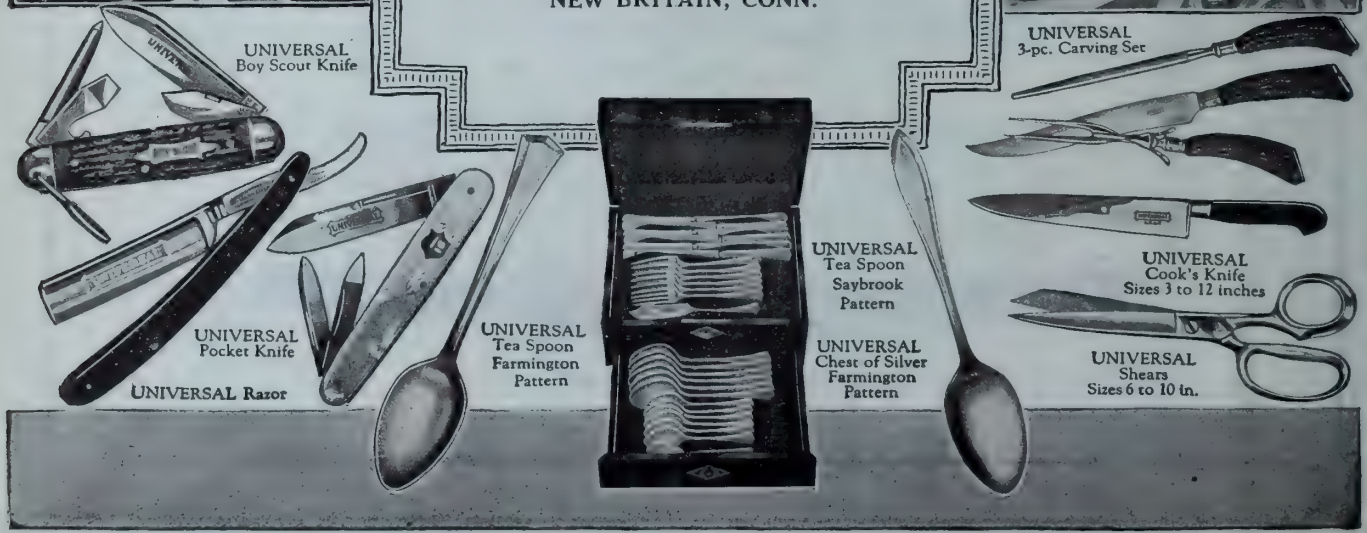


Canadian Representative :

Montreal **A. MACFARLANE & CO., LTD.** Quebec

LANDERS, FRARY & CLARK

NEW BRITAIN, CONN.



"Canada"

Flexible Steel Door Hanger

The real test of a hanger is performance "on the job." The "Canada" runs smoothly and easily on anti-friction, steel-roller bearings. It uses the same track as our famous "National" Hanger.

The Braced Rail, shown above at the left is 1¼ x 3-16 inches and is furnished in lengths of 4, 6, 8 and 10 feet; 8 lengths to the bundle.

The farmer was never more prosperous than to-day and probably was never more inclined to

build and repair and generally to improve his buildings than now. 1920 will see a particularly active season in this way. The hardware merchant may expect unusual sales of builders' and garage hardware this year. It brings new customers and nothing holds them like Canada Steel Goods Co. products.

The "Canada" comes neatly and conveniently packed, one pair in a box complete with bolts. Be sure to include "Canada" in your order.

Floor Dressing— Window Dressing

Floor dressing is equally as important to successful business as window dressing. Of what use is an attractive exterior when the interior is neglected? A good window display attracts customers to your store, but the clean merchandise, shelves, and display counters hold them. Dirt repels trade.

IMPERIAL

FLOOR DRESSING

(Standard)

(Formerly "Imperial Standard Floor Dressing.")

—eliminates—banishes—dispels—prevents dust. Dust cannot rise from floors treated with Imperial Floor Dressing. One gallon will treat upwards to 700 square feet of floor surface—one application preserves the floors for months.

Imperial Floor Dressing preserves the surface of wood, linoleum or oilcloth. It does not gum or evaporate, and it *prevents the dust from rising.*

Ask the Imperial Oil salesman.

WHEN LINCOLN FREED THE SLAVES

BOURNE SPOONER was an overseer in a rope walk in New Orleans, employing slave labor exclusively. He was a northern man, a strong opponent of slavery. He saw the economic inefficiency of unpaid labor. He believed that better rope, at less cost, could be made in the north by free men. So he resigned his position and in 1824 came back to New England to prove his contention, choosing Plymouth as the site for his new rope walk.

When in 1863 Abraham Lincoln signed the historic document that struck from over a million black men the shackles holding them in bondage, this company had proven over a period of 39 years that slavery was an economic waste.

The rope made at Plymouth was good rope — so good that the old rope walk has expanded until the buildings of the company now house the largest rope works in the world.

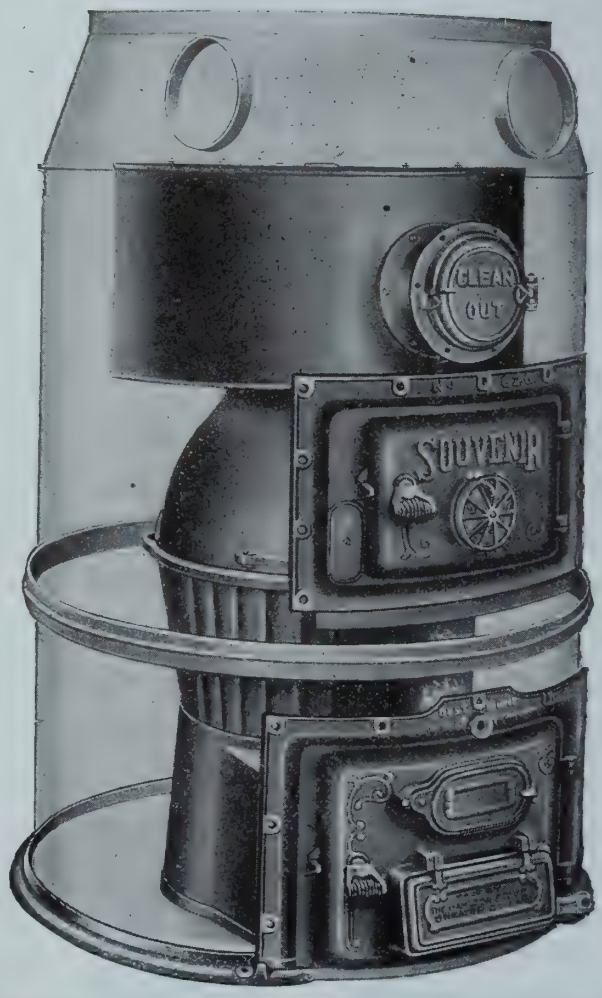
SOUVENIR
WARM AIR FURNACE

BURNS COAL OR WOOD — QUICK SELLER — GOOD PROFIT



This furnace is a wonder for the price. It is one of the biggest sellers in our shop. Made in small sizes which makes it particularly suitable for use in workingmen's houses.

Made with one piece, heavy corrugated firepot, and equipped with a Smythe Triangular Pattern grate, recognized as the best type of Triangular Bar Grate.

The Souvenir can be sold at a surprisingly low price and yet allow you a very liberal profit.

Would you care to have us mail our new Catalogue describing our complete line of Furnaces, Stoves, Ranges, and Builders' Hardware?

Stanley Tools

Made in Canada

The illustration above shows a line of Screw Drivers which should be in the store of every dealer who prides himself upon carrying a complete stock of tools.

It is an assortment of SPECIALS that will appeal to many of your customers.

For instance—No. 21, shown at the extreme right of the picture—blade only 1½ inches long, just fits the vest pocket, a strong little Driver and very handy.

Also No. 60—shown at the left—only 1⅝-inch blade, but with a big sure grip handle. For heavy work into close corners it cannot be beaten. Used by Plumbers, Machinists, Millwrights, etc.

Nos. 51, 52 and 53—Called MACHINISTS' DRIVERS—Big, broad tips for large screws and extra large shanks for heavy work.

Nos. 51½, 52½ and 53½ — also Machinists' Drivers, have hexagon nut on shank for use with a wrench.

No. 54—Note the DOUBLE GRIP, also the hexagon feature for wrench. With this latter Driver one can turn anything.

We make other drivers. See Catalogue.

The clerk makes a complete record at the time of the sale.

The record made at the time of the sale is placed in the credit file. No further recording or bookkeeping is necessary.

One writing completes the record of a charge sale

by the N. C. R. method of handling credit accounts

After the clerk makes the original record at the time of the sale, no further recording, posting, or bookkeeping is necessary until money is paid on the account.

And every account is always kept up to the minute—ready for instant settlement.

Thousands of merchants in all lines of business are now using this up-to-date N. C. R. Credit File.

They find that it is the safest, quickest, and most economical credit system they could use. It saves them time and money.

Fill out this coupon and mail it to-day

GOODELL-PRATT

1500 GOOD TOOLS

Ratchet Micrometer Caliper

Goodell-Pratt Ratchet Micrometers present a new form of construction that all users of these tools will appreciate.

The Ratchet Stop is operated by a large knurled ring, conveniently located where it can be readily operated by the same hand that holds the micrometer.

No. 2 R

This mechanism, by always applying an equal pressure, assures more uniform and accurate measurements.

A Speeder is provided for running the screw in and out. We guarantee the accuracy of these micrometers.

As for its material and manufacture—out of thousands supplied to the U.S. Navy, not one was rejected, and the Navy inspection tests are the severest in the world. Note especially that the lead screw is hardened tool steel and runs through a hardened bushing.

Mr. Punch Says:

The best of being a Toolsmith dealer is that you remain more than ever your own boss. It's just a better chance to prove what you can do in the way of display, local advertising and store salesmanship

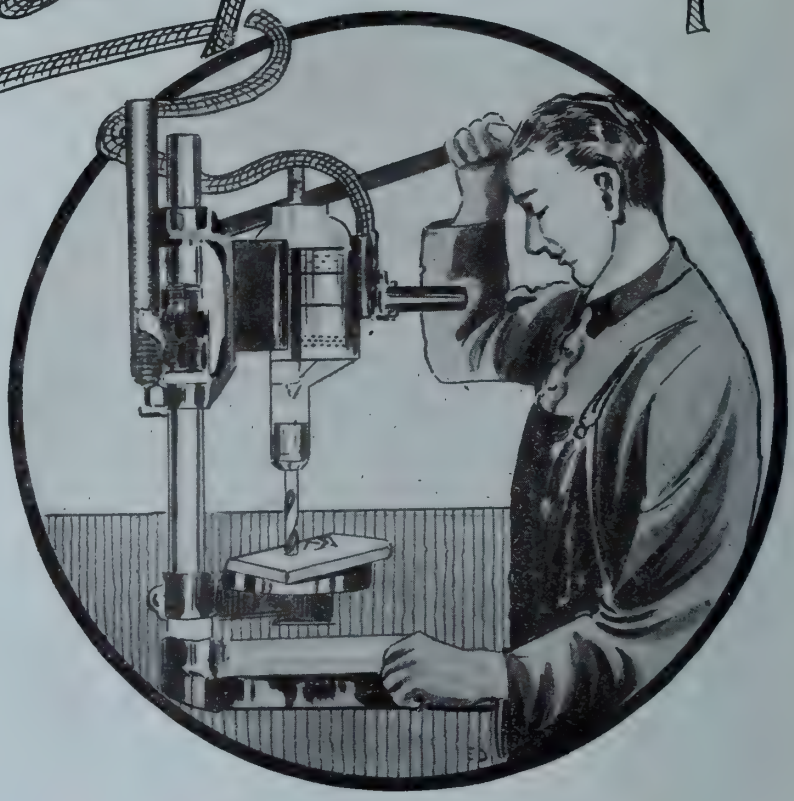
Butterfield



Another Name for

Accuracy, Speed

Dependability

Good Retail Sales

and Satisfied Customers

Butterfield Tools—high speed and carbon twist drills, milling- and gear-cutters, taps, dies and reamers—have so firmly established themselves in Canadian Industry that the name Butterfield is almost synonymous with accuracy, speed, dependability, and good work to the machinist, and of good sales and prosperity to the merchant.

Butterfield tools have many friends. They have been successful in the markets for about forty years. During that time efficient machinists have learned to feel a strong regard and esteem for Butterfield tools. Every machinist knows that Butterfield's increase production. Every "piece-worker" prefers Butterfield tools.

It is scarcely necessary to remind the Canadian hardware trade of the years of good sales and satisfied customers enjoyed by merchants with Butterfield Tools. That is well known in most hardware store tool departments.

Story for Week Dated August 7th, 1920. **Being No. 17 in the Series**

Indian Trapping Scene at Camp Where Eddy Match-Wood Is Cut

FUR-BEARING animals roam over the wide extent of the Eddy Company Timber Limits, and the Indians every season bring in their catch of furs to the Dumoine Depot. The scene is reminiscent of the early Hudson's Bay days, and is in itself a reminder that the Eddy Company ranks with Canada's pioneer organizations.

In the picture above the Indian Trappers are seen with their canoes laden with furs, arriving at the Dumoine Depot. In the background is a scow used for freighting supplies and equipment over the Lake in tow of the S.S. Alligator, as pictured in a previous illustration in this series.

Close to the scow, on the wharves, may be seen E. B. Eddy Company lumber piled ready for its journey down river to Hull to be converted into matches, paper, or indurated ware. When you see the sources of supply for Eddy Company raw materials, you realize that every splinter in an Eddy Co. match-stick, every fibre in an Eddy Co. paper bag or sheet of wrapping paper, every portion of an Eddy Co. indurated ware article is a little bit of Canada doing its little bit usefully in the development of Canadian Trade.

A tool is as good as its maker

WHETHER for the skilled mechanic, the master carpenter, or the every day job about the house, garage or barn, your tools are a gauge of your workmanship—your means of expressing your creative self.

This creative instinct that rules every man's heart is the guiding spirit of attainment in the Millers Falls factory. Here among New England's peaceful hills it has found full expression for over fifty years in the craftsmanship of skilled toolmakers. Here you may find father teaching son the lesson that painstaking care for details and respect for his work bring lasting rewards.

Ask your hardware dealer about Millers Falls Tools. Look at them. handle them,—bit braces, hand and breast drills, auger bits, automatic screw drivers, mitre boxes, hacksaw frames and others. They feel "right" in your hands—their perfect balance and fit tell you that they will be your reliable, lifelong friends.

In and out Screw Driver No 41 An efficient, rapid working, powerful household and workshop tool, for quickly driving or withdrawing screws by repeated forward thrusts of the handle.

MILLERS FALLS TOOLS

In New England's Peaceful Hills

This advertisement helps too. It appears in the Saturday Evening Post for July 24th.

MILLERS FALLS TOOLS

If interested tear out this page and place with letters to be answered.

He Saw This Millers Falls Ad.

in the Saturday Evening Post and so he stopped in at the leading hardware store in his neighborhood. That No. 41 Screwdriver would be just the thing to use around his motorboat.

But the salesman didn't let his interest stop there. A little questioning—and out came a No. 12 Millers Falls Breast Drill. The customer tested its balance, felt the free run of its gears, admired its fine finish. A word and a touch showed how the gears were shifted —and the sale was made.

Alert hardware dealers know that the "talking points" of Millers Falls Tools make it easy to hold the attention of the craftsman, be he amateur or professional. They tell us that every Millers Falls tool in service is a salesman for its fellows. Bits, braces, hand and breast drills, mitre-boxes—each through its performance speaks of the merits of the entire line.

YOUR BEST "BUY" is a customer's good-will

Unless he hands *that* over the counter when he pays his bill, it's better not to make the sale.

You buy good-will and gain a friend whenever you sell a Starrett Tool. That accounts for the constantly-growing business of Starrett dealers. Forty years of use have taught mechanics to rely absolutely on Starrett Tools, and they have the same confidence in the dealers who sell them.

Make the most of the new business created by Starrett national advertising, by supplying the steadily increasing demand for Starrett Tools and Starrett Hack Saws.

DISSTON LEVELS

Disston Levels are made from specially treated hardwood stock—wood that has been scientifically cured in the Disston plant, so treated as to allow the least possible warp. It is admitted that Disston Levels cause less trouble from warping than any others.

The House of Disston has developed the most perfect level adjustment on the market. The turning of two small screws enables anyone to true up the bubble. This is a most simple arrangement to offset the almost inevitable slight variation due to heat, cold, dampness, etc.

Disston Levels are made as carefully and as expertly as Disston Saws, and are guaranteed right as are all Disston Brand products.

"STERLING" Dairy Pails

We should be glad to supply in addition to our general catalogue, information on Ranges, Stoves, Enamelled Signs, Tinner's Trimmings, etc., etc.

With body of the finest, quality XXXX tin strongly wired, the ears are made of extra heavy steel tinned, and are reinforced on the inside to the body by a steel band.
Another feature that gives great satisfaction is the outside soldering around the wires and ears —this leaves no crevices for milk to lodge and decay, and, therefore, ensures a more sanitary pail.

Davidson's pails are strong, sensible and durable.

Makes Most of Trade Opportunities

Novel Features of Summer Resort, Household Goods and Paint Trade as Adopted by Robert Hawkins, Smiths Falls, Ontario—Opposes Taxation Plan as a Factor in Increasing Prejudice Against Retailer—Arguments Which Have Proved Effective in Developing Paint Business

Mr. Hawkins believes that the plan of taxation imposed by the Government, namely, the collection of luxury taxes through the retail trade, is making a prejudice against the retailer who is called upon to bear the brunt of facing the customer, do the collecting gratuitously and make the returns, while the only thanks he gets is to be compelled to absorb the tax himself in some cases.

"Why should we be tax collectors for a Government that immediately uses the money to justify itself in voting the members an increased sessional indemnity while our time is required without remuneration?" asks Mr. Hawkins.

MAKING the most of one's opportunities is a very important factor in modern merchandising, and its full effectiveness is realized by Robert Hawkins, hardware, of Smiths Falls, Ont. There are many distinctive features of trade to be found in Smiths Falls and district, though perhaps these are no greater than exist in any other centre, but the important thing is to take advantage of them and make the most out of their possibilities.

There are months in mid-summer which are looked upon as being dull by many in the trade. Customers are away on holidays and others are not desirous at that time of year of doing any little fixing up that may be necessary around the house. But did it ever occur to the merchant that he might possibly follow his customers to their summer resort and get as much of their business as possible while away? A great deal of supplies used for fitting up the summer cottages and for the comfort of those on holidays during the summer are sold through the hardware store, but generally this business goes to the general store or to any other type of merchant who is nearby and who can supply such requirements. Not so with Robert Hawkins. In this case his local business has firmly established itself in the hearts and minds of many of the town's oldest inhabitants. His reputation is good and because he has told his customers that he wants their business when they go to summer resorts, he gets it, or the most of it.

A chain of beautiful lakes extends practically all the way from Smiths Falls to Kingston and these are dotted with islands, on the most of which are to be found cottages owned by people from the cities and towns nearby and some owned by people from centres farther afield, some from the United States. A supply boat is the recognized means of communication between the cottages and the source of supplies and on practically every trip it carries its capacity of all the various lines required by summer cottagers.

Boat Officials Bring Orders to Town

Orders are either mailed or brought to town personally by the officials of the boat and a very quick service is given in shipping out the required supplies. Not only do Mr. Hawkins' town customers send him orders, but very often someone occupying the next cottage to them wants something and it only requires a word of recommendation to send another order on the way. Oil stoves, refrigerators, camp cots, chairs, flashlights, oilcloths, floor mats, fishing tackle and other sporting goods are among the chief lines which are ordered in this way. It is significant that when the cottagers return to town for the winter Mr. Hawkins finds he has not only strengthened his hold on regular customers, but has added new ones, who have called upon him for requirements while away at the summer cottages and have been pleased with the service given.

Fishing is a very popular pastime and sport among the men of Smiths Falls and district nearby. Numerous lakes well supplied with fish and attractive haunts in abundance are factors which make for much interest in fishing. For this reason it is well to keep a window display of fishing tackle always on view. This plan is followed in the Hawkins store, and the clerks talk fishing to customers at every opportunity.

Salesgirl Sells Wallpaper, Kitchen Utensils, Etc.

In the sale of wallpaper, kitchen utensils and other home requirements in which women do the majority of the shopping, Mr. Hawkins has adopted a novel plan with splendid results. The innovation is to engage a salesgirl to look after this branch of the business.

"A girl has more patience with women than has the average male clerk and besides a girl knows more what is wanted in the home and the various uses to which certain utensils can be put," said Mr. Hawkins to Hardware and Metal, pointing out that his women customers like the service, and it tends to discourage the idea that the hardware store is only a place for men to shop. Women's trade is highly valued in the Hawkins' store and every effort is made to give courteous treament and good service to women shoppers. In addition to being able to make more effective suggestions as to the use of certain articles a girl generally has better taste in the selection of articles suitable for various purposes. Hence in the wallpaper department the salesgirl is especially valuable. Here she may exercise her taste and sales ability to the greatest extent. Wallpaper should be sold on a larger scale through the hardware trade than it is, and probably placing a girl in charge of a well arranged department with a complete stock on hand would do much to bring this trade

to many stores which do not now boast of business in wallpaper.

Girl is Also Bookkeeper

The question may be asked, "How does Mr. Hawkins make it pay to employ a girl to sell only household goods such as kitchen utensils, wallpaper etc.?" The girl also acts as cashier and bookkeeper, therefore her whole time is well taken up and yet the whole expense of her salary does not fall upon the sales she makes. In passing it may be noted that the young lady in this particular case is very well pleased with the arrangement for it gives her an opportunity of exercising some initiative and showing her ability to sell, thereby making her a more valuable member of the staff. Such a girl can greatly increase her income besides being a valuable addition to the store's selling staff.

Develops Big Trade in Aluminum Ware

A considerable trade in high class kitchen utensils has been developed in the Hawkins store within a few months.

A substantial business with cottagers at the summer resorts of the Rideau Lakes district is done by Robert Hawkins hardware store, Smith's Falls, Ont. Mr. Hawkins has a good reputation among many Smiths Falls families who spend the summer among these lakes, and they do much, unconsciously, to extend his summer resort trade by advising other cottagers where they may secure their oil stoves, camp chairs, camp beds, sporting goods, etc. These pictures show scenes on the Rideau Lakes. The supply boat which brings many orders to Smiths Falls dealers can be seen in one picture and in the other a boat landing supplies at one of the resorts may be seen. This is an important factor in the summer trade of Smiths Falls merchants.

It was last Christmas that Mr. Hawkins first decided to try out his trade on aluminum cooking utensils, his idea being that the line would possibly sell well just prior to Christmas for presents, but he had misgivings as to the possibility of a continued sale for high-priced utensils where only a medium-priced line of enamelware had formerly been sold. He therefore put in a window of aluminumware just before Christmas and backed this up with a display on a rack in the store near the door. The big trade in this line at Christmas developed as he expected but it did not fall off afterward and by constantly pushing this line he has built up a substantial, permanent trade.

"My customers formerly thought tinware and enamelware were good enough but now they see the advantage of stocking their kitchen with a complete line of higher class utensils," said Mr. Hawkins.

The windows were used in connection with a recent sale of aluminum preserving kettles and the results were forthcoming in volume.

Some Good Arguments for Paint Selling

Paint is an active line in the Hawkins store and Mr. Hawkins is a firm believer in stocking one good substantial brand of paint and pushing it to the utmost. During the war paint business was not as active as now, but at the conclusion of the war, realizing the possibilities that lay before, Mr. Hawkins moved the paint department from the rear to the front of the store. Now it occupies a dominating place on the store shelves immediately on the left of the store on entering. The stock is kept complete and well arranged at all times and there is plenty of light at the front of the store to enable customers to look over the color cards and see what they are getting.

INCREASING OUTPUT OF FORDS

The Ford Motor Co. is notifying the steel mills that it is planning a production of 4,000 cars per day, starting with its manufacturing year, Aug. 1, and the latter are asked to increase their allotments of steel accordingly. This plant has been on a daily basis of 3,000 to 3,500 cars recently.

Gets One Person on Street to Paint-Up

Mr. Hawkins is a student of psychology, judging by the way he guides the destinies of his paint department.

"I always try to get at least one person on a street to paint his house because then the others look shabby in comparison, even if they have had a coat of paint in recent seasons, and then I get business from other tenants on the same street," said Mr. Hawkins to Hardware and Metal. Painting is contagious to a great extent and the dealer can devise many means of starting the ball rolling.

In handling his paint department Mr. Hawkins has made full use of the argument that property has increased in value to such a great extent during the past few years that it is therefore entitled to more protection. This argument is made even stronger when it is kept in mind that during the war property that was increasing in value was being sadly neglected year after year, to an even greater extent than in normal times. This has produced an opportunity for the use of paint which more than overcomes any deficiency caused by the recent stagnation of the building industry.

Store Clerk is Constant Demonstrator of Finishes

During the past few months Mr. Hawkins reports a splendid demand for all exterior and interior finishes. Demonstrations are arranged periodically and these have been followed by considerable business in indoor finishes principally. Mr. Hawkins has a boy in the store who received some instruction from the demonstrators of some woodwork finish for interior use, and the boy has become quite expert in the work. Thus Mr. Hawkins has a competent demonstrator always on hand

A section of Robert Hawkins' store, Smith's Falls, Ont., showing the complete and well-arranged paint stock. Mr. Hawkins finds it pays to have the paint department right up at the front of the store where there is plenty of light and where it receives much attention from customers waiting to place their order. Aluminum kitchenware has also been a good line in this store during the past year and it will be noted that Mr. Hawkins is keeping interest alive by having a special rack devoted to aluminum ware right at the front door. Another batch of aluminum goods is arranged on the top of another display cabinet, the lower shelves of which are used for paint.

now and the service is much appreciated by customers.

The paint stock is arranged on wall shelves and a floor table with many shelves is also used to supplement the wall fixture. The floor fixture is placed so as to face customers entering the store and if they are compelled to wait their turn, their attention is generally attracted for a few moments to the complete paint stock on the shelves and the color cards. Any special lines being pushed are generally arranged on the top of the floor fixture, the lower shelves of which are devoted to paint stocks.

Sells as Many Bicycles as Any Dealer in Town

In bicycles and bicycle accessories Mr. Hawkins claims to sell as much stock as any other dealer in the town without exception. This is a good record for a hardware store. Mr. Hawkins has the agency for a well-known line of bicycles and he gives good prominence to them in season. The windows are generally devoted to a display of bicycles and accessories just before the spring fishing season opens. After the initial season is over they are removed to a position of secondary importance in the store display but are kept well before the customers throughout the summer months.

Peak in Sheffield Iron Prices Reached

The conditions in the steel trade at Sheffield are not so favorable as they were some months ago. Offers in England and on the Continent of large tonnage of semisteel bars and plates from the United States at prices below British quotations has had a depressing effect. It is reported that a good quantity of orders has been given to the United States manufacturers. This competition and some cancellations of foreign orders have weakened somewhat the position of British makers. It is said the premiums on basis prices asked here have been modified. The tendency of costs is, however, in an upward direction. In finished steel there is a decrease in inquiries and new business, and while makers have sufficient orders to keep them busy for the remainder of the year the prospects for the new year are not bright.

There is a great scarcity of all descriptions of pig iron. West coast hematite costs about £16 (77.86 at normal exchange) per ton delivered to local stations. Foundry iron is about £13 10s. ($65.70) per ton and in extreme cases £14 ($68.13). Makers of finished iron can dispose of their output as fast as they can make deliveries. It is reported that several iron and steel contracts have been accepted without the clause which protects the seller against increased costs. This would indicate that the apex of prices has been reached.

GAS MADE FROM OIL IS EXEMPT FROM TAXATION

Through the dropping of a word in the statement showing the application of taxes to the hardware trade, which appeared in a recent issue of Hardware and Metal, it made a sentence read as though oil for illuminating or heating purposes was exempt from taxes. The correct interpretation of the resolution is that gas manufactured from coal, calcium carbide, or oil, for illuminating or heating purposes, is exempt. This means the gas is exempt, not the oil, as it would appear at first glance.

Toronto Hardware Merchants' Picnic

Large Representation of Retailers, Travelers, etc., at 5th Annual Picnic at Long Branch Park—Much Interest and Splendid Prizes for Long List of Events—Plan Monster Celebration of Wholesalers and Retailers for Next Year

EVERY year there is a larger representation of all branches of the trade at the Toronto Hardware Merchants and Travellers picnics. This year's event was held on July 28 to Long Branch Park and this pretty spot on Lake Ontario proved to be an ideal one for the celebration. The crowd first started to come to Sunnyside about 2 p.m. and from then until shortly after 3 o'clock there was a constant stream of merchants, travellers, representatives of local wholesales with their wives and families and friends, and others. A special radial car left Sunnyside at 2 p.m. which took the majority of the crowd to the grounds though there were also a great many automobiles, estimated by one who attended at from 50 to 60 cars, to take picnickers to the grounds.

It is estimated that the attendance numbered as high as 300 when everyone was on hand. The usual round of events were carded including a number of children's races which were closely contested and for which a number of very fine prizes were offered. The sports programme was carried out under the guidance of N. Baden and R. Blackwell as starters, and B. Cotton, K. Brandon, and A. Laake, as judges. The events were as follows:

Girls' race, 6 years and under, 25 yards; boys' race, 6 years and under, 25 yards; girls' race, 7 to 10 years, 25 yards; boys' race, 7 to 10 years, 25 yards; girls' race, 11 to 15 years, 50 yards; boys' race, 11 to 15 years, 50 yards; balloon race, ladies, 50 yards; hardware clerks' race, 100 yards; single ladies' race, 75 yards; backward race, (men) 50 yards; married ladies' race, 50 yards; travellers' race, 100 yards; boot and shoe race; hardware merchants' race; hardware merchants' and travellers' (over 50) race, 75 yards; married couples' race; pipe race; wheelbarrow race.

Ninety Prizes in Drawing Contest

A drawing contest was another feature of the afternoon's program, tickets for which were sold at a price of 25 cents each. Nearly everyone entered this contest and a total of ninety prizes were drawn. These included such articles as safety razors, aluminumware, baseballs, baseball gloves, tennis raquets, hammers, etc., all of which were very useful.

During the progress of these events the small folk were well looked after and kept supplied with ice cream cones. John Caslor thinks it is a heavy job and

an expensive one to keep the children supplied with ice cream. No doubt such indulgence was not in vogue in his younger days though he still seems capable of looking out for his share as well as a number of the other adult members of the hardware trade who were present.

Ball Game Between East and West

After the races had been run off and prizes donated a ball game was commenced, the contestants representing the East End and West End dealers respectively. J. Vernon was manager of the East End team and J. Booth managed the West End aggregation. A keenly contested game took place but the teams lacked practice and failed to come through with an extra innings no-hit game such as had been talked of. The result was that toward the end interest seemed to lag and so far we have been unable to find out who really won the game or whether it ever finished.

Fine Supper Provided by Women Folk

Another picnic was on the grounds at the time, which resulted in a little overcrowding of the park, but taken as a whole the outing was well arranged and thoroughly enjoyed by everyone. Plenty of eatables were on hand, thanks to the generosity of the women-folk who brought the baskets, and these were supplemented with four hundred sandwiches purchased by the committee in addition to ten gallons of ice cream. The fact that there was no speech-making seemed to many who attended to be an added attraction to the supper. Dancing was held in the pavilion from 8.30 in the evening until the last car left at 10 p.m..

It is doubtful if at any previous picnic there has been anywhere as large a representation of hardware retailers. They were greatly in the preponderance at this year's celebration and the whole spirit of the gathering was that something on even a much larger scale should be attempted in future. Some are of the opinion that the wholesales and retail stores should combine each year in one monster picnic which would attract anywhere up to 3,000 representatives of these branches of trade. Such a plan is to be figured on for next year. Among the hardware dealers who attended this year were a good representation from Danforth Avenue, Queen St., East, and the Junction.

The committee responsible for the success of the outing consisted of J. C. McFadden, chairman; O. F. Morrison, secretary; John Caslor, treasurer, with the help of R. Jackson, W. Platt, W. Cotton and J. Buscombe.

Contributors of prizes for the various events on the program included the following:

Kennedy Hardware Co., Ltd.; E. T. Wright & Co.; Nerlich & Co.; Auto-Strop Razor Co.; Rice, Lewis & Son, Ltd., The Boeckh Co., Ltd., W. S. Hall & Co.; Dunlop Tire & Rubber Goods Co.; Canadian Oil Company; Imperial Varnish & Color Co.; Canadian National Carbon Co., Ltd.; Imperial Oil Co.; Sherwin-Williams Paint Co., Ltd.; McClary Mfg. Co., Ltd.; Dominion Batrery Co., Ltd.; Kasement Skrene Dore Co.; Burrows Mfg. Co.; Glidden Varnish Co.; Meakins & Co.; Henry Disston & Sons; A. Ramsay & Son Co.; Northern Aluminum Co.; Channell Chemical Co.; Sanderson Pearcy & Co.; Lowe Bros., Ltd.; McFarlane Ladder Works; Gillette Safety Razor Co.; Gurney Foundry Co., Ltd.; Goodyear Tire Co.; Bird & Son; Cooke & Boulton; Gutta Percha & Rubber Co.; Soren Bros.; James Smart Mfg. Co.; H. D. Howland Sons & Co.; Benjamin Moore & Co.; Lyons & Marks; Hobbs Mfg. Co; Sheet Metal Products Co.; Majestic Heater Co.; Thos. Davidson Mfg. Co.; Pilkington Bros., Ltd.; Toronto Plate Glass Co.; Wood, Alexander & James; Consolidated Plate Glass Co.; Taylor, Forbes Co., Ltd.; Canadian Fairbanks-Morse Co.; Dominion Rubber System.

Plenty of Fun at London Hardware Picnic

Again Fortunate in Having Ideal Weather for 5th Annual Picnic —Big Card of Events Produces Much Mirth and Many Close Finishes—Five Hundred People on Special Train to Port Stanley

(Staff Correspondent Hardware & Metal)

LONDON, Ont.—Not in years has such a successful and enjoyable outing been held on Invererie Heights at Port Stanley as the fifth annual picnic of the London Retail Hardware Dealers' Association. Everything went smoothly and the schedule was carried out to a dot. The London hardware men arranged to close their stores at 11 o'clock and shortly after noon with their wives and families' and a number of hardware men from the surrounding district who were invited for the big outing, got started. There were by actual count almost 500 people on the special train that had been chartered by the committee. Just what a cargo of good eatables was taken along may be gathered from the fact that one car was loaded so that it got a hot box when near Port Stanley and delayed things for ten minutes.

The Only Mishap

However this proved to be the only mishap of any kind during the whole day. On arriving at Port the picnickers at once took posesssion of Invererie Heights, overlooking Lake Erie, simply an ideal spot for an outing. It might be mentioned here that the committee which takes charge of arrangements for the hardware merchants' annual outings are regarded by other merchants as wizards. Not in five years have they hit upon a rainy day and this year was no exception. President Tom Jones absolutely refuses to tell how it is done or how an inside pull is obtained with the weatherman and his finest sunshiny day secured for the hardware merchants' outing.

Everybody Happy

The program was splendidly varied. There was something for everybody. Not only that, there was something for everybody every minute and the entire crowd was kept on its toes watching the events and cheering the contestants.

One of the best events on the whole program was the blind pig race. The contestants were required to run with a paper bag fastened over their heads, a young woman guiding the way by ropes fastened to the leaders' arms. There were contestants galore and the race produced roars of laughter. Many of those in the race lost all sense of direction and, imagining they were headed the right way, dashed off at full speed, only to find that they had charged into the crowd, where they ran amuck and got so excited that all efforts of the young women guides to get them started in the right direction failed. This race was won by Mr. and Mrs. C. Arnold with R. Craig and Miss M. Carrothers second.

Won Second Time

Another event that aroused much interest was the bowling tournament. For the second season the cup was won by the team from the Purdom Hardware Co., their bowlers making some shots that would have made some of the professionals on the best greens in the country envious.

The three-legged race was another event where unexpected speed was shown and the usual spills conspicuous by their absence. E. Russell and Charlie Craig captured first prize, with Howard Crummer and C. McKerlie close seconds.

Just to show that he is in prime condition, and not winded by one race, C. McKerlie also went into the proprietors' race. This event might reasonably be expected to be a "slow" affair. It was by no means slow and the winners finishing in the following order with only inches separating them

EDITORIAL COMMENT

GERMANS PROSECUTED FOR FORGING "GILLETTE" NAME ON RAZOR BLADES

FOLLOWING out the statement made in July 31 issue of Hardware and Metal to the effect that German manufacturers of cutlery lines were misrepresenting their goods by marking them "Made in America" or "Made in England," according as it best served their purpose, a report is outlined in the "Ironmonger" concerning the prosecution in a Glasgow court of Gerber Bros. & Co., of Glasgow, charged with having sold to the firm of Carson & Co. five gross of razor blades to which the forged trademark "Gillette" and the false trade inscription "Gillette" were applied, contrary to the Merchandise Marks Act.

Detective Lieutenant Forbes, of the Glasgow Police, stated that on March 22 he visited the premises of Gerber Bros. and received from them a duplicate of a letter which they had sent to Gillette Safety Razor (Limited), inquiring as to whether the razor blades in question were of their manufacture. It was explained to witness that the blades were purchased by an agent of Gerber Bros. from a German firm in Germany.
